

## About the American College of Clinical Pharmacy

The American College of Clinical Pharmacy (ACCP) is a professional and scientific society that provides leadership, education, advocacy, and resources enabling clinical pharmacists to achieve excellence in practice and research. ACCP exists to advance human health and quality of life by helping pharmacists expand the frontiers of their practice and research. ACCP's membership is composed of practitioners, scientists, educators, administrators, students, residents, fellows, and others committed to excellence in clinical pharmacy and patient pharmacotherapy.

### Annual dues for ACCP membership are:

|                            |          |
|----------------------------|----------|
| Full Member                | \$215.00 |
| Associate Member           | \$215.00 |
| Associate Member, Fellow   | \$75.00  |
| Associate Member, Resident | \$75.00  |
| Associate Member, Student  | \$35.00  |
| Affiliate Member           | \$215.00 |

For more information on the benefits of membership in ACCP, please see details on page 38.

### About the ACCP 2008/2009 Publications Catalog

The *ACCP 2008/2009 Publications Catalog* presents the extensive array of publications and other educational resources available from ACCP. The catalog includes ACCP offerings in the areas of Therapeutics, Research and Outcomes Assessment, Teaching and Learning, Practice Development, and Leadership and Administration. Many resources are available online for your convenience; some offer continuing pharmacy education credit.

ACCP members receive the discounted member price on the purchase of publications. If you are not an ACCP member, complete the membership application on pages 42 and 43 and enclose it with your order to receive the discounted price. To order ACCP publications, use the order form on page 44. You also may order online at the ACCP Bookstore, [www.accp.com/bookstore.php](http://www.accp.com/bookstore.php). To purchase by telephone, call ACCP headquarters at (913) 492-3311 or fax your order to (913) 492-0088. Quantity discounts are available.

### Satisfaction Guarantee

If you are dissatisfied with your order for any reason, you may return all materials to ACCP within 30 days, and we will refund the purchase price or credit your credit card.

Please contact ACCP to obtain a return authorization. All returned items must be in good condition and acceptable for resale.

Customers are responsible for shipping charges for items returned to ACCP.

All prices supersede previous pricing. Prices and sales tax in this catalog are subject to change.

The American College of Clinical Pharmacy is accredited by the Accreditation Council for Pharmacy Education (ACPE) as a provider of continuing pharmacy education. ACCP's continuing education programs, identified by the ACPE logo, are available for credit in all 50 states of the United States.

## Pharmacotherapy Self-Assessment Program, Sixth Edition (PSAP-VI)

An ACCP Publication Series

PSAP-VI is a cutting-edge resource designed to give the reader a thorough understanding of recent advances in pharmacotherapy. Each book in this 11-book series provides information that can be applied immediately in the provision of quality patient care to improve patient outcomes. Emphasis is placed on integrating new drug therapy knowledge in professional practice. The program is designed as a self-assessment tool to assist pharmacists in sharpening their clinical knowledge and skills. PSAP-VI is a ready reference tool for individual pharmacists and a source of exceptional therapeutic content for staff development.

### Features New to This Edition

New with the PSAP-VI edition are the following:

- All testing is done online.
- Answer books are supplied as portable document format (pdf) files.
- Chapters are shorter and more concise.
- Annotated bibliographies are expanded.

PSAP subscribers now submit all tests through a Web-based testing program. Although subscribers can choose to receive books in either the print or online versions, the corresponding answer books are available only in an electronic format. Based on subscriber feedback, PSAP chapters are shorter and designed to concentrate on information released in the past 3 to 5 years. Also, the number of annotated bibliographic references has been expanded because subscribers indicated that this documentation is valuable in their practices.

### Valuable Features That Reinforce Learning

Each book in the PSAP-VI series is organized into one or more modules. Every module presents the most current information relevant to that therapeutic area. Within each module, review-style chapters offer a variety of features to reinforce learning, including:

- Learning objectives
- Annotated references to additional resources for further study
- Self-assessment questions in case-study format, with answer choices designed to improve participants' decision-making and clinical management skills
- Online answer book with detailed explanations and rationale for each self-assessment question. Each answer includes two or more references that provide additional information on the subject covered.

### PSAP-VI Schedule

The modules in this PSAP edition will cover 15 therapeutic areas on completion of the 11-book series. Each book's topic, scheduled release dates, continuing pharmacy education contact hours, and expiration dates appear on page 5. Visit the ACCP Web site at [www.accp.com/p6\\_se.php](http://www.accp.com/p6_se.php) for more information on the content of each book as it becomes available.

| Pricing                                | Member   | Nonmember |
|--|----------|-----------|
| PSAP-VI Print (11 books)*              | \$375.00 | \$545.00  |
| PSAP-VI Online (11 books)              | \$330.00 | \$490.00  |
| PSAP-VI Print and Online (11 books)    | \$545.00 | \$705.00  |

| PSAP-VI Print and Online (single book) | \$85.00  | \$105.00  |

\*ISBN-13: 978-1-932658-30-9; ISBN-10: 1-932658-30-0; softbound

## Continuing Pharmacy Education Credit

The American College of Clinical Pharmacy is accredited by the Accreditation Council for Pharmacy Education (ACPE) as a provider of continuing pharmacy education. Continuing pharmacy education credit for each PSAP-VI book is available for 3 years from the date of its release.

To receive continuing pharmacy education credit for a PSAP-VI test, a post test must be submitted online for scoring. Continuing pharmacy education credit will be awarded for test scores of 50 percent or higher. The answers to each continuing education (CE) post test will be made available electronically to participants after they successfully complete the CE post test. If you submit a PSAP-VI CE post test, information will also be included with your statement of CE credit, describing how to receive your answers in electronic format. Statements of CE credit will be processed and mailed within 10 business days of receiving an ACPE test (see below for processing times for BCPS tests). The exception to this 10-day processing is the 3-month period after a book is released. Statements of credit (ACPE) will be mailed after the BCPS tests are processed.

To receive the explained answers to the PSAP-VI questions without submitting a CE test, fill out the online waiver form for each module you do not want to complete. By completing the form, you waive the opportunity to receive CE credit for any module for which you request to receive answers. Once you submit a waiver, you will be redirected to a pdf that contains the answers to the post test module that you waived. Waiver statements will be processed and mailed within 10 business days of receiving a waiver form.

For complete program information—including program goals, target audience for the series, and requirements to successfully complete the modules and receive continuing pharmacy education credit—visit the PSAP-VI page on the ACCP Web site at [www.accp.com/p6\\_se.php](http://www.accp.com/p6_se.php).

### BCPS Recertification

Subscribers submitting a PSAP-VI post test for BCPS recertification credit have a narrow window of opportunity (the 3-month period before the release of the answer book) to use each module for recertification. The due date to submit online tests for BCPS CE credit is listed on the opening page of each print and online book.

Tests submitted for BCPS recertification credit will be processed and results will be mailed within 60 days of the published due date. Only completed tests are eligible for credit; no partial or incomplete tests will be processed. The passing point for BCPS recertification is based on a statistical analysis of the examination scores received for each module. If you receive a passing score, that information will be forwarded to BPS, and a statement of continuing pharmacy education/BCPS recertification credit will be sent to you.

### New Online Test Feature

The post test for the *Pharmacotherapy Self-Assessment Program, Sixth Edition (PSAP-VI)*, is Web based. After purchasing a PSAP-VI product, you will receive e-mail instructions on access to the Web-based post test. If you do not receive an e-mail message containing this information after your purchase, please send an e-mail message to [learning@accp.com](mailto:learning@accp.com).

## Updates in Therapeutics: The Pharmacotherapy Preparatory Course

An ACCP Educational Resource

*Updates in Therapeutics: The Pharmacotherapy Preparatory Course* is ideal for pharmacy professionals who are preparing for the Pharmacotherapy Specialty Certification Examination administered by the Board of Pharmaceutical Specialties (BPS) and for those seeking a self-paced review and refresher of disease states and therapeutics.

Developed by Board Certified Pharmacotherapy Specialists, the course content provides a comprehensive review of the knowledge domains covered in the

pharmacotherapy specialty certification examination. The course uses a case-based approach, with strong emphasis on the thought processes needed to solve patient care problems in each therapeutic area.

This is the same course that is presented live each year at ACCP's Spring Practice and Research Forum. The course materials are available in a variety of formats to best suit your learning style. Instructional materials from the 2008 live course will be available in June 2008. The online course, print workbook and CD-ROM package, and online workbook and CD-ROM package are available for continuing pharmacy education credit. Visit the ACCP Web site, [http://www.accp.com/th\\_08bcps.php](http://www.accp.com/th_08bcps.php), for a description of the program's educational goals and target audience; listing of faculty, program content, and learning objectives; and requirements for successful completion of the program.

\*These course formats are available for continuing pharmacy education credit.

The American College of Clinical Pharmacy is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education. The Universal Program Numbers are: Pharmacotherapy Preparatory Course for home study, 2008 Edition: Pediatrics, Geriatrics, 217-000-08-013-H01, 2.0 contact hours; Biostatistics, Clinical Trial Design, 217-000-08-014-H01, 3.0 contact hours; Neurology, General Psychiatry, 217-000-08-015-H01, 2.0 contact hours; Pharmacokinetics: A Refresher, Oncology Supportive Care, 217-000-08-016-H01, 2.0 contact hours; Acute Care Cardiology, Critical Care, Fluids, Electrolytes, and Nutrition, 217-000-08-017-H01, 4.0 contact hours; Infectious Diseases, HIV/ Infectious Diseases, 217-000-08-018-H01, 2.0 contact hours; Ambulatory Care, Outpatient Cardiology, Men's and Women's Health, Endocrine and Metabolic Disorders, 217-000-08-019-H01, 4.0 contact hours; Gastrointestinal Disorders, Nephrology, 217-000-08-020-H01, 2.0 contact hours. To receive continuing education credit, the Web-based post test must be successfully completed and submitted to ACCP by October 31, 2009. ACCP will mail statements of credit for continuing pharmacy education to participants within 4 weeks of successful completion and submission of the Web-based post test.

## Pharmacotherapy News Network

Pharmacy's Daily Newspaper

The *Pharmacotherapy News Network* (PNN) provides pharmacotherapy-related knowledge—not just more information. In the five daily editions each week, the PNN Pharmacotherapy Line generally adheres to the following schedule:

**Monday:** Coverage of that week's British journals *Lancet* and *British Medical Journal*, plus a "Journal Watch" column with titles and reprint information on just-published review articles or clinical guidelines

**Tuesday:** Reports on articles in the *Annals* or *Archives of Internal Medicine*

**Wednesday:** Summaries of articles in that day's *Journal of the American Medical Association*

**Thursday:** Coverage of studies in the *New England Journal of Medicine*

**Friday:** Summaries from the top journals in one or more medical specialty areas (e.g., cardiology, pediatrics, neurology) or major pharmacy journals

### Type of Service and Price

PNN is available to individual subscribers by e-mail. In addition, a site license can be obtained, allowing e-mail distribution for up to 50 users.

### Annual E-mail Site Licenses

|             |          |             |          |
|-------------|----------|-------------|----------|
| Single user | \$195.00 | 11–15 users | \$495.00 |
| 2–5 users   | \$295.00 | 16–20 users | \$595.00 |
| 6–10 users  | \$395.00 | 21–50 users | \$750.00 |

### Educational Site License

Colleges of Pharmacy\* \$1,000.00

\*Internal distribution to all faculty, staff, and students of a college of pharmacy.

## Career Development Center

*The Career Development Center serves the needs of both pharmacy professionals and recruiters. Visit [www.accp.com/career.php](http://www.accp.com/career.php) for information on career development resources and services.*

## Oncology Pharmacy Preparatory Review Course

This course is designed to help oncology pharmacy practitioners prepare for the Board of Pharmaceutical Specialties (BPS) Oncology Pharmacy Specialty Certification examination and obtain a broad and detailed update to their knowledge in oncology. Jointly sponsored by ACCP and the American Society of Health-System Pharmacists, the course content is based on the domains and knowledge areas tested on the examination.

The detailed workbook, filled with patient cases and practice-based self-assessment questions, is an excellent resource for assessing knowledge in multiple areas of oncology practice. The instructional materials, developed by clinical and educational experts and derived from the live presentation of the 2008 course,\* are available in these formats:

|   | Member Price | Nonmember Price |
|---|--------------|-----------------|
| Online Course with CE CD-ROM and Workbook with CE | \$335.00     | \$435.00        |
| CD-ROM only                                       | \$245.00     | \$300.00        |
| Workbook only                                     | \$110.00     | \$130.00        |

\*2008 course materials available July 2008.

CD-ROM includes audio-synchronized lecture and slides from the live course.

The American College of Clinical Pharmacy and the American Society of Health-System Pharmacists are accredited by the Accreditation Council for Pharmacy Education as providers of continuing pharmacy education. This program is approved for 28.0 contact hours. The Universal Program Number is 217-999-08-050-H01. To receive continuing education credit, the Web-based post test must be successfully completed and submitted to ACCP by October 31, 2009. ACCP will mail statements of credit for continuing pharmacy education to participants within 4 weeks of successful completion of the Web-based post test.

## Oncology Pharmacy Specialty Home Study Syllabus and Recertification Test

The Oncology Pharmacy Specialty Home Study Course is approved by the Board of Pharmaceutical Specialties (BPS) as one of three components in a professional development program that can be used by Board Certified Oncology Pharmacotherapists (BCOPs) as an alternative to the written recertification examination. Jointly sponsored by ACCP and the American Society of Health-System Pharmacists, the Oncology Pharmacy Specialty Home Study Course content is based on the domains and knowledge areas tested on the examination.

ACCP, as the official provider approved by BPS, will record and report recertification credit earned in this program directly to BPS. The course content, developed by clinical and educational experts, is a collection of journal articles from a variety of leading oncology and pharmacy peer-reviewed publications. The course is only available as a workbook. This format includes a Web-based recertification test. BCOPs who take the 2008 course\* and successfully complete the self-assessment test by November 30, 2008, will earn 15 hours of recertification credit.

|  | Member Price | Nonmember Price |
|--|--------------|-----------------|
| Print Book and Online Test with Recertification Credit | \$205.00     | \$310.00        |

\*2008 course materials available July 2008.

CD-ROM includes audio-synchronized lecture and slides from the live course.

The American College of Clinical Pharmacy and the American Society of Health-System Pharmacists are accredited by the Accreditation Council for Pharmacy Education as providers of continuing pharmacy education. This program is approved for 15 contact hours. Universal Program Number: 217-999-08-053-H01. To receive continuing education credit, the Web-based post test must be successfully completed and submitted to ACCP by November 30, 2008. ACCP will mail statements of credit for continuing pharmacy education to participants within 4 weeks of successful completion of the Web-based post test.

## Publishing Opportunities through ACCP

*Would you like to bring your best work to the marketplace? The American College of Clinical Pharmacy is always seeking new publications and products developed by ACCP members that we can make available to a broad audience of health care practitioners, faculty, students, and trainees.*

*If you (or your institution) have developed books, workbooks, software, dosing guides, monographs, or teaching materials that you would like to have published, please contact us. Through a co-marketing agreement with ACCP, your work can be promoted extensively to clinical pharmacists, faculty, students, and other health care practitioners.*

*For more information, contact Janel Mosley, Publications Project Manager, ACCP, at [jmosley@accp.com](mailto:jmosley@accp.com).*

## Oncology Pharmacy Preparatory Review Course for Recertification

The Oncology Pharmacy Preparatory Review Course is approved by the Board of Pharmaceutical Specialties (BPS) as one of three components in a professional development program that can be used by Board Certified Oncology Pharmacotherapists (BCOPs) as an alternative to the written recertification examination. Jointly sponsored by ACCP and the American Society of Health-System Pharmacists, the Oncology Pharmacy Preparatory Review Course content is based on the domains and knowledge areas tested on the examination.

ACCP, as the official provider approved by BPS, will record and report recertification credit earned in this program directly to BPS. The course content, developed by clinical and educational experts, is derived from the live presentation of the Oncology Pharmacy Preparatory Review Course. The course is available both online and as a CD-ROM and workbook package. Both formats include a Web-based recertification test. BCOPs who take the 2008 course\* and successfully complete the self-assessment test by November 30, 2008, will earn 28 hours of recertification credit and ACPE credit.

|  | Member Price | Nonmember Price |
|--|--------------|-----------------|
| Online Course with CE/Recertification Credit       | \$395.00     | \$500.00        |
| CD-ROM and Workbook with CE/Recertification Credit | \$435.00     | \$520.00        |

\*2008 course materials available July 2008.

CD-ROM includes audio-synchronized lecture and slides from the live course.

The American College of Clinical Pharmacy and the American Society of Health-System Pharmacists are accredited by the Accreditation Council for Pharmacy Education as providers of continuing pharmacy education.

This program is approved for 28 contact hours. Universal Program Number: 217-999-08-050-H01. ## Pediatric Medication Education Text, Fourth Edition

An ACCP Publication

By Marcia Lease Buck, Pharm.D., FCCP; and Anne E. Hendrick, Pharm.D.

The *Pediatric Medication Education Text* is a patient-counseling aid that has dramatically simplified the provision and administration of prescription pediatric medicine. It is a simple, straightforward resource with special emphasis on accessibility. It is written with all data provided in both English and Spanish, ready to be photocopied.

The *Pediatric Medication Education Text*, designed specifically for families with children younger than 12 years, is an alphabetically organized volume of information sheets on 340 commonly

prescribed pediatric drugs. Each sheet provides practical answers to the most common questions regarding pediatric drugs.

### Features include:

- Information sheets on warnings, adverse effects, and new approved uses
- Content presented in question-and-answer format, written at sixth-grade to eighth-grade reading level
- Content meets the requirements set forth in the "Action Plan for the Provision of Useful Prescription Information"
- Information sheets designed to copy and distribute to families and other care providers of pediatric patients

Member Price \$58.95

Nonmember Price \$69.95

ISBN-10: 1-880401-98-3; 2004; 356 pages; spiral bound

The *Pediatric Medication Education Text* also is available in an electronic format through a site license. Contact ACCP for details and pricing.

## ACCP Academy

For complete information on the ACCP Academy certificate programs, including curricular schedules and enrollment information, visit the ACCP Web site at <http://academy.accp.com>.

## Pharmacogenomics: Applications to Patient Care

An ACCP Publication

An essential resource for understanding the scientific underpinnings of this emerging discipline, *Pharmacogenomics: Applications to Patient Care* is designed to prepare pharmacists to integrate pharmacogenomic principles into practice.

The basics of genetics and pharmacogenomics are described and applications to specific therapeutic areas are highlighted in three modules. Each module includes content outlines, learning objectives, key words and abstracts, self-assessment questions and explained answers, and references to reinforce learning.

*Pharmacogenomics: Applications to Patient Care* is available in print and online formats.

### Module 1: Fundamentals of Applied Human Genomics

Introduces genetics and molecular and cellular biology and shows how these disciplines can be used to explain the possible genetic basis for variability in drug response. Also discussed is the application of bioinformatics studies to pharmacogenomics and ethical issues in genomics.

### Module 2: Fundamentals of Pharmacogenomics

Introduces the pharmacogenetics of oxidative drug metabolism, together with potential applications to tailoring drug therapy. A discussion of drug transporter pharmacogenetics includes localization and function, genetic variability, and clinical consequences. Drug target pharmacogenomics and pharmacogenetics, including the role of genetic variability in drug targets on drug efficacy and toxicity, and applications to individualized drug therapy are explored.

### Module 3: Pharmacogenomic Applications in Patient Care

Describes current and future pharmacogenomic applications for several therapeutic areas, including oncology and hematology, cardiovascular disease, infectious diseases, respiratory diseases, psychiatry, and transplantation.

### More Information Available

For more information about the content of each module, visit the Pharmacogenomics Web page at ACCP Online Bookstore [www.accp.com/strphgen.php](http://www.accp.com/strphgen.php).

| Three-module series (one book) | Member Price | Nonmember Price |
|--------------------------------|--------------|-----------------|
| Print                          | \$85.95      | \$122.95        |
| Online                         | \$64.95      | \$95.95         |
| Print and Online               | \$112.95     | \$165.95        |

ISBN-10: 1-880401-80-0; 2004; 648 pages; hardbound

| Single Modules*                              | Member Price | Nonmember Price |
|--|--------------|-----------------|
| Fundamentals of Applied Human Genomics       | \$32.95      | \$53.95         |
| Fundamentals of Pharmacogenomics             | \$32.95      | \$53.95         |
| Pharmacogenomic Applications in Patient Care | \$32.95      | \$53.95         |

\*Single modules available online only. When ordering, please specify module on the order form.

“This book is an excellent resource for readers with a wide range of pharmacogenomic knowledge. Each module is well organized and written. It would make an excellent textbook for pharmacy students, as well as a useful resource for current practitioners and prospective investigators in the field.”—*The Annals of Pharmacotherapy*, December 2005, Volume 39

## Pharmacotherapy

ACCP's Official Journal

*Pharmacotherapy* is ACCP's peer-reviewed scientific journal. Published monthly, it includes contemporary original research and review articles about all aspects of human pharmacology and drug therapy. ACCP members receive *Pharmacotherapy* as a benefit of membership. Journal departments include:

- Original research articles
- Research reports
- Brief reports
- Mini-reviews
- Practice insights
- Special articles
- Reviews of therapeutics
- Case reports
- Alternative viewpoints

### Journal Features

All issues from January 1999 through the present issue of *Pharmacotherapy* are available online at [www.pharmacotherapy.org](http://www.pharmacotherapy.org). This e-journal is free to all subscribers.

Individual articles are available as PDF files, which reproduce articles as they appear in the print edition of the journal. PDF files may be used on PC, Mac, and UNIX computers. The free Adobe Acrobat Reader software is available for download from [www.adobe.com](http://www.adobe.com).

| Annual Subscription        | USA      | International |
|----------------------------|----------|---------------|
| Institutions and Libraries | \$395.00 | \$435.00      |
| Individuals                | \$95.00  | \$135.00      |
| Students and Residents     | \$65.00  | \$105.00      |

## A Guide to Clinical Decision-Making: The PSAP Algorithms, Fourth Edition

An ACCP Publication

Algorithms are a trusted way to illustrate diagnoses and drug therapy decisions, and these valuable tools appear throughout the books in the Pharmacotherapy Self-Assessment Program (PSAP) series. The fourth edition of this online handbook presents selected clinical algorithms from PSAP-VI, with new algorithms added as each book in the series is published. When applicable, the algorithms have been updated to reflect current research and practice. Algorithms are provided in the portable document format (PDF) and are fully searchable by key word. More than 200 algorithms will be included

when the PSAP-VI series is completed. Until then, subscribers will receive updates as new algorithms from published books become available.

ISBN-10: 1-932658-29-7; 2007; online book

## Clinical Pharmacokinetics, Fourth Edition

Edited by John E. Murphy

This popular resource is designed as a clinical reference offering the key principles of pharmacokinetics and their applications in drug therapy. This book offers information for medications that require an understanding of individual patients' probable or actual drug concentrations to achieve medication effectiveness and safety.

This expanded edition incorporates:

- A listing of commonly used pharmacokinetic equations
- Dosing for pediatric and geriatric patients, overweight and obese patients, and considerations for neonates
- Creatinine clearance estimation
- Tables on international and traditional units for drug and laboratory tests
- Specific chapters on anti-infectives, neurologic agents, cardiovascular drugs, and anticoagulants

The authors represent a broad range of pharmacy practice, including clinical practice, academics, and pharmaceutical industry medical departments.

Nonmember price **\$50.50**

ISBN: 978-1-58528-167-1; 2008; 500 pages; softcover

## Antibiotic Basics for Clinicians: Choosing the Right Antibacterial Agent

By Alan R. Hauser, M.D., Ph.D.

A text designed for students, trainees, and non-infectious disease clinicians who are looking for quick and easy understanding of the rationale behind antibiotic selection for common bacterial pathogens and infectious disease presentations. By providing a brief overview of the rationale behind antibiotic selection, the text serves as a learning device to supplement those large reference books. Features include organization by class of antibiotics; fact-anecdotes, interesting ancillary information, mnemonics, and questions to test understanding; and additional reading

reference sources. Appendices are included that cover dosing in adults and children, antibacterial agents in pregnancy, generic and trade names of commonly used antibacterial agents, and treatment of infections caused by bacterial agents of bioterrorism.

Selection includes online access to the fully searchable text.

Member price **\$30.95**  
Nonmember price **\$34.95**

ISBN: 978-0-7817-9464-0; 2007; 320 pages; softbound

## Drug Prescribing in Renal Failure: Dosing Guidelines for Adults and Children, Fifth Edition

Edited by Michael E. Brier, Ph.D.; and George R. Aronoff, M.D.

Here is the classic pocket guide to drug dosing for patients with impaired renal function—in a revised and updated new edition. Easy-to-read tables offer information for determining dosages for more than 450 drugs. This new edition also features new guidance on pediatric dosing, making it one of the most complete resources of its kind.

Features include:

- Details of the biochemical and physiologic effects of drugs in patients with renal failure
- Emphasis on drugs eliminated by the kidney as well as the importance of the patient's glomerular filtration rate (GFR)
- Recommendations for supplemental drug dosing during renal replacement therapies
- Coverage of antimicrobial and antiviral agents

Because the kidney is the major regulator of the internal fluid environment, the physiologic changes associated with renal disease have pronounced effects on the pharmacology of many drugs. This handy pocket guide will assist you in managing these effects.

Member price **\$37.95**  
Nonmember price **\$41.95**

## The Medical Letter on Drugs and Therapeutics

*The Medical Letter on Drugs and Therapeutics* is an independent, peer-reviewed, nonprofit publication that offers unbiased critical evaluations of drugs, with special emphasis on new drugs. It evaluates virtually all new drugs and reviews older drugs when important new information becomes available on their usefulness or adverse effects. *The Medical Letter* is published every other week in a four-page newsletter format and is available in print, Palm OS, and online versions. The newsletter carries no advertising and is supported entirely by subscription

fees. A typical issue appraises two or three new drugs in terms of their effectiveness, toxicity, cost, and possible alternatives. Occasionally, *The Medical Letter* publishes an article on a new nondrug treatment or a new diagnostic aid.

*The Medical Letter* is intended specifically to meet the needs of the busy health care professional who wants unbiased, reliable, and timely information on new drugs. *The Medical Letter* indicates whether a new drug offers genuine advantages over older drugs, whether its effectiveness is limited, or whether it is too toxic or too expensive to justify its use. If new information changes the picture, follow-up reports are published.

## Pharmacotherapy: A Pathophysiologic Approach, Sixth Edition

Edited by Joseph T. DiPiro, Pharm.D., FCCP; Robert L. Talbert, Pharm.D., FCCP, BCPS; Gary C. Yee, Pharm.D., FCCP; Gary R. Matzke, Pharm.D., FCP, FCCP; Barbara G. Wells, Pharm.D., FASHP, FCCP, BCPP; and L. Michael Posey, B.S.Pharm.

This gold standard text equips the reader to rigorously assess new drugs and new evidence-based therapeutic approaches. The key to this process is the pathophysiology sections, which identify the mechanism of disease as a foundation for pharmacotherapeutic principles and strategies. Readers will find a wealth of treatment algorithms, principles of pharmacotherapy, and extensive figures and tables that serve to enhance the readability of the text, make the information easy to use, and provide clear recommendations. Highlights include:

- Online Resource Center for professors and students includes study materials; Web chapters; questions and answers; and updates.
- Clinical Controversies are included in the treatment sections of disease-oriented chapters.
- Disease management focus meets needs of pharmacy curriculum and establishes a strong pathophysiologic basis for treatment.

Member Price            \$170.95

## Pharmacotherapy Handbook, Sixth Edition

Edited by Barbara G. Wells, Pharm.D., FASHP, FCCP, BCPP; Joseph T. DiPiro, Pharm.D., FCCP; Terry L. Schwinghammer, Pharm.D., FCCP, BCPS; and Cindy W. Hamilton, Pharm.D.

This companion to the Sixth Edition of DiPiro's *Pharmacotherapy: A Pathophysiologic Approach* is an excellent stand-alone reference that provides quick, critical information on diseases and disorders, alphabetized in an easy-to-read, easy-to-find, bulleted format. With coverage of more than 85 of the most common disorders, this handbook provides readers with a portable, readable guide that is integral to any clinical setting. Features include:

- Key information on more than 85 common diseases and disorders
- Outline format with tables, charts, and algorithms
- Alphabetic organization by organ system and disease state

## The Washington Manual of Medical Therapeutics, 32nd Edition

Edited by Daniel H. Cooper, M.D.; Andrew J. Krainik, M.D.; Sam J. Lubner, M.D.; Hilary E. Reno, M.D., Ph.D.; and Scott Micek, Pharm.D.

Established for more than 40 years as the authority of the medical ward, *The Washington Manual of Medical Therapeutics*, now in its 32nd Edition, contains even more current information with a focus on inpatient care, delivered in a time-saving, quick-reference style. Each chapter has been updated and reformatted for easier access to information.

Major topics include hypertension, ischemic heart disease, heart failure, cardiomyopathy, valvular heart disease, arrhythmias, critical care, pulmonary disease, allergy and immunology, renal diseases, infectious diseases, antimicrobials, gastrointestinal diseases, liver diseases, neurologic disorders, arthritis and rheumatologic diseases, and endocrine diseases. The 32nd Edition covers the newest treatment guidelines in the Seventh Report of the Joint National Committee on Prevention, Detection, Evaluation, and Treatment of High Blood Pressure (JNC 7).

## Pediatric Dosage Handbook, 14th Edition

By Carol K. Taketomo, Pharm.D.; Jane H. Hodding, Pharm.D.; and Donna M. Kraus, Pharm.D.

The *Pediatric Dosage Handbook*, now in the 14th Edition, continues to be the trusted information resource for medical professionals managing pediatric patients. Updates for this edition include 47 new drug monographs, updates to hundreds of existing monographs, new appendices including "Management of Healthcare Worker Exposure to HBV, HCV, HIV" and "Malaria Prevention and Treatment." New appendix updates include 2007 Childhood Immunization Schedules, Endocarditis Prophylaxis, HIV Treatment Guidelines, and OTC Cough and Cold Preparations in Pediatrics.

Key features of the *Pediatric Dosage Handbook, 14th Edition* include:

- 821 drug monographs
- Up to 35 fields of information per monograph
- Usual dosage by age group (neonatal, pediatric, adult)
- More than 110 extemporaneous preparation recipes
- Dictionary-like headings at the top of each page
- U.S. Food and Drug Administration "Tall Man" lettering to help distinguish drugs with look-a-like names
- Therapeutic category and key word index

## Applied Therapeutics: The Clinical Use of Drugs, Eighth Edition

By Mary Anne Koda-Kimble, Pharm.D.; Lloyd Y. Young, Pharm.D.; Wayne A. Kradjan, Pharm.D., BCPS; B.J. Guglielmo, Pharm.D.; Brian K. Alldredge, Pharm.D.; and Robin L. Corelli, Pharm.D., FCSHP

This widely used text is now revised and thoroughly up-to-date. A practical case-study approach helps health care students master the fundamentals of therapeutics while gaining a firm grasp on essential problem-solving techniques. True-to-life clinical circumstances are incorporated into every disease and disorder chapter to illustrate concepts and principles of therapeutics and to offer hands-on practice in developing therapeutic care plans.

Comprehensive coverage of therapeutics fundamentals gives students an

understanding of disease states and their treatments and how to apply optimal pharmaceutical care. This edition has two new chapters: "Delivering Culturally Competent Care" and "End of Life." A bonus CD-ROM includes an indexed, searchable version of the book for quick access to needed information.

## Handbook of Applied Therapeutics, Eighth Edition

By Mary A. Koda-Kimble, Pharm.D.; Lloyd Y. Young, Pharm.D.; Wayne A. Kradjan, Pharm.D., BCPS; B.J. Guglielmo, Pharm.D.; Brian K. Alldredge, Pharm.D.; and Robin L. Corelli, Pharm.D.

Designed as a pocket version of *Applied Therapeutics: The Clinical Use of Drugs, Eighth Edition*, this completely updated handbook offers quick access to the most pertinent drug-related information from the text. It follows the same chapter structure and approach as the textbook. The handbook provides in-depth information on the latest drug treatments for more than 85 diseases and conditions, including heart failure, acne, schizophrenia, viral hepatitis, and diabetes mellitus.

Detailed algorithms and charts guide students and practitioners through complex therapeutic decisions. More than 700 tables provide rapid access to comparative drug information, pharmacokinetic properties, treatment options, dosing guidelines, risk factors, and disease information.

## Basic and Clinical Pharmacology, 10th Edition

By Bertram G. Katzung, M.D., Ph.D.

This textbook integrates basic and clinical science, making it well suited for both the traditional curricula and the integrated organ system-based curricula.

*Basic and Clinical Pharmacology* provides in-depth coverage of key pharmacology topics from basic principles to pharmacological considerations for autonomic, cardiovascular-renal, smooth muscle, CNS, endocrine, antimicrobial, and chemotherapeutic and immunotherapeutic drugs. This 10th edition additionally presents dozens of new, recently approved

drugs, including monoclonal antibodies, and a detailed review of the mechanism of action and toxicities of traditional and newer drugs.

In addition to treatment strategies and recommended drugs for all major diseases, the textbook contains evidence-based chapters on abused drugs; special aspects of perinatal, pediatric, and geriatric pharmacology; and the latest information on over-the-counter drugs, herbal medicines, and nutritional supplements.

## CURRENT Medical Diagnosis & Treatment, 2008

Edited by Stephen J. McPhee, M.D.; Maxine A. Papdakis, M.D.; and Lawrence M. Tierney, M.D., Senior Editor

Updated each year, *CURRENT Medical Diagnosis & Treatment* provides comprehensive information on symptoms, signs, epidemiology, etiology, and treatment for more than 1,000 diseases. For any topic, there is information for inpatient and ambulatory care and reinforcement for diagnostic and treatment tools pertinent to clinical practice. This well-established internal medicine book presents the latest medical advances, prevention strategies, and cost-effective treatments in every major primary care topic, including gynecology, ophthalmology, psychiatry, neurology, obstetrics, dermatology, otolaryngology, toxicology, and urology.

New to the 2008 edition are:

- Extensively revised chapters on ear, nose, and throat; hypertension; disorders of the blood vessels and lymphatics; and protozoal and helminthic diseases
- Updated chapter on preventive medicine emphasizing disease prevention and health promotion
- Revamped cancer chapter delivering the very latest treatment advances
- Expanded common symptoms chapter
- Revised chapter on end-of-life issues addressing palliative care and pain management

## Lange Smart Charts Pharmacology

By Catherine E. Pelletier, M.D.

Written and designed for pharmacy and medical students, *Lange Smart Charts Pharmacology* presents a complete review of pharmacology in an innovative format and organized by drug group. The book covers all essential topics in pharmacology and is an ideal companion resource to pharmacology textbooks.

The format and approach of *Lange Smart Charts Pharmacology* are tailored to the ways in which students study and learn pharmacology. The book's contents include tables and diagrams that facilitate comparisons and clarify relationships

among drugs in terms of interactions, pharmacokinetics, uses, and adverse effects. Each chapter begins with an outline of the drug class discussed, followed by a list of key terms.

## Basic Concepts in Pharmacology: A Student's Survival Guide, Third Edition

By Janet L. Stringer, M.D., Ph.D.

This survival guide serves as an effective resource for learning difficult concepts in pharmacology and offers a study system that sets priorities and minimizes memorization. The book also organizes and condenses must-know drug information and clearly explains each fundamental principle of drug actions.

*Basic Concepts in Pharmacology: A Student's Survival Guide* simplifies the learning process by presenting drugs by class and describes key concepts about each drug class. The guide presents coverage of new classes of drugs

such as fusion inhibitors for HIV, antibiotic and antifungal drugs, and drugs for cancer and immune suppression. Expect the book to cover newly updated information on poisoning/toxicology as well. Essential information is showcased in numerous summary boxes, illustrations, and tables throughout.

## Drug Information Handbook, 16th Edition

Edited by Charles F. Lacy, Pharm.D.; Lora L. Armstrong, Pharm.D., BCPS; Morton P. Goldman, Pharm.D.; and Leonard L. Lance, B.S.Pharm.

The *Drug Information Handbook*, 16th Edition, is an easy-to-use reference developed especially for clinicians and health care professionals who need quick access to comprehensive drug information. The handbook contains 1,415 monographs, including 30 new drugs and hundreds of updates to existing monographs.

Each monograph presents up to 33 fields of information, with details on dosage, drug interactions, and adverse reactions. The appendix includes hundreds of charts and reviews of special topics, such as

treatment guidelines and therapy recommendations. Also included is a Pharmacologic Category Index listing all drugs in this handbook under their unique pharmacologic class.

## Handbook of Clinical Drug Data, 10th Edition

Edited by Philip O. Anderson, Pharm.D., FASHP; James E. Knoben, Pharm.D., M.P.H.; and William G. Troutman, Pharm.D., FASHP

This essential resource contains evaluative and comparative information on more than 1,200 drugs. Part I of the book covers drug monographs from 10 major drug categories and is subdivided by therapeutic groups for quick and easy comparison. Part II covers clinical drug data—everything from predicting adverse drug reactions to drug interactions. Several comprehensive chapters provide information for specialty drug therapy based on patient populations. Valuable features of this handbook include:

- Convenient tabbing guide for location of drug categories
- References, including more than 3,600 literature citations
- A cross-referenced index, including Canadian and British drug names
- Guides for optimal drug choices in special populations, such as in pregnant and breastfeeding women and in patients with renal disease or undergoing dialysis

## Anesthesiology & Critical Care Drug Handbook, Eighth Edition

By Andrew J. Donnelly, Pharm.D., MBA, FASHP; Verna L. Baughman, M.D.; Jeffrey P. Gonzales, Pharm.D., BCPS; Julie Golembiewski, Pharm.D.; and Elizabeth A. Tomsik, Pharm.D., BCPS

The latest edition of this drug reference presents information on over 2,000 medications used in the care of surgical or critically ill patients.

The text is presented in an easy-to-use, dictionary-style format with medications organized alphabetically. Each monograph includes up to 30 fields of information, including anesthesia and critical care concerns, use, dosages, monitoring parameters, and special consideration to anesthetic drug interactions when applicable.

Supplemental information includes a Special Topics/Issues section addressing perianesthetic patient management issues and an appendix covering abbreviations and measurements, comparative drug charts, commonly used herbal medicines, therapy recommendations, and more. A Pharmacologic Category Index is included.

Updates to this edition include:

- 15 new drug monographs
- U.S. Black Box warnings highlighted in the monographs
- Special topics updates including anesthesia concerns for neurosurgery, anesthesia for geriatric patients, anesthesia for obstetric patients in non-obstetric surgery, perioperative management of the patient with diabetes, and perioperative evaluation for noncardiac surgery in the cardiac patient

## Drug Information Handbook for Oncology, Seventh Edition

By Dominic A. Solimando Jr., B.S.Pharm., M.A.

This new edition contains 270 drug monographs and more than 330 chemotherapy regimens, cross-referenced and organized in a concise, uniform format.

The content of the *Drug Information Handbook for Oncology* offers tabbed sections organized like a dictionary for ease of use. Drugs are located by generic name, with each monograph including up to 42 unique fields of information. The Chemotherapy Regimens section provides a comprehensive presentation of cancer chemotherapy regimens, listed

alphabetically by regimen name (acronym). An index also lists regimens by indication. The Special Topics section covers important cancer-related issues such as pain management, bone marrow transplantation, managing infections, and safe handling of hazardous drugs.

## Cancer: Principles & Practice of Oncology, Seventh Edition

By Vincent T. DeVita Jr., M.D.; Samuel Hellman, M.D.; and Steven A. Rosenberg, M.D., Ph.D.

This authoritative book on cancer was completely revised and updated for the seventh edition to include the latest developments in molecular biology, cancer prevention, and multimodality treatment of every cancer type.

New chapters examine molecular biologic techniques, including proteomics, genomics, targeted therapies, RNA interference, cDNA arrays, and tissue arrays. New sections discuss bioinformatics and societal issues in oncology, including regulatory issues, telemedicine, and international differences

in oncology. The book also presents new information on functional and metabolic imaging, vaccines, and antiangiogenesis agents.

*Cancer: Principles & Practice of Oncology* also comes with a CD-ROM that includes the full text, color slides, and PubMed links.

## Rating Scales in Mental Health, Second Edition

By Martha Sajatovic, M.D.; and Luis F Ramirez, M.D.

*Rating Scales in Mental Health*, Second Edition, presents clinicians with information on the use of rating scales in mental health assessment and includes conditions such as general anxiety, social/family functioning, eating disorders, and sleep disorders. This handbook contains more than 100 psychiatric rating scales that can be applied in a variety of clinical and research settings.

In the first section of the book, the authors discuss general concepts in the use of rating scales, history of rating scales,

statistical evaluation of rating scales, and rating scale domains. The second section of the book features monographs that present and discuss commonly used rating scales in mental health assessment.

*Rating Scales in Mental Health* also includes an appendix with charts and tables in a quick reference format and two indexes.

## Medication Errors, Second Edition

By Michael R. Cohen, Sc.D., D.P.S., M.S., R.Ph.

*Medication Errors* was specifically written to provide the health care community with practical guidance in making drugs safer for patients. Thirty experts from pharmacy, medicine, nursing, and risk management discuss causes for medication errors and strategies to prevent those errors. The book presents insights into the origin of many medication errors, including drug names, drug packaging and labeling, and error-prone abbreviations and dose expressions.

Experts additionally provide an in-depth analysis of errors in prescribing, dispensing, administering, and use of drug-delivery devices. The book also scrutinizes high-risk treatment, such as cancer chemotherapy and immunologic drugs, and high-risk patient populations, such as pediatric and neonatal patients. A full chapter is devoted to high-alert drugs and precautions regarding their use. Other key chapters discuss topics such as disclosure of errors, clinical bioethics of safe medication practices, and management of risks through a culture of safety.

## Adverse Drug Reactions, Second Edition

Edited by Anne Lee, M.Phil., Pharm.S.

Adverse reactions to medicines continue to be a burden on health care, causing considerable morbidity and mortality. This essential, practical guide has been extensively revised and updated to include three new chapters on adverse effects, pharmacogenetics and adverse reactions, and adverse reactions in pregnancy. Case studies are provided with each chapter.

ISBN-13: 978-0853696018; 2005; 496 pages; softbound

## Poisoning & Drug Overdose, Fifth Edition

By Kent R. Olson, M.D.

*Poisoning & Drug Overdose* serves as a valuable guide for poison control staff, medical toxicologists, and emergency physicians by offering the latest recommendations on effective diagnosis and treatment of poisoning and drug overdose.

The guide contains essential insights and updated information on biologic warfare agents and their newest antidotes. The author also discusses industrial chemicals and the most recent regulatory exposure limits. A detailed table within the

Industrial Chemicals chapter summarizes current toxicity and workplace exposure guidelines for more than 500 industrial chemicals. The author also discusses special pregnancy considerations in poisoning and drug overdose.

Designed in a user-friendly format, the book features easy-to-read text and tables that contain specific drug dosage information; provides extensive cross-referencing; and offers a comprehensive index of generic, chemical, and brand names for many drugs and commercial products.

## Reese and Betts' A Practical Approach to Infectious Diseases, Fifth Edition

By Robert F. Betts, M.D.; Stanley W. Chapman, M.D.; and Robert L. Penn, M.D.

Now in a thoroughly revised, updated Fifth Edition, this handbook is a practical, easily accessible, and authoritative guide to the diagnosis and treatment of infectious diseases. Leading experts present realistic clinical approaches to infectious disease problems seen in hospital and outpatient settings and offer the latest information on antimicrobial use, including specific recommendations on dosages, routes of administration, and duration of therapy.

The editors make recommendations on their preferred treatment approach, which will aid readers in clinical decision-

making. Chapters are written in a user-friendly outline format that is ideal for quick reference. This edition includes complete information on new diseases, new antibiotics, and HIV antiviral agents.

## The Washington Manual Infectious Diseases Subspecialty Consult

By Richard Starlin, M.D.; Michele Cabellon, M.D.; Rebecca Chandler, M.D.; Erik Dubberke, M.D.; Melissa Norton, M.D.; and Erin Quirk, M.D.

Prepared by residents and fellows at the Washington University School of Medicine, this handbook covers the full spectrum of infectious disease problems with the same frontline practicality as the world-famous *Washington Manual of Medical Therapeutics*. This consult manual offers clinicians valuable assistance in determining what infections patients are at risk for; where and how they acquired the infection; how to evaluate and manage the patient; and what complications to expect.

Chapters on infections of each organ system begin with an approach to that organ system. Other topics covered include bioterrorism, sexually transmitted diseases, brucellosis, systemic mycoses, immunizations, and antimicrobials.

## Bacterial Pathogenesis: A Molecular Approach, Second Edition

By Abigail A. Salyers, Ph.D.; and Dixie D. Whitt, Ph.D.

Presenting a new perspective on the host-parasite interaction, the second edition of this best-selling text is designed to provide a comprehensive introduction to bacterial pathogenesis for both students and researchers. Authors integrate material from pathogenic microbiology, molecular biology, immunology, and human physiology to provide a complete overview of the field.

This edition includes two major components. The key features at the beginning of each chapter in Section II provide a snapshot of the organism(s)

covered. These snapshots present the organisms as intact entities associated with a particular disease, while the detailed material is presented in the text of the chapter. In addition, the summary sections at the end of each chapter have been reformatted to present information in outline and table form, an arrangement that students find useful.

## Drug-Induced Diseases: Prevention, Detection, and Management

Edited by James E. Tisdale, Pharm.D., FCCP, BCPS; and Douglas A. Miller, Pharm.D.

This comprehensive resource provides a detailed analysis of how to identify, prevent, and manage drug-induced diseases. Edited by James E. Tisdale and Douglas A. Miller, with contributions from experts distinguished in their respective specialties, *Drug-Induced Diseases* is organized logically and is easy to use. Opening chapters discuss the epidemiology, public health impact, and monitoring of drug-induced diseases, covering numerous diseases of every major organ system. Each chapter addresses a particular disease state and explores links

to drugs that can cause the disease.

Drug-induced disease is responsible for extensive mortality, morbidity, and economic costs within the health care system. This book serves as an essential reference for clinicians in preventing and treating these diseases.

## Drugs in Pregnancy and Lactation, Eighth Edition

By Gerald G. Briggs, B.Pharm.; Roger K. Freeman, M.D.; and Sumner J. Yaffe, M.D.

Thoroughly updated, featuring 127 new drug entries, the Eighth Edition of this popular reference provides practical, reliable information on more than 1,175 drugs that may be used by pregnant and lactating women.

Each monograph summarizes the known and/or possible effects of the drug on the fetus and the known/possible passage of the drug into breast milk. U.S. Food and Drug Administration Risk Factor ratings for each drug are also included. Drugs are listed alphabetically and indexed by generic

and United States and foreign trade names.

This edition includes more herbal medicines and nutritional supplements used by women. An important feature: Recommendations for pregnancy and breastfeeding are shown at the top of each review to provide a quick assessment of the drug.

A companion Web site will offer the fully searchable online text with links to the Briggs Update newsletter.

## The Top 100 Drug Interactions: A Guide to Patient Management, 2008 Edition

By Philip D. Hansten, Pharm.D.; and John R. Horn, Pharm.D.

This handy, authoritative drug interaction resource is intended for all practitioners. The 2008 edition contains more than 3,600 common drug interactions in 120 monographs. The table of CYP450 and P-glycoprotein substrates and modifiers includes about 325 drugs and continues to include only data that are based on human in vivo studies. The book lists potentially important herb-drug interactions.

The index supports searching for drug interaction entries by trade or generic name. The Hansten and Horn Drug Interaction Probability Scale is included to

assess the probability of a causal relationship between a drug interaction and a patient event.

## A.S.P.E.N. Nutrition Support Practice Manual, Second Edition

By Editor-in-Chief Russell Merritt, M.D., Ph.D.

This practical “how-to” manual provides the most comprehensive and up-to-date information on the proper implementation of enteral and parenteral nutrition based on the American Society for Parenteral and Enteral Nutrition (A.S.P.E.N.) Guidelines, Safe Practices, and Standards of Practice.

Sections within the practice manual include fundamentals of nutrition support practice and management, immune-driven conditions, gastrointestinal-related conditions, surgical and critically

ill conditions, metabolic conditions, and site related and ethical issues. Extensive chapters have been written on parenteral and enteral nutrition issues regarding AIDS, cancer, transplantation, and long term care. The publication includes an easy-to-use, searchable CD-ROM.

## A.S.P.E.N. Specialized Nutrition Support Tutorial: Writing Parenteral Nutrition Orders

By Editor-in-Chief Ainsley Malone, M.S., R.D., CNSD

This A.S.P.E.N. educational CD-ROM tutorial is designed to strengthen the clinician’s skills in writing parenteral nutrition orders. The tutorial provides instruction on how to perform a nutrition assessment to estimate nutrient requirements and to design a safe and appropriate parenteral nutrition formulation, including macronutrients, electrolytes, minerals, trace elements, and vitamins. The tutorial also describes how to identify the appropriate type of vascular access device for administration of parenteral nutrition. Other issues

addressed by the CD-ROM tutorial include monitoring patients for response and complications related to parenteral nutrition therapy and facilitating patients’ transition from in-patient to home parenteral nutrition.

In addition to the fundamentals of parenteral nutrition, the tutorial presents four interactive cases with neonatal, pediatric, adult medical, and adult surgical patients.

## Evidence-Based Herbal Medicine

Edited by Michael Rotblatt, M.D., Pharm.D.; and Irwin Ziment, M.D., FRCP

*Evidence-Based Herbal Medicine* is a handbook designed to provide practical, objective information on the use of herbal medicine. This well-organized and easy-to-reference handbook covers each herb with a summary of clinical trials and a rating of efficacy, evidence, and safety levels.

Evaluations of each herb include uses, pharmacology, clinical trials, adverse effects, preparations and dosages, interactions and cautions, analyses of controlled studies, and references.

Provided in the appendix are reviews of other herbal medicinal resources as well as a section on non-herbal dietary supplements.

Member Price \$38.95  
Nonmember Price \$41.95

ISBN-13: 978-1560534471; 2002; 464 pages; softbound

## Pharmacogenomics Handbook, Second Edition

By Larisa M. Humma, Pharm.D., BCPS; Vicki L. Ellingrod, Pharm.D., BCPP; and Jill M. Kolesar, Pharm.D., FCCP, BCPS

This handbook presents information concerning key genetic variations that may influence drug disposition and sensitivity, providing a concise reference on key polymorphisms and their potentially altering effects on prescribed and over-the-counter drugs. The pocket-sized book serves as both a reference guide and an introduction to pharmacogenetic principles.

### Contents include:

- Polymorphism monographs
- Cytochrome P450 nomenclature
- Table of cytochrome P450 enzymes, substrates, inhibitors, and inducers
- Alphabetic listing of drugs by generic and brand names
- Alphabetic listing of gene polymorphisms
- Index of polymorphisms and drugs potentially affected

Member Price                 \$31.95  
 Nonmember Price           \$35.95

ISBN-10: 1-59195-124-0; 2006; 419 pages; softbound

## Discount-Priced Publications

Pharmacotherapy Self-Assessment Program, Fifth Edition (PSAP-V)

Full series and single PSAP-V books are now clearance priced. Print books are discounted to match online book prices. Quantities of print books are limited. Shipping and handling charges apply for print books only. See the order form on page 44 for shipping and handling charges. All sales are final. BCPS recertification credit is no longer available for PSAP-V.

### Books in the PSAP-V Series

1. Cardiovascular I, II, and III (*all CE expired*)
2. Health Care Stakeholders I and II (*all CE expired*)
3. Psychiatry I, II, and III (*all CE expired*)
4. Geriatrics I and II and Special Populations (*all CE expired*)
5. The Science and Practice of Pharmacotherapy I, II, and III (*all CE expired*)
6. Infectious Diseases I, II, III, and IV (*all CE expired*)
7. Gastroenterology I and II and Nutrition I and II
8. Chronic Illnesses I, II, and III
9. Chronic Illnesses IV and Pediatrics I and II
10. Hematology and Oncology I and II
11. Critical Care I and II and Transplantation

 13000 West 87th Street Parkway  
 Lenexa, KS 66215-4530

## Pharmacoeconomics and Outcomes: Applications for Patient Care, Second Edition

An ACCP Publication

Fully updated and substantially expanded, this Second Edition of the well-known ACCP publication equips pharmacists and pharmacy students to develop the knowledge to evaluate economic and patient-based outcomes.

*Pharmacoeconomics and Outcomes* introduces the terminology and basic components of health care economics, outcomes research, and pharmacoeconomics. It identifies a strategy for designing a research question, a process for conducting

a pharmacoeconomic evaluation, and sources of data for economic outcomes analyses. The authors present many economic and humanistic assessments, their purpose, and their applications, including:

- Cost-of-illness analysis
- Cost-benefit analysis
- Cost-utility analysis
- Markov modeling
- Patient satisfaction
- Cost-minimization analysis
- Cost-effectiveness analysis
- Decision analysis
- Health status

## Pharmacoeconomics and Outcomes: Applications for Patient Care, Case Studies

An ACCP Publication

New with the Second Edition is a companion book of 12 case studies to reinforce learning. The case studies present real-world instances that enable users to apply the concepts presented in the main text. Each case study contains answers and rationales for the questions posed.

### Cases include:

- Cost-of-Illness Analysis; Calculation of the Cost of Migraine Within a Managed Care Organization

- Sensitivity Analysis
- Interpreting Scale Scores for an Individual Patient
- Formulary Decision-making Incorporating Humanistic Outcomes
- Evaluating and Justifying Clinical Services
- Policy Implications of a Health Economic Study

## Applied Pharmacokinetics & Pharmacodynamics, Fourth Edition

Edited by Michael E. Burton, Pharm.D.; Leslie M. Shaw, Ph.D.; Jerome J. Schentag, Pharm.D., FCCP; and William E. Evans, Pharm.D., FCCP, BCPS

The definitive advanced-level clinical pharmacokinetics text is now in its Fourth Edition, with new emphasis on the relationship between pharmacokinetics and pharmacodynamics. Written by 70 leading researchers and practitioners, this book is a rigorous yet practical text on the application of pharmacokinetic methods, pharmacodynamic principles, and pharmacotherapeutic data for optimal, individualized drug therapy.

New with this edition:

- The title reflects an increased emphasis on drug pharmacodynamics due to the evolution and growing wealth of knowledge from research in the area.
- A series of case studies helps readers apply concepts they examine in the text to actual patient problems.
- Five added chapters are “Critical Evaluations of Methods for Therapeutic Drug Monitoring,” “Tacrolimus,” “Mycophenolic Acid,” “Sirolimus,” and “Antipsychotics.”
- The appendix provides information on outcome studies with therapeutic drug monitoring.
- More drawings and reference tables provide rapid access to key information for effective and efficient learning.

Nonmember Price \$79.95

ISBN-13: 978-0781744317; 2005; 867 pages; hardbound

## Designing Clinical Research, Third Edition

By Stephen B. Hulley, M.D., M.P.H.; Steven R. Cummings, M.D.; Warren S. Browner, M.D., M.P.H.; Deborah G. Grady, M.D., M.P.H.; and Thomas B. Newman, M.D., M.P.H.

This book has set the standard for providing a practical guide to planning, tabulating, formulating, and implementing clinical research. The straightforward, reader-friendly text explains how to choose well-focused research questions and details the steps through the elements of study design, data collection, quality assurance, and basic grant writing. The third edition presents current research methodology, including molecular and genetic clinical research, and provides a syllabus for conducting a clinical research workshop.

Member Price \$74.95

Nonmember Price \$79.95

ISBN-13: 978-0781782104; 2006; 384 pages; softbound

## Basic & Clinical Biostatistics, Fourth Edition

By Beth Dawson, Ph.D.; and Robert G. Trapp, M.D.

This publication presents the ideal way to develop sound judgment about data applicable to clinical care. A thorough and interesting presentation of biostatistics, this book is the first choice of students, educators, and practitioners. Readers will become informed users of biostatistics and learn to evaluate and apply statistics in medicine, medical research, and all health-related fields. Features include:

- Emphasis on the basics of biostatistics and epidemiology and the clinical applications in evidence-based medicine and decision-making methods

- New chapter on survey research
- Expanded discussion of logistic regression, the Cox model, and other multivariate statistical methods
- Problems drawn from studies in the medical literature that illustrate the various statistical methods
- CD-ROM with number-crunching statistical software, procedures, and data sets from the presenting problems
- End-of-chapter exercises
- Multiple-choice final practice examination

Member Price           \$54.95  
Nonmember Price       \$57.95

ISBN-10: 0-071410-17-1; 2004; 416 pages; softbound

## Basic Clinical Pharmacokinetics, Fourth Edition

By Michael E. Winter, Pharm.D.

*Basic Clinical Pharmacokinetics* was designed to simplify pharmacokinetics to help busy practitioners understand and visualize basic principles. An easy-to-read case-study format has made the text a favorite among clinical professors, students, and practitioners. The text provides an introduction to the principles of monitoring drug therapy for those involved in the interpretation of drug levels in a patient care setting.

Part One provides a basic review of pharmacokinetic principles. Extensive

explanations, graphic illustrations, and detailed algorithms teach the principles of bioavailability, volume of distribution, clearance, elimination rate constant, and half-life. Part Two explains the clinical applications of these principles. Solutions to problems commonly encountered in the practice setting are discussed for specific drugs. Appendices provide commonly used equations and a glossary of pharmacokinetic terms and abbreviations.

New to this edition are chapters on tricyclic antidepressants and cyclosporine, an expanded chapter on dialysis, and updated information on choosing equations and interpreting plasma drug concentrations.

Member Price           \$64.95  
Nonmember Price       \$68.95

ISBN-13: 9780781741477; 2003; 576 pages; softbound

## Primer of Biostatistics, Sixth Edition

By Stanton A. Glantz, Ph.D.

This introduction to biostatistics presents a challenging topic in a readable and enjoyable format that assumes no prior knowledge of the subject. The reader is quickly prepared to understand test selection and to be able to evaluate biomedical statistics critically and knowledgeably.

The primer begins with the basics, including analysis of variance and the t-test, and then advances to multiple comparison testing, contingency tables, and regression. Examples from the current biomedical literature illustrate key

concepts throughout the book. New to the sixth edition are discussions of relative risks and odds ratios, more material on multiple comparison testing (e.g., the Holm test), a new two-color design, and review questions within each chapter.

Member Price           \$44.95  
Nonmember Price       \$48.95

ISBN-13: 978-0071435093; 2005; 500 pages; softbound

## Interpreting the Medical Literature, Fifth Edition

By Stephen H. Gehlbach, M.D., M.P.H.

Keeping up with the medical literature is a daunting task for most health care professionals, especially as medical research becomes increasingly sophisticated and statistical analysis more complex. This easy-to-follow guide will enhance your ability to demystify, interpret, and analyze research literature, making the task not only palatable but also quicker, easier, and more enjoyable.

A highlight of the Fifth Edition includes a new chapter on how to interpret conflicting studies. Other features of

this edition are an expanded discussion on meta-analysis and developing consensus; updated examples from the literature; and a thorough review of text and references.

Member Price           \$36.95  
Nonmember Price       \$40.95

ISBN-13: 978-0071437899; 2006; 308 pages; softbound

## The ACCP Scientific Series, Second Edition

An ACCP Publication Series

This comprehensive two-part series presents key concepts in biostatistics. It is available for purchase individually or as a series.

### Biostatistics I, Second Edition

Biostatistics I discusses types of research data and introduces the use of biostatistics. The 100-plus page syllabus and companion set of eight audiocassettes cover:

- Types of research data
- Introduction to the use of biostatistics
- Key concepts of statistical inference
- Statistical inference on interval data: t-tests
- Statistical inference on interval data: one-way analysis of variance

- Statistical analysis of lines: correlation and regression
- Statistical inference on nominal data: chi-square and Fisher's exact test
- Essential clinical concepts of biostatistics

2000; 143 pages; softbound

### Biostatistics II, Second Edition

Biostatistics II presents concepts in biostatistics. The 100-plus page syllabus and companion set of five audiocassettes cover:

- Types of errors in inferential statistics
- Repeated-measures analysis of variance and analysis of covariance
- Multivariable regression
- Nonparametric statistics for ordinal and interval data
- Statistical concepts and methods used to evaluate pharmacotherapy

2000; 161 pages; softbound

## Biostatistics for Clinicians and Researchers

An ACCP Online Educational Program

A solid understanding of biostatistics is essential for all clinical pharmacists. This online educational program is designed for both the beginning biostatistician and the experienced clinician and researcher. Developed by ACCP and its Pharmacokinetics/Pharmacodynamics Practice and Research Network, the two-part program presents basic and applied biostatistics.

Part I, Biostatistics Review and Primer, covers fundamentals of biostatistics and is intended both for beginners and those who want a refresher course. Types of

data, descriptive statistics, statistical tests, and regression and correlation analyses compose the core curriculum.

Part II, Implementing Biostatistical Applications in Research and Clinical Practice, introduces applied biostatistics. This section presents a practical approach to using biostatistical principles in clinical trial design, pharmacoconomics, and drug literature evaluation.

## Join ACCP Today

By joining ACCP, you help shape clinical pharmacy, advance the profession, and enhance patient care. Explore the benefits of ACCP membership on page 38.

## Fundamentals of Clinical Trials, Third Edition

By Lawrence M. Friedman, M.D.; Curt D. Furberg, M.D., Ph.D.; and David L. DeMets, Ph.D.

This text is intended for the clinical researcher who is interested in designing a clinical trial and developing a protocol. It also is of value to researchers and practitioners who must critically evaluate the literature of published clinical trials and assess the merits of each trial and the implications for the care and treatment of patients.

The organization of the text in *Fundamentals of Clinical Trials* presents the essentials in the order they would be used to develop a typical protocol. To

best aid the clinical trial researcher, a chapter is devoted to each of the critical areas of a protocol. The fundamentals described in this text are based on sound scientific methodology, statistical principles, and years of accumulated experience by the three authors.

## Grant Application Writer's Handbook, Fourth Edition

By Liane Reif-Lehrer, Ph.D.

*Grant Application Writer's Handbook, Fourth Edition*, addresses step by step the key points in developing grant proposals. Dr. Liane Reif-Lehrer has been funded by the National Institutes of Health (NIH) during her academic career and has served as a member of an NIH Study Section. In this text, Reif-Lehrer uses her extensive experience to guide both first-time grant seekers and those who have experience seeking funding, but who could benefit from updated information and tips on newly instituted guidelines.

### Sections include:

- Getting started
- Understanding the NIH review process
- Parts of the grant application
- Planning the research plan
- Writing the research plan
- Submitting and tracking the grant application
- Summary statements, rebuttals, and revisions
- Appendices and index

## Re-visioning Professional Education: An Orientation to Teaching

An ACCP Publication  
By Thomas D. Zlatic, Ph.D.

ACCP's *Re-visioning Professional Education: An Orientation to Teaching* presents educational principles that describe how learning takes place and offers a vision for the type of education required to prepare practitioners to provide pharmaceutical care. The book is designed for both new and experienced clinical faculty and preceptors.

Author Thomas D. Zlatic, professor of English and director of the Writing Center at St. Louis College of Pharmacy, invites readers to take instructional approaches beyond conveyance of information and to embrace

a philosophy, style, and manner of teaching that lead students to master the general and professional abilities necessary for competent pharmacy practice.

Zlatic discusses the nature of teaching, addressing the premise that teaching, as a profession, is based on fiducial or covenantal relationships. He makes a strong case for clinical educators to promote active learning that prepares practitioners to provide pharmaceutical care in all its dimensions, including knowledge, skills, attitudes, and values. He presents rationales for incorporating higher order thinking into the pharmacy curriculum and offers strategies for active learning to motivate students to attain educational goals related to the mission of pharmacy practice.

Chapter topics include defining and teaching critical thinking within professional contexts, devising active learning strategies that help students practice professional abilities, using assessment to structure learning, and employing writing to learn methodologies within professional courses and practice experiences.

## Clinical Faculty Survival Kit

An ACCP Publication

The *Clinical Faculty Survival Kit* offers the keys to a successful faculty appointment by focusing on solid career development. The guide focuses on personal and professional development and on understanding the academic environment.

Focused on new and junior faculty, this guide provides a foundation for properly developing a career while keeping a personal life in balance. The guide also targets senior faculty responsible for faculty mentorship and departmental leadership.

Advice is given on how to overcome the common barriers that faculty members encounter. Other key areas include scholarship excellence, time and project management, grantsmanship, personal development, research, and teaching. References and Web sites are included.

Member Price **\$19.95**  
Nonmember Price **\$25.95**

ISBN-10: 1-880401-82-7; 2004; 56 pages; softbound

## Team-Based Learning for Health Professions Education: A Guide to Using Small Groups for Improving Learning

Edited by Larry K. Michaelsen, Dean X. Parmelee, Kathryn K. McMahon, and Ruth E. Levine

Education in the health professions is placing greater emphasis on “active” learning—learning that requires applying knowledge to authentic problems and that teaches students to engage in the kind of collaboration that is expected in today’s clinical practice.

Team-based learning (TBL) is a strategy for accomplishing these goals. It can be used to transform passive, lecture-based coursework into an environment that promotes more self-directed learning and teamwork.

This book is an introduction to TBL for health professional educators. It outlines the theory, structure, and process of TBL; explains how TBL promotes problem solving and critical thinking skills; aligns with the goals of science and health courses; improves knowledge retention and application; and develops students as professional practitioners. The book provides models and guidance on team formation and maintenance, peer feedback and evaluation processes, and facilitation. A directory of tools and resources is also included.

Chapters are included in which instructors from a broad range of courses describe how they apply TBL. The book concludes with a review and critique of the current scholarship on TBL in the health professions and explores the need for future research.

## The Judicious Professor

By Paul Gathercoal and Forrest Gathercoal

*The Judicious Professor* provides an examination and analysis of teaching at the college and university level, with a focus on the sharing of responsibility for teaching and learning between the professor and students. Through theory and practical examples, the nature of the judicious professor is discussed and demonstrated.

Using the metaphor of the professor as the “keeper of the gate of knowledge,” the professor is characterized as the conscience of academic responsibility to the discipline as well as to greater society.

This book explores the importance of students’ perception: When students perceive the professor as a person who is sharing responsibility for the students’ academic achievement, the rate of student success will increase, as will the distribution of the knowledge base throughout society.

## Tools for Teaching

By Barbara Gross Davis, Ph.D.

*Tools for Teaching* serves as a rich compendium of classroom-tested strategies and suggestions designed to improve the teaching practice of beginning, mid-career, and senior faculty members. The author presents 49 teaching tools that focus on traditional tasks, such as writing a course syllabus and delivering a lecture, and newer, broader concerns, such as responding to diversity and using technology.

The author addresses issues such as making the most of students’ needs as an incentive for learning, using approaches

that encourage students to become active participants in learning, and inviting student feedback on what makes classes motivating.

Member Price **\$40.95**

Nonmember Price **\$43.95**

## Teaching at Its Best: A Research-Based Resource for College Instructors, Second Edition

By Linda B. Nilson, Ph.D.

*Teaching at Its Best* is a best-selling handbook loaded with practical teaching techniques, formats, classroom activities, and exercises. It covers topics relevant to today’s classroom such as technology and the Internet, simulations and games, diversity, service learning, and faculty evaluation systems.

This second edition retains the proven, practical information from the first edition but incorporates additional sections on using course portfolios, teaching with laptops, teaching problem-solving, and

providing incentives for students to complete their readings. The author also presents information on adult learning, the learning-centered syllabus, and the cognitive profile learning styles model. Chapters are devoted to classroom management, incivility, academic honesty, and grading.

Member Price **\$36.95**

Nonmember Price **\$43.95**

## Creating Significant Learning Experiences: An Integrated Approach to Designing College Courses

By L. Dee Fink, Ph.D.

Many teachers use content-centered approaches to instruction, but the author advocates a learning-centered approach in which courses are developed to create significant learning experiences for students. Fink draws on existing concepts in the literature on college teaching (e.g., active learning, educative assessment), adds some new ideas (e.g., a taxonomy of significant learning, a teaching strategy theory), and shows how to systematically combine these in a way that results in powerful learning experiences for students.

The book presents valuable conceptual and procedural tools for teachers in their work of designing instruction. Acquiring a deeper understanding of the design process will empower teachers to creatively design courses for significant learning in a variety of circumstances and settings.

Member Price            \$35.95  
Nonmember Price        \$41.95

ISBN-13: 978-0787960551; 2003; 320 pages; hardcover

## McKeachie's Teaching Tips: Strategies, Research, and Theory for College and University Teachers, 12th Edition

By Wilbert J. McKeachie, Sc.D., Ph.D.

*McKeachie's Teaching Tips* provides strategies for dealing with everyday problems of teaching at the university level and trying to maximize learning for every student. The suggested strategies are supported by research and are grounded in enough theory to allow teachers to adapt them to their own situations. The author does not suggest a set of recipes to be followed mechanically; rather, he gives teachers the tools they need to deal with the ever-changing dynamics of teaching and learning.

The book's organization and consolidation of chapters allow the text to maintain its handy pocket-sized length while incorporating new information. The 12th Edition features coverage of updated technology in the "Technology and Teaching" chapter, which includes issues such as the use of PowerPoint slides, plagiarism, and effective Internet research.

Member Price            \$50.95  
Nonmember Price        \$53.95

ISBN-13: 978-0618515561; 2006; 407 pages; softbound

## Mastering the Techniques of Teaching, Second Edition

By Joseph Lowman, Ph.D.

In this second edition of his classic resource, Joseph Lowman expands on his earlier model of effective teaching by placing greater emphasis on motivational skill and commitment to teaching. He presents a practical new learning model that compares six sources of influence on what and how students learn in a college course.

All types of teachers and instructors will discover options on how to organize classes and use group work to promote learning. They will also find a checklist

for assessing their classroom performance on video, detailed instructions for using video analysis to improve their technique, and an innovative approach to evaluating their overall performance.

Member Price            \$32.95  
Nonmember Price        \$35.95

## Engaging Ideas: The Professor's Guide to Integrating Writing, Critical Thinking, and Active Learning in the Classroom

By John C. Bean, Ph.D.

A practical nuts and bolts guide for teachers from any discipline who want to design interest-provoking writing and critical thinking activities. *Engaging Ideas* addresses the following issues:

- How teachers can encourage inquiry, exploration, discussion, and debate in their courses
- A wide variety of strategies for stimulating active learning and for coaching writing and critical thinking

- Concrete advice on how teachers can design courses, structure assignments, use class time, critique student performance, and model critical thinking activities

- How writing can easily be integrated with critical thinking

Nonmember Price        \$42.95

ISBN-13: 978-0787902032; 1996; 304 pages; softbound

## Active Learning: 101 Strategies to Teach Any Subject

By Mel Silberman, Ph.D.

This text offers myriad instructional strategies to engage students in learning any subject. The book presents practical strategies that require action and thinking from students about the subject matter, building teamwork among students during their learning experiences. Designed for the pre-service and in-service teacher, this book is effective for anyone teaching in middle school, high school, college, or a center for adult education.

Member Price \$42.95

ISBN-13: 978-0205178667; 1996; 189 pages; softbound

## Active Learning: Creating Excitement in the Classroom

By Charles C. Bonwell, Ph.D.; and James A. Eison, Ph.D.

This publication presents active learning as a teaching method that results in greater student involvement and knowledge retention. Included in the book are modifications to traditional lectures, alternative lecture formats, challenges in active learning, and practical strategies.

The authors discuss the importance of understanding the nature of active learning, the research regarding its use, and common obstacles to instructors in incorporating active learning in their classrooms. Faculty developers,

administrators, and educational researchers learn how they can encourage and promote active learning in their educational institutions.

## Engaging Large Classes: Strategies and Techniques for College Faculty

Edited by Christine A. Stanley, Ph.D.; and M. Erin Porter, Ph.D.

*Engaging Large Classes* taps the knowledge and skill of 34 experienced educators who teach large classes (100-plus students) in a broad range of disciplines and institutions. These contributing authors present strategies for structuring large classes to promote learning, managing the logistics of a large class, presenting alternatives to the lecture format, and maximizing the advantages of a large class.

Chapters in Part I address course design, planning and assessment, promoting civility, active and collaborative learning,

classroom technology, working with teaching assistants, and a review of research. Part II includes essays written by teachers of large classrooms from disciplines such as agriculture, business, clinical sciences, education, engineering, English, law, mathematics, sciences, and social sciences. The book concludes with a summary of strategies and key points for teaching in large classes.

## What's the Use of Lectures? First U.S. Edition of the Classic Work on Lecturing

By Donald A. Bligh

Based on decades of research and hands-on experience, the author wrote *What's the Use of Lectures?* to help college and university teachers develop and use lectures effectively. The book presents insights on the nature of teaching and learning in a classroom lecture, describing how students learn, how much knowledge they retain, and how to enhance their attention and motivation.

Expect to learn strategies for creating organized, thoughtful, and effective lectures. Topics include taking notes, using handouts, practicing different formats and

styles, obtaining feedback, overcoming difficulties, evaluating the lecture, and testing alternative methods to lectures. The book serves as a guide for anyone who aspires to be a skilled lecturer and teacher.

## Introduction to Rubrics: An Assessment Tool to Save Grading Time, Convey Effective Feedback, and Promote Student Learning

By Dannelle D. Stevens, Ph.D.; and Antonia J. Levi, Ph.D.

Research shows that rubrics save professors time while conveying meaningful and timely feedback for students. Rubrics also promote self-regulated and independent learning. The reason rubrics are rarely used in higher education is that few faculty members have been exposed to their use.

The authors describe a variety of processes to construct rubrics, including some that involve student participation. They demonstrate how interactive rubrics—a process involving assessors and

the assessed in defining the criteria for an assignment or objective—can be effective.

## Effective Grading: A Tool for Learning and Assessment

By Barbara E. Walvoord, Ph.D.; and Virginia Johnson Anderson, Ph.D. (Foreword by Thomas A. Angelo, Ed.D.)

This hands-on guide for evaluating student work offers an in-depth examination of the link between teaching and grading. *Effective Grading* uses grades as part of a process that, when integrated with course objectives, provides rich information about student learning. The authors reveal how the grading process can also be used for broader assessment objectives, such as curriculum and institutional assessment.

*Effective Grading* contains a wealth of special materials, including the American Association for Health Education's

Principles of Good Practice for Assessing Student Learning, types of assignments and tests, and a plan for a faculty workshop on grading and assessment. In addition, the book provides background into the principles of the grading process plus illustrative examples, offering faculty both a sound basis in assessment theory and the practical tools they need to put it to work.

## Classroom Assessment Techniques: A Handbook for College Teachers, Second Edition

By Thomas A. Angelo, Ed.D.; and K. Patricia Cross, Ph.D.

This handbook offers teachers at all levels how-to advice on classroom assessment, including:

- What classroom assessment entails and how it works
- How to plan, implement, and analyze assessment projects
- Twelve case studies that detail the real-life classroom experiences of teachers who are carrying out successful classroom assessment projects
- Fifty classroom assessment techniques
- Step-by-step procedures for administering the techniques
- Practical advice on how to analyze your data

## Educating for Professionalism: Creating a Culture of Humanism in Medical Education

Edited by Delese Wear, Ph.D.; and Janet Bickel, M.D.

The 13 essays in *Educating for Professionalism* examine the often conflicting ethical, social, emotional, and intellectual messages that medical institutions send students about what it means to be a doctor. Because this disconnection between what medical educators profess and what students experience is partly to blame for the current crisis in medical professionalism, the authors offer timely, reflective analyses of the work and opportunities facing medical education if doctors are to win public trust.

In their drive to improve medical professionalism within academic medicine, the editors have assembled thought-provoking essays that elucidate the many facets of teaching, valuing, and maintaining medical professionalism. The collection traces how the values of altruism and service can influence mission statements, admission policies, content of medical school ethics courses, student-led task forces, and mentoring programs.

## Promoting Civility in Pharmacy Education

By Bruce A. Berger, Ph.D., R.Ph.

Incivility is a growing problem within all aspects of pharmaceutical education and, indeed, across the spectrum of higher education. *Promoting Civility in Pharmacy Education* describes the issues involved and provides practical solutions. With this book, readers will learn which teaching characteristics lead to more/less incivility in the classroom, how to make expectations known in a nonconfrontational manner, and how to respond to incivilities from students, administrators, and faculty.

The book assists educators in addressing problems such as “passive” incivilities, which include inattention, lateness, asking for extensions on assignments, and making excuses, and “overt” incivilities, which include vulgar language, insulting comments, direct challenges to the teacher’s authority, and physical threats.

## The Teaching Portfolio: A Practical Guide to Improved Performance and Promotion/Tenure Decisions, Third Edition

By Peter Seldin, Ph.D.

In its third edition, *The Teaching Portfolio* has been significantly revised and expanded but continues to focus on self-reflection and documenting teaching performance. Its straightforward approach, practical suggestions, step-by-step instructions, and field-tested recommendations will prove invaluable to those involved in evaluating and improving teaching.

Now organized into five parts, this edition includes new information on Web-based electronic teaching portfolios, descriptions

of how seven colleges and universities have implemented portfolios, and 22 new sample teaching portfolios from an array of disciplines and institutions.

## The Joy of Teaching: A Practical Guide for New College Instructors

By Peter G. Filene, Ph.D.

Gathering concepts and techniques borrowed from outstanding college professors, *The Joy of Teaching* provides helpful guidance for new instructors developing and teaching their first college courses.

Rather than prescribe any single model for success, the author examines the advantages and disadvantages of various pedagogic strategies, inviting new teachers to make choices based on their own personalities, values, and goals.

The author tackles everything from syllabus writing and lecture planning to class discussions, grading, and teacher-student interactions outside the classroom. The book’s down-to-earth, accessible style makes it appropriate for new teachers in all fields.

## The Courage to Teach: Exploring the Inner Landscape of a Teacher's Life, 10th Anniversary Edition

By Parker J. Palmer, Ph.D.

The Tenth Anniversary Edition of *The Courage to Teach* takes teachers on an inner journey toward reconnecting with themselves, their students, their colleagues, and their vocations and toward reclaiming their passion for one of the most challenging and important of human endeavors.

The book builds on a simple premise: good teaching cannot be reduced to technique but is rooted in the identity and integrity of the teacher. Good teachers share one trait: they are authentically present in the

classroom, in community with their students and their subjects.

This edition features a bonus CD featuring a 45-minute conversation between the author and two of his colleagues reflecting on what they have learned from working with thousands of teachers.

## Into the Classroom: Developing the Scholarship of Teaching and Learning

By Thomas Hatch, Ed.D.  
(Foreword by Lee S. Shulman, Ph.D.)

Teachers are often sequestered in their classrooms, unable to see what their colleagues are doing. All too often, good teachers have few, if any, opportunities to share their teaching techniques with others in their profession. *Into the Classroom* brings teaching into the public arena, making it possible for many people to see the nature and quality of the teaching.

By making teaching more public, unprecedented opportunities are created for teachers to learn from one another

and for others to participate constructively in supporting and improving instruction. *Into the Classroom* outlines the issues that must be addressed for the teaching profession to become a true learning profession.

## The Wisdom of Practice: Essays on Teaching, Learning, and Learning to Teach

By Lee S. Shulman, Ph.D.

What do teachers need to know to teach well? How can teachers best be educated, and how can we assess their accomplishments as teachers? In what ways is the professional preparation of teachers comparable with the preparation of physicians and other members of learned professions? What kinds of educational research can provide a deeper understanding of teaching, learning, and the reform of education?

These are just some of the questions answered in this landmark collection of

Lee Shulman's best work. Shulman, a pioneer in the field of teaching and teacher research, has long influenced teachers and researchers.

## Clinical Pharmacy Services: Successful Practices in Community Hospitals

An ACCP Publication

By Karen E. Koch, Pharm.D., BCPS, FASHP; and Bob L. Lobo, Pharm.D., BCPS

Working from the premise that clinical pharmacy services are an essential component of medical care in today's community hospitals, this how-to guide takes the reader through each step in developing clinical pharmacy services. The authors explain how to identify practice opportunities with potential for the greatest impact, how to identify potential challenges and barriers in the institution, and how to implement the service.

A series of 22 structured monographs highlight a variety of clinical pharmacy services delivered in both large and small

community hospitals. The monographs provide examples of mainstream services (anticoagulation and nutrition), comprehensive services, pediatric services, and innovative services (case management and research). The book also presents an overview of collaborative drug therapy management.

## How to Develop a Business Plan for Pharmacy Services

An ACCP Publication

By Glen T. Schumock, Pharm.D., MBA, FCCP; and JoAnn Stubbings, R.Ph., MHCA

*How to Develop a Business Plan for Pharmacy Services* provides a valuable resource for planning, developing, launching, and evaluating business services for the pharmacy field. A business plan is essential if you are thinking of starting a business, but it is also an important tool for established businesses. Viable businesses are dynamic; they change and grow. A pharmacy service launch or expansion needs a business plan that can be reviewed and revised as new goals are set.

This new book will assist pharmacy clinicians,

managers, and leaders in implementing new services and enhancing existing services by providing a systematic approach to the business development process. The materials presented are applicable to pharmacy services in hospitals, community practice, managed care organizations, clinics, and elsewhere. Teachers and students will find the book very useful in preparing for real-world practical settings. Key features of the new book include:

- An in-depth presentation of the general process of business planning
- A step-by-step analysis and insightful questions presented in a format designed to lead the reader through the business plan development process in a comprehensive fashion
- Model business plans developed by the American College of Clinical Pharmacy and sample business plans written by students at the University of Illinois based on the instructions provided in this book
- A companion CD-ROM with financial spreadsheet models and key questions to answer in developing a business plan presented in a workbook format

## How to Prove the Value of Your Clinical Pharmacy Services When Resources Are Limited

An ACCP Educational Program

This program addresses a critical niche in the clinical pharmacy practice setting: How to prove the value of your services when resources are limited. A panel of experts introduces strategic measures and several case studies to explain how administrators judge the value of your patient care services.

This program:

- Defines methods to assess and justify your clinical services
- Discusses clinical, economic, and humanistic outcomes that can be used to justify your services
- Discusses cost-benefit analysis and how to use it to justify your services
- Explains the critical importance of using a business plan to justify your services

Derived from live educational presentations, the program is delivered on a CD-ROM containing audio-synchronized slides and lectures. A printed handout of the presentation slides also is provided. Additional course materials included in this offering, a \$175.00 value if purchased separately, are:

- *How to Develop a Business Plan for Pharmacy Services*
- *Pharmacoeconomics and Outcomes: Applications for Patient Care, Second Edition*
- *Pharmacoeconomics and Outcomes: Applications for Patient Care, Case Studies*

## Collaborative Drug Therapy Management Handbook

By Sarah A. Tracy, Pharm.D., BCPS; and Cynthia A. Clegg, B.S.Pharm., MHA

This practical guide to collaborative drug therapy management addresses the core elements necessary for establishing and maintaining a collaborative drug therapy management (CDTM) program. Pharmacists and administrators seeking to initiate, improve, or expand CDTM services will value this useful framework for achieving desired outcomes.

The evidence-based approach begins with in-depth guidelines created by a team of clinical pharmacy specialists at Harborview Medical Center in Seattle. Case studies illustrate the use of these guidelines in daily practice. Chapters

on quality assurance provide information on pharmacist privileging and measuring outcomes and form the basis for improving and maintaining quality practice.

The book includes an overview of the requirements, first steps, and potential obstacles to this practice model, which has gained in importance with the greater emphasis on drug therapy management.

## Pharmacy Law Desk Reference

Edited by Delbert D. Konnor, Pharm.M.S., Pharm.B.S., R.Ph.

*Pharmacy Law Desk Reference* is a primer on the legal aspects of pharmaceutical practice, providing background on foundational legal concepts and guidance on the Food, Drug, and Cosmetic Act (FDCA), the Controlled Substances Act (CSA), and the Federal Trade Commission (FTC). This reference book presents major topics such as professional liability insurance; the need for supportive personnel in pharmacy practice; patent law, trademarks, and copyrights; law and ethics; business law; the Health Insurance

Portability and Accountability Act of 1996 (HIPAA); electronic prescribing; pharmacy compounding; forged prescription orders; and medication error reporting.

Handy tables, figures, and exhibits make complex information easily accessible. Each chapter is written by a nationally recognized authority on one or more aspects of pharmacy law.

## Communication Skills for Pharmacists: Building Relationships, Improving Patient Care, Second Edition

By Bruce A. Berger, Ph.D., R.Ph.

*Communication Skills for Pharmacists* helps practicing pharmacists and pharmacy students develop the communication skills they need to deliver pharmacy care. The book covers key communication skills: listening and empathic responding; supportive communication; persuasive communication; assertiveness; managing conflict; dealing with angry patients; and helping patients accept the behavior changes needed to manage their illness.

The book features dozens of examples of good and bad pharmacist–patient and pharmacist–physician dialogs. The book also presents a detailed patient counseling checklist designed to help pharmacists with the timing and organization of the information that they provide to patients and that they receive from patients. The book advises pharmacists on how to contact, build rapport with, and discuss drug-related problems with physicians.

## The Pharmacy Professional's Guide to Résumés, CVs, & Interviewing, Second Edition

By Thomas P. Reinders, Pharm.D.

Geared specifically to pharmacists, this updated and enhanced edition serves as a “how-to” reference for pharmacy professionals with step-by-step instructions on writing résumés, CVs, and cover letters and preparing for the interview. The “start-to-finish” approach walks the reader through each phase of the process, providing helpful advice and sample forms along the way. A CD-ROM containing additional samples of résumés and CVs is packaged with the book.

## Writing, Speaking, & Communication Skills for Health Professionals

Edited by Stephanie Barnard; Kirk T. Hughes, Ph.D.; and Deborah St. James

Written by experts in the field of health care communications, this text is a “must-have” for every health care professional. Topics range from organizing data to writing conference posters. The authors present tips for improvement and examples for guidance. Also discussed are teaching, practice building, meeting skills, and business writing. This book is an excellent primer for students or seasoned professionals wanting to develop and improve their skills. Content includes discussions on:

- Reading science
- Writing science
- Speaking science
- Teaching science
- The business aspects of health care

## The Conscience of a Pharmacist: Essays on Vision and Leadership for a Profession

By William A. Zellmer

In recognition of the immense gap between the potential and the actual performance of pharmacy as a health profession, this book offers an alternative to the reactions of denial, resignation, frustration, and cynicism that are often the response to this recognition. The more constructive response is a dedication to reform of the profession in whatever sphere of influence a pharmacist has.

That spirit of reform shaped the essays in this book, which were first published as editorials in the *American Journal of*

*Health-System Pharmacy* (AJHP). The editorials selected for this book offer insight into the state of pharmacy today, as well as a historical perspective on past choices the profession has made.

The hope is that this book will attract and arouse new readers—inspiring them to make pharmacy a better profession.

## The Leadership Experience

Leadership Development Customized to Pharmacy Professionals

ACCP in cooperation with LeaderPoint, offers a comprehensive management and leadership development program designed for pharmacy professionals who currently have, or will be assuming, significant management and leadership responsibilities. *The Leadership Experience* is a 3.5-day session in which participants, working in groups, assume senior management roles. They analyze information, make decisions, and live with the consequences of their decisions. On completion of *The Leadership Experience*, participants will know how to:

- Create and maintain cooperation among people
- Diagnose and correct dysfunctional group dynamics
- Bring people together to seize opportunity
- Integrate opportunity into current strengths
- Conduct activities consistent with strategy
- Contribute to the formulation and implementation of strategy
- Develop a strategic plan
- Read and analyze financial reports

More than 100 ACCP members have completed this course during the past 8 years. For complete program information, including program goals and target audience, program content, learning objectives, and course location, schedule, and fees, visit the LeaderPoint Web site at [www.leaderpoint.biz/accp.htm](http://www.leaderpoint.biz/accp.htm).

The American College of Clinical Pharmacy is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education. Participants in *The Leadership Experience* can receive up to 30.0 contact hours of continuing pharmacy education upon completion of the course and submission of a Verification of Attendance Form. Universal Program Number: 217-000-08-057-L04-P. Statements of credit will be mailed from ACCP by July 31, 2008.

## Good to Great: Why Some Companies Make the Leap ... and Others Don't

By James C. Collins, M.B.A.

Based on the results of a 5-year study, *Good to Great* details the universal distinguishing characteristics that lead a company from good to great. Using tough benchmarks, the author and his research team identify 28 elite companies that made the leap to great results and sustained those results for at least 15 years. After analyzing extensive interviews and data, Collins and his research colleagues discover the key determinants of greatness.

Among the major determinants discussed are the type of leadership required to achieve greatness, the need for a culture that combines discipline with entrepreneurship, the advantages of making the most of what a company does well, and the pitfalls of radical change programs and restructurings. The author's conclusions in *Good to Great* have surprised many readers and revealed new insights in almost every area of management strategy and practice.

## Synchronicity: The Inner Path of Leadership

By Joseph Jaworski, J.D.

The conventional view of a leader emphasizes conspicuous accomplishments or charisma. The author argues that leadership is not about positional power or accomplishments. Instead, true leadership is about creating a domain in which people continually learn and become more capable of participating in their unfolding future. In the author's words, a real leader sets the stage on which "predictable miracles" synchronistic in nature can and do occur.

*Synchronicity: The Inner Path of Leadership* describes three basic shifts of mind required for individuals to create and discover an unfolding future—shifts in how they see the world, how they understand relationships, and how they make commitments. The author offers a deeper understanding of how human beings might individually and collectively tap their potential to shape the future instead of merely responding to the forces at large.

## The 8th Habit: From Effectiveness to Greatness

By Stephen R. Covey, M.B.A.

As a follow-up to the author's 1992 classic, *The 7 Habits of Highly Effective People*, Covey introduces another essential habit in his new book, *The 8th Habit: From Effectiveness to Greatness*. "To find our voice and inspire others to find theirs" is the eighth habit the author presents as a method to move individuals and organizations beyond effectiveness toward greatness.

To thrive, innovate, excel, and lead in what Covey calls the "New Knowledge Worker Age," leaders and individuals must build on

and move beyond effectiveness. The call of this new era is for greatness; it's for fulfillment, passionate execution, and significant contribution.

Accessing the higher levels of human genius and motivation in today's new reality requires a change in thinking, a new mind-set, a new skill-set, and a new tool-set—in short, a whole new habit.

## Leadership and Self-Deception: Getting Out of the Box

By The Arbinger Institute

*Leadership and Self-Deception* reveals that there are only two ways that leaders function. They are either the source of leadership problems or the source of leadership success. The authors use an entertaining and compelling story to examine this premise, identifying self-deception as the underlying cause of leadership failure and showing how any leader can overcome self-deception to become a consistent catalyst of success.

The authors assert that the key to leadership lies deeper than any particular

technique, behavior, or skill. It lies in how an individual is and his or her way of being. The authors advocate a state of being that is honest, straightforward, and genuine. This book demonstrates how individuals enter a state as leaders and how it is possible to change. Understanding and applying this principle is the key to leadership transformation and the key to becoming a consistent catalyst for success.

## The Leadership Challenge, Fourth Edition

By James M. Kouzes, Ph.D.; and Barry Z. Posner, Ph.D.

This trusted leadership resource is now updated and revised for a new generation. After 20 years in print and three editions, this text continues to be a bestseller and premier resource on becoming a leader. This new edition, with streamlined text, more international and business examples, and a graphic redesign, offers more readability and accessibility. The fourth edition has been updated with the latest research and case studies and offers new stories of real people achieving extraordinary results. The authors' central theme remains: "Leadership Is Everyone's

Business." The "Five Practices" and "Ten Commitments" have been proved by many dedicated, successful leaders. This edition, with almost one-third new material, places the emphasis on the global community and business leaders.

## On Becoming a Leader

By Warren Bennis, Ph.D.

Warren Bennis's formative years, in the 1930s and 1940s, were characterized by severe economic hardship and a world war that showcased the extreme depths and heights to which leaders could drive their followers. Today's environment is similarly chaotic, turbulent, and uncertain. *On Becoming a Leader* has served for nearly 15 years as a beacon of insight, delving into the qualities that define leadership, the people who exemplify it, and the strategies that anyone can apply to become an effective leader.

This expanded and updated book features a provocative introduction on the challenges and opportunities facing leaders today, with additional updates and current references throughout.

## On Leadership

By John Gardner, Ph.D.

Leaders today are familiar with the demand that they come forward with a new vision, but it is not a matter of fabricating a new vision out of whole cloth. A vision relevant for today will build on values deeply embedded in human history and in our own tradition. The materials out of which we build the vision will be our moral strivings, today and in the distant past.

Most of the ingredients of a vision for this country have been with us for a long time. That we have failed and fumbled in some

of our attempts to achieve our ideals is obvious. But the great ideas still beckon—freedom, equality, justice, and the release of human possibilities. The vision is to live up to the best in our past and to reach the goals we have yet to achieve with respect to our domestic problems and our responsibilities worldwide.

## A Force for Change: How Leadership Differs from Management

By John P. Kotter, Ph.D.

John P. Kotter, who focused on why we have a leadership crisis in *The Leadership Factor*, shows here, with compelling evidence, what leadership really means today. He discusses why it is rarely associated with larger-than-life charismatics, precisely how it is different from management, and yet why both good leadership and management are essential for business success, especially for complex organizations operating in changing environments.

Leadership, Kotter clearly demonstrates, is, in fact, a process that creates change,

which often involves hundreds or even thousands of “little acts of leadership” orchestrated by people who have the profound insight to realize this process.

## Coming Soon . . .

### Pharmacist's Guide to Lipid Management

*Coronary artery disease is the number one killer of both men and women. Pharmacists can have a significant effect on lipid management if they understand all the risk factors, how to risk-stratify patients, and how to optimize treatment while minimizing adverse effects. Doses need to be titrated to optimize their effect; costs must be managed; and patients need to be identified for primary prevention—all of which are roles an informed pharmacist can perform.*

ACCP will be presenting the *Pharmacist's Guide to Lipid Management* in fall 2008. This guide will provide clinical pharmacists with the tools they need to manage patients' lipid treatment. It will provide an overview of pathophysiology, the role of lipids, a review of the drugs and clinical data supporting their use, and methods for implementing lipid management into patient practice. Ambulatory care pharmacists and inpatient pharmacists, together with physicians, nurse practitioners, and physicians' assistants involved in managing lipid disorders in patients, would benefit from this handbook.

### Ambulatory Care Survival Guide, Second Edition

ACCP is presenting a new, updated version of this must-have resource for practitioners in ambulatory care. Whether a new practitioner or one already practicing, you will want to have this updated and expanded guide containing information submitted and reviewed by members of the ACCP Ambulatory Care Practice and Research Network (PRN).

The guide is divided into extensive sections on clinical services and education, and it includes an appendix for the most current pertinent references. It is an excellent resource for sample collaborative practice agreements, protocols, evaluation tools, and policies that apply to your ambulatory practice.

Look for the *Ambulatory Care Survival Guide, Second Edition*, in summer 2008.

## ACCP Academy

The ACCP Academy is designed to deliver a flexible, curricular approach to enhance clinical pharmacists' abilities in their major areas of responsibility.

The ACCP Academy provides four unique professional development programs, which culminate in a certificate of completion in: Teaching and Learning (released in 2006), Leadership and Management (released in 2007), Research and Scholarship Development (released in 2008), and Clinical Practice (planned for release in 2009).

These certificate programs focus on interactive instruction, guidance from mentors, and opportunities to apply key principles to everyday professional pursuits. Participants who complete program curricular requirements and portfolio requirements will receive a certificate and additional recognition as graduates of the ACCP Academy.

For complete information on the ACCP Academy certificate programs, including curricular schedules and enrollment information, visit the ACCP Web site at <http://academy.accp.com>.

## ACCP Advocacy Agenda for 2008

ACCP seeks to achieve targeted, strategic advocacy objectives through a combination of activities involving the professional staff, multiorganizational coalitions, and our individual members. The objectives are consistent with the College's strategic plan and the expressed and identified needs of the membership as articulated through the ACCP Board of

Regents. These activities are directed primarily at the federal level, although certain state and regional issues may also attract the involvement of the College. The priority issues for 2008 are:

- **Inclusion of and payment for the direct patient care medication management services of qualified pharmacists under Part B of the Medicare program and other major health insurance plans.** Continue to play a central coordinating role in the Leadership for Medication Management coalition to achieve introduction of legislation in Congress that results in the inclusion of the direct patient care medication management services of qualified pharmacists under Part B of the Medicare program. Further, to actively pursue legislative or regulatory strategies that may achieve comparable results as part of the process of Congressional evaluation, oversight, and possible legislative changes to the Medicare Part D outpatient drug benefit and its associated medication therapy management (MTM) component.

- **Promote enhanced quality, structure, and information dissemination concerning medication therapy management services (MTMS) under Medicare Part D.** Increase communication and interaction with the Centers for Medicare and Medicaid Services (CMS) to promote more specific structure and enhanced evaluation of the MTMS component of the Medicare Part D outpatient drug benefit.
- **Focus Interactions with the Agency for Healthcare Research and Quality (AHRQ) on the issue of Quality of Medication Therapy Management Programs within Medicare Part D plans.** Interact regularly with the AHRQ staff responsible for quality assessment of the Medicare Part D benefit, with particular attention to MTM programs, models of collaborative care, and performance-based practice models.
- **Continue to seek restoration of Medicare funding for specialized residency training under Medicare prospective payment rules.** In cooperation with ASHP and AACCP government affairs staff, work with CMS to establish benchmarks and data supporting the value of and need for Medicare support for second-year and 2-year integrated residency training for pharmacists in facilities that are Medicare providers.
- **Monitor and influence, as needed, legislation and regulations dealing with issues of medication safety and rational medication use.** Work with appropriate health associations and advocacy organizations to promote greater medication safety through more active involvement of pharmacists in patient care.
- **Support for Pharmacy Professional Education Programs.** Working with AACCP, continue advocacy for passage of legislation and/or enhanced appropriations for existing programs to enhance support for the nation's pharmacy education infrastructure to help ensure an appropriate supply of pharmacy professionals for their roles in clinical practice, education, and research.
- **National Health Service Corps (NHSC)—Seek pharmacist participation in NHSC loan repayment programs available through federally qualified health centers, as authorized by Senate language that permits the HHS Secretary to include pharmacists in the program.** Monitor House of Representatives NHSC reauthorization to seek clarification on pharmacist eligibility for the program.
- **Title VII Funding**—Support the development of interprofessional health education programs by working with Congress to make programs authorized under Title VII of the Public Health Service Act a significant aspect of comprehensive health professions education.

- **Nomination of clinical pharmacists to federal government agency and related advisory panels.** Working collaboratively with other science-based pharmacy organizations and appropriate agencies of the federal government, identify and promote the inclusion of clinical pharmacists for participation on NIH study sections, FDA advisory panels, and similar agency and related groups (e.g., United States Pharmacopeia) involved in both basic and clinical research in pharmacotherapy and related sciences.

#### Related Supporting Messages:

**Practice Model Change**—Promote better understanding of CDTM as a more comprehensive model of care that better achieves the goals being expected of MTM—broaden the distribution of ACCP’s 2005 message to IOM concerning the need for a “pharmaco-therapist” as an integral member of the health care team.

**Payment Policy Change**—Encourage and promote dialogue and policy discussions seeking change from the traditional drug product-based reimbursement structure for pharmacy to payment for the provision of clinical services.

**Access**—Work to ensure a patient-oriented structure of care. Expand the pool of beneficiaries eligible for MTMS. Encourage payers across all sectors to expand their provision of MTM/CDTM services to further encourage safe and appropriate medication use. (According to the IOM report, one-third of adults take five or more medications each week—similar to the criteria required for MTMS under Part D.)

**Program Costs**—Promote clinical pharmacists’ services as a mechanism to help reduce the financial burden on Medicare/Medicaid/SCHIP programs resulting from medication errors and adverse drug events. Also help ease the burden on employers and small businesses struggling with rising health care costs.

**2008 Elections**—Encourage ACCP member participation at all levels in the 2008 election process, helping members understand the long-term benefits of sophisticated political activism and helping candidates better understand the role of the clinical pharmacist in the health care delivery team.

#### Future Trends

FDA reform—Encourage a balanced FDA approval process that will not needlessly prevent access to needed drugs in the marketplace but that will still ensure safety and encourage more aggressive and effective postmarketing surveillance.

Impending economic challenges of Medicare and Social Security spending (the “baby boom” problem)—Work with other organizations seeking policy changes to promote the long-term viability of both programs.

Work with allies and in coalitions to help create a climate in which the budgetary and appropriations processes recognize the importance of reducing costs and improving quality through continued investment in public health; health care research and information; and access to preventive care.

#### ACCP Research Institute

The research mission of ACCP is to advance human health and quality of life by facilitating the generation, dissemination, and application of new knowledge that promotes the safe, effective, and cost-effective use of drugs.

The ACCP Research Institute—a not-for-profit, charitable organization—helps the College meet its research mission by:

- Directly funding health services, clinical, and translational research
- Supporting the training and career development of clinical pharmacy researchers

The Research Institute’s initiatives benefit patient care by directly supporting evidence-based pharmacotherapy. Since its founding, the Research Institute has provided \$4 million in support of ACCP members’ research and research training. The Research Institute’s programs currently include the following:

- Frontiers Career Development Research Awards
- Investigator Development Research Awards
- Research Fellowships

The ACCP Research Institute is expanding its investigator development initiatives in 2008 by offering the *Focused Investigator Training (F.I.T.) Program*, to help experienced researchers secure extramural funding, and the *Research and Scholarship Academy Program*, to help clinical pharmacists develop fundamental research skills.

Other programs available through the ACCP Research Institute include the following:

- Anticoagulation Traineeship
- Heart Failure Traineeship
- Mini-sabbaticals, offered through several Practice and Research Networks (PRNs)

Please visit [www.accp.com/ri/index.php](http://www.accp.com/ri/index.php) for details on any of the above programs and to make a charitable tax deductible donation to the ACCP Research Institute.

## ACCP Recruitment Resources

The ACCP Career Development Center is a valuable resource for pharmacy professionals and recruiters alike. Located on ACCP's Web site at [www.accp.com/career.php](http://www.accp.com/career.php), the center's resources include:

### Online Position Listings

ACCP offers a 24-hour, 7 days/week online directory of clinical pharmacy position listings. Advertise position listings for 60 days, with the ability to update and edit the position listing at any time within those 60 days.

Recruiters use this database to promote available opportunities, including residencies, fellowships, clinical pharmacy practitioners, tenure-track clinical faculty, nontenure-track clinical faculty, pharmacy managers, pharmaceutical industry positions, graduate programs, and academic administrators.

For more information, please e-mail [accp@accp.com](mailto:accp@accp.com). Rates for online position listings are available on the ACCP Web site.

### Recruitment Forum

ACCP's Annual Meeting is the site for this live recruitment event. ACCP offers a unique online position and applicant database that allows applicants and employers to connect before coming to the meeting.

Once on-site, meet with prospective applicants and employers in an informal environment. This year's Recruitment Forum will be held on Tuesday, October 21, 2008, in Louisville, Kentucky.

### ACCP Report Position Listings

Advertise available positions in the ACCP Report to reach qualified clinical pharmacy candidates. The ACCP Report is a monthly online newsletter available to all ACCP members. Each issue features current position listings, including available clinical pharmacy opportunities in academia, clinical practice, and the pharmaceutical industry.

To reserve your desired listing date, please e-mail [accp@accp.com](mailto:accp@accp.com).

### Monthly rates for position listings are:

|                 |            |
|-----------------|------------|
| Up to 250 words | \$550.00   |
| 251–500 words   | \$700.00   |
| 501–750 words   | \$850.00   |
| 751–1,000 words | \$1,100.00 |

## ACCP 2008–2009 Meeting Calendar

### 2008 Spring Practice and Research Forum and Updates in Therapeutics: The Pharmacotherapy Preparatory Course

April 5–9, 2008  
Phoenix Convention Center  
Phoenix, Arizona

### 2008 Oncology Pharmacy Preparatory Review Course

Co-sponsored with the American Society of Health-System Pharmacists

May 1–3, 2008  
Tampa Marriott Waterside Hotel and Marina  
Tampa, Florida

### 2008 Annual Meeting

October 19–22, 2008  
Kentucky International Convention Center  
Louisville, Kentucky

### 2009 ACCP/ESCP International Congress and Updates in Therapeutics: The Pharmacotherapy Preparatory Course

April 24–28, 2009  
Orange County Convention Center  
Orlando, Florida

### 2009 Oncology Pharmacy Preparatory Review Course

Co-sponsored with the American Society of Health-System Pharmacists

Date and Location TBD

### 2009 Annual Meeting

October 18–21, 2009  
Anaheim Convention Center  
Anaheim, California

# ACCP Membership: Connect with Your Future

## Our Past ... Your Future

In 1979, a small group of forward-thinking individuals realized the need to advance the evolving practice of clinical pharmacy. These charter members founded ACCP to meet this need and thereby laid the foundation for an organization that now serves nearly 10,000 clinical pharmacists.

Today, clinical pharmacists work in virtually every health care practice setting, dispelling the long-held belief that “clinical pharmacy” resides only in academic and tertiary care institutions. ACCP is an organization designed to meet your professional needs as the practice of clinical pharmacy continues to evolve.

## ACCP: Your Partner in Every Practice Setting

From its inception, ACCP has championed the advancement of clinical pharmacy. ACCP promotes leadership, professional development, research opportunities, and advocacy to support important issues facing the profession. With a diverse membership that spans all practice settings, ACCP is the leading organization in clinical pharmacy.

ACCP is enhancing the practice of clinical pharmacy and improving the lives of the patients we serve. We invite you to learn more about us and discover how you can benefit by joining ACCP.

## Broaden Your Expertise and Focus Your Skills

ACCP membership provides immediate access to an international network of experts and specialists engaged in clinical pharmacy. Join an ACCP Practice and Research Network (PRN) to find members whose professional interests closely match your own.

### Practice and Research Networks (PRNs): Connections for Your Future

An ACCP PRN is an active group of members who interact frequently via electronic listserve messages. These communications facilitate the timely exchange of information that can improve your practice and the quality of patient care. As an ACCP PRN member, you will gain immediate access to an international network of experts and specialists engaged in all facets of clinical pharmacy.

A wide variety of professional networks are available to you. Explore 21 ACCP PRNs representing specific therapeutic and professional interest areas. Sign up for PRN membership(s) when you complete the ACCP membership application on page 42 of this catalog.

# You Belong at ACCP

## Advance Your Professional Development

Whether you are pursuing a career as a practitioner, researcher, administrator, or educator, ACCP membership will enhance your professional knowledge and skills with cutting-edge educational offerings, timely publications, and superior programming available through ACCP's national meetings and distance-learning programs.

**ACCP Professional Development Services:**  
**Your Resource for Success**

### ACCP National Meetings

Network with colleagues while updating your knowledge and clinical skills by attending ACCP's Annual Meeting or Spring Practice and Research Forum/*Updates in Therapeutics: The Pharmacotherapy Preparatory Course*. ACCP's meetings provide a broad array of high-quality educational programming on emerging issues in clinical pharmacy practice, research, and education.

### Board Certification Preparatory Materials

Prepare for specialty certification examinations by attending live review sessions held at ACCP national meetings and by purchasing electronic or print study materials. Members receive discounted rates.

### Board Recertification Materials

Maintain your pharmacotherapy specialty certification by using the *Pharmacotherapy Self-Assessment Program (PSAP)*. Board Certified Oncology Pharmacists can participate in a professional development program for oncology recertification. Members receive discounted prices for both programs.

### The ACCP Academy

ACCP's Academy offers a flexible, curricular approach to enhancing ACCP members' abilities in their major areas of responsibility. The Academy provides four unique professional development programs leading to certificates of completion in the following key areas: Clinical Practice Development, Leadership and Management, Research and Scholarship Development, and Teaching and Learning. Certificate program curricula will be offered during each ACCP national meeting.

### *Pharmacotherapy: The Journal of Human Pharmacology and Drug Therapy*

*Pharmacotherapy* is an essential professional reference for the clinical pharmacist. All members receive a subscription to ACCP's peer-reviewed scientific journal—now available in both electronic and print formats. Each monthly issue of *Pharmacotherapy* contains exceptional and innovative articles that will enhance your drug therapy expertise.

# Join Us and Focus Your Professional Future!

## Extend Your Clinical Influence through Advocacy and Research Initiatives

As the profession's patient care roles continue to evolve, ACCP is positioned to advocate for you and your patients. Key issues facing our profession include recognizing pharmacists as health care providers within Medicare and ensuring rational drug therapy.

## ACCP Advocacy Initiatives: Uniting Members to Influence Health Policy Outcomes

### ACCP Advocates Program

The ACCP Advocates Program is an ongoing initiative to enhance the effectiveness and frequency of the College's interactions and relationships with officials in Congress and the Executive Branch of the federal government, including regulatory agencies.

The ACCP Advocates Program will identify, develop, and support the skills and abilities of ACCP members who serve ACCP as active "grassroots" advocates for the legislative, regulatory, and policy priorities of ACCP. These members will work directly with and be supported by ACCP government and professional affairs staff based in Washington, D.C.

### Legislative Action Center

Members are encouraged to visit the ACCP Legislative Action Center at [www.capwiz.com/accp](http://www.capwiz.com/accp). This Web-based interactive tool allows you to review ACCP's complete Advocacy Agenda and receive notification about important legislation affecting clinical pharmacy. This Web site also provides information about your elected officials and allows you to contact them by e-mail.

## The ACCP Research Institute: Promoting Clinical Pharmacy's Research Mission

### Advancing the Future of Clinical Pharmacy Research

The ACCP Research Institute (RI) advances pharmacotherapy by supporting and promoting research, training, and education in clinical pharmacy through fellowships, research awards, training grants, and investigator development programs. The Frontiers Fund has supported 26 new research studies with total budgets of more than \$800,000.

The ACCP RI is expanding its investigator development initiatives in 2008 by offering the *Focused Investigator Training (F.I.T.) Program*, to help experienced researchers secure extramural funding, and the *Research and Scholarship Development Academy Certificate Program*, to help clinical pharmacists develop fundamental research skills.

Discover  
more reasons to  
belong to ACCP.

Visit ACCP online at  
[www.accp.com](http://www.accp.com)

# Students, Residents, and Fellows

## ACCP ... Your Future Is Here

Partner with ACCP as you take your next steps toward achieving your professional goals. We invite you to join a dynamic, member-driven organization and experience the many unique benefits and opportunities available to you during your professional training.

### Discover Career Opportunities

#### Online Position Listings

Available 24 hours a day, this Web-based service allows you to explore available clinical pharmacy positions across the country.

### Recruitment Forum

Held during the ACCP Annual Meeting, this event provides a head start on identifying career opportunities and professional positions.

### Directory of Residencies, Fellowships, and Graduate Programs

Seeking additional training? Find key information on more than 500 training programs in ACCP's online and print directory.

### Expand Your Professional Network

#### Practice and Research Networks (PRNs)

These groups provide a means for ACCP members with common practice and research interests to gather for networking, listserv interaction, and continuing professional development. There are 21 PRNs representing major therapeutic areas and professional interests. Learn from clinical experts online by monitoring and participating in listserv discussions.

### Educational Conferences

ACCP holds two meetings each year: the Annual Meeting in the fall and the Spring Practice and Research Forum/*Updates in Therapeutics: The Pharmacotherapy Preparatory Course*. Each meeting provides high-level educational programming and excellent networking opportunities.

The benefits of ACCP membership are clear.  
*Join us today and bring your future into focus!*

Your Membership Category

Full Member - \$215

Pharmacists who have been practicing clinical pharmacy for three or more years since graduation from a college of pharmacy. (Must submit completed four-page application, which is available at [www.accp.com](http://www.accp.com), and enclose with a copy of curriculum vitae.)

Associate Member, Out of Training - \$215

Pharmacists who have been practicing clinical pharmacy for less than 3 years since graduation from a college of pharmacy.

Affiliate Member - \$215

Individuals from pharmacy disciplines other than clinical pharmacy or from other health science professions.  
Field of practice \_\_\_\_\_

Associate Member, Fellow/Graduate Student - \$75

Fellows in a fellowship program. Please provide program director's name and year of completion:  
\_\_\_\_\_

Associate Member, Resident - \$75

Residents in a pharmacy residency program. Please provide program director's name and year of completion:  
\_\_\_\_\_

Associate Member, Student - \$35

Students in a pharmacy degree program earning their **first** professional degree. Please list college of pharmacy and anticipated year of graduation:
