American College of Clinical Pharmacy

## About the American College of Clinical Pharmacy

The American College of Clinical Pharmacy (ACCP) is a professional and scientific society that provides leadership, education, advocacy, and resources enabling clinical pharmacists to achieve excellence in practice and research. ACCP exists to advance human health and quality of life by helping pharmacists expand the frontiers of their practice and research. ACCP's membership is composed of practitioners, scientists, educators, administrators, students, residents, fellows, and others committed to excellence in clinical pharmacy and patient pharmacotherapy.

### Annual dues for ACCP membership are:

Full Member	\$215.00
Associate Member	\$215.00
Fellow Member	\$75.00
Resident Member	\$75.00
Student Member	\$35.00
Affiliate Member	\$215.00

For more information on the benefits of membership in ACCP, please see details on page 43.

## About the ACCP 2009/2010 Publications Catalog

The ACCP 2009/2010 Publications Catalog presents publications and other educational resources available from ACCP. The catalog includes ACCP offerings in the areas of Therapeutics, Research and Outcomes Assessment, Teaching and Learning, Practice Development, and Leadership and Administration. Many resources are available online for your convenience. Also included are resources offering continuing pharmacy education credit.

ACCP members receive the discounted member price on the purchase of publications. If you are not an ACCP member, complete the membership application on page 47 and enclose it with your order to receive the discounted price. To order ACCP publications, use the order form on page 49. You also may order online at the ACCP Bookstore, [www.accp.com/bookstore](http://www.accp.com/bookstore). To purchase by telephone, call ACCP headquarters at (913) 492-3311 or fax your order to (913) 492-0088. Quantity discounts are available.

## Satisfaction Guarantee

If you are dissatisfied with your order for any reason, you may return all materials to ACCP within 30 days, and we will refund the purchase price or credit your credit card.

Please contact ACCP to obtain a return authorization. All returned items must be in good condition and acceptable for resale. Customers are responsible for shipping charges for items returned to ACCP.

All prices supersede previous pricing. Prices and sales tax in this catalog are subject to change.

The American College of Clinical Pharmacy is accredited by the Accreditation Council for Pharmacy Education (ACPE) as a provider of continuing pharmacy education. ACCP's continuing education programs, identified by the ACPE logo, are available for credit in all 50 states of the United States.

## Pharmacotherapy Self-Assessment Program, Sixth Edition (PSAP-VI)

An ACCP Publication Series

PSAP-VI is a cutting-edge resource designed to give the reader a thorough understanding of recent advances in pharmacotherapy. Each book in this 11-book series provides information that can be applied immediately in the provision of quality patient care to improve patient outcomes. Emphasis is placed on integrating new drug therapy knowledge in professional practice. The program is designed as a self-assessment tool to assist pharmacists in sharpening their clinical knowledge and skills. PSAP-VI is a ready reference tool for individual pharmacists and a source of exceptional therapeutic content for staff development.

### PSAP-VI Schedule

On completion of the 11-book series, the modules in this PSAP edition will have covered 15 therapeutic areas. Complete information to date for each PSAP-VI book—topics covered, the scheduled release date, and expiration dates for continuing education testing—are listed at [www.accp.com/psap](http://www.accp.com/psap). As each new book in the series is published, this Web page hosts additional information such as the available contact hours and the faculty, learning objectives, and sample chapters from each learning module.

Prices	Member	Nonmember
PSAP-VI Print (11 books)*	\$375.00	\$545.00
PSAP-VI Online (11 books)	\$330.00	\$490.00
PSAP-VI Print and Online (11 books)	\$545.00	\$705.00
PSAP-VI Print (single book)	\$60.00	\$80.00
PSAP-VI Online (single book)	\$50.00	\$70.00
PSAP-VI Print and Online (single book)	\$85.00	\$105.00

\*ISBN-13: 978-1-932658-30-9; softbound

### Features New to This PSAP Edition

New with the PSAP-VI edition are the following:

- All testing is done online.
- Answers for each test module are supplied as portable document format (PDF) files.
- Chapters are shorter and more concise.
- Annotated bibliographies are expanded.

### PSAP subscribers now submit all tests through ACCP's online education center.

Although subscribers can choose to receive books in either the print or online versions, test answers are available only in the electronic format. Based on subscriber feedback, PSAP chapters are shorter and designed to concentrate on information released in the past 3 to 5 years. Also, the number of annotated bibliographic references has been expanded because subscribers indicated that this documentation is valuable in their practices.

### Valuable Features That Reinforce Learning

Books in the PSAP-VI series are organized by clinical area and contain two or more learning modules. Each module presents the most current information relevant to that therapeutic area. Within each module, review-style chapters offer a variety of features to reinforce learning, including:

- Learning objectives
- Annotated references to additional resources for further study
- Self-assessment questions in case-study format, with answer choices designed to improve participants' decision-making and clinical management skills

- Online answers with detailed explanations and rationale for each self-assessment question. Each answer includes two or more references that provide additional information on the subject covered.

### Continuing Pharmacy Education Credit

The American College of Clinical Pharmacy is accredited by the Accreditation Council for Pharmacy Education (ACPE) as a provider of continuing pharmacy education. Continuing pharmacy education credit for each PSAP-VI book is available for 3 years from the date of its release.

To receive ACPE continuing pharmacy education credit for a PSAP-VI module, a post test must be submitted online for scoring. Continuing pharmacy education credit will be awarded for test scores of 50% and greater. The answers to each continuing education post test are made available in electronic format to participants after they complete the test. After submitting a PSAP-VI post test, re-enter the online education center and click on the test you submitted. You will see your test with correct and incorrect answers identified. You will also see a hyperlink to a PDF file with the correct answers and explanations for that test. Statements of continuing education credit will be processed and mailed within 10 business days of receiving an ACPE test (see below for processing times for BCPS tests). The exception to the 10-day processing is the 3-month period after a book is released. Statements of ACPE credit will be mailed out after the BCPS tests are processed.

To receive electronic access to the explained answers to the PSAP-VI questions without submitting a continuing education post test, fill out the online waiver form for each test module you do not want to complete. By completing the waiver form for any module, you waive the opportunity to receive continuing education credit for that module. After you submit a waiver for a post test, re-enter the online education center and click on that test. You will be redirected to a PDF file with answers for the module that you waived. Waiver statements are processed and mailed within 10 business days of receipt. The exception to this 10-day processing is the 3-month period after a book is released. Waiver statements will be mailed out after the BCPS tests are processed.

For complete program information—including program goals, target audience, faculty, learning objectives, and requirements to successfully complete the modules and receive continuing pharmacy education credit—visit [www.accp.com/psap](http://www.accp.com/psap).

### BCPS Recertification

Subscribers submitting a PSAP-VI post test for BCPS recertification credit have a narrow window of opportunity (the 3-month period before the release of the answer book) to use each module for recertification. The due date to submit online tests for BCPS continuing education credit is listed on the opening page of each print and online book.

Tests submitted for BCPS recertification credit will be processed and results mailed within 60 days of the published due date. Only completed tests are eligible for credit; no partial or incomplete tests will be processed. The passing point for BCPS recertification is based on a statistical analysis of the examination scores received for each module. If you receive a passing score, that information will be forwarded to BPS, and a statement of continuing pharmacy education/BCPS recertification credit will be sent to you.

### New Online Test Feature

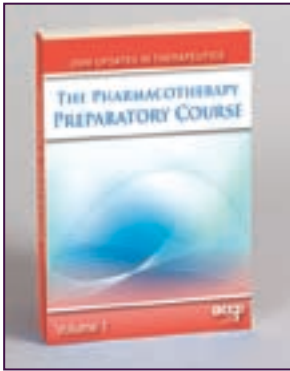

Post tests for the Pharmacotherapy Self-Assessment Program, Sixth Edition (PSAP-VI), are accessed online. After purchasing a PSAP-VI product, you will receive e-mail instructions on access to the post test. If you do not receive this message, please send an e-mail to [learning@accp.com](mailto:learning@accp.com).

### Visit PSAP-VI Online!

For complete information to date for each PSAP-VI book—including topics, scheduled release date, available continuing education contact hours, and sample chapters from each learning module—visit [www.accp.com/psap](http://www.accp.com/psap).

## Updates in Therapeutics: The Pharmacotherapy Preparatory Course

An ACCP Educational Resource

*Updates in Therapeutics: The Pharmacotherapy Preparatory Course* is ideal for pharmacy professionals who are preparing for the Pharmacotherapy Specialty Certification Examination administered by the Board of Pharmaceutical Specialties (BPS) and for those seeking a self-paced review and refresher of disease states and therapeutics.

Developed by Board Certified Pharmacotherapy Specialists, the course content provides a comprehensive review of the knowledge domains covered in the pharmacotherapy specialty certification

examination. The course uses a case-based approach, with strong emphasis on the thought processes needed to solve patient care problems in each therapeutic area.

This is the same course that is presented each year at ACCP's Spring Practice and Research Forum, and in 2009 with the ACCP/ESCP International Congress. The course materials are available in a variety of formats to best suit your learning style. Instructional materials from the 2009 live course will be available in June 2009. The online course, print workbook and CD-ROM package, and online workbook and CD-ROM package are available for continuing pharmacy education credit. Visit [www.accp.com/bookstore/ppc09.aspx](http://www.accp.com/bookstore/ppc09.aspx) for a description of the program's educational goals and target audience, listing of faculty, program content and learning objectives, and requirements for successful completion of the program.

	Member Price	Nonmember Price
Print Workbook and CD-ROM package*	\$540.00	\$480.00
Online Workbook and CD-ROM package*	\$525.00	\$465.00
Online Course*	\$505.00	\$445.00
Print Book	\$145.00	\$210.00
Online Book	\$135.00	\$200.00
CD-ROM	\$210.00	\$315.00

\*These course formats are available for continuing pharmacy education credit.

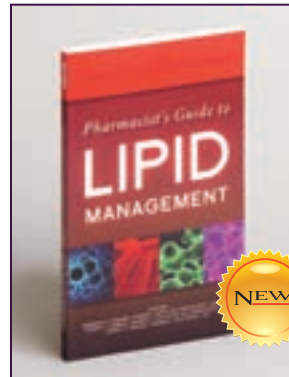

The American College of Clinical Pharmacy is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education. The Universal Activity Numbers are: Pharmacotherapy Preparatory Course for home study, 2009 Edition: Pediatrics and Oncology Supportive Care, 217-000-09-013-H01-P, 2.0 contact hours; Biostatistics: A Refresher and Clinical Trials: Fundamentals of Design and Interpretation, 217-000-09-014-H01-P, 3.0 contact hours; Infectious Diseases, HIV/Infectious Diseases, and Pharmacokinetics: A Refresher, 217-000-09-015-H01-P, 3.0 contact hours; Neurology and General Psychiatry, 217-000-09-016-H01-P, 2.0 contact hours; Acute Care Cardiology and Critical Care, 217-000-09-017-H01-P, 3.0 contact hours; Nephrology; Endocrine and Metabolic Disorders; and Fluids, Electrolytes, and Nutrition, 217-000-09-018-H01-P, 3.0 contact hours; Ambulatory Care and Men's and Women's Health, 217-000-09-019-H01-P, 3.0 contact hours; Gastrointestinal Disorders and Outpatient Cardiology, 217-000-09-020-H01-P, 2.5 contact hours.

To earn continuing pharmacy education credit for the home study version of the 2009 Pharmacotherapy Preparatory Course, you must successfully complete and submit the Web-based post test associated with each program within the course by no later than October 31, 2010. Statements of continuing pharmacy education credit will be available at [www.accp.com](http://www.accp.com) within 4 weeks of submission of the Web-based post test.

## Pharmacist's Guide to Lipid Management

An ACCP Publication

Edited by Barbara S. Wiggins, Pharm.D., BCPS (AQ Cardiology), CLS, FAHA; Joseph J. Saseen, Pharm.D., FCCP, BCPS (AQ Cardiology), CLS; Sarah A. Spinler, Pharm.D., FCCP, BCPS, CLS

ACCP is pleased to announce the publication of its new *Pharmacist's Guide to Lipid Management*. Coronary artery disease is the number one killer of men and women. Pharmacists have the opportunity to have significant impact on the fight against this disease by understanding all the risk factors, knowing how to risk stratify patients, and helping to optimize treatment while minimizing adverse effects. Pharmacists are of value not only in managing treatment but also in identifying patients for primary prevention based on risk factors and lipid profiles. With this

information, pharmacists can recommend initiation of therapy at an early stage. Pharmacists also add value by managing cost issues in the treatment of lipid disorders.

This book is designed to provide clinical pharmacists with the tools they need to manage patients with lipid disorders. It provides an overview of pathophysiology, the role of lipids in coronary artery disease, a review of pharmacologic options and their efficacy, and implementation into practice based on risk and lipid profile results. Information is included about achieving lifestyle modifications, assessing therapy, monitoring and managing adverse effects, as well as the management of drug interactions. Targeted toward ambulatory care pharmacists and inpatient pharmacists, this book is also beneficial to physicians, nurse practitioners, and physician assistants involved in managing patients with lipid disorders.

Member Price	\$32.95
Nonmember Price	\$37.95

ISBN: 978-1-932658-63-7; 2008; 192 pages; softbound

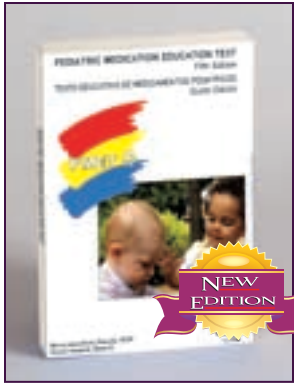

### Save a Tree—and Shipping Charges

Many ACCP products and publications are available in online versions. Pages are supplied as portable document format (pdf) files, which can be printed or viewed on a computer.

## Pediatric Medication Education Text, Fifth Edition

An ACCP Publication

By Marcia Lease Buck, Pharm.D., FCCP; and Anne E. Hendrick, Pharm.D.

For ten years this resource has been the go-to publication for practitioners needing easy to access medication information that can be passed along to pediatric caregivers. The new 2009 fifth edition is now available in an even easier to use CD-ROM format. Easily accessed from your desktop, these single page drug information sheets can be quickly located and printed to provide caregivers with easy to understand instructions.

This unique medication counseling resource, developed for families with

children younger than 12 years of age, offers information for each drug in both English and Spanish. The format is specifically designed to provide valuable educational information without overwhelming families with too much information.

The *Pediatric Medication Education Text* is your source for simple, straightforward medication information on 389 alphabetically organized medications focusing on products most often prescribed at hospital discharge or during pediatric ambulatory care visits. The question-and-answer format meets the requirements from the U.S. Food and Drug Administration for providing written medication information to patients.

Member Price            \$68.95  
Nonmember Price        \$86.95

ISBN: 978-1-932658-64-4; 2009; 400 pages each of English and Spanish; CD-ROM

## Pharmacogenomics: Applications to Patient Care

An ACCP Publication

An essential resource for understanding the scientific underpinnings of this emerging discipline, *Pharmacogenomics: Applications to Patient Care* is designed to prepare pharmacists to integrate pharmacogenomic principles into practice.

The basics of genetics and pharmacogenomics are described and applications to specific therapeutic areas are highlighted in three modules. Each module includes content outlines, learning objectives, key words and abstracts, self-assessment questions and explained answers, and references to reinforce learning.

*Pharmacogenomics: Applications to Patient Care* is available in print and online formats.

### Module 1: Fundamentals of Applied Human Genomics

Introduces genetics and molecular and cellular biology and shows how these disciplines can be used to explain the possible genetic basis for variability in drug response. Also discussed is the application of bioinformatics studies to pharmacogenomics and ethical issues in genomics.

### Module 2: Fundamentals of Pharmacogenomics

Introduces the pharmacogenetics of oxidative drug metabolism, together with potential applications to tailoring drug therapy. A discussion of drug transporter pharmacogenetics includes localization and function, genetic variability, and clinical consequences. Drug target pharmacogenetics and pharmacogenetics, including the role of genetic variability in drug targets on drug efficacy and toxicity, and applications to individualized drug therapy are explored.

### Module 3: Pharmacogenomic Applications in Patient Care

Describes current and future pharmacogenomic applications for several therapeutic areas, including oncology and hematology, cardiovascular disease, infectious diseases, respiratory diseases, psychiatry, and transplantation.

### More Information Available

For more information about the content of each module, visit [www.accp.com/bookstore/strphgen.aspx](http://www.accp.com/bookstore/strphgen.aspx).

## Pharmacotherapy Self-Assessment Program, Seventh Edition (PSAP-VII)

ACCP will launch the seventh edition of the popular *Pharmacotherapy Self-Assessment Program (PSAP-VII)* in January 2010.

Cardiology will be the first book in the new 11-book series, followed by Urgent Care/Critical Care; Women's and Men's Health; Pediatrics; Chronic Illness; Oncology; Geriatrics; Science and Practice of Pharmacotherapy; Infectious Diseases; Neurology/Psychiatry; and Gastroenterology/Nutrition.

New features for PSAP-VII include the integration within each book of content such as health promotion and maintenance, statistics, and literature evaluation. Relating this complementary material to traditional clinical topics provides a more practice-based view of the content. Pediatrics and Geriatrics also return as separate books in the PSAP-VII series.

As with the previous edition, PSAP-VII will feature shorter chapters, expanded annotated bibliographies, and online testing. Chapters focus on the latest information (the past 3-5 years) to allow pharmacists to develop and assess their knowledge and to enhance their educational competence. PSAP-VII books will be available in the print and online formats, or a combination of both.

Subscriptions to PSAP-VII will be available in September 2009. For subscription information, including early bird discount savings, please visit [www.accp.com/psap](http://www.accp.com/psap).

## A Guide to Clinical Decision-Making: The PSAP Algorithms, Fourth Edition

An ACCP Online Resource

Algorithms are a trusted way to illustrate diagnoses and drug therapy decisions, and these valuable tools appear throughout the books in the Pharmacotherapy Self-Assessment Program (PSAP) series. The fourth edition of this online handbook presents selected clinical algorithms from PSAP-VI, with new algorithms added as each book in the series is published. When applicable, the algorithms have been updated to reflect current research and practice. Algorithms are provided in the portable document format (PDF) and are fully keyword searchable. More than 200

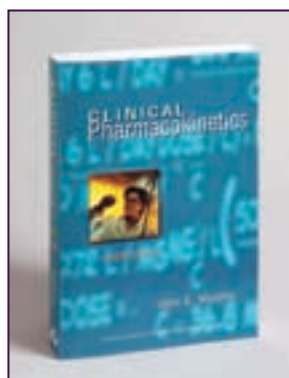

algorithms will be included when the PSAP-VI series is completed. Until then, subscribers will receive updates as new algorithms from published books become available.

Member Price            \$63.95  
Nonmember Price        \$69.95

ISBN-13: 978-1-932658-29-3; 2007; online book

## Clinical Pharmacokinetics, Fourth Edition

Edited by John E. Murphy

This popular resource is designed as a clinical reference offering the key principles of pharmacokinetics and their applications in drug therapy. This book offers information for medications that require an understanding of individual patients' probable or actual drug concentrations to achieve medication effectiveness and safety.

This expanded edition includes:

- A list of commonly used pharmacokinetic equations
- Dosing for pediatric and geriatric patients, overweight and obese patients, and considerations for neonates
- Creatinine clearance estimations
- Tables on international and traditional units for drug and laboratory tests
- Specific chapters on anti-infectives, neurologic agents, cardiovascular drugs, and anticoagulants

The authors represent a broad range of pharmacy practice, including clinical practice, academics, and pharmaceutical industry medical departments.

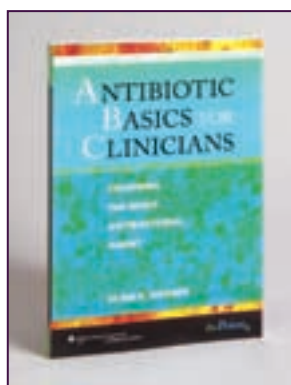

Member Price            \$49.95

Nonmember Price        \$54.95

ISBN: 978-1-58528-167-1; 2008; 463 pages; softbound

## Antibiotic Basics for Clinicians: Choosing the Right Antibacterial Agent

By Alan R. Hauser, M.D., Ph.D.

A text designed for students, trainees, and non-infectious disease clinicians who are looking for quick and easy understanding of the rationale behind antibiotic selection for common bacterial pathogens and infectious disease presentations. By providing a brief overview of the rationale behind antibiotic selection, the text serves as a learning device to supplement large reference books. Features include organization by class of antibiotics; fact-anecdotes, interesting ancillary information, mnemonics, and questions to test understanding; and additional reading

reference sources. Appendices are included that cover dosing in adults and children, antibacterial agents in pregnancy, generic and trade names of commonly used antibacterial agents, and treatment of infections caused by bacterial agents of bioterrorism.

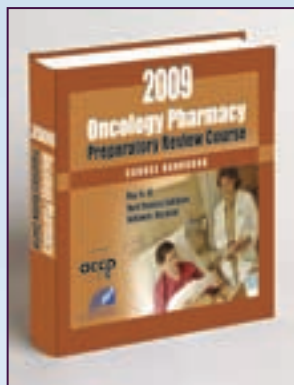

This book includes online access to the fully searchable text.

## Oncology Pharmacy Preparatory Review Course

This course is designed to help oncology pharmacy practitioners prepare for the Board of Pharmaceutical Specialties (BPS) Oncology Pharmacy Specialty Certification examination, and obtain a broad and detailed update to their knowledge in oncology. Jointly sponsored by ACCP and the American Society of Health-System Pharmacists, the course content is based on the domains and knowledge areas tested on the examination.

The detailed workbook, filled with patient cases and practice-based self-assessment

questions, is an excellent resource for assessing knowledge in multiple areas of oncology practice. The instructional materials, developed by clinical and educational experts and derived from the live presentation of the 2009 course\*, are available in these formats:

	Member Price	Nonmember Price
Online Course with CE	\$350.00	\$455.00
CD-ROM and Workbook with CE	\$400.00	\$480.00
CD-ROM only	\$255.00	\$315.00
Print Book only	\$115.00	\$140.00

\*2009 course materials available July 2009.

CD-ROM includes audio-synchronized lecture and slides from the live course.

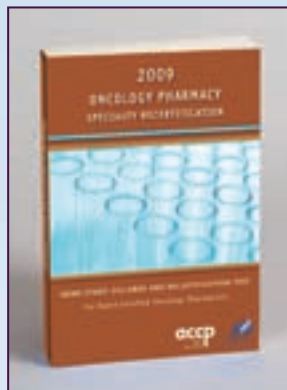

The American College of Clinical Pharmacy and the American Society of Health-System Pharmacists are accredited by the Accreditation Council for Pharmacy Education as providers of continuing pharmacy education. This activity is approved for a total of 28 contact hours.

### Universal Activity Numbers are:

- 217-999-09-066-H01-P - 2009 Oncology Pharmacy Preparatory Review Course for Home Study - Symptom and Pain Management,
- 217-999-09-067-H01-P - 2009 Oncology Pharmacy Preparatory Review Course for Home Study - Blood Cancers and Bone Marrow
- 217-999-09-068-H01-P - 2009 Oncology Pharmacy Preparatory Review Course for Home Study - Other Cancers
- 217-999-09-069-H01-P - 2009 Oncology Pharmacy Preparatory Review Course for Home Study - Women and Men's Cancers and Genitourinary
- 217-999-09-070-H04-P - 2009 Oncology Pharmacy Preparatory Review Course for Home Study - Developments, Guidelines and Research

To receive continuing education credit, the Web-based post test must be successfully completed and submitted to ACCP by October 31, 2010. Statements of credit for continuing pharmacy education will be available to participants via ACCP's Web site within 4 weeks of successful completion of the Web-based post test.

## Oncology Pharmacy Specialty Home Study Syllabus for Recertification

The Oncology Pharmacy Specialty Home Study Course is approved by the Board of Pharmaceutical Specialties (BPS) as one of three components in a professional development program that can be used by Board Certified Oncology Pharmacotherapists (BCOPs) as an alternative to the written recertification examination. Jointly sponsored by ACCP and the American Society of Health-System Pharmacists, the Oncology Pharmacy Specialty Home Study Course content is based on the domains and knowledge areas tested on the examination.

ACCP, as the official provider approved by BPS, will record and report recertification credit earned for this program directly to BPS. The course content, developed by clinical and educational experts, is a collection of journal articles from a variety of leading oncology and pharmacy peer-reviewed publications. The course is only available as a workbook and includes a Web-based recertification test. BCOPs who take the 2009 course\* and successfully complete the self-assessment test by November 30, 2009, will earn 15 hours of recertification credit.

## Drug Information Handbook for Oncology, Seventh Edition

By Dominic A. Solimando Jr., B.S.Pharm., M.A.

This new edition contains 270 drug monographs and more than 330 chemotherapy regimens, cross-referenced and organized in a concise, uniform format.

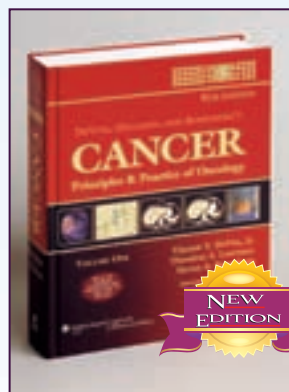

The content of the *Drug Information Handbook for Oncology* offers tabbed sections organized like a dictionary for ease of use. Drugs are listed by generic name, with each monograph including up to 42 unique fields of information. The Chemotherapy Regimen Index provides a comprehensive presentation of cancer chemotherapy regimens, listed alphabetically by regimen name (acronym) and by indication. The Special Topics section covers important cancer-related issues such as pain management, bone marrow transplantation, managing infections, and safe handling of hazardous drugs.

## Cancer: Principles & Practice of Oncology, Eighth Edition

By Vincent T. DeVita Jr., M.D.; Theodore S. Lawrence, M.D., Ph.D.; Steven A. Rosenberg, M.D., Ph.D.; Ronald A. DePino, M.D.; and Robert A. Weinberg, Ph.D.

Now in its eighth edition, *Cancer: Principles and Practice of Oncology* enjoys worldwide acclaim as a staple oncology reference text. The book provides cutting-edge, practical information on the science of oncology and the multimodality treatment of every cancer type. Offering a balanced, multidisciplinary approach, each major treatment chapter is co-authored by a surgeon, a medical oncologist, and a radiation oncologist. Each cancer type is discussed, including stages, the molecular biology of the cancer, treatment modality, and patient management.

In addition to the major treatment chapters, full consideration is also given to cancer prevention, screening, palliative care, supportive oncology, and quality of life issues.

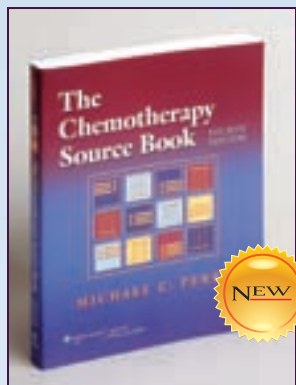

This two-volume publication is offered for the first time in full color. Other new features include: a new companion Web site with fully searchable online text, an image bank, links to journal articles, and a question bank; 40 new chapters; and more than 70 rewritten chapters with new contributing authors.

Member Price \$332.95  
Nonmember Price \$379.95

## Chemotherapy Source Book, Fourth Edition

By Michael C. Perry, MD

*The Chemotherapy Source Book* brings together the current information on the chemotherapeutic management of cancer patients, including the choice of chemotherapeutic agents, use of drug combinations, and toxicity of individual drugs. Organized by disease site, this book is a complete source of pharmacologic and patient management information that clinicians can access for any question encountered in the delivery of chemotherapy.

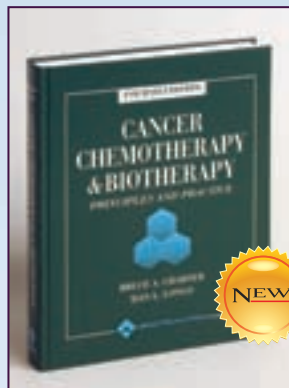

In this fourth edition, new drugs are included as well as new indications for older drugs. The content has been streamlined to provide busy practitioners with essential information more quickly. Offered in softcover, this edition is both portable and convenient.

Member Price **\$89.95**

## Cancer Chemotherapy and Biotherapy, Fourth Edition

Edited by Bruce A. Chabner, M.D. and Dan L. Longo, M.D.

The fourth edition of *Cancer Chemotherapy and Biotherapy* includes the newest anticancer drugs. This is a comprehensive reference on the preclinical and clinical pharmacology of these drugs. Organized by drug class, the book provides the latest information on drugs and biological agents – their mechanisms of action, interactions with other agents, toxicities, side effects, and mechanisms of resistance.

The authors explain the rationale for use of drugs in specific schedules and combinations, and offer guidelines for dose adjustment in particular situations.

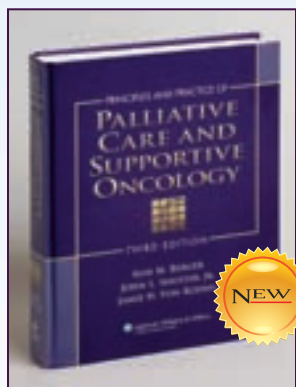

New to this edition are expanded coverage of monoclonal antibodies, molecularly targeted drugs, vaccines, cell based therapies, growth factors, and pharmacogenetics.

## Principles and Practice of Palliative Care and Supportive Oncology, Third Edition

By Ann M. Berger, MSN, MD; John L. Shuster Jr., MD; Jamie H. Von Roenn, MD

*Principles and Practice of Palliative Care and Supportive Oncology, Third Edition*, is a truly interdisciplinary book that serves as a practical guide to the management of the myriad symptoms and quality-of-life issues that occur in patients with cancer. It addresses newly diagnosed patients, patients undergoing treatment, cancer survivors, and patients whose disease is no longer curable.

This third edition features new chapters on caregiver stress, hepatic failure, pulmonary failure, research issues in palliative care, and beginning a palliative care program. New to this edition are additional tables, algorithms, and flow charts.

The interdisciplinary group of contributors includes leading experts in hospice care and palliative medicine, oncology, nursing, neurology, psychiatry, anesthesiology, and pharmacology.

## Pocket Guide to Critical Care Pharmacotherapy

By John Papadopoulos, Pharm.D., FCCM, BCNSP

Here is an easy-to-follow pocket reference to step-by-step critical care pharmacotherapy. Based on both real patient-care experience and review of current medical literature this text will guide clinicians in giving their patient optimal, evidence-based care. It covers the most common ailments observed in critically ill medical patients and uses an algorithmic approach, focusing on pharmacotherapeutics that clinicians with varying degrees of training will be able to follow. Also provided are assessment tools, preventive strategies, drug-induced disease

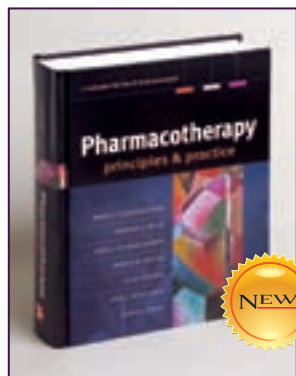

states, and pharmacological pearls. Up-to-date references and Web links are included for many disease states to aid in reviewing available literature. Making the book easy to access in an emergency or ICU setting is the one table per disease design. *Pocket Guide to Critical Care Pharmacotherapy* offers very specific context for the therapeutic treatment and management of specific diseases—a valuable tool for any clinician.

## Pharmacotherapy Principles & Practice

By Marie A. Chisholm-Burns, Barbara G. Wells, Terry L. Schwinghammer, Patrick M. Malone, Jill M. Kolesar, John C. Rotschafer, Joseph T. DiPiro

*Pharmacotherapy Principles & Practice* is an essential therapeutic text covering the epidemiology, etiology, pathophysiology, clinical presentation, and treatment of more than 100 disease states. The book is organized in an easy-to-follow disorder-based manner that surveys the full range of organ system disorders treated in pharmacy practice. The use of case-based examples aids in the development of critical thinking and helps illustrate the clinical relevance of each topic. Features include knowledge-building boxed elements consisting of clinical

presentation and diagnosis, patient encounters, and patient care and monitoring guidelines. Helpful tables and figures also contribute to a better understanding of the concepts included.

This is an excellent publication for anyone—from students starting their first therapeutics courses to practitioners—wanting access to key points of pharmacotherapy information. The addition of online resources makes this text a valuable addition to the clinical pharmacist's library.

Member Price      \$117.95  
Nonmember Price      \$126.95

ISBN: 9780071448802; 2007; 1,600 pages; hardbound

## Drug Interactions Analysis and Management

By Philip D. Hansten, Pharm.D.; and John R. Horn, Pharm.D.

Hansten and Horn's *Drug Interactions Analysis and Management* assists in the prevention and management of drug interactions, achieving improved patient outcomes. Each interaction monograph includes a ranking system clearly indicating the level of patient risk. Noninteractions are also included. Each monograph contains a summary, risk factors, related drugs, management options, and references. The authors offer guidance for managing the interaction and recommendations for alternative medications, if appropriate.

Based on clinical as well as case-study findings, the book includes a clinical evaluation section enabling review and assessment of published data via the reference list.

Member Price      \$88.95  
Nonmember Price      \$98.95

ISBN: 978-1-57439-286-9; 2008; 768 pages; softbound

## Drug Prescribing in Renal Failure: Dosing Guidelines for Adults and Children, Fifth Edition

Edited by Michael E. Brier, Ph.D.; and George R. Aronoff, M.D.

Here is the classic pocket guide to drug dosing for patients with impaired renal function—in a revised and updated new edition. Easy-to-read tables offer information for determining dosages for more than 450 drugs. This new edition also features new guidance on pediatric dosing, making it one of the most complete resources of its kind.

Features include:

- Details of the biochemical and physiologic effects of drugs in patients with renal failure
- Emphasis on drugs eliminated by the kidney as well as the importance of the patient's glomerular filtration rate (GFR)
- Recommendations for supplemental drug dosing during renal replacement therapies
- Coverage of antimicrobial and antiviral agents

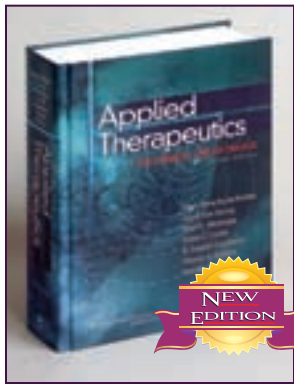

Because the kidney is the major regulator of the internal fluid environment, the physiologic changes associated with renal disease have pronounced effects on the pharmacology of many drugs. This handy pocket guide will assist you in managing these effects.

Member Price      \$42.95  
Nonmember Price      \$46.95

ISBN: 978-1-930513-76-1; 2007; 272 pages; softbound

## Applied Therapeutics: The Clinical Use of Drugs, Ninth Edition

By Mary Anne Koda-Kimble, Pharm.D.; Lloyd Y. Young, Pharm.D.; Wayne A. Kradjan, Pharm.D., BCPS; B. Joseph Guglielmo, Pharm.D.; Brian K. Alldredge, Pharm.D.; Robin L. Corelli, Pharm.D., FCSHP; and Bradley R. Williams, Pharm.D., CGP

This text uses a case-based approach to help master the fundamentals of drug therapeutics. Readers will learn the basics of common diseases and disorders and develop practical problem-solving skills for devising and implementing successful drug treatment regimens. Case studies integrated into each chapter illustrate key concepts and principles of therapeutics and provide practice in developing evidence-based therapeutic plans.

This updated ninth edition incorporates the latest drug treatments and therapeutic practices and guidelines. New chapters cover pharmacogenomics and osteoporosis. Transplantation is now broken into two chapters to ensure adequate coverage. Culturally competent care issues are now incorporated into many chapters. Over 850 tables provide quick access to comparative drug information, pharmacokinetic properties, treatment options, dosing guidelines, risk factors, and disease and diagnosis information.

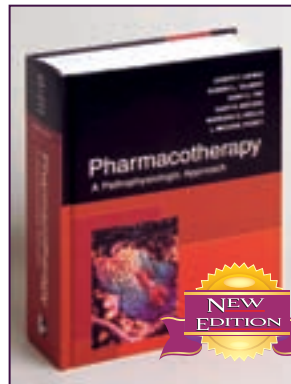

A companion Web site offers the fully searchable text, animations of pathophysiologic concepts, and additional case studies.

Member Price                \$169.95  
Nonmember Price        \$181.95

ISBN-13: 978-0781765558; 2008; 3040 pages; hardbound

## Pharmacotherapy: A Pathophysiologic Approach, Seventh Edition

Edited by Joseph T. DiPiro, Pharm.D., FCCP; Robert L. Talbert, Pharm.D., FCCP, BCPS; Gary C. Yee, Pharm.D., FCCP; Gary R. Matzke, Pharm.D., FCP, FCCP; Barbara G. Wells, Pharm.D., FASHP, FCCP, BCPP; and L. Michael Posey, B.S.Pharm.

To assist you in developing a mastery of evidence-based medicine for optimal patient outcomes, here is a new edition of *Pharmacotherapy: A Pathophysiologic Approach*. The scope of this resource goes beyond drug indications and dosages to include the initial selection, proper administration, and monitoring of drugs. Long the gold standard text for assessing new drugs and new evidence-based therapeutic approaches, *Pharmacotherapy* provides a resource for providing safe, efficacious drug therapy across the full range of therapeutic categories.

The pathophysiology sections identify the mechanism of disease as a foundation for pharmacotherapeutic principles and strategies. Readers will find a wealth of treatment algorithms, principles of pharmacotherapy, and extensive figures and tables that serve to enhance the readability of the text, make the information easy to use, and provide clear recommendations.

### New features for this edition include:

- Expanded evidence-based recommendations
- Extended coverage of the timely issue of palliative care and pain medicine
- Important chapters on pulmonary hypertension, disorders of calcium and phosphorus homeostasis, and multiple myeloma
- “Key Concepts” highlighted in each chapter
- “Clinical Presentation” boxes that summarize the most common disease signs and symptoms covered in each chapter
- “Clinical Controversies” boxes—presented in the Treatment sections of the disease-oriented chapters—that examine the complicated issues faced by students and clinicians in providing drug therapy
- Clear therapeutic recommendations in each disease-specific chapter
- “Evaluation of Therapeutic Outcomes” boxes in each disease-specific chapter, containing key monitoring guidelines that facilitate the development of a pharmaceutical, nursing, or medical care plan

Member Price                \$170.95  
Nonmember Price        \$186.95

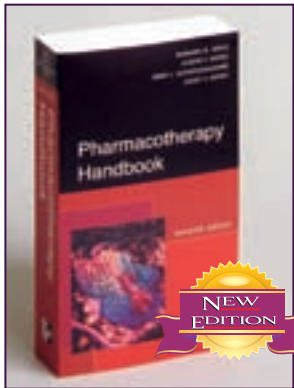

ISBN: 978-0071478991; 2008; 2,559 pages; hardbound

## Pharmacotherapy Handbook, Seventh Edition

By Barbara G. Wells, Pharm.D., FASHP, FCCP, BCPP; Joseph T. DiPiro, Pharm.D., FCCP; Terry L. Schwinghammer, Pharm.D., FCCP, BCPS; and Cecily V. DiPiro, Pharm.D.

*Pharmacotherapy Handbook, Seventh Edition*, delivers essential information needed to quickly and confidently make drug therapy decisions for 84 diseases and disorders. Organized in an alphabetical format, the book uses text, tables, figures, and treatment algorithms to offer easy and understandable access to important drug data.

Chapters include organized information on disease state definitions, review of relevant pathophysiology, clinical presentation, diagnosis, desired outcome, treatment, and monitoring.

This new addition includes a new appendix on the management of pharmacotherapy in the elderly and new chapters addressing adrenal gland disorders and influenza.

## The Washington Manual of Medical Therapeutics, 32nd Edition

Edited by Daniel H. Cooper, M.D.; Andrew J. Krainik, M.D.; Sam J. Lubner, M.D.; Hilary E. Reno, M.D., Ph.D.; and Scott Micek, Pharm.D.

Established for more than 40 years as the authority of the medical ward, *The Washington Manual of Medical Therapeutics*, now in its 32nd Edition, contains even more current information with a focus on inpatient care, delivered in a time-saving, quick-reference style. Each chapter has been updated and reformatted for easier access to information.

Major topics include hypertension, ischemic heart disease, heart failure, cardiomyopathy, valvular heart disease, arrhythmias, critical care, pulmonary

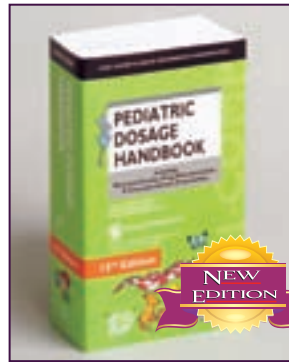

disease, allergy and immunology, renal diseases, infectious diseases, antimicrobials, gastrointestinal diseases, liver diseases, neurologic disorders, arthritis and rheumatologic diseases, and endocrine diseases. The 32nd Edition covers the newest treatment guidelines in the Seventh Report of the Joint National Committee on Prevention, Detection, Evaluation, and Treatment of High Blood Pressure (JNC 7).

## Pediatric Dosage Handbook, 15th Edition

By Carol K. Taketomo, Pharm.D.; Jane H. Hodding, Pharm.D.; and Donna M. Kraus, Pharm.D.

The pediatric population is a dynamic group, with major changes in pharmacokinetics and pharmacodynamics taking place throughout infancy and childhood. Because of these vital changes, the need for the evaluation and establishment of drug dosing regimens in children of different ages is great. The *Pediatric Dosage Handbook, 15th Edition*, continues to be the trusted resource for medical professionals managing pediatric patients.

Updates to this edition include:

- 39 new drug monographs for a total of 852 monographs
- Updates to hundreds of existing monographs
- New Appendix: Intravenous Immune Globulin
- Appendix updates for: 2008 Childhood Immunization Schedules; Antiepileptic Drugs; Average Weights and Surface Areas; HIV Treatment Guidelines; OTC Cough and Cold Preparations, Pediatric

Continuing highlights of the *Pediatric Dosage Handbook* include up to 35 fields of information per monograph; usual dosage by age group (neonatal, pediatric, adult); dictionary-like headings at the top of each page; FDA "Tall Man" lettering; therapeutic category and key word indexes.

Member Price \$47.95  
Nonmember Price \$53.95

ISBN: 978-1-59195-239-8; 2008; 2,181 pages; softbound

## The Medical Letter on Drugs and Therapeutics

*The Medical Letter on Drugs and Therapeutics* is an independent, peer-reviewed, nonprofit publication that offers unbiased critical evaluations of drugs, with special emphasis on new drugs. It evaluates virtually all new drugs and reviews older drugs when important new information becomes available on their usefulness or adverse effects. *The Medical Letter* is published every other week in a four-page newsletter format and is available in print, Palm OS, and online versions. The newsletter carries no advertising and is supported entirely by subscription fees. A typical issue appraises

two or three new drugs in terms of their effectiveness, toxicity, cost, and possible alternatives. Occasionally, *The Medical Letter* publishes an article on a new nondrug treatment or a new diagnostic aid.

*The Medical Letter* is intended specifically to meet the needs of the busy health care professional who wants unbiased, reliable, and timely information on new drugs. *The Medical Letter* indicates whether a new drug offers genuine advantages over older drugs, whether its effectiveness is limited, or whether it is too toxic or too expensive to justify its use. If new information changes the picture, follow-up reports are published.

1-year Subscription

26 issues \$95.00

## Handbook of Applied Therapeutics, Eighth Edition

By Mary A. Koda-Kimble, Pharm.D.; Lloyd Y. Young, Pharm.D.; Wayne A. Kradjan, Pharm.D., BCPS; B.J. Guglielmo, Pharm.D.; Brian K. Alldredge, Pharm.D.; and Robin L. Corelli, Pharm.D.

Designed as a pocket version of *Applied Therapeutics: The Clinical Use of Drugs, Eighth Edition*, this completely updated handbook offers quick access to the most pertinent drug-related information presented in the same chapter structure and approach as the textbook. The handbook provides in-depth information on the latest drug treatments for more than 85 diseases and conditions, including heart failure, acne, schizophrenia, viral hepatitis, and diabetes mellitus.

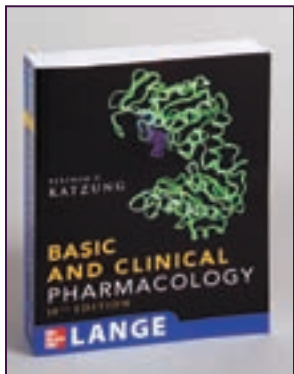

Detailed algorithms and charts guide students and practitioners through complex therapeutic decisions. More than 700 tables provide rapid access to comparative drug information, pharmacokinetic properties, treatment options, dosing guidelines, risk factors, and disease information.

Member Price **\$52.95**

ISBN: 978-0-7817-9026-0; 2006; 1,104 pages; softbound

## Basic and Clinical Pharmacology, 10th Edition

By Bertram G. Katzung, M.D., Ph.D.

This textbook integrates basic and clinical science, making it well suited for both the traditional curricula and the integrated organ system-based curricula.

*Basic and Clinical Pharmacology* provides in-depth coverage of key pharmacology topics from basic principles to pharmacological considerations for autonomic, cardiovascular-renal, smooth muscle, CNS, endocrine, antimicrobial, and chemotherapeutic and immunotherapeutic drugs. This 10th edition also presents a detailed review of the mechanism of action

and toxicities of traditional and newer drugs, as well as an introduction to occupational and environmental toxicology.

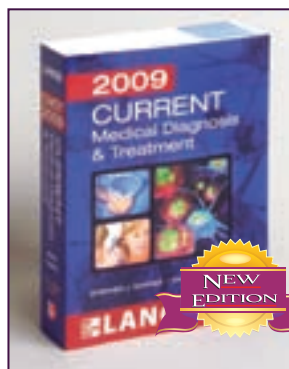

In addition to treatment strategies and recommended drugs for all major diseases, the textbook contains evidence-based chapters on abused drugs; special aspects of perinatal, pediatric, and geriatric pharmacology; and the latest information on over-the-counter drugs, herbal medicines, and nutritional supplements.

## CURRENT Medical Diagnosis & Treatment, 2009

Edited by Stephen J. McPhee, M.D.; and Maxine A. Papadakis, M.D.

Annually updated, this trusted, authoritative, and essential internal medicine text delivers the most current insights into signs, symptoms, epidemiology, etiology, and treatment for over 1,000 diseases and disorders. For each topic you will find on-the-spot, evidence-based answers that reflect the most recent developments in diagnosis and treatment. This reference gives you the latest medical advances, prevention strategies, cost-effective treatments, and more.

*The CURRENT Medical Diagnosis & Treatment* covers diagnostic tools important to your daily practice; a full review of all primary care topics; an annual review of advances in HIV treatment; "Essentials of Diagnosis" for most diseases/disorders; hundreds of quick-access drug treatment tables, with indexed trade names and updated drug prices; ICD codes; diagnostic and treatment algorithms; and up-to-date references for peer-reviewed, evidence-based information.

New highlights in this edition include a new chapter on hemostasis and antithrombotic therapy; a revamped end of life chapter now called Palliative Care & Pain Management; new sections on asthma and palpitations; and more algorithms throughout.

## Publishing Opportunities through ACCP

The American College of Clinical Pharmacy is always seeking new publications and products to develop in conjunction with ACCP members.

If you have an idea for a book, teaching material, monograph, or other information product that you think needs to reach a market that includes clinical pharmacists, faculty, students, and other health care practitioners, we would like to talk with you about working with ACCP to publish and market your ideas.

Here is your opportunity to develop a resource to advance knowledge for our profession and at the same time enhance your professional development. Publishing with ACCP can further your professional reputation while giving you the opportunity to make a significant contribution to the clinical pharmacy field.

If you would like to discuss your ideas please contact Janel Mosley, Publications Project Manager, at [jmosley@accp.com](mailto:jmosley@accp.com) or visit <http://www.accp.com/docs/bookstore/proposal.pdf> to complete an ACCP Publishing Proposal.

## CURRENT Critical Care Diagnosis and Treatment, Third Edition

Edited by Frederic S. Bongard, M.D., J.D.; Darryl Y. Sue, M.D.; and Janine R. E. Vintch, M.D.

*CURRENT Critical Care Diagnosis and Treatment* delivers authoritative and clinically focused guidance in a concise, find-it-now format. It includes a review of the etiology, relevant pathophysiology, and clinical symptoms as a prelude to diagnosis and treatment. Coverage includes everything from renal failure and surgical infections to coronary heart disease, with an emphasis on evidence-based medicine throughout.

New features in this edition include:

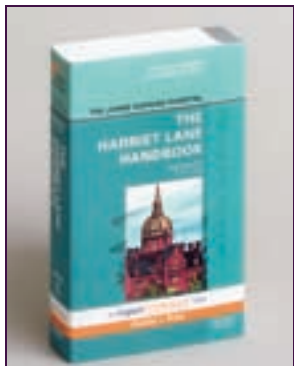

- Comprehensive overview of 40 key critical care topics, covering critical care basics, medical critical care, and the essentials of surgical critical care
- Concise chapters geared to the specific needs of medical students, residents, critical care trainees, and clinicians
- Common but difficult-to-diagnose critical care problems and “approach to the patient” strategies
- Important new treatment strategies for venous thromboembolism, acute respiratory distress syndrome, diabetic ketoacidosis, asthma, sepsis, and many more
- Current recommendations for deep vein thrombosis prophylaxis, transfusions, goal-directed therapy in sepsis, mechanical ventilation, use of pulmonary artery catheters, and glycemic control
- PubMed Unique Identifier numbers on all references for easy look-up

## The Harriet Lane Handbook: A Manual for Pediatric House Officers, 18th Edition

By The Johns Hopkins Hospital; Jason W. Custer; and Rachel E. Rau, Eds.

*The Harriet Lane Handbook* represents more than 50 years of expert guidance in pediatric care. Step-by-step emergency management protocols, growth charts, and other features help streamline treatment. Conveniently pocket-sized, this latest edition features Expert Consult functionality, so you can access the complete contents of the book, online and fully searchable.

The book’s trademark comprehensive formulary will be regularly updated online to keep you absolutely current.

## Lange Smart Charts Pharmacology

By Catherine E. Pelletier, M.D.

Written and designed for pharmacy and medical students, *Lange Smart Charts Pharmacology* presents a complete review of pharmacology in an innovative format and organized by drug group. The book covers all essential topics in pharmacology and is an ideal companion resource to pharmacology textbooks.

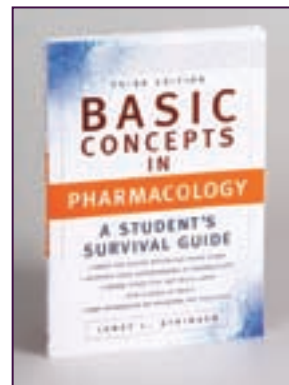

The format and approach of *Lange Smart Charts Pharmacology* are tailored to the ways in which students study and learn pharmacology. The book’s contents include tables and diagrams that facilitate comparisons and clarify relationships among drugs in terms of interactions, pharmacokinetics, uses, and adverse effects. Each chapter begins with an outline of the drug class discussed, followed by a list of key terms.

## Basic Concepts in Pharmacology: A Student’s Survival Guide, Third Edition

By Janet L. Stringer, M.D., Ph.D.

This survival guide serves as an effective resource for learning difficult concepts in pharmacology and offers a study system that sets priorities and minimizes memorization. The book also organizes and condenses must-know drug information and clearly explains each fundamental principle of drug actions.

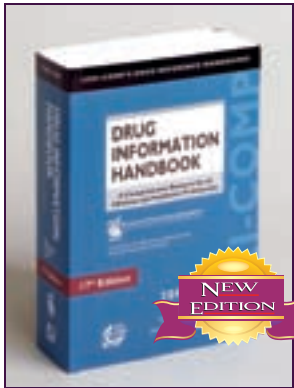

*Basic Concepts in Pharmacology: A Student’s Survival Guide* simplifies the learning process by presenting drugs by class and describes key concepts about each drug class. The guide presents coverage of new classes of drugs such as fusion inhibitors for HIV, antibiotic and antifungal drugs, and drugs for cancer and immune suppression. This book contains newly updated information on poisoning/toxicology as well. Essential information is showcased in numerous summary boxes, illustrations, and tables throughout.

## Drug Information Handbook, 17th Edition

Edited by Charles F. Lacy, R.Ph., Pharm.D., FCSHP; Lora L. Armstrong, R.Ph., Pharm.D., BCPS; Morton P. Goldman, R.Ph., Pharm.D., BCPS, FCCP; and Leonard L. Lance, R.Ph., B.S.Pharm.

The *Drug Information Handbook, 17th Edition*, continues to set the industry standard for an easy-to-use reference for all clinicians and healthcare professionals seeking access to concise, comprehensive drug information. This edition contains 1,415 drug monographs, including over 30 new drugs and hundreds of updates. Monographs encompass up to 32 fields of information, including detailed content on dosage, drug interactions, and adverse reactions. Also included is an extensive appendix containing charts, special topics, and a Pharmacologic Category Index.

## Pharmacotherapy News Network

Pharmacy's Daily Newspaper

The *Pharmacotherapy News Network (PNN)* provides pharmacotherapy-related knowledge—not just more information. In five daily editions each week, the PNN Pharmacotherapy Line generally adheres to the following schedule:

**Monday:** Coverage of that week's British journals *Lancet* and *British Medical Journal*, plus a "Journal Watch" column with titles and reprint information on just-published review articles or clinical guidelines;

**Tuesday:** Reports on articles in the *Annals* or *Archives of Internal Medicine*;

**Wednesday:** Summaries of articles in that day's *Journal of the American Medical Association*;

**Thursday:** Coverage of studies in the *New England Journal of Medicine*;

**Friday:** Summaries from the top journals in one or more medical specialty areas (e.g., cardiology, pediatrics, neurology) or major pharmacy journals.

### Type of Service and Price

PNN is available by e-mail to individual subscribers. In addition, a site license can be obtained that allows e-mail distribution for up to 50 users.

### Annual E-mail Site Licenses

Single user	\$195.00	11–15 users	\$495.00
2–5 users	\$295.00	16–20 users	\$595.00
6–10 users	\$395.00	21–50 users	\$750.00

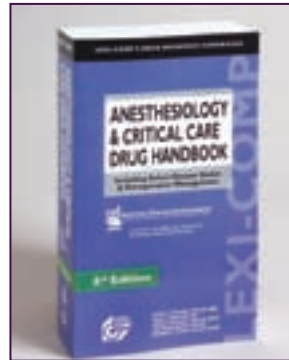

### Educational Site License

Colleges of Pharmacy\* **\$1,000.00**

\*Internal distribution to all faculty, staff, and students of a college of pharmacy.

## Anesthesiology & Critical Care Drug Handbook, Eighth Edition

By Andrew J. Donnelly, Pharm.D., MBA, FASHP; Verna L. Baughman, M.D.; Jeffrey P. Gonzales, Pharm.D., BCPS; Julie Golembiewski, Pharm.D.; and Elizabeth A. Tomsik, Pharm.D., BCPS

The latest edition of this drug reference presents information on over 2,000 medications used in the care of surgical or critically ill patients. The text is presented in an easy-to-use, dictionary-style format with medications organized alphabetically. Each monograph includes up to 30 fields of information, including anesthesia and critical care concerns, use, dosages, monitoring parameters, and special consideration to anesthetic drug interactions when applicable.

Supplemental information includes a Special Topics/Issues section addressing perianesthetic patient management issues and an appendix covering abbreviations and measurements, comparative drug charts, commonly used herbal medicines, therapy recommendations, and more. A Pharmacologic Category Index is included.

Updates to this edition include:

- 15 new drug monographs
- U.S. Black Box warnings highlighted in the monographs

Special topics updates include:

- Anesthesia concerns for neurosurgery
- Anesthesia for geriatric patients
- Anesthesia for obstetric patients in non-obstetric surgery
- Perioperative management of the patient with diabetes
- Perioperative evaluation for noncardiac surgery in the cardiac patient

## Medication Errors, Second Edition

By Michael R. Cohen, Sc.D., D.P.S., M.S., R.Ph.

*Medication Errors* was specifically written to provide the health care community with practical guidance in making drugs safer for patients. Thirty experts from pharmacy, medicine, nursing, and risk management discuss causes for medication errors and strategies to prevent those errors. The book presents insights into the origin of many medication errors, including drug names, drug packaging and labeling, and error-prone abbreviations and dose expressions.

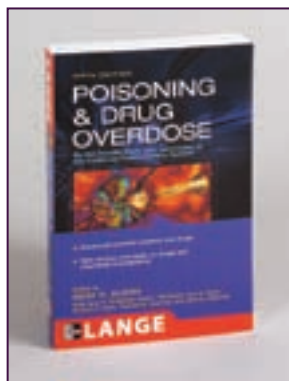

Experts additionally provide an in-depth analysis of errors in prescribing, dispensing, administering, and use of drug-delivery devices. The book also scrutinizes high-risk treatments, such as cancer chemotherapy and immunologic drugs, and high-risk patient populations, such as pediatric and neonatal patients. A full chapter is devoted to high-alert drugs and precautions regarding their use. Other key chapters discuss topics such as disclosure of errors, clinical bioethics of safe medication practices, and management of risks through a culture of safety.

## Poisoning & Drug Overdose, Fifth Edition

By Kent R. Olson, M.D.

*Poisoning & Drug Overdose* serves as a valuable guide for poison control staff, medical toxicologists, and emergency physicians by offering the latest recommendations on effective diagnosis and treatment of poisoning and drug overdose.

The guide contains essential insights and updated information on biological warfare agents and their newest antidotes. The author also discusses industrial chemicals and the most recent regulatory exposure limits. A detailed table within the "Industrial Chemicals" chapter summarizes current toxicity and workplace exposure guidelines for more than 500 industrial chemicals. The author also discusses special pregnancy considerations in poisoning and drug overdose.

Designed in a user-friendly format, the book features easy-to-read text and tables that contain specific drug dosage information; provides extensive cross-referencing; and offers a comprehensive index of generic, chemical, and brand names for many drugs and commercial products.

## Adverse Drug Reactions, Second Edition

Edited by Anne Lee, M.Phil., Pharm.S.

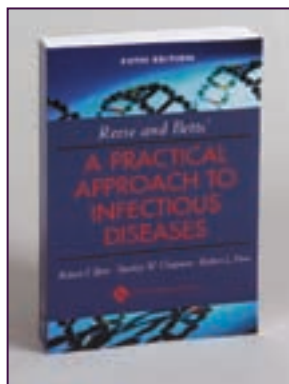

Adverse reactions to medicines continue to be a burden on health care, causing considerable morbidity and mortality. This essential, practical guide has been extensively revised and updated to include three new chapters on adverse effects, pharmacogenetics and adverse reactions, and adverse reactions in pregnancy. Case studies are provided with each chapter.

## Reese and Betts' A Practical Approach to Infectious Diseases, Fifth Edition

By Robert F. Betts, M.D.; Stanley W. Chapman, M.D.; and Robert L. Penn, M.D.

Now in a thoroughly revised, updated Fifth Edition, this handbook is a practical, easily accessible, and authoritative guide to the diagnosis and treatment of infectious diseases. Leading experts present realistic clinical approaches to infectious disease problems seen in hospital and outpatient settings and offer the latest information on antimicrobial use, including specific recommendations on dosages, routes of administration, and duration of therapy.

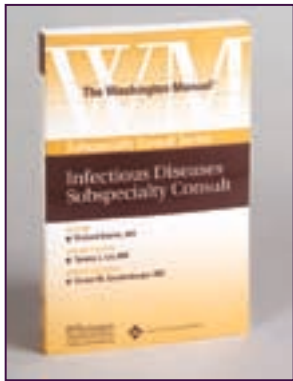

The editors make recommendations on their preferred treatment approach, which will aid readers in clinical decision-making. Chapters are written in a user-friendly outline format that is ideal for quick reference. This edition includes complete information on new diseases, new antibiotics, and HIV antiviral agents.

## The Washington Manual Infectious Diseases Subspecialty Consult

By Richard Starlin, M.D.; Michele Cabellon, M.D.; Rebecca Chandler, M.D.; Erik Dubberke, M.D.; Melissa Norton, M.D.; and Erin Quirk, M.D.

Prepared by residents and fellows at the Washington University School of Medicine, this handbook covers the full spectrum of infectious disease problems with the same frontline practicality as the world-famous *Washington Manual of Medical Therapeutics*. This consult manual offers clinicians valuable assistance in determining what infections patients are at risk for; where and how they acquired the infection; how to evaluate and manage the patient; and what complications to expect.

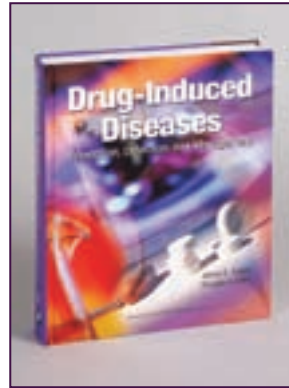

Chapters on infections of each organ system begin with an approach to that organ system. Other topics covered include bioterrorism, sexually transmitted diseases, brucellosis, systemic mycoses, immunizations, and antimicrobials.

## Drug-Induced Diseases: Prevention, Detection, and Management

Edited by James E. Tisdale, Pharm.D., FCCP, BCPS; and Douglas A. Miller, Pharm.D.

This comprehensive resource provides a detailed analysis of how to identify, prevent, and manage drug-induced diseases. Edited by James E. Tisdale and Douglas A. Miller, with contributions from experts distinguished in their respective specialties, *Drug-Induced Diseases* is organized logically and is easy to use. Opening chapters discuss the epidemiology, public health impact, and monitoring of drug-induced diseases, covering numerous diseases of every major organ system. Each chapter addresses a particular disease state and explores links to drugs that can cause the disease.

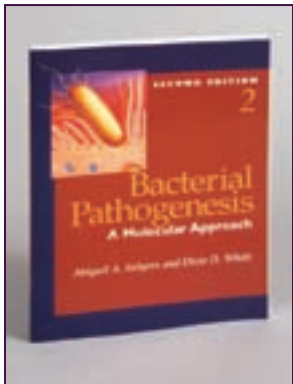

Drug-induced disease is responsible for extensive mortality, morbidity, and economic costs within the health care system. This book serves as an essential reference for clinicians in preventing and treating these diseases.

## Bacterial Pathogenesis: A Molecular Approach, Second Edition

By Abigail A. Salyers, Ph.D.; and Dixie D. Whitt, Ph.D.

Presenting a new perspective on the host-parasite interaction, the second edition of this best-selling text is designed to provide a comprehensive introduction to bacterial pathogenesis for both students and researchers. The authors integrate material from pathogenic microbiology, molecular biology, immunology, and human physiology to provide a complete overview of the field.

This edition includes two major components: Part I introduces the reader to the broad spectrum of bacterial

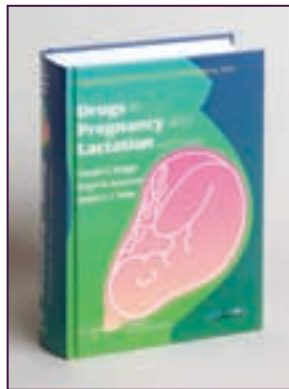

pathogenesis; Part II discusses specific pathogens and their role in disease. Each chapter in Part II begins with a snapshot of the organism(s) covered as intact entities associated with a particular disease. Detailed material is then presented in the text of the chapter. A summary of the material is presented in outline and table form at the end of each chapter, an arrangement that students find useful.

## Drugs in Pregnancy and Lactation, Eighth Edition

By Gerald G. Briggs, B.Pharm.; Roger K. Freeman, M.D.; and Sumner J. Yaffe, M.D.

Thoroughly updated, featuring 127 new drug entries, the Eighth Edition of this popular reference provides practical, reliable information on more than 1,175 drugs that may be used by pregnant and lactating women.

Each monograph summarizes the known and/or possible effects of the drug on the fetus and the known/possible passage of the drug into breast milk. U.S. Food and Drug Administration Risk Factor ratings for each drug are also included. Drugs are listed alphabetically and indexed by generic and United States and foreign trade names.

This edition includes more herbal medicines and nutritional supplements used by women. An important feature: recommendations for pregnancy and breastfeeding are shown at the top of each review to provide a quick assessment of the drug.

A companion Web site offers the fully searchable online text with links to the Briggs Update newsletter.

## The Top 100 Drug Interactions: A Guide to Patient Management, 2009 Edition

By Philip D. Hansten, Pharm.D.; and John R. Horn, Pharm.D., FCCP

This pocket sized authoritative drug interaction resource provides practical information for management of potential drug–drug interactions. The 2009 edition has been revised to include approximately 125 drug monographs detailing interactions with more than 3,900 drug pairs. The popular table of almost 350 CYP450 substrates, inducers, and inhibitors has been expanded to include information on common drug transporters including P-gp, OATP, and OCT. Also included are important herb–drug interactions as well as Hansten and Horn’s Drug Interaction

Probably Scale, which aids in assessing the probability of a causal relationship between a potential drug interaction and a patient event. The book index allows searching for drugs by generic or trade name.

## ADA Pocket Guide to Enteral Nutrition

By Pamela Charney, M.S., R.D.; and Ainsley Malone, M.S., R.D.

The pocket guide’s research-based content provides a quick reference for the management of patients on enteral feedings. Information is easy to locate and includes formulas, equations, and explanations of procedures.

Key topics within the guide include risk screening and assessment, enteral nutrition and specific medical conditions, short- and long-term access, initiation and advancement of enteral nutrition, transitional feedings, monitoring of complications, and home enteral nutrition.

## ADA Pocket Guide to Nutrition Assessment

By Pamela Charney, M.S., R.D.; and Ainsley Malone, M.S., R.D.

The *ADA Pocket Guide to Nutrition Assessment* provides convenient, reliable information on the tools and techniques of nutrition assessment. From nutrition screening to physical assessment, laboratory assessment, anthropometrics, and determining protein and energy requirements, this guide emphasizes interpretation and application of the findings to individual patient circumstances.

Both practical and comprehensive, this pocket guide is a valuable resource for almost any health care setting.

## Parenteral and Enteral Nutrition Manual, Eighth Edition

Edited by Nabil Khalidi, Pharm.D., BCNSP, FASHP; Imad F. Btaiche, Pharm.D., BCNSP; and Debra S. Kovacevich, R.N., M.PH.

Written by experts in the field of nutrition, the *Parenteral and Enteral Nutrition Manual* is an essential, concise reference for any clinician. This pocket-sized text includes pediatric and adult nutritional assessments and requirements; indications and routes of nutrition support delivery; the monitoring and evaluating of responses; complications associated with enteral feeding; and policies and techniques for nutrition administration. An index and bibliography complete the text, making this manual ideal for health care professionals in daily practice and for those preparing for specialty certification.

## A.S.P.E.N. Nutrition Support Practice Manual, Second Edition

By Editor-in-Chief Russell Merritt, M.D., Ph.D.

This practical “how-to” manual provides the most comprehensive and up-to-date information on the proper implementation of enteral and parenteral nutrition based on the American Society for Parenteral and Enteral Nutrition (A.S.P.E.N.) Guidelines, Safe Practices, and Standards of Practice.

Sections within the practice manual include fundamentals of nutrition support practice and management, immune-driven conditions, gastrointestinal-related conditions, surgical and critically ill conditions, metabolic conditions, and site

related and ethical issues. There are chapters on parenteral and enteral nutrition issues regarding AIDS, cancer, transplantation, and long term care. The publication includes an easy-to-use, searchable CD-ROM.

## A.S.P.E.N. Specialized Nutrition Support Tutorial: Writing Parenteral Nutrition Orders

By Editor-in-Chief Ainsley Malone, M.S., R.D., CNSD

This A.S.P.E.N. educational CD-ROM tutorial is designed to strengthen the clinician’s skills in writing parenteral nutrition orders. The tutorial provides instruction on how to perform a nutrition assessment to estimate nutrient requirements and to design a safe and appropriate parenteral nutrition formulation, including macronutrients, electrolytes, minerals, trace elements, and vitamins. The tutorial also describes how to identify the appropriate type of vascular access device for administration of parenteral nutrition. Other issues addressed

by the CD-ROM tutorial include monitoring patients for response and complications related to parenteral nutrition therapy and facilitating patients’ transition from in-patient to home parenteral nutrition.

In addition to the fundamentals of parenteral nutrition, the tutorial presents four interactive cases with neonatal, pediatric, adult medical, and adult surgical patients.

## Evidence-Based Herbal Medicine

Edited by Michael Rotblatt, M.D., Pharm.D.; and Irwin Ziment, M.D., FRCP

*Evidence-Based Herbal Medicine* is a handbook designed to provide practical, objective information on the use of herbal medicine. This well-organized and easy-to-reference handbook covers each herb with a summary of clinical trials and a rating of efficacy, evidence, and safety levels.

Evaluations of each herb include uses, pharmacology, clinical trials, adverse effects, preparations and dosages, interactions and cautions, analyses of controlled studies, and references. Provided in the appendix are reviews of other herbal medicinal

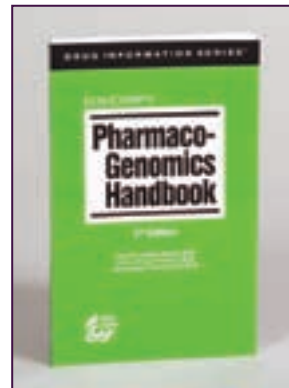

resources as well as a section on non-herbal dietary supplements.

## Pharmacogenomics Handbook, Second Edition

By Larisa M. Cavallari, Pharm.D., BCPS; Vicki L. Ellingrod, Pharm.D., BCPP; and Jill M. Kolesar, Pharm.D., FCCP, BCPS

This handbook presents information concerning key genetic variations that may influence drug disposition and sensitivity, providing a concise reference on key polymorphisms and their potentially altering effects on prescribed and over-the-counter drugs. The pocket-sized book serves as both a reference guide and an introduction to pharmacogenetic principles.

Contents include:

- Polymorphism monographs
- Cytochrome P450 nomenclature
- Table of cytochrome P450 enzymes, substrates, inhibitors, and inducers
- Alphabetic listing of drugs by generic and brand names
- Alphabetic listing of gene polymorphisms
- Index of polymorphisms and drugs potentially affected

## Pharmacoeconomics and Outcomes: Applications for Patient Care, Second Edition

An ACCP Publication

Fully updated and substantially expanded, this Second Edition of the well-known ACCP publication equips pharmacists and pharmacy students to develop the knowledge to evaluate economic and patient-based outcomes.

*Pharmacoeconomics and Outcomes* introduces the terminology and basic components of health care economics, outcomes research, and pharmacoeconomics. It identifies a strategy for designing a research question, a process for conducting a pharmacoeconomic evaluation, and

sources of data for economic outcomes analyses. The authors present many economic and humanistic assessments, their purpose, and their applications, including:

- Cost-of-illness analysis
- Cost-minimization analysis
- Cost-benefit analysis
- Cost-effectiveness analysis
- Cost-utility analysis
- Decision analysis
- Markov modeling
- Measuring health status
- Patient satisfaction

## Pharmacoeconomics and Outcomes: Applications for Patient Care, Case Studies

New with the Second Edition is a companion book of 12 case studies to reinforce learning. The case studies present real-world instances that enable users to apply the concepts presented in the main text. Each case study contains answers and rationales for the questions posed. Cases include:

- Cost-of-Illness Analysis; Calculation of the Cost of Migraine Within a Managed Care Organization
- Sensitivity Analysis
- Interpreting Scale Scores for an Individual Patient
- Formulary Decision-making Incorporating Humanistic Outcomes
- Evaluating and Justifying Clinical Services
- Policy Implications of a Health Economic Study

## Applied Pharmacokinetics & Pharmacodynamics, Fourth Edition

Ed. by Michael E. Burton, Pharm.D.; Leslie M. Shaw, Ph.D.; Jerome J. Schentag, Pharm.D., FCCP; and William E. Evans, Pharm.D., FCCP, BCPS

The definitive advanced-level clinical pharmacokinetics text is now in its Fourth Edition, with new emphasis on the relationship between pharmacokinetics and pharmacodynamics. Written by 70 leading researchers and practitioners, this book is a rigorous yet practical text on the application of pharmacokinetic methods, pharmacodynamic principles, and pharmacotherapeutic data for optimal, individualized drug therapy.

New with this edition:

- Increased emphasis on drug pharmacodynamics due to the evolution and growing wealth of knowledge from research in the area
- Case studies that help readers apply concepts they examine in the text to actual patient problems
- Five added chapters: "Critical Evaluations of Methods for Therapeutic Drug Monitoring," "Tacrolimus," "Mycophenolic Acid," "Sirolimus," and "Antipsychotics"
- Information on outcome studies with therapeutic drug monitoring
- More drawings and reference tables provide rapid access to key information for effective and efficient learning

## Clinical Epidemiology: The Essentials, Fourth Edition

By Robert H. Fletcher, M.D., M.Sc., and Suzanne W. Fletcher, M.D., M.Sc.

This comprehensive introduction to epidemiology offers a practical approach to developing a system for observing and assessing outcomes in similar patient types, and applying this knowledge to improve patient care. This fourth edition has been redesigned to enhance understanding with new illustrations, pedagogical tools, examples, and summary boxes. This book is a valuable tool for pharmacy students, as well as medical, nursing, and other healthcare students.

## Ethical Issues in Biomedical Publication

By Anne Hudson Jones and Faith McLellan, eds.

Here is a resource to aid in training researchers in the highest standards of sound, ethical scientific research. Focusing on publication ethics as an essential aspect of responsible scientific conduct, *Ethical Issues in Biomedical Publication* examines a variety of troublesome issues, including authorship, peer review, repetitive publication, conflict of interest, and electronic publishing. Contributors include the editors of distinguished biomedical journals, humanities scholars, scientists, lawyers, and a university administrator. Chapters address specific ethical issues and

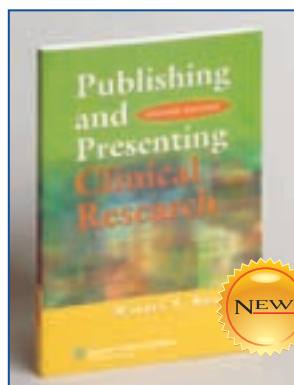

offer recommendations for preventing or solving problems associated with them. This book serves as a standard reference for biomedical researchers, authors, editors, and teachers of research ethics.

## Publishing and Presenting Clinical Research, Second Edition

By Warren S. Browner

Here is an excellent practical primer for researchers who want to learn how to organize, present, and publish the results of their research. Written in a clear style with numerous examples, tables, and figures, the book shows how to produce a successful abstract, poster, and/or manuscript for publication.

This updated edition reflects the growing use of software in preparing and submitting presentations and publications. The posters and oral presentations chapters have been completely rewritten to cover

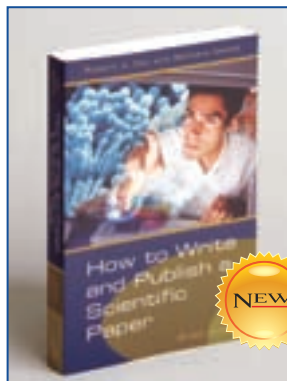

PowerPoint® technology. Emphasis is placed on learning how to create graphics for written research. This edition also includes new clinical examples.

## How to Write and Publish a Scientific Paper, Sixth Edition

By Robert A. Day and Barbara Gastel

To be useful, scientific research needs to be explained clearly to others—to colleagues, to administrators, to foundations and governmental bodies, and to the public. The classic *How to Write and Publish a Scientific Paper* gives both beginning scientists and experienced researchers practical advice on writing about their work and publishing what they write. The core of the book consists of a how-to guide to writing and publishing research articles, explaining every step of the process, from choosing a suitable publisher to presenting the results of your work and citing references.

In addition to the information on writing, this book provides additional advice for scientists of the twenty-first century:

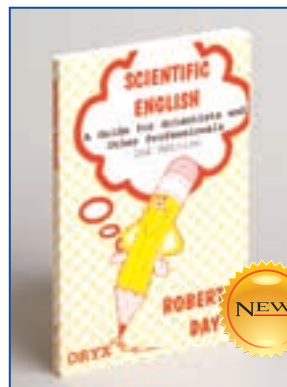

- What ethical issues are important in scientific publishing?
- What should a scientist know about rights and permissions?
- How does a scientist write a grant proposal or prepare progress reports for administrators?
- What should a scientist know to work well with the media or to write for a general audience?

## Good Clinical Practice: A Question and Answer Reference Guide 2008

By Mark P. Mathieu, ed.

Newly updated and expanded for 2008, this industry-leading Good Clinical Practice (GCP) training and reference guide answers approximately 500 of the most common and difficult questions regarding the day-to-day interpretation and implementation of GCP requirements for drugs and biologics.

While maintaining a U.S. Food and Drug Administration focus, the guide has been expanded to provide even more information on not only U.S. GCP, but international GCP issues in, for example,

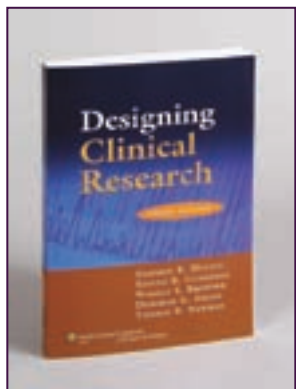

the European Union, Canada, India, Latin America, Russia, and China. This is the guide for educating professionals on the many emerging complexities of GCP standards.

## Designing Clinical Research, Third Edition

By Stephen B. Hulley, M.D., M.P.H.; Steven R. Cummings, M.D.; Warren S. Browner, M.D., M.P.H.; Deborah G. Grady, M.D., M.P.H.; and Thomas B. Newman, M.D., M.P.H.

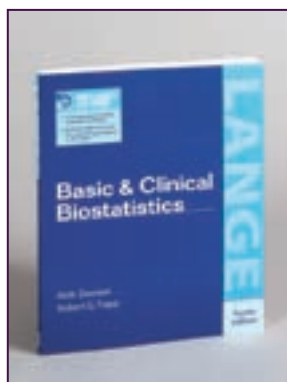

This book has set the standard for providing a practical guide to planning, tabulating, formulating, and implementing clinical research. The straightforward, reader-friendly text explains how to choose well-focused research questions and details the steps through the elements of study design, data collection, quality assurance, and basic grant writing. The third edition presents current research methodology, including molecular and genetic clinical research, and provides a syllabus for conducting a clinical research workshop.

## Basic & Clinical Biostatistics, Fourth Edition

By Beth Dawson, Ph.D.; and Robert G. Trapp, M.D.

This publication presents the ideal way to develop sound judgment about data applicable to clinical care. A thorough and interesting presentation of biostatistics, this book is the first choice of students, educators, and practitioners. Readers will become informed users of biostatistics and learn to evaluate and apply statistics in medicine, medical research, and all health-related fields.

Features include:

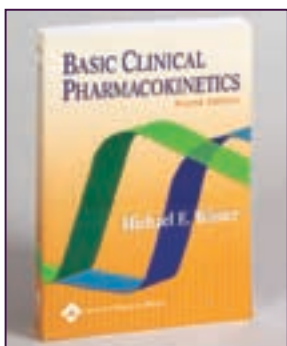

- Emphasis on the basics of biostatistics and epidemiology and the clinical applications in evidence-based medicine and decision-making methods
- New chapter on survey research
- Expanded discussion of logistic regression, the Cox model, and other multivariate statistical methods
- Problems drawn from studies in the medical literature that illustrate the various statistical methods
- CD-ROM with number-crunching statistical software, procedures, and data sets from the presenting problems
- End-of-chapter exercises
- Multiple-choice final practice examination

## Basic Clinical Pharmacokinetics, Fourth Edition

By Michael E. Winter, Pharm.D.

*Basic Clinical Pharmacokinetics* is designed to simplify pharmacokinetics and help busy practitioners understand and visualize basic principles. The easy-to-read case-study format has made the text a favorite among clinical professors, students, and practitioners. The text provides an introduction to the principles of monitoring drug therapy for those involved in the interpretation of drug levels in the patient care setting.

Part One provides a basic review of pharmacokinetic principles. Extensive explanations, graphic illustrations, and detailed algorithms teach the principles of bioavailability, volume of distribution, clearance, elimination rate constant, and half-life. Part Two explains the clinical applications of these principles. Solutions to problems commonly encountered in the practice setting are discussed for specific drugs. Appendices provide commonly used equations and a glossary of pharmacokinetic terms and abbreviations.

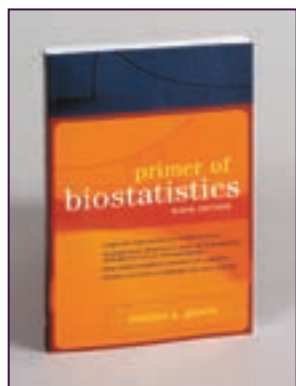

New to this edition are chapters on tricyclic antidepressants and cyclosporine, an expanded chapter on dialysis, and updated information on choosing equations and interpreting plasma drug concentrations.

ISBN: 978-0-7817-4147-7; 2003; 576 pages; softbound

### Primer of Biostatistics, Sixth Edition

By Stanton A. Glantz, Ph.D.

This introduction to biostatistics presents a challenging topic in a readable and enjoyable format that assumes no prior knowledge of the subject. The reader is quickly prepared to understand test selection and to be able to evaluate biomedical statistics critically and knowledgeably.

The primer begins with the basics, including analysis of variance and the t-test, and then advances to multiple comparison testing, contingency tables, and regression. Examples from the current

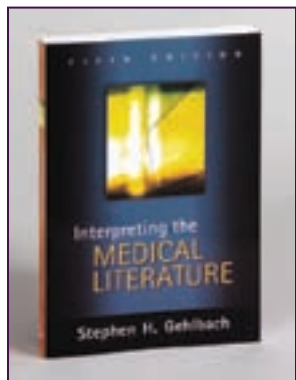

biomedical literature illustrate key concepts throughout the book. New to the sixth edition are discussions of relative risks and odds ratios, more material on multiple comparison testing (e.g., the Holm test), a new two-color design, and review questions within each chapter.

### Interpreting the Medical Literature, Fifth Edition

By Stephen H. Gehlbach, M.D., M.P.H.

Keeping up with the medical literature is a daunting task for most health care professionals, especially as medical research becomes increasingly sophisticated and statistical analysis more complex. This easy-to-follow guide will enhance your ability to demystify, interpret, and analyze research literature, making the task not only palatable but also quicker, easier, and more enjoyable.

A highlight of the Fifth Edition includes a new chapter on how to interpret conflicting studies. Other features of this

edition are an expanded discussion on meta-analysis and developing consensus; updated examples from the literature; and a thorough review of text and references.

ISBN: 978-0-07-143789-9; 2006; 308 pages; softbound

### The ACCP Scientific Series, Second Edition

An ACCP Publication Series

This comprehensive two-part series presents key concepts in biostatistics. It is available for purchase individually or as a series.

#### Biostatistics I, Second Edition

Biostatistics I discusses types of research data and introduces the use of biostatistics. The 100-plus page syllabus and companion set of audio CDs or cassettes cover:

- Key concepts of statistical inference
- Statistical inference on interval data: t-tests
- Statistical inference on interval data: one-way analysis of variance
- Statistical analysis of lines: correlation and regression
- Statistical inference on nominal data: chi-square and Fisher's exact test
- Essential clinical concepts of biostatistics

2000; 143 pages; softbound

#### Biostatistics II, Second Edition

Biostatistics II presents concepts in biostatistics. The 100-plus page syllabus and companion set of audio CDs or cassettes cover:

- Types of errors in inferential statistics
- Repeated-measures analysis of variance and analysis of covariance
- Multivariable regression
- Nonparametric statistics for ordinal and interval data
- Statistical concepts and methods used to evaluate pharmacotherapy

2000; 161 pages; softbound

	Biostatistics I	Biostatistics II	Biostatistics I and II
Member Price	\$65.00	\$60.00	\$117.00
Nonmember Price	\$86.00	\$79.00	\$156.00

## ACCP Research Institute

The mission of the ACCP Research Institute is to advance pharmacotherapy through support and promotion of research, training, and educational programs. The Research Institute is committed to uncompromising excellence in scholarship, education, and research, while expanding the impact of clinical pharmacy professionals across the entire health care community. See page 41 for ways that you can contribute to this important endeavor.

## Biostatistics for Clinicians and Researchers

An ACCP Online Educational Program

A solid understanding of biostatistics is essential for all clinical pharmacists. This online educational program is designed for both the beginning biostatistician and the experienced clinician and researcher. Developed by ACCP and its Pharmacokinetics/Pharmacodynamics Practice and Research Network, the two-part program presents basic and applied biostatistics.

Part I, Biostatistics Review and Primer, covers fundamentals of biostatistics and is intended both for beginners and those who

want a refresher course. Types of data, descriptive statistics, statistical tests, and regression and correlation analyses compose the core curriculum.

Part II, Implementing Biostatistical Applications in Research and Clinical Practice, introduces applied biostatistics. This section presents a practical approach to using biostatistical principles in clinical trial design, pharmacoeconomics, and drug literature evaluation.

Member Price            \$110.00  
Nonmember Price        \$160.00

ISBN: 1-880401-96-7; online book

## The Elements of Style, Fourth Edition

By William Strunk Jr.; and E.B. White

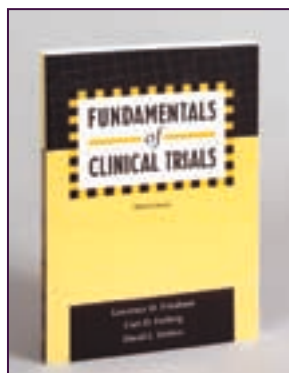

This classic reference book is a must-have for any student or conscientious writer. The book presents the principal requirements of plain English style and concentrates on the rules of usage and principles of composition that are most commonly violated.

Member Price            \$9.95  
Nonmember Price        \$10.95

ISBN: 978-0-205-30902-3; 1999; 105 pages; softbound

## Fundamentals of Clinical Trials, Third Edition

By Lawrence M. Friedman, M.D.; Curt D. Furberg, M.D., Ph.D.; and David L. DeMets, Ph.D.

This text is intended for the clinical researcher who is interested in designing a clinical trial and developing a protocol. It also is of value to researchers and practitioners who must critically evaluate the literature of published clinical trials and assess the merits of each trial and the implications for the care and treatment of patients.

The organization of the text in *Fundamentals of Clinical Trials* presents the essentials in the order they would be used to develop a typical protocol. To best aid the clinical

trial researcher, a chapter is devoted to each of the critical areas of a protocol. The fundamentals described in this text are based on sound scientific methodology, statistical principles, and years of accumulated experience by the three authors.

Member Price            \$66.95  
Nonmember Price        \$71.95

ISBN: 978-0-387-98586-2; 1998; 361 pages; softbound

## Grant Application Writer's Handbook, Fourth Edition

By Liane Reif-Lehrer, Ph.D.

*Grant Application Writer's Handbook, Fourth Edition*, addresses step by step the key points in developing grant proposals. Dr. Liane Reif-Lehrer has been funded by the National Institutes of Health (NIH) during her academic career and has served as a member of an NIH Study Section. In this text, Reif-Lehrer uses her extensive experience to guide both first-time grant seekers and those who have experience seeking funding, but who could benefit from updated information and tips on newly instituted guidelines.

Sections include:

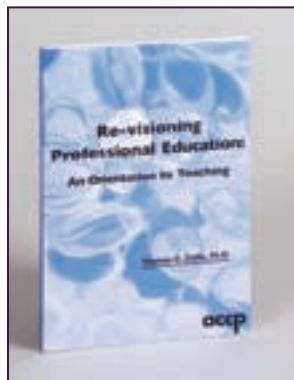

- Getting started
- Understanding the NIH review process
- Parts of the grant application
- Planning the research plan
- Writing the research plan
- Submitting and tracking the grant application
- Summary statements, rebuttals, and revisions
- Appendices and index

Member Price            \$59.95  
Nonmember Price        \$65.95

ISBN: 978-0-7637-1642-4; 2005; 362 pages; softbound

## Re-visioning Professional Education: An Orientation to Teaching

An ACCP Publication  
By Thomas D. Zlatic, Ph.D.

ACCP's *Re-visioning Professional Education: An Orientation to Teaching* presents educational principles that describe how learning takes place and offers a vision for the type of education required to prepare practitioners to provide pharmaceutical care. The book is designed for both new and experienced clinical faculty and preceptors.

Author Thomas D. Zlatic, professor of English and director of the Writing Center at St. Louis College of Pharmacy, invites readers to take instructional approaches beyond conveyance of information and

to embrace a philosophy, style, and manner of teaching that lead students to master the general and professional abilities necessary for competent pharmacy practice.

Zlatic discusses the nature of teaching, addressing the premise that teaching, as a profession, is based on fiducial or covenantal relationships. He makes a strong case for clinical educators to promote active learning that prepares practitioners to provide pharmaceutical care in all its dimensions, including knowledge, skills, attitudes, and values. He presents rationales for incorporating higher order thinking into the pharmacy curriculum and offers strategies for active learning to motivate students to attain educational goals related to the mission of pharmacy practice.

Chapter topics include defining and teaching critical thinking within professional contexts, devising active learning strategies that help students practice professional abilities, using assessment to structure learning, and employing writing to learn methodologies within professional courses and practice experiences.

## StuNet: The Network for Future Clinical Pharmacists

StuNet provides essential networking opportunities for student pharmacists. Visit [www.accp.com/stunet](http://www.accp.com/stunet) for career and professional resources offered to student members.

## Clinical Faculty Survival Kit

An ACCP Publication

The *Clinical Faculty Survival Kit* offers the keys to a successful faculty appointment by focusing on solid career development. The guide focuses on personal and professional development and on understanding the academic environment.

Focused on new and junior faculty, this guide provides a foundation for properly developing a career while keeping one's personal life in balance. The guide also targets senior faculty responsible for faculty mentorship and departmental leadership.

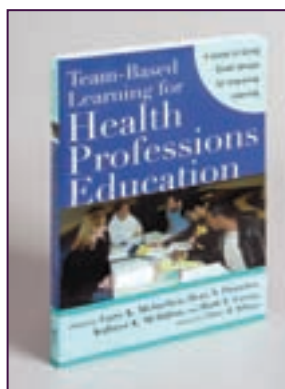

Advice is given on how to overcome the common barriers that faculty members encounter. Other key areas include scholarship excellence, time and project management, grantsmanship, personal development, research, and teaching. References and Web sites are included.

Member Price           \$19.95

ISBN: 1-880401-82-7; 2004; 56 pages; softbound

## Team-Based Learning for Health Professions Education: A Guide to Using Small Groups for Improving Learning

Edited by Larry K. Michaelsen, Dean X. Parmelee, Kathryn K. McMahon, and Ruth E. Levine

Education in the health professions is placing greater emphasis on "active" learning—learning that requires applying knowledge to authentic problems and that teaches students to engage in the kind of collaboration that is expected in today's clinical practice.

Team-based learning (TBL) is a strategy for accomplishing these goals. It can be used to transform passive, lecture-based coursework into an environment that promotes more self-directed learning and teamwork.

This book is an introduction to TBL for health professional educators. It outlines the theory, structure, and process of TBL; explains how TBL promotes problem solving and critical thinking skills; aligns with the goals of science and health courses; improves knowledge retention and application; and develops students as professional practitioners. The book provides models and guidance on team formation and maintenance, peer feedback and evaluation processes, and facilitation. A directory of tools and resources is also included.

Chapters are included in which instructors from a broad range of courses describe how they apply TBL. The book concludes with a review and critique of the current scholarship on TBL in the health professions and explores the need for future research.

## What the Best College Teachers Do

By Ken Bain

What makes a great teacher great? Who are the professors students remember long after graduation? This book, the conclusion of a fifteen-year study of nearly one hundred college teachers in a wide variety of fields and universities, offers valuable answers for all educators.

The short answer is—it's not what teachers do, it's what they understand. Lesson plans and lecture notes matter less than the special way teachers comprehend the subject and value human learning. The best teachers know their subjects inside

and out—but they also know how to engage and challenge students and to provoke impassioned responses. Most of all, they believe two things fervently: that teaching matters and that students can learn.

In humorous and touching stories, the author describes examples of ingenuity and compassion, of students' discoveries of new ideas and the depth of their own potential. *What the Best College Teachers Do* offers insight and inspiration for both first-year teachers and seasoned educators.

## Developing Outcomes-based Assessment for Learner-centered Education

By Amy Driscoll and Swarup Wood

Offering a description of the basics of outcomes-based assessment, this book strives to empower faculty to develop and maintain ownership of assessment by articulating the learning outcomes and evidence of learning that are appropriate for their courses and programs. Readers are offered a guide to the not always tidy process of articulating expectations, defining criteria and standards, and aligning course content consistently with desired outcomes. With a wealth of examples and stories, including accounts of successes and false-starts, the authors use a

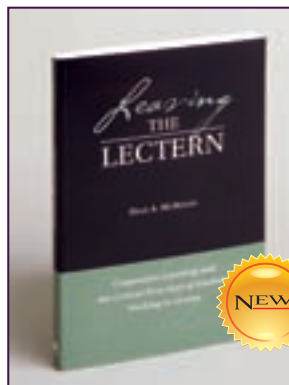

personal voice to provide a realistic and honest guide to what is involved in the institutionalization of assessment. This is a must-read for faculty, staff, and campus leaders.

Member Price            \$21.95

ISBN: 978-1-57922-195-9; 2007; 287 pages; softbound

## Leaving the Lectern: Cooperative Learning and the Critical First Days of Students Working in Groups

By Dean A. McManus

Here is the story of how one professor at a research university used a form of active learning to change the way he taught—from traditional lectures and examinations to cooperative learning and student projects. Engagingly written, *Leaving the Lectern* offers an insightful look at the challenges and rewards of achieving change in the classroom. Readers will discover the kinds of risks, assumptions, and decisions they will face as they change their teaching to emphasize student learning.

Features in the book include:

- Reflective questions at the end of each chapter to aide in using the chapter information
- References to pedagogical precepts, strategies, and tools
- Seven themes to help bring about change: accept risk, use feedback, reflect, adapt and be flexible, establish a partnership, accept that you are teaching in a different world, and finally, welcome the joy

## Publishing Opportunities through ACCP

**The American College of Clinical Pharmacy is always seeking new publications and products to develop in conjunction with ACCP members.**

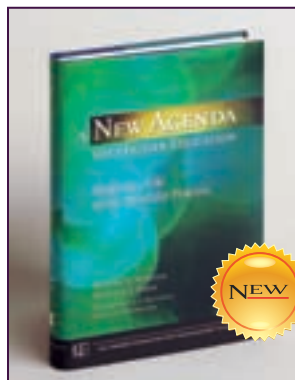

**If you have an idea for a book, teaching material, monograph, or other information product that you think needs to reach a market that includes clinical pharmacists, faculty, students, and other health care practitioners, we would like to talk with you about working with ACCP to publish and market your ideas.**

**Here is your opportunity to develop a resource to advance knowledge for our profession and at the same time enhance your professional development. Publishing with ACCP can further your professional reputation while giving you the opportunity to make a significant contribution to the clinical pharmacy field.**

**If you would like to discuss your ideas please contact Janel Mosley, Publications Project Manager, at [jmosley@accp.com](mailto:jmosley@accp.com) or visit [www.accp.com/docs/bookstore/proposal.pdf](http://www.accp.com/docs/bookstore/proposal.pdf) to complete an ACCP Publishing Proposal.**

## A New Agenda for Higher Education: Shaping a Life of the Mind for Practice

By William M. Sullivan and Matthew S. Rosin

*A New Agenda for Higher Education: Shaping a Life of the Mind for Practice* is an important work for all pharmacy faculty. In this work, the authors propose a new model of teaching that focuses on the interdependence of liberal education and professional training.

Historically, higher education has aimed to enhance the students' possibilities of life: in the liberal arts and sciences by cultivating a "life of the mind"—the intellectual dimensions such as problem-solving capacities and critical thinking; and,

on the other hand, in the professional schools by focusing on providing the means for students to "make something of themselves" by acquiring competence in specific skills. These authors endorse a third, different concept of educational purpose.

The book is based on the Carnegie Foundation for the Advancement of Teaching seminar that brought together educators from six professional fields along with faculty from the liberal arts and sciences. The authors relate how they learned to collaborate with one another across fields and, in the end, produced a new discourse of practical reason. Included are case studies of instructors from a wide array of disciplines.

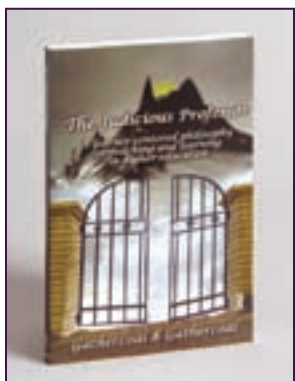

Faculty, administrators, and those interested in the promise of higher education can glean valuable suggestions on how to put these insights to work in their own academic contexts.

Member Price                      \$36.95  
Nonmember Price                \$39.95

ISBN: 978-0-470-25757-9; 2008; 272 pages; hardbound

## The Judicious Professor

By Paul Gathercoal and Forrest Gathercoal

*The Judicious Professor* provides an examination and analysis of teaching at the college and university level, with a focus on the sharing of responsibility for teaching and learning between the professor and students. Through theory and practical examples, the nature of the judicious professor is discussed and demonstrated.

Using the metaphor of the professor as the "keeper of the gate of knowledge," the professor is characterized as the conscience of academic responsibility to the discipline

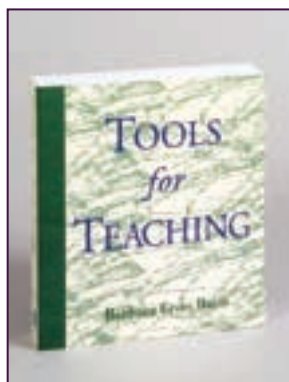

as well as to greater society. This book explores the importance of students' perception: when students perceive the professor as a person who is sharing responsibility for the students' academic achievement, the rate of student success will increase, as will the distribution of the knowledge base throughout society.

Member price:                    \$25.95  
Nonmember price:               \$29.95

ISBN: 978-1-880192-53-5; 2007; 228 pages; softbound

## Tools for Teaching

By Barbara Gross Davis, Ph.D.

*Tools for Teaching* serves as a rich compendium of classroom-tested strategies and suggestions designed to improve the teaching practice of beginning, mid-career, and senior faculty members. The author presents 49 teaching tools that focus on traditional tasks, such as writing a course syllabus and delivering a lecture, and newer, broader concerns, such as responding to diversity and using technology.

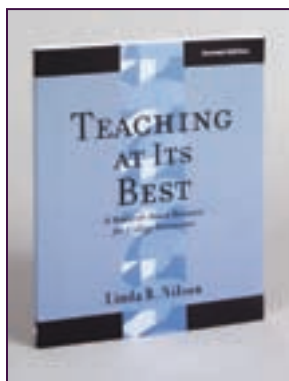

The author addresses issues such as making the most of students' needs as an incentive for learning, using approaches that encourage students to become active participants in learning, and inviting student feedback on what makes classes motivating.

Member Price                      \$34.95  
Nonmember Price                \$39.95

ISBN: 978-1-55542-568-5; 1993; 442 pages; softbound

## Teaching at Its Best: A Research-Based Resource for College Instructors, Second Edition

By Linda B. Nilson, Ph.D.

*Teaching at Its Best* is a top-selling handbook loaded with practical teaching techniques, formats, classroom activities, and exercises. It covers topics relevant to today's classroom such as technology and the Internet, simulations and games, diversity, service learning, and faculty evaluation systems.

This second edition retains the proven, practical information from the first edition but incorporates additional sections on course portfolios, teaching with laptops, teaching problem solving, and incentives for students to complete their readings. The author also presents information on adult learning, the learning-centered syllabus, and the cognitive profile learning styles model. Chapters are devoted to classroom management, incivility, academic honesty, and grading.

Member Price                      \$36.95  
Nonmember Price                \$43.95

ISBN: 978-1-882982-64-6; 2003; 245 pages; softbound

## Creating Significant Learning Experiences: An Integrated Approach to Designing College Courses

L. Dee Fink, Ph.D.

Many teachers use content-centered approaches to instruction, but the author advocates a learning-centered approach in which courses are developed to create significant learning experiences for students. Fink draws on existing concepts in the literature on college teaching (e.g., active learning, educative assessment), adds some new ideas (e.g., a taxonomy of significant learning, a teaching strategy theory), and shows how to systematically combine these in a way that results in powerful learning experiences for students.

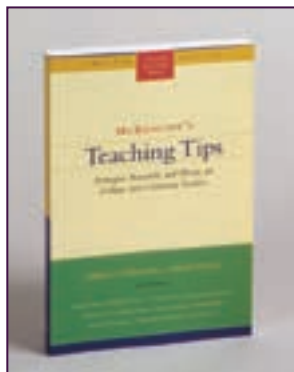

The book presents valuable conceptual and procedural tools for teachers in their work of designing instruction. Acquiring a deeper understanding of the design process will empower teachers to creatively design courses for significant learning in a variety of circumstances and settings.

Member Price \$38.95  
Nonmember Price \$42.95

ISBN: 978-0-7879-6055-1; 2003; 320 pages; hardbound

## McKeachie's Teaching Tips: Strategies, Research, and Theory for College and University Teachers, 12th Edition

By Wilbert J. McKeachie, Sc.D., Ph.D.

*McKeachie's Teaching Tips* provides strategies for dealing with everyday problems of teaching at the university level and of trying to maximize learning for every student. The suggested strategies are supported by research and are grounded in enough theory to enable teachers to adapt them to their own situations. The author does not suggest a set of recipes to be followed mechanically; rather, he gives teachers the tools they need to deal with the ever-changing dynamics of teaching and learning.

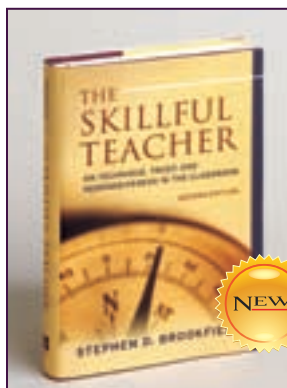

The book's organization and consolidation of chapters allow the text to maintain its handy pocket-size length, while incorporating new information. The 12th Edition features coverage of updated technology in the "Technology and Teaching" chapter, including issues such as the use of PowerPoint slides, plagiarism, and effective Internet research.

Member Price \$59.95  
Nonmember Price \$64.95

ISBN: 978-0-618-51556-1; 2006; 407 pages; softbound

## The Skillful Teacher: On Technique, Trust, and Responsiveness in the Classroom, Second Edition

By Stephen D. Brookfield

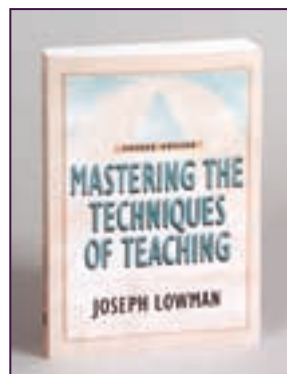

Offering inspiration and down-to-earth advice to both new and seasoned teachers, *The Skillful Teacher* is a comprehensive guide on how to thrive on the unpredictability and diversity of classroom life. Included are insights developed from hundreds of workshops conducted by the award-winning author. New to this edition are emerging topics from the changing classroom of the last decade, including new chapters that deal with classroom diversity and teaching in the new world of online learning environments.

## Mastering the Techniques of Teaching, Second Edition

By Joseph Lowman, Ph.D.

In this second edition of his classic resource, Joseph Lowman expands on his earlier model of effective teaching by placing greater emphasis on motivational skill and commitment to teaching. He presents a practical new learning model that compares six sources of influence on what and how students learn in a college course.

All types of teachers and instructors will discover options on how to organize classes and use group work to promote learning. They will also find a checklist

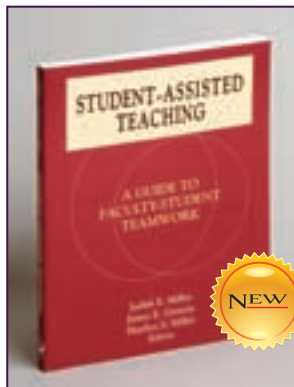

for assessing their classroom performance on video, detailed instructions for using video analysis to improve their technique, and an innovative approach to evaluating their overall performance.

Member Price \$36.95  
Nonmember Price \$39.95

ISBN: 978-0-7879-5568-7; 2000; 368 pages; softbound

## Student-Assisted Teaching: A Guide to Faculty-Student Teamwork

Edited by Judith E. Miller, James E. Groccia, and Marilyn S. Miller

For faculty, faculty developers, and administrators wanting to make learning more student-centered, more effective, and more productive, here is an innovative handbook that provides a range of models for student-assisted partnerships.

Each of the 31 models is supported by practical details and each focuses on four main aspects of a specific peer-assisted learning environment: implementation, evidence of effectiveness and learning benefits, analysis of time and cost expenditures, and suggestions for replication.

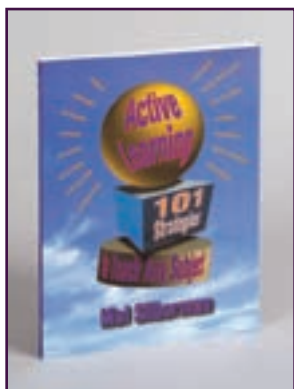

Extensive appendices aid implementation by providing concrete examples of evaluation methods, training syllabi, teaching materials, and hiring documents.

## Active Learning: 101 Strategies to Teach Any Subject

By Mel Silberman, Ph.D.

This text offers myriad instructional strategies to engage students in learning any subject. The book presents practical strategies that require action and thinking from students about the subject matter, building teamwork among students during their learning experiences. Designed for the pre-service and in-service teacher, this book is effective for anyone teaching in middle school, high school, college, or a center for adult education.

Member Price \$45.95  
Nonmember Price \$50.95

ISBN: 978-0-205-17866-7; 1996; 189 pages; softbound

## Active Learning: Creating Excitement in the Classroom

By Charles C. Bonwell, Ph.D.; and James A. Eison, Ph.D.

This publication presents active learning as a teaching method that results in greater student involvement and knowledge retention. Included in the book are modifications to traditional lectures, alternative lecture formats, challenges in active learning, and practical strategies.

The authors discuss the importance of understanding the nature of active learning, the research regarding its use, and common obstacles to instructors in incorporating active learning in their classrooms. Faculty developers,

administrators, and educational researchers learn how they can encourage and promote active learning in their educational institutions.

Member Price \$28.95  
Nonmember Price \$51.95

ISBN: 978-1-878380-08-1; 1991; 128 pages; softbound

## Engaging Large Classes: Strategies and Techniques for College Faculty

Edited by Christine A. Stanley, Ph.D.; and M. Erin Porter, Ph.D.

*Engaging Large Classes* taps the knowledge and skill of 34 experienced educators who teach large classes (100-plus students) in a broad range of disciplines and institutions. These contributing authors present strategies for structuring large classes to promote learning, managing the logistics of a large class, presenting alternatives to the lecture format, and maximizing the advantages of a large class.

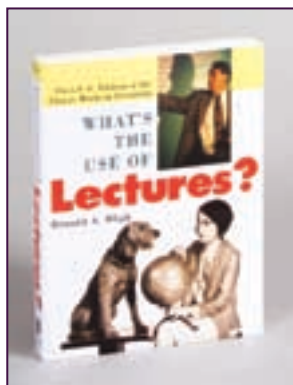

Chapters in Part I address course design, planning and assessment, promoting civility, active and collaborative learning, classroom technology, working with teaching assistants, and a review of research. Part II includes essays written by teachers of large classrooms from disciplines such as agriculture, business, clinical sciences, education, engineering, English, law, mathematics, sciences, and social sciences. The book concludes with a summary of strategies and key points for teaching in large classes.

Member Price \$38.95

ISBN: 978-1-882982-51-7; 2002; 353 pages; hardbound

## What's the Use of Lectures?

By Donald A. Bligh

Based on decades of research and hands-on experience, the author wrote *What's the Use of Lectures?* to help college and university teachers develop and use lectures effectively. The book presents insights on the nature of teaching and learning in a classroom lecture, describing how students learn, how much knowledge they retain, and how to enhance their attention and motivation.

Expect to learn strategies for creating organized, thoughtful, and effective lectures. Topics include taking notes, using

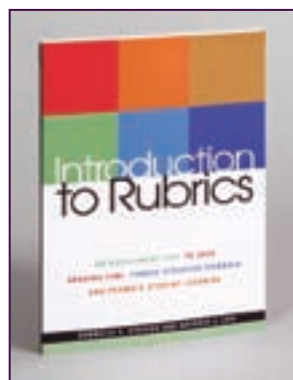

handouts, practicing different formats and styles, obtaining feedback, overcoming difficulties, evaluating the lecture, and testing alternative methods to lectures. The book serves as a guide for anyone who aspires to be a skilled lecturer and teacher.

Member Price           \$35.95  
Nonmember Price       \$40.95

ISBN-10: 0-7879-5162-5; 2000; 346 pages; softbound

## Introduction to Rubrics: An Assessment Tool to Save Grading Time, Convey Effective Feedback, and Promote Student Learning

By Dannelle D. Stevens, Ph.D.; and Antonia J. Levi, Ph.D.

Research shows that rubrics save professors time while conveying meaningful and timely feedback for students. Rubrics also promote self-regulated and independent learning. The reason rubrics are rarely used in higher education is that few faculty members have been exposed to their use.

The authors describe a variety of processes to construct rubrics, including some that involve student participation. They demonstrate how interactive rubrics—a process involving assessors and the

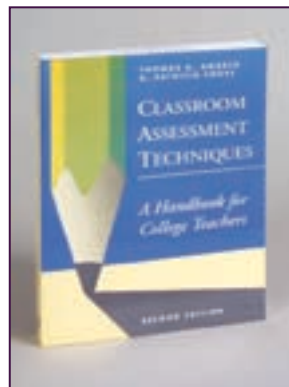

assessed in defining the criteria for an assignment or objective—can be effective.

Member Price           \$16.95

## Classroom Assessment Techniques: A Handbook for College Teachers, Second Edition

By Thomas A. Angelo, Ed.D.; and K. Patricia Cross, Ph.D.

This handbook offers teachers at all levels how-to advice on classroom assessment, including:

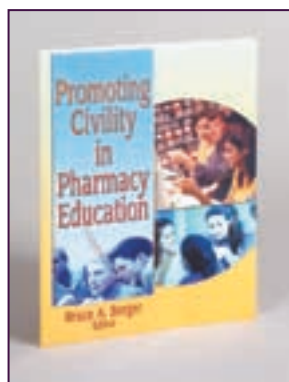

- What classroom assessment entails and how it works
- How to plan, implement, and analyze assessment projects
- Twelve case studies that detail the real-life classroom experiences of teachers who are carrying out successful classroom assessment projects
- Fifty classroom assessment techniques
- Step-by-step procedures for administering the techniques
- Practical advice on how to analyze your data

Member Price           \$44.95

## Promoting Civility in Pharmacy Education

By Bruce A. Berger, Ph.D., R.Ph.

Incivility is a growing problem within all aspects of pharmaceutical education and, indeed, across the spectrum of higher education. *Promoting Civility in Pharmacy Education* describes the issues involved and provides practical solutions. With this book, readers will learn which teaching characteristics lead to more/less incivility in the classroom, how to make expectations known in a nonconfrontational manner, and how to respond to incivilities from students, administrators, and faculty.

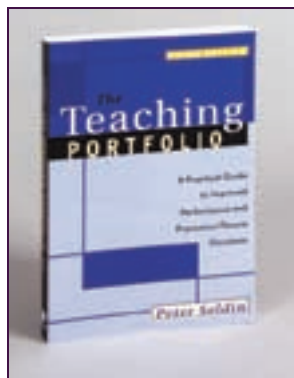

The book assists educators in addressing problems such as “passive” incivilities, which include inattention, lateness, asking for extensions on assignments, making excuses, and “overt” incivilities, which include vulgar language, insulting comments, direct challenges to the teacher’s authority, and physical threats.

Member Price           \$18.95  
Nonmember Price       \$24.95

ISBN: 978-0-7890-2121-2; 2003; 122 pages; softbound

## The Teaching Portfolio: A Practical Guide to Improved Performance and Promotion/Tenure Decisions, Third Edition

By Peter Seldin, Ph.D.

In its third edition, *The Teaching Portfolio* has been significantly revised and expanded but continues its focus on self-reflection and documenting teaching performance. Its straightforward approach, practical suggestions, step-by-step instructions, and field-tested recommendations will prove invaluable to those involved in evaluating and improving teaching.

Now organized into five parts, this edition includes new information on Web-based electronic teaching portfolios, descriptions of how seven colleges and universities have

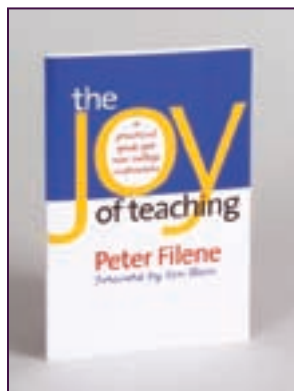

actually implemented portfolios, and 22 new sample teaching portfolios from an array of disciplines and institutions.

Member Price            \$35.95  
Nonmember Price        \$38.95

ISBN: 978-1-882982-69-1; 2004; 349 pages; softbound

## The Joy of Teaching: A Practical Guide for New College Instructors

By Peter G. Filene, Ph.D.

Gathering concepts and techniques borrowed from outstanding college professors, *The Joy of Teaching* provides helpful guidance for new instructors developing and teaching their first college courses.

Rather than prescribe any single model for success, the author examines the advantages and disadvantages of various pedagogic strategies, inviting new teachers to make choices based on their own personalities, values, and goals.

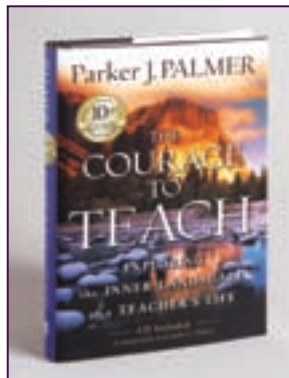

The author tackles everything from syllabus writing and lecture planning to class discussions, grading, and teacher-student interactions outside the classroom. The book's down-to-earth, accessible style makes it appropriate for new teachers in all fields.

## The Courage to Teach: Exploring the Inner Landscape of a Teacher's Life, 10th Anniversary Edition

By Parker J. Palmer, Ph.D.

The Tenth Anniversary Edition of *The Courage to Teach* takes teachers on an inner journey toward reconnecting with themselves, their students, their colleagues, and their vocations and toward reclaiming their passion for one of the most challenging and important of human endeavors.

The book builds on a simple premise: good teaching cannot be reduced to technique but is rooted in the identity and integrity of the teacher. Good teachers share one trait: they are authentically present in the classroom, in community with their students and their subjects.

This edition features a bonus CD featuring a 45-minute conversation between the author and two of his colleagues reflecting on what they have learned from working with thousands of teachers.

## ACCP Ambulatory Care New Practitioner Survival Guide/Resource Manual

An ACCP Publication  
Developed by the ACCP Ambulatory Care Practice and Research Network members

ACCP is pleased to offer this new edition of the *ACCP Ambulatory Care New Practitioner Survival Guide/Resource Manual*. Intended to provide assistance to both new and seasoned clinicians practicing in the ambulatory care setting, these detailed examples of successful clinical practices are invaluable for building or expanding your practice.

The manual is divided into two sections, Clinical Services and Education, and includes an extensive list of references for further study. The material is presented in a layout that makes it convenient to draw out forms, protocols, algorithms, and specific policies for your particular practice setting.

The members of the ACCP Ambulatory Care Practice and Research Network have generously submitted and reviewed information that they have found valuable in their own practices and made it available in this easy to use format. Every clinician in the ambulatory care setting will benefit from this excellent resource.

## Clinical Pharmacy Services: Successful Practices in Community Hospitals

An ACCP Publication  
By Karen E. Koch, Pharm.D., BCPS, FASHP; and Bob L. Lobo, Pharm.D., BCPS

Working from the premise that clinical pharmacy services are an essential component of medical care in today's community hospitals, this how-to guide takes the reader through each step in developing clinical pharmacy services. The authors explain how to identify practice opportunities with potential for the greatest impact, how to identify potential challenges and barriers in the institution, and how to implement the service.

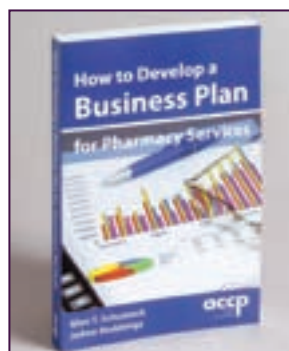

A series of 22 structured monographs highlight a variety of clinical pharmacy services delivered in both large and small community hospitals. The monographs provide examples of mainstream services (anticoagulation and nutrition), comprehensive services, pediatric services, and innovative services (case management and research). The book also presents an overview of collaborative drug therapy management.

## How to Develop a Business Plan for Pharmacy Services

An ACCP Publication  
By Glen T. Schumock, Pharm.D., MBA, FCCP;  
and JoAnn Stubbings, R.Ph., MHCA

*How to Develop a Business Plan for Pharmacy Services* provides a valuable resource for planning, developing, launching, and evaluating business services for the pharmacy field. A business plan is essential if you are thinking of starting a business, but it is also an important tool for established businesses. Viable businesses are dynamic; they change and grow. A pharmacy service launch or expansion needs a business plan that can be reviewed and revised as new goals are set.

This new book will assist pharmacy clinicians, managers, and leaders in implementing new services and enhancing existing services by providing a systematic approach to the business development process. The materials presented are applicable to pharmacy services in hospitals, community practice, managed care organizations, clinics, and elsewhere. Teachers and students will find the book very useful in preparing for real-world practical settings. Key features of the new book include:

- An in-depth presentation of the general process of business planning,
- A step-by-step analysis and insightful questions presented in a format designed to lead the reader through the business plan development process in a comprehensive fashion,
- Model business plans developed by the American College of Clinical Pharmacy and sample business plans written by students at the University of Illinois based on the instructions provided in this book,
- A companion CD-ROM with financial spreadsheet models and key questions to answer in developing a business plan presented in a workbook format.

## How to Prove the Value of Your Clinical Pharmacy Services When Resources Are Limited

An ACCP Educational Program

This program addresses a critical niche in the clinical pharmacy practice setting: How to prove the value of your services when resources are limited. A panel of experts introduces strategic measures and several case studies to explain how administrators judge the value of your patient care services.

To assist you in justifying your services this program defines methods for assessing your clinical services; discusses clinical, economic, and humanistic outcomes; explores cost-benefit analysis; and explains

the critical importance of using a business plan.

Derived from live educational presentations, the program is delivered on a CD-ROM containing audio-synchronized slides and lectures. A printed handout of the presentation slides also is provided.

Additional course materials available with this offering, a more than \$175 value if purchased separately, are:

- *How to Develop a Business Plan for Pharmacy Services*
- *Pharmacoeconomics and Outcomes: Applications for Patient Care, Second Edition*
- *Pharmacoeconomics and Outcomes: Applications for Patient Care, Case Studies*

## Essentials of Cultural Competence in Pharmacy Practice

By Kimberly Vess Halbur and Duane A. Halbur

*Essentials of Cultural Competence in Pharmacy Practice* is designed to help pharmacists and student pharmacists excel in today's multicultural world by improving cultural competency. The book lays the foundation for cultural competence by illuminating the communication styles, familial structure, spiritual beliefs, and genetic, biochemical, and physiological traits of particular ethnic or sociological groups. This practical text offers the opportunity for pharmacists and students pharmacists to study their own cultural background, the health care needs inherent across cultures, and to

effectively hone communication and competency skills needed to work effectively with patients and other health care providers from diverse cultures. Equipped with knowledge about a patient's cultural background, pharmacists can deliver pharmaceutical care that accommodates the patient's needs, beliefs, and health practices.

## Collaborative Drug Therapy Management Handbook

By Sarah A. Tracy, Pharm.D., BCPS; and Cynthia A. Clegg, B.S.Pharm., MHA

This practical guide to collaborative drug therapy management addresses the core elements necessary for establishing and maintaining a collaborative drug therapy management (CDTM) program. Pharmacists and administrators seeking to initiate, improve, or expand CDTM services will value this useful framework for achieving desired outcomes.

The evidence-based approach begins with in-depth guidelines created by a team of clinical pharmacy specialists at Harborview Medical Center in Seattle. Case studies

illustrate the use of these guidelines in daily practice. Chapters on quality assurance provide information on pharmacist privileging and measuring outcomes, and form the basis for improving and maintaining quality practice.

The book includes an overview of the requirements, first steps, and potential obstacles to this practice model, which has gained in importance with the greater emphasis on drug therapy management.

## Pharmacy Law Desk Reference

Edited by Delbert D. Konnor, Pharm.M.S., Pharm.B.S., R.Ph.

*Pharmacy Law Desk Reference* is a primer on the legal aspects of pharmaceutical practice, providing background on foundational legal concepts and guidance on the Food, Drug, and Cosmetic Act (FDCA), the Controlled Substances Act (CSA), and the Federal Trade Commission (FTC). Each chapter is written by a nationally recognized authority on one or more aspects of pharmacy law. Major topics include:

- Professional liability insurance
- The need for supportive personnel in pharmacy practice
- Patent law, trademarks, and copyrights
- Law and ethics; business law
- The Health Insurance Portability and Accountability Act of 1996 (HIPAA)
- Electronic prescribing; pharmacy compounding
- Forged prescription orders; and medication error reporting.

Handy tables, figures, and exhibits make complex information easily accessible.

## Communication Skills for Pharmacists: Building Relationships, Improving Patient Care, Second Edition

By Bruce A. Berger, Ph.D., R.Ph.

*Communication Skills for Pharmacists* helps practicing pharmacists and pharmacy students develop the communication skills they need to deliver pharmacy care. The book covers key communication skills: listening and empathic responding; supportive communication; persuasive communication; assertiveness; managing conflict; dealing with angry patients; and helping patients accept the behavior changes needed to manage their illness.

The book features dozens of examples of good and bad pharmacist-patient and pharmacist-physician dialogs. The book also presents a detailed patient counseling checklist designed to help pharmacists with the timing and organization of the information that they provide to patients and that they receive from patients. The book advises pharmacists on how to contact, build rapport with, and discuss drug-related problems with physicians.

## Writing, Speaking, & Communication Skills for Health Professionals

Edited by Stephanie Barnard; Kirk T. Hughes, Ph.D.; and Deborah St. James

Written by experts in the field of health care communications, this text is a "must-have" for every health care professional. Topics range from organizing data to writing conference posters. The authors present tips for improvement and examples for guidance. Also discussed are teaching, practice building, meeting skills, and business writing. This book is an excellent primer for students or seasoned professionals wanting to develop and improve their skills. Content includes discussions on:

- Reading science
- Writing science
- Speaking science
- Teaching science
- The business aspects of health care

## The Leadership Experience

Leadership Development Customized to Pharmacy Professionals

ACCP, in cooperation with LeaderPoint, offers a comprehensive management and leadership development program designed for pharmacy professionals who currently have, or will be assuming, significant management and leadership responsibilities. *The Leadership Experience* is a 3.5-day session in which participants, working in groups, assume senior management roles. They analyze information, make decisions, and live with the consequences of their decisions. On completion of *The Leadership Experience*, participants will know how to:

- Create and maintain cooperation among people
- Diagnose and correct dysfunctional group dynamics
- Bring people together to seize opportunity
- Integrate opportunity into current strengths
- Conduct activities consistent with strategy
- Contribute to the formulation and implementation of strategy
- Develop a strategic plan
- Read and analyze financial reports

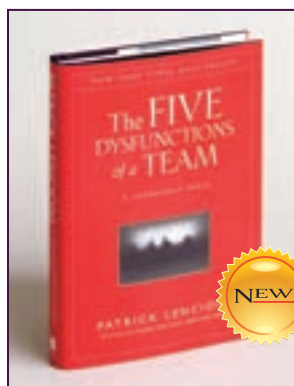

More than one hundred ACCP members have completed this course during the past eight years. For complete program information, including program goals and target audience, program content, learning objectives, and course location, schedule, and fees, visit the LeaderPoint Web site at [www.leaderpoint.biz/accp.htm](http://www.leaderpoint.biz/accp.htm).

The American College of Clinical Pharmacy is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education. Participants in *The Leadership Experience* can receive up to 30.0 contact hours of continuing pharmacy education upon completion of the course and submission of a Verification of Attendance Form. Universal Program Number: 217-000-08-057-L04-P. Statements of credit will be mailed from ACCP by July 31, 2009.

## The Five Dysfunctions of a Team

By Patrick Lencioni

*The Five Dysfunctions of a Team* offers an instructive leadership fable exploring the fascinating, complex world of teams. The story serves as a timeless reminder that leadership requires as much courage as it does insight.

Throughout the story the author focuses on the five dysfunctions which go to the very heart of why teams, even the best ones, often struggle. He outlines a powerful model and actionable steps that can be used to overcome these common hurdles and build a cohesive, effective team. This is

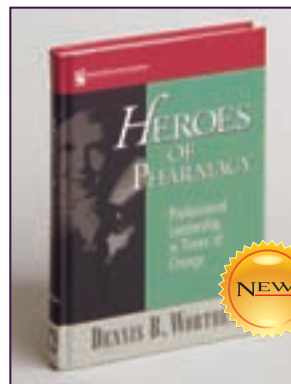

a compelling fable with a powerful yet deceptively simple message for all those who strive to be exceptional team leaders.

## Heroes of Pharmacy: Professional Leadership in Times of Change

By Dennis B. Worthen, Ph.D.

Faculty, residents, and student pharmacists will find this essential history text to be a valuable resource. Knowledge of the history of pharmacy, including major milestones and contributors in the evolution of the profession, will enhance the competency of every practitioner. This book addresses most of the major issues of the profession of pharmacy, including association organization and management, education, industry, governance, and practice, by examining the lives and careers of the pharmacy professionals who dealt with them. Leaders in the profession

and those who aspire to be leaders will find the different approaches to problem solving of value.

Key features include:

- Essays on the professional lives of 28 pharmacy statesmen, reformers, activists, educators, ethicists, editors, and pioneers
- Photographs of pharmacy leaders and milestones in the history of pharmacy
- Insights into two centuries of professional progress in education, community and institutional practice, manufacturing, government, publishing, association leadership, and military service

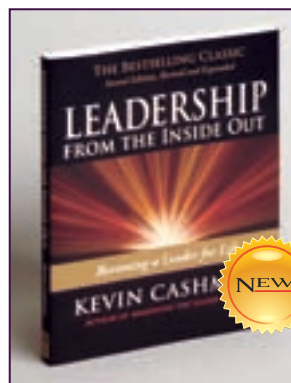

*Heroes of Pharmacy: Professional Leadership in Times of Change* is recommended for pharmacy leaders at the local, state, and national level, pharmacy faculty, students and residents, and historians.

## Leadership from the Inside Out: Becoming a Leader for Life, Second Edition

By Kevin Cashman

This new edition of the classic leadership title includes new research and case studies supporting a model for enhancing leadership effectiveness. The core premise of the book is that developing as a whole leader requires developing as a whole person. Research validates that the principles presented in this book are essential to substantial leadership, team, and organizational success. Reminding readers that "we lead by virtue of who we are," the author updates areas of mastery needed to authentically influence others and create enduring value. Using

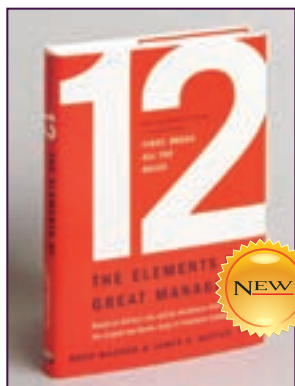

illustrative stories and tools, the book emphasizes building awareness, building commitment, and building practice.

## The 12 Elements of Great Managing

By Rodd Wagner and James K. Harter, Ph.D.

How do great managers inspire top performance in employees? How do they generate enthusiasm, unite disparate personalities to focus on a common mission, and drive teams to achieve ever-higher goals?

*The 12 Elements of Great Managing* follows great managers as they harness employee engagement to turn around a failing call center, save a struggling hotel, improve patient care in a hospital, maintain production through power outages, and successfully face a host of other challenges

in settings around the world.

The basis of this book is a study that now includes 10 million employee and manager interviews spanning 114 countries and conducted in 41 languages. Authors Rodd Wagner and James K. Harter weave the latest insights with recent discoveries in the fields of neuroscience, game theory, psychology, sociology, and economics.

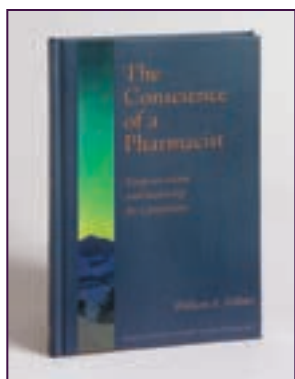

Managers and employees of organizations large and small will learn what every employer needs to know about creating and sustaining employee engagement.

## The Conscience of a Pharmacist: Essays on Vision and Leadership for a Profession

By William A. Zellmer

In recognition of the immense gap between the potential and the actual performance of pharmacy as a health profession, this book offers an alternative to the reactions of denial, resignation, frustration, and cynicism that are often the response to this recognition. The more constructive response is a dedication to reform of the profession in whatever sphere of influence a pharmacist has.

That spirit of reform shaped the essays in this book, which were first published as editorials in the *American Journal of Health-*

*System Pharmacy* (AJHP). The editorials selected for this book offer insight into the state of pharmacy today, as well as a historical perspective on past choices the profession has made.

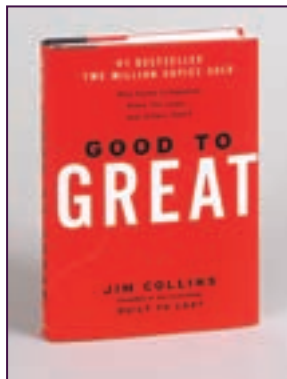

The hope is that this book will attract and arouse new readers—inspiring them to make pharmacy a better profession.

## Good to Great: Why Some Companies Make the Leap ... and Others Don't

By James C. Collins, M.B.A.

Based on the results of a 5-year study, *Good to Great* details the universal distinguishing characteristics that lead a company from good to great. Using tough benchmarks, the author and his research team identify 28 elite companies that made the leap to great results and sustained those results for at least 15 years. After analyzing extensive interviews and data, Collins and his research colleagues discover the key determinants of greatness.

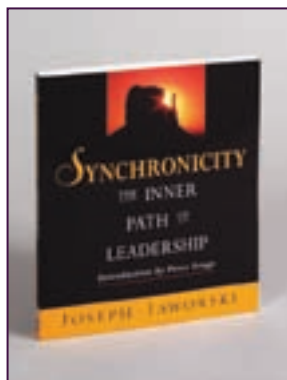

Among the major determinants discussed are the type of leadership required to achieve greatness, the need for a culture that combines discipline with entrepreneurship, the advantages of making the most of what a company does well, and the pitfalls of radical change programs and restructurings. The author's conclusions in *Good to Great* have surprised many readers and revealed new insights in almost every area of management strategy and practice.

Member Price \$24.95  
Nonmember Price \$28.95

ISBN: 978-0-06-662099-2; 2001; 320 pages; hardbound

## Synchronicity: The Inner Path of Leadership

By Joseph Jaworski, J.D.

The conventional view of a leader emphasizes conspicuous accomplishments or charisma. The author argues that leadership is not about positional power or accomplishments. Instead, true leadership is about creating a domain in which people continually learn and become more capable of participating in their unfolding future. In the author's words, a real leader sets the stage on which "predictable miracles" synchronistic in nature can and do occur.

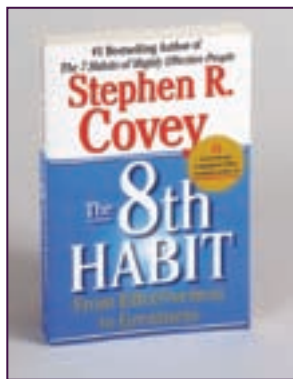

*Synchronicity: The Inner Path of Leadership* describes three basic shifts of mind required for individuals to create and discover an unfolding future—shifts in how they see the world, how they understand relationships, and how they make commitments. The author offers a deeper understanding of how human beings might individually and collectively tap their potential to shape the future instead of merely responding to the forces at large.

## The 8th Habit: From Effectiveness to Greatness

By Stephen R. Covey, M.B.A.

As a follow-up to the author's 1992 classic, *The 7 Habits of Highly Effective People*, Covey introduces another essential habit in his new book, *The 8th Habit: From Effectiveness to Greatness*. "To find our voice and inspire others to find theirs" is the eighth habit the author presents as a method to move individuals and organizations beyond effectiveness toward greatness.

To thrive, innovate, excel, and lead in what Covey calls the "New Knowledge Worker Age," leaders and individuals must build on and move beyond effectiveness. The call of

this new era is for greatness; it's for fulfillment, passionate execution, and significant contribution.

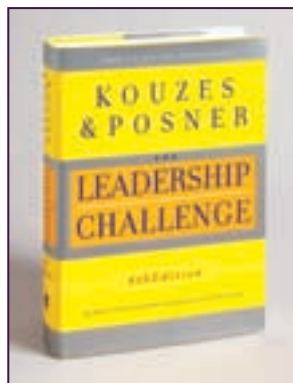

Accessing the higher levels of human genius and motivation in today's new reality requires a change in thinking, a new mind-set, a new skill-set, and a new tool-set—in short, a whole new habit.

## The Leadership Challenge, Fourth Edition

By James M. Kouzes, Ph.D.; and Barry Z. Posner, Ph.D.

This trusted leadership resource is now updated and revised for a new generation. After 20 years in print and three editions, this text continues to be a bestseller and premier resource on becoming a leader. This new edition, with streamlined text, more international and business examples, and a graphic redesign, offers more readability and accessibility. The fourth edition has been updated with the latest research and case studies and offers new stories of real people achieving extraordinary results. The authors' central theme remains: "Leadership Is Everyone's

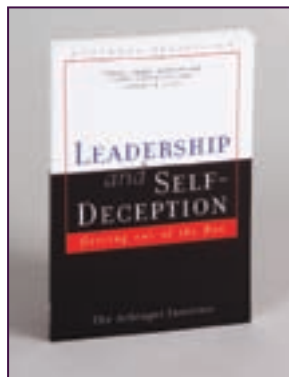

Business." The "Five Practices" and "Ten Commitments" have been proved by many dedicated, successful leaders. This edition, with almost one-third new material, places emphasis on the global community and business leaders.

## Leadership and Self-Deception: Getting Out of the Box

By The Arbinger Institute

*Leadership and Self-Deception* reveals that there are only two ways that leaders function. They are either the source of leadership problems or the source of leadership success. The authors use an entertaining and compelling story to examine this premise, identifying self-deception as the underlying cause of leadership failure and showing how any leader can overcome self-deception to become a consistent catalyst of success.

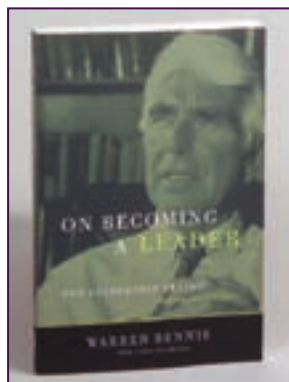

The authors assert that the key to leadership lies deeper than any particular technique, behavior, or skill. It lies in how an individual is and his or her way of being. The authors advocate a state of being that is honest, straightforward, and genuine. This book demonstrates how individuals enter a state as leaders and how it is possible to change. Understanding and applying this principle is the key to leadership transformation and the key to becoming a consistent catalyst for success.

## On Becoming a Leader

By Warren Bennis, Ph.D.

Warren Bennis's formative years, in the 1930s and 1940s, were characterized by severe economic hardship and a world war that showcased the extreme depths and heights to which leaders could drive their followers. Today's environment is similarly chaotic, turbulent, and uncertain. *On Becoming a Leader* has served for nearly 15 years as a beacon of insight, delving into the qualities that define leadership, the people who exemplify it, and the strategies that anyone can apply to become an effective leader.

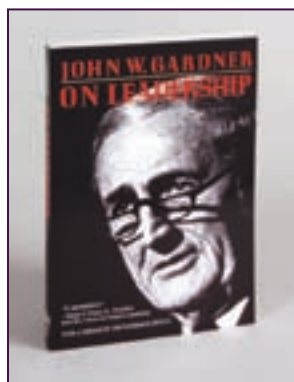

This expanded and updated book features a provocative introduction on the challenges and opportunities facing leaders today, with additional updates and current references throughout.

## On Leadership

By John Gardner, Ph.D.

Leaders today are familiar with the demand that they come forward with a new vision, but it is not a matter of fabricating a new vision out of whole cloth. A vision relevant for today will build on values deeply embedded in human history and in our own tradition. The materials out of which we build the vision will be our moral strivings, today and in the distant past.

Most of the ingredients of a vision for this country have been with us for a long time. That we have failed and fumbled in some of our attempts to achieve our ideals is obvious. But the great ideas still beckon—freedom, equality, justice, and the release of human possibilities. The vision is to live up to the best in our past and to reach the goals we have, yet to achieve with respect to our domestic problems and our responsibilities worldwide.

## Coming Soon...

The second edition of ACCP's *Pharmacogenomics: Applications to Patient Care* is scheduled for publication in the summer of 2009. *Pharmacogenomics* is designed to provide a comprehensive discussion of key areas in genomics important to pharmacists and other health professionals by developing the participant's knowledge and skills needed to apply the concepts of genomics research to drug therapy decisions within health care organizations.

The curriculum is directed primarily at pharmacists, students of colleges of pharmacy, industry pharmacists, and other health professionals who require an effective working knowledge of pharmacogenomics. In addition to the knowledge imparted, skills will be developed, and the application of material will be stressed.

Chapters in the second edition are divided into the following sections:

- Pharmacogenetics Basics
- Pharmacogenomics Applications in Treating Disease
- Ethical, Legal, Social, and Regulatory Issues
- Fundamentals of Applied Human Genomics

Much has changed in the field of pharmacogenomics since the launch of the first edition in 2004. Look for this second edition to provide the latest information on this important topic, with new and revised chapters offering the most recent developments in the field.

*Clinical Pharmacy in the United States: Transformation of a Profession*, written by Robert Elenbaas, Pharm.D., FCCP, and Dennis B. Worthen, Ph.D., is scheduled for publication in fall 2009 – just in time for the 2009 ACCP Annual Meeting and in commemoration of the College's 30th anniversary.

Although published in conjunction with ACCP's anniversary, this historical compilation and analysis of the clinical pharmacy profession is intended to provide a history of not only ACCP, but of the profession, from a broad perspective with input from many sources and individuals.

This book will document and comment on the development of clinical pharmacy as a profession transformed from product focused to patient focused. Using personal observations and commentaries from pharmacy leaders and others, it will reflect on the impact that significant events, publications, and trends have had on the development of pharmacy as a true health care profession employing pharmacists with specialized knowledge, experience, and judgment to optimize medication therapy and promote health, wellness, and disease prevention.

After examining the changes that have taken place during the past 40 years in pharmacy practice, education, and research, the book will culminate in recommendations and perspectives for the future.

## ACCP Advocacy Agenda 2009

ACCP seeks to achieve targeted, strategic advocacy objectives through a combination of activities involving the professional staff, multi-organizational coalitions, and our individual members. The objectives are consistent with the College's strategic plan and the expressed and identified needs of the membership as articulated through the ACCP Board of Regents. These activities are directly primarily at the federal level, although certain state and regional issues may also attract the involvement of the College. The priority issues for 2009 are:

### Expanded Access to Pharmacists' Services under Medicare Part B

- Advocate for the introduction of legislation that would provide coverage of and payment for the direct patient care services of qualified pharmacists under Part B of the Medicare program and other major health insurance plans.
- Continue to play a lead coordinating role in the Leadership for Medication Management (LMM) coalition to achieve introduction of legislation in Congress that results in the inclusion of the direct patient care medication management services of qualified pharmacists under Part B of the Medicare program.
- Actively pursue legislative or regulatory strategies that may achieve comparable results as part of the process of Congressional evaluation, oversight, and possible legislative changes to the Medicare Part D outpatient drug benefit and its associated Medication Therapy Management (MTM) component.

### Enhanced Patient Care under Medicare Part D

- Seek expanded, comprehensive Medication Therapy Management services (MTMS) under Medicare Part D.
- Work with the pharmacy community to increase communication and interaction with the Centers for Medicare and Medicaid Services (CMS) to promote more specific structure and enhanced evaluation of the MTMS component of the Medicare Part D outpatient drug benefit.

### Improved Data Collection on the Value of Pharmacists' Services

- Support and advocate for increased utilization of Comparative Effectiveness research as a means to identify the most effective treatments and reduce health care costs.
- Work closely with Agency for health research and Quality (AHRQ) staff responsible for quality assessment of the Medicare Part D benefit, with particular attention to MTM programs, models of collaborative care, and performance-based practice models to encourage and facilitate the collection of data that supports better approaches to effective medication use.

### Restore Medicare Funding for Second Year Residency Training

- Continue to seek restoration of Medicare funding for specialized residency training under Medicare prospective payment rules. In cooperation with ASHP and ACCP government affairs staff, work with CMS to establish benchmarks and data supporting the value of and need for Medicare support for second-year and 2-year integrated residency training for pharmacists in facilities that are Medicare providers.

### Promote Policies that Improve Medication Safety

- Monitor and influence as needed legislation and regulations dealing with issues of medication safety and rational medication use.
- Work with appropriate health associations and advocacy organizations to promote greater medication safety through more active involvement of pharmacists in patient care.

### Support for Pharmacy Professional Education Programs

- Working with ACCP, continue advocacy for passage of legislation and/or enhanced appropriations for existing programs to enhance support for the nation's pharmacy education infrastructure to help assure an appropriate supply of pharmacy professionals for their roles in clinical practice, education, and research.

### Loan Repayment Programs for Pharmacy Graduates

- **National Health Service Corps (NHSC):** Seek pharmacist participation in NHSC loan repayment programs available through federally qualified health centers, as authorized by Senate language that permits the Health and Human Services (HHS) Secretary to include pharmacists in the program. Monitor House of Representatives NHSC reauthorization to seek clarification on pharmacist eligibility for the program.
- **Title VII Funding:** Support development of inter-professional health education programs. Work with Congress to make programs authorized under Title VII of the Public Health Service Act a significant aspect of comprehensive health professions education. Programs funded under Title VII are the only federal program focused on health professions education and provide essential support in addressing pharmacist workforce shortages, particularly in rural and underserved areas.

### Increase the Prominence and Visibility of Clinical Pharmacists in Government Agencies and related advisory panels.

- Working collaboratively with other science-based pharmacy organizations and appropriate agencies of the federal government, identify and promote the inclusion of clinical pharmacists for participation on National Institutes of Health study sections, U. S. Food and Drug Administration advisory panels, and similar agency and related groups (e.g., United States Pharmacopeia) involved in both basic and clinical research in pharmacotherapy and related sciences.

### Related Supporting Messages:

- **Practice Model Change** - Promote better understanding of Collaborative Drug Therapy Management (CDTM) as a more comprehensive model of care that better achieves the goals expected of MTM - broaden the distribution of ACCP's 2005 message to the Institute of Medicine (IOM) concerning the need for a *pharmacotherapist* as an integral member of the health care team.

- **Payment Policy Change** - Encourage and promote dialogue and policy discussions seeking change from the traditional drug product-based reimbursement structure for pharmacy to payment for the provision of clinical services.
- **Access to Care** – Work to ensure a patient-oriented structure of care. Expand the pool of beneficiaries eligible for MTMS. Encourage payers across all sectors to expand their provision of MTM/CDTM services to further encourage safe and appropriate medication use. (According to the IOM report, one-third of adults take five or more medications each week – similar to the criteria required for MTMS under Part D)
- **Program Costs** – Promote clinical pharmacists' services as a mechanism to help reduce the financial burden on Medicare, Medicaid, and State Children's Health insurance programs resulting from medication errors and adverse drug events. Also help ease the burden on employers and small businesses struggling with rising health care costs.

### Future Trends

- **FDA reform** – Encourage a balanced FDA approval process that will not needlessly prevent access to needed drugs in the marketplace but still ensures safety and encourages more aggressive and effective post marketing surveillance.
- Impending economic challenges of Medicare and Social Security spending (the "baby boom" problem) – Work with other organizations seeking policy changes to promote the long-term viability of both programs.
- Work with allies and in coalitions to help create a climate in which the budgetary and appropriations processes recognize the importance of reducing costs and improving quality through continued investment in public health; healthcare research and information; and access to preventative care.

### ACCP Research Institute

#### Mission Statement of the Research Institute

The mission of the ACCP Research Institute is to advance pharmacotherapy through support and promotion of research, training and educational programs.

We are continuing our commitment to uncompromising excellence in scholarship, education and research, while expanding the impact of clinical pharmacy professionals across the entire health care community.

### History of the Research Institute

The ACCP Research Institute, a non-profit 501(c)(3) organization, is the research arm of the American College of Clinical Pharmacy. The mission of the ACCP Research Institute is to advance pharmacotherapy through support and promotion of research, training, and educational programs.

### What are the Research Institute's overall goals?

- To conceive and drive the research agenda of ACCP. ACCP's vision for the profession of pharmacy is that pharmacists will be recognized and valued as the preeminent health care professionals responsible for the use of medicines in the prevention and

treatment of disease. ACCP also envisions that it will be the most respected and influential organization advancing pharmacotherapy in the prevention and treatment of disease.

- To help develop the next generation of clinical pharmacy researchers. The new focused Investigator Training Program for experienced researchers and the new PPD Bioanalytical Fluid and Tissue Sample grant award are programs directed at these goals.
- To help position clinical pharmacist principal investigators so they can generate a substantial portion of the research that guides drug therapy in this country and compete successfully with other health professionals for research funding.
- To create a sustainable national clinical pharmacy Practice Based Research Network (PBRN).

Please visit [www.accpri.org](http://www.accpri.org) for details on the above programs and to make a charitable donation to the ACCP Research Institute.

The ACCP Academy is designed to deliver a flexible, curricular approach to enhance clinical pharmacist's abilities in their major areas of responsibility.

The ACCP Academy provides four unique professional development programs, which culminate in a certificate of completion in: Teaching and Learning, Leadership and Management, Research and Scholarship, and Clinical Practice Advancement.

These certificate programs focus on interactive instruction, guidance from mentors, and opportunities to apply key principles to everyday professional pursuits. Participants who complete program curricular requirements, elective requirements, and portfolio requirements will receive a certificate and additional recognition as graduates of the ACCP Academy. Core curricula for each of the certificate programs are listed below.

#### Teaching and Learning:

- Basic Training for New Clinical Faculty and Preceptors
- Planning for Effective Teaching
- Implementing Teaching and Learning Strategies
- Assessing Student Learning

#### Leadership and Management:

- Leadership Primer
- Personal Leadership Development
- Interpersonal Leadership Development
- The Attributes of a Leader

#### Research and Scholarship:

- Research Primer
- Basics of Clinical Research
- Statistical Issues
- Regulatory/Ethical Issues

#### Clinical Practice Advancement:

- Clinical Practice Primer
- Establishing Interprofessional and Patient-Centered Roles
- Extending Your Practice by Mentoring and Precepting
- Clinical Career Advancement

For complete information on the ACCP Academy certificate programs, including curricular schedules and enrollment information, visit the ACCP Web site at [www.accp.com/academy](http://www.accp.com/academy).

## 2009–2010 Meetings Calendar

### 2009 ACCP/ESCP International Congress on Clinical Pharmacy, ACCP Updates in Therapeutics: The Pharmacotherapy Preparatory Course; PPAG International Pediatric Pharmacy and Pharmacology Symposium

April 24–28, 2009  
Orange County Convention Center  
Orlando, Florida

### 2009 Oncology Pharmacy Preparatory Review Course

Co-sponsored with the American Society of Health-System Pharmacists  
May 14–16, 2009  
Hyatt Regency Baltimore  
Baltimore, Maryland

### 2009 Annual Meeting

October 18–21, 2009  
Anaheim Convention Center  
Anaheim, California

### 2010 Spring Practice and Research Forum and ACCP Updates in Therapeutics: The Pharmacotherapy Preparatory Course

April 23–27, 2010  
Charlotte Convention Center  
Charlotte, North Carolina

### 2010 Oncology Pharmacy Preparatory Review Course

Co-sponsored with the American Society of Health-System Pharmacists  
Date and Location TBD

### 2010 Annual Meeting

October 17–20, 2010  
Austin Convention Center  
Austin, Texas

## ACCP Recruitment Resources

The ACCP Career Development Center is a valuable resource for pharmacy professionals and recruiters alike. Located at [www.accp.com/careers](http://www.accp.com/careers), the center's resources include:

### Online Position Listings

ACCP offers a 24-hour, 7 days/week online directory of clinical pharmacy position listings. Advertise position listings for 60 days, with the ability to update and edit the position listing at any time within those 60 days. In addition, select from specialty groups to advertise your listings and featured positioning on the position listing home page.

Recruiters use this database to promote available opportunities including: residencies, fellowships, clinical pharmacy practitioners, tenure-track clinical faculty, non-tenure track clinical faculty, pharmacy managers, pharmaceutical industry positions, graduate programs, academic administrators, and more. For more information, please e-mail [accp@accp.com](mailto:accp@accp.com). Rates for online position listings are available on the ACCP Web site.

## Residency and Fellowship Forum

Searching for a residency or fellowship candidate? Beginning in 2009, ACCP will host the first Residency and Fellowship Forum at its Annual Meeting. This event will offer preceptors a chance to meet face to face with prospective clinical pharmacists who are just starting their careers and searching for a residency or fellowship position. Searchable online listings will offer individuals a sneak peek at the available positions prior to the meeting. Watch [www.accp.com](http://www.accp.com) for more information on the ACCP Residency Forum to be held in October 2009.

## ACCP Report Position Listings

Advertise available positions in the ACCP Report to reach qualified clinical pharmacy candidates. The ACCP Report is a monthly online newsletter available to all ACCP members. Each issue features current position listings, including available clinical pharmacy opportunities in academia, clinical practice, and the pharmaceutical industry.

To reserve your desired listing date, please e-mail [accp@accp.com](mailto:accp@accp.com).

### Monthly rates for position listings are:

Up to 250 words	\$550.00
251–500 words	\$700.00
501–750 words	\$850.00
751–1,000 words	\$1,100.00

## Publishing Opportunities through ACCP

The American College of Clinical Pharmacy is always seeking new publications and products to develop in conjunction with ACCP members.

If you have an idea for a book, teaching material, monograph, or other information product that you think needs to reach a market that includes clinical pharmacists, faculty, students, and other health care practitioners, we would like to talk with you about working with ACCP to publish and market your ideas.

Here is your opportunity to develop a resource to advance knowledge for our profession and at the same time enhance your professional development. Publishing with ACCP can further your professional reputation while giving you the opportunity to make a significant contribution to the clinical pharmacy field.

If you would like to discuss your ideas please contact Janel Mosley, Publications Project Manager, at [jmosley@accp.com](mailto:jmosley@accp.com) or visit [www.accp.com/docs/bookstore/proposal.pdf](http://www.accp.com/docs/bookstore/proposal.pdf) to complete an ACCP Publishing Proposal.

# ACCP Membership: Connect with Your Future

## Our Past ... Your Future

In 1979, a small group of forward-thinking individuals realized the need to advance the evolving practice of clinical pharmacy. These charter members founded ACCP to meet this need and thereby laid the foundation for an organization that now serves nearly 10,000 clinical pharmacists.

Today, clinical pharmacists work in virtually every health care practice setting, dispelling the long-held belief that "clinical pharmacy" resides only in academic and tertiary care institutions. ACCP is an organization designed to meet your professional needs as the practice of clinical pharmacy continues to evolve.

## ACCP: Your Partner in Every Practice Setting

From its inception, ACCP has championed the advancement of clinical pharmacy. ACCP promotes leadership, professional development, research opportunities, and advocacy to support important issues facing the profession. With a diverse membership that spans all practice settings, ACCP is the leading organization in clinical pharmacy.

ACCP is enhancing the practice of clinical pharmacy and improving the lives of the patients we serve. We invite you to learn more about us and discover how you can benefit by joining ACCP.

## Broaden Your Expertise and Focus Your Skills

ACCP membership provides immediate access to an international network of experts and specialists engaged in clinical pharmacy. Join an ACCP Practice and Research Network (PRN) to find members whose professional interests closely match your own.

## Practice and Research Networks (PRNs): Connections for Your Future

An ACCP PRN is an active group of members who interact frequently via electronic listserve messages. These communications facilitate the timely exchange of information that can improve your practice and the quality of patient care. As an ACCP PRN member, you will gain immediate access to an international network of experts and specialists engaged in all facets of clinical pharmacy.

A wide variety of professional networks are available to you. Explore 22 ACCP PRNs representing specific therapeutic and professional interest areas. Sign up for PRN membership(s) when you complete the ACCP membership application on page 47 of this catalog.

# You Belong at ACCP

## Advance Your Professional Development

Whether you are pursuing a career as a practitioner, researcher, administrator, or educator, ACCP membership will enhance your professional knowledge and skills with cutting-edge educational offerings, timely publications, and superior programming available through ACCP's national meetings and distance-learning programs.

## ACCP Professional Development Services: Your Resource for Success

### ACCP National Meetings

Network with colleagues while updating your knowledge and clinical skills by attending ACCP's Annual Meeting or Spring Practice and Research Forum/Updates in Therapeutics: The Pharmacotherapy Preparatory Course. ACCP's meetings provide a broad array of high-quality educational programming on emerging issues in clinical pharmacy practice, research, and education.

### Board Certification Preparatory Materials

Prepare for specialty certification examinations by attending live review sessions held at ACCP national meetings and by purchasing electronic or print study materials. Members receive discounted rates.

### Board Recertification Materials

Maintain your pharmacotherapy specialty certification by using the *Pharmacotherapy Self-Assessment Program (PSAP)*. Board Certified Oncology Pharmacists can participate in a professional development program for oncology recertification. Members receive discounted prices for both programs.

### The ACCP Academy

ACCP's Academy offers a flexible, curricular approach to enhancing ACCP members' abilities in their major areas of responsibility. The Academy provides unique professional development programs leading to certificates of completion in the following key areas: Clinical Practice Advancement, Leadership and Management, Research and Scholarship, and Teaching and Learning. Certificate program curricula is offered during each ACCP national meeting.

### Pharmacotherapy: The Journal of Human Pharmacology and Drug Therapy

*Pharmacotherapy* is an essential professional reference for the clinical pharmacist. All members receive a subscription to ACCP's peer-reviewed scientific journal—now available in both electronic and print formats. Each monthly issue of *Pharmacotherapy* contains exceptional and innovative articles that will enhance your drug therapy expertise.

Discover More Reasons  
to Belong to ACCP.  
Visit ACCP online at [www.accp.com](http://www.accp.com)

# Students, Residents, and Fellows

## ACCP ... Your Future Is Here

Partner with ACCP as you take your next steps toward achieving your professional goals. We invite you to join a dynamic, member-driven organization and experience the many unique benefits and opportunities available to you during your professional training.

## Discover Career Opportunities

### Online Position Listings

Available 24 hours a day, this Web-based service allows you to explore available clinical pharmacy positions across the country.

### Residency and Fellowship Forum

Searching for a residency or fellowship candidate? Beginning in 2009, ACCP will host the first Residency and Fellowship Forum at its Annual Meeting. This event will offer preceptors a chance to meet face to face with prospective clinical pharmacists who are just starting their careers and searching for a residency or fellowship position. Searchable online listings will offer individuals a sneak peek at the available positions prior to the meeting. Watch [www.accp.com](http://www.accp.com) for more information on the ACCP Residency Forum to be held in October 2009.

### Directory of Residencies, Fellowships, and Graduate Programs

Seeking additional training? Find key information on more than 500 training programs in ACCP's online and print directory.

## Expand Your Professional Network

### Practice and Research Networks (PRNs)

These groups provide a means for ACCP members with common practice and research interests to gather for networking, listserv interaction, and continuing professional development. There are 22 PRNs representing major therapeutic areas and professional interests. Learn from clinical experts online by monitoring and participating in listserv discussions.

## Educational Conferences

ACCP holds two meetings each year: the Annual Meeting in the fall and the Spring Practice and Research Forum and Updates in Therapeutics: The Pharmacotherapy Preparatory Course. Each meeting provides high-level educational programming and excellent networking opportunities.

### StuNet Web Site and Listserv

Designed especially for student pharmacists, ACCP StuNet provides lines of communication to leaders in clinical pharmacy and helps you build a lasting professional network.

### College of Pharmacy Student Liaisons

Schools and colleges of pharmacy have established an official liaison who is available to answer your questions about ACCP and who can serve as an invaluable resource. The College of Pharmacy Student Liaison can provide students with up-to-date information regarding ACCP initiatives and career options in clinical pharmacy.

**The Benefits of ACCP  
Membership Are Clear.**

**Join Us Today and Bring Your  
Future into Focus!**

## Join Us and Focus Your Professional Future!

### Extend Your Clinical Influence through Advocacy Initiatives

As the profession's patient care roles continue to evolve, ACCP is positioned to advocate for you and your patients. Key issues facing our profession include recognizing pharmacists as health care providers within Medicare and ensuring rational drug therapy.

### ACCP Advocacy Initiatives: Uniting Members to Influence Health Policy Outcomes

#### ACCP Advocates Program

The ACCP Advocates Program is an ongoing initiative to enhance the effectiveness and frequency of the College's interactions and relationships with officials in Congress and the Executive Branch of the federal government, including regulatory agencies.

The ACCP Advocates Program will identify, develop, and support the skills and abilities of ACCP members who serve ACCP as active "grassroots" advocates for the legislative, regulatory, and policy priorities of ACCP. These members will work directly with and be supported by ACCP government and professional affairs staff based in Washington, D.C.

#### Legislative Action Center

Members are encouraged to visit the ACCP Legislative Action Center at [www.capwiz.com/accp](http://www.capwiz.com/accp). This Web-based interactive tool allows you to review ACCP's complete Advocacy Agenda and receive notification about important legislation affecting clinical pharmacy. This Web site also provides information about your elected officials and allows you to contact them by e-mail.

### ACCP Practice-Based Research Network

If you are a clinical pharmacist involved in direct patient care or have access to patients for research purposes, we welcome you to join the Registry and enter your practice information today.

#### What is the ACCP PBRN?

The ACCP PBRN is a group of clinical pharmacy members from across the United States. They deliver clinical pharmacy services at a variety of academic, inpatient, outpatient, and other practice settings. Together, they form a nationwide network of pharmacists interested in answering research questions that are aligned with the mission of ACCP.

#### How much does it cost to belong to the ACCP PBRN?

The Registry is free to all ACCP members. You can also register as an existing PBRN, if applicable. To learn more about the ACCP PBRN, go to [www.accpri.org](http://www.accpri.org).

#### What types of studies will be conducted by the PBRN?

We anticipate our projects will vary from practice surveys and quasi-experimental designs to randomized, controlled interventional trials that will facilitate collaborative research promoting safe, efficacious, and cost-effective use and delivery of medications and clinical pharmacy services.

Ultimately, those who comprise the Registry will determine which research questions the ACCP PBRN will address; consequently, registration is vital to all interested ACCP members.

Take advantage of this opportunity to join your colleagues as we shape the future of clinical pharmacy research and practice. Begin your registration today at [www.accpri.org](http://www.accpri.org).

**Register Online Today**

## ACCP Research Institute

The mission of the ACCP Research Institute is to advance pharmacotherapy through support and promotion of research, training, and educational programs. The Research Institute is committed to uncompromising excellence in scholarship, education, and research, while expanding the impact of clinical pharmacy professionals across the entire health care community. See page 41 for ways that you can contribute to this important endeavor.

**Your Membership Category**

- Full Member - \$215**  
Pharmacists who have been practicing clinical pharmacy for three or more years since graduation from a college of pharmacy. *(Must submit completed four-page application, which is available at www.accp.com, and enclose with a copy of curriculum vitae.)*
- Associate Member - \$215**  
Pharmacists who have been practicing clinical pharmacy for less than 3 years since graduation from a college of pharmacy.
- Affiliate Member - \$215**  
Individuals from pharmacy disciplines other than clinical pharmacy or from other health science professions.

**Satisfaction Guarantee**

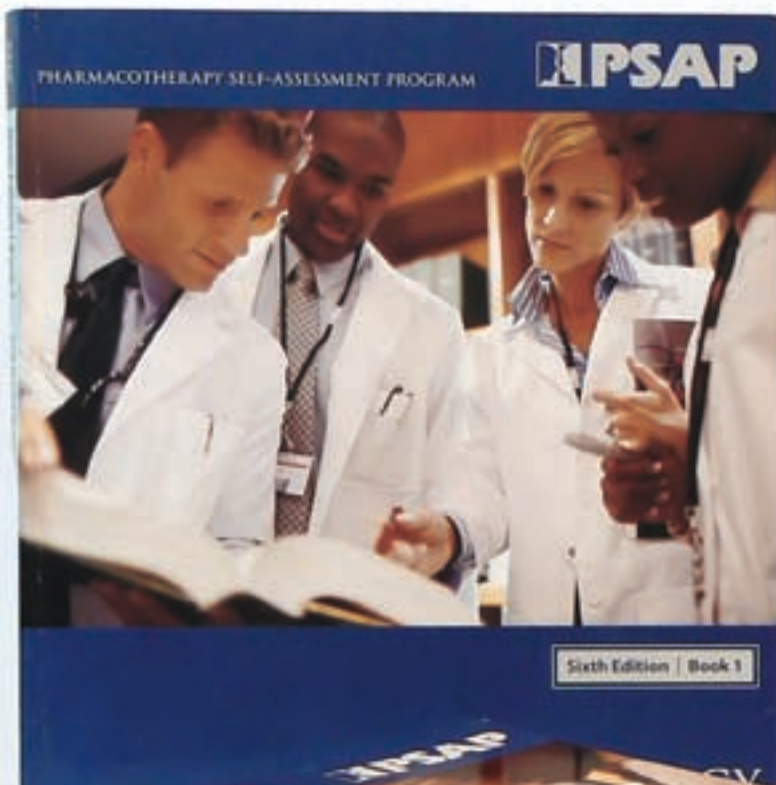

If you are dissatisfied with your order for any reason, you may return all materials to ACCP within 30 days and we will refund the purchase price or, if purchased by credit card, we will credit your card. Please contact ACCP to obtain a return authorization before returning any item. All returned items must be in good condition and acceptable for resale. Customers will be responsible for shipping charges for items returned to ACCP. **Exceptions:** Online products may **not** be returned. Items containing software, such as CD-ROMs may **not** be returned.
