# American College of Clinical Pharmacy

The American College of Clinical Pharmacy (ACCP) is a professional and scientific society that provides leadership, education, advocacy, and resources enabling clinical pharmacists to achieve excellence in practice, research, and education.

ACCP’s membership is composed of practitioners, scientists, educators, administrators, students, residents, fellows, and others committed to excellence in clinical pharmacy and patient pharmacotherapy.

## ACCP’s Core Values

Core values that characterize the American College of Clinical Pharmacy:

- Passion for extending the frontiers of clinical pharmacy.
- Dedication to excellence in patient care, research, and education.
- Commitment to challenge the status quo, state our beliefs, and act on them.
- Integrity, honesty, reliability, and accountability.
- Courage to lead while remaining responsive to our members.

## Annual Dues for ACCP Membership

## ACCP Ambulatory Care Pharmacist's Survival Guide, Fourth Edition

Lead Editor: Gregory Castelli, Pharm.D., BCPS, BC-ADM

The *ACCP Ambulatory Care Pharmacist's Survival Guide, Fourth Edition* is a comprehensive resource that offers practical assistance to both new and seasoned clinicians. As in previous editions, all content in this Survival Guide has been contributed by members of the ACCP Ambulatory Care Practice and Research Network, ensuring its applicability and relevance.

More than 65 guidance documents cover the areas of:

- Ambulatory Care Basics – Scholarship for Clinicians, Reimbursement
- Clinical Practice – Managing Clinics for Opioid Use, DOAC Programs, Public Health, and More
- Education – Clinical Faculty Preceptor Cooperative, Layered Learning, and More
- Practice Management – Collaborative MTM, Practice Agreements, Protocols

These detailed examples of successful clinical practices are invaluable for building or expanding your patient care services. Every clinician in the ambulatory care setting would benefit from this excellent resource.

## How to Develop a Business Plan for Pharmacy Services, Third Edition

Editors: Glen T. Schumock, Pharm.D., MBA, Ph.D., FCCP; and JoAnn Stubbings, BPharm, MHCA

The third edition of *How to Develop a Business Plan for Pharmacy Services* is now available. This book is designed to assist pharmacy clinicians, including residents, managers, and leaders in exploring, researching, proposing, and implementing new services as well as enhancing existing services by providing a systematic approach to the business planning process. The materials presented are applicable to pharmacy services in hospitals, community practice, managed care organizations, ambulatory clinics, and elsewhere.

### Features of this new edition include:

- Expanded instruction for the pre-planning phase to help readers learn to explore a new business concept
- New sample business plans:
  - Antimicrobial Stewardship Program in a Community Hospital
  - Specialty Pharmacy Services for Oral Anticancer Agents
  - Value-Based Pharmacy Services in a Clinic Setting
  - Pharmacist-Run Medication Therapy Management Clinic
- Access to online resources including:
  - An electronic version of the workbook questions
  - An electronic version of the business plan template to be used for writing a business plan
  - A Microsoft Excel program that allows the user to develop financial statements for proposed businesses
  - Model business plans

Business planning is an important skill for pharmacists, pharmacy residents, and pharmacy students. Many colleges/schools of pharmacy have required or elective courses on this subject and this book is an indispensable teaching tool in the classroom environment.

# 2019 ACCP/ASHP Ambulatory Care Pharmacy Preparatory Review and Recertification Course

## ACCP collaborates with ASHP on Ambulatory Care Pharmacy activities.

The *ACCP/ASHP Ambulatory Care Pharmacy Preparatory Review and Recertification Course* is ideal for pharmacy professionals who are preparing for the Ambulatory Care Pharmacy Specialty Certification Examination administered by the Board of Pharmacy Specialties (BPS) and for those seeking a self-paced review and refresher of disease states and therapeutics.

Developed by Board Certified Pharmacists and clinical experts, the course

content is based on the domains, tasks and knowledge statements outlined in the BPS Ambulatory Care Pharmacy content outline. The course content provides a comprehensive review of the knowledge domains covered in the specialty certification examination. The course uses a case-based approach, with strong emphasis on the thought processes needed to solve patient care problems in each therapeutic area.

This is the same course that was presented live at the 2019 ACCP/ASHP Board Review and Recertification Course meeting. The course is available for continuing pharmacy education and recertification credit.

### Recertification Credit

The *Ambulatory Care Pharmacy Preparatory Review and Recertification Course* is approved by the Board of Pharmacy Specialties (BPS) as one of three components in a professional development program that can be used by Board Certified Ambulatory Care Pharmacists (BCACPs) as an alternative to the written recertification examination. BCACPs who take the 2019 course and successfully complete the self-assessment test by December 17, 2019, will earn 26.0 hours of BCACP recertification credit

### Course Content

The Ambulatory Care Pharmacy Preparatory Review and Recertification Course workbook covers the following content:

- Practices and Processes of Care
- Communication Strategies in Pharmacy
- Developing a Clinical Practice
- Managing a Clinical Practice
- Cardiology I
- Cardiology II
- Genitourinary, Electrolytes, and Nutritional Deficiencies/Supplementation in Older Adults
- Trial Design and Biostatistics
- Pulmonary Disorders
- Diabetes Mellitus
- Endocrine Disorders
- Obstetrics and Gynecology
- Psychiatric Disorders
- Neurology
- Gastrointestinal Disorders
- Infectious Diseases I
- Infectious Diseases II
- Nephrology
- Bone/Joint and Rheumatology
- Dermatologic and Eyes, Ears, Nose, and Throat, and Immunologic Disorders
- Policy, Practice, and Regulatory Issues
- Oncology Supportive Care

### The Course Package includes:

- Streaming audio/slide synchronized presentations
- Downloadable MP4 video files
- Online access to the course workbook in electronic (PDF) format
- The opportunity to claim up to 26.0 contact hours of Continuing Pharmacy Education (CPE) credit for the course

| Product  | Member Price | Nonmember Price |
|--|--------------|-----------------|
| Course Package with Online Workbook                            | \$425.00     | \$625.00        |
| Course Package with Online Workbook + Recertification Posttest | \$475.00     | \$670.00        |
| Online Workbook Only   | \$165.00     | \$265.00        |

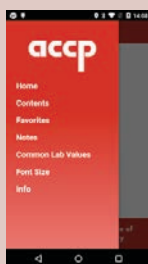

## ACCP Flip Cards: Ambulatory Care Mobile App

Are you preparing for the Ambulatory Care Pharmacy Specialty Certification Examination administered by the Board of Pharmacy Specialties? There's an app for that! *ACCP Flip Cards: Ambulatory Care* is a mobile app for smartphone and iOS devices. Combining the time-tested method of review by flash card experience with almost 300 patient care scenarios, this new app is a fun, fast, and simple way to prepare for specialty certification in ambulatory care.

*ACCP Flip Cards: Ambulatory Care* features enhance self-testing and evaluation. Items can be viewed by domain or random shuffle; scoring statistics outline performance by topic; the favorites and notes features identify areas for further study; and a handy table allows quick access to reference values for common laboratory tests. Explained answers for each item assist learning and include 2–5 supporting references, each with a hyperlink to PubMed or other compiler.

*ACCP Flip Cards: Ambulatory Care* combines the time-tested method of review by flashcard with your mobile device, creating an ideal resource for those who want a self-paced review and refresher of disease states and therapeutics.

# 2019 ACCP/ASHP Cardiology Pharmacy Preparatory Review And Recertification Course

## ACCP collaborates with ASHP on Cardiology Pharmacy activities.

The ACCP/ASHP Cardiology Pharmacy Preparatory Review Course is ideal for pharmacy professionals who are preparing for the Cardiology Pharmacy Specialty Certification Examination administered by the Board of Pharmacy Specialties (BPS) and for those seeking a self-paced review and refresher of disease states and therapeutics.

Developed by Board Certified Pharmacists and clinical experts, the course content is based on the domains, tasks and knowledge statements outlined in the BPS Cardiology Pharmacy content outline.

The course content provides a comprehensive review of the knowledge domains covered in the specialty certification examination. The course uses case-based presentations for application to real-life scenarios, a practice exam along with correct answers, and links to the reference sources, and domains, tasks, and knowledge statements.

The course is available for continuing pharmacy education and recertification credit.

### Recertification Credit

The Cardiology Pharmacy Preparatory Review and Recertification Course is approved by the Board of Pharmacy Specialties (BPS) as one of three components in a professional development program that can be used by Board Certified Cardiology Pharmacists (BCCPs) as an alternative to the written recertification examination. BCCPs who take the 2019 course and successfully complete the self-assessment test by December 17, 2019, will earn 26.0 hours of BCCP recertification credit

## Course Content

The Cardiology Pharmacy Preparatory Review Course workbook covers the following content:

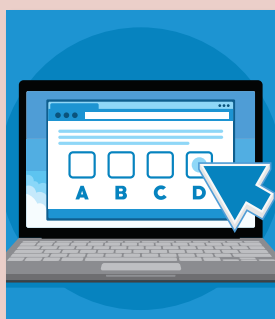

- Primary Prevention of Cardiovascular Disease and Public Health
- Dyslipidemia
- Blood Pressure Management of Adult Patients
- Stable Atherosclerotic Disease
- Anticoagulation
- Arrhythmias
- Drug Induced Cardiovascular Disease and Drugs to Avoid in Cardiovascular Disease
- Chronic Heart Failure
- Acute Decompensated Heart Failure
- Cardiac Transplantation and Mechanical Circulatory Support
- Acute Coronary Syndromes
- Cardiovascular Emergencies
- Pulmonary Arterial Hypertension
- Specialized Topics in Cardiovascular Disease
- Pharmacogenomics of Cardiovascular Disease
- Principles of Information Management and Education
- Research Design, Biostatistics, and Literature Training and Education and Training
- Principles of Cardiology Pharmacy Practice Administration: Protocol Development and Quality Improvement, Pharmacoeconomics and Safe Medication Use

### The Course Package includes:

- Streaming audio/slide synchronized presentations
- Downloadable/printable PDFs of presentation slides
- Downloadable MP4 video files
- Online access to the course workbook in electronic (PDF) format
- Practice exam
- The opportunity to claim up to 26.0 contact hours of Continuing Pharmacy Education (CPE) credit for the course

## 2019 ACCP/ASHP Cardiology Pharmacy Specialty Review Course Practice Exam

### Program Overview

The Cardiology Pharmacy Specialty Review Course Practice Exam is a compilation of practice questions to help you prepare for the Board of Pharmacy Specialties (BPS) Cardiology Pharmacy Specialty examination. The practice exam questions are based from content discussed in the Cardiology Pharmacy Specialty Review Course. The course is designed based on the domains, tasks, and knowledge

statements developed by BPS for the examination, and provides in-depth review of patient care issues for practitioners in Cardiology Pharmacy.

### How to Use the Cardiology Pharmacy Specialty Review Course Practice Exam:

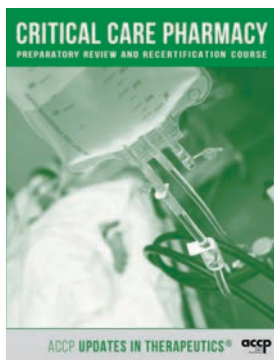

1. Take the online practice exam as a diagnostic tool to identify knowledge gaps.
2. Obtain a score.
3. View your answers to obtain the answer rationale document which includes correct answers and corresponding rationales, reference sources, and the domains, tasks, and knowledge statements.
4. Retake the practice exam as many times as you wish.

## 2019 Oncology Pharmacy Preparatory Review and Recertification Course

The *Oncology Pharmacy Preparatory Review and Recertification Course* is ideal for pharmacy professionals who are preparing for the Oncology Pharmacy Specialty Certification Examination administered by the Board of Pharmacy Specialties (BPS) and for those seeking a self-paced review and refresher of disease states and therapeutics.

Developed by Board Certified Pharmacists and clinical experts, the course content is based on the domains, tasks and knowledge statements outlined in the BPS Oncology

Pharmacy content outline. The course content provides a comprehensive review of the knowledge domains covered in the specialty certification examination. The course uses a case-based approach, with strong emphasis on the thought processes needed to solve patient care problems in each therapeutic area.

This is the same course that was presented live at the 2019 ACCP/ASHP Board Review and Recertification Course meeting. The course is available for continuing pharmacy education and recertification credit.

### Recertification Credit

The *Oncology Pharmacy Preparatory Review and Recertification Course* is approved by the Board of Pharmacy Specialties (BPS) as one of three components in a professional development program that can be used by Board Certified Oncology Pharmacists (BCOPs) as an alternative to the written recertification examination. BCOPs who take the 2019 course and successfully complete the self-assessment test by December 17, 2019, will earn 25.75 hours of BCOP recertification credit.

## Course Content

The Oncology Preparatory Review and Recertification Course workbook covers the following content:

- Research Design, Statistics, and Evaluating Oncology Literature
- Chronic Leukemias
- Melanoma and Non-Melanoma Skin Cancers
- Cancer-related Infectious Diseases
- Lung Cancer
- Head, Neck and Adult Central Nervous System (CNS) Malignancies
- Prostate Cancer
- Oncology Practice Management
- Multiple Myeloma
- Adult Sarcoma
- Bladder, Renal Cell, and Testicular Cancers
- Pharmacogenomics in Oncology
- Adult Acute Leukemias and Myelodysplastic Syndromes
- Breast Cancer
- Lymphomas
- Lower Gastrointestinal and Pancreatic Cancers
- Gynecologic Malignancies
- Hematopoietic Stem Cell Transplantation
- Pediatric Malignancies and Supportive Care
- Upper Gastrointestinal and Hepatocellular Carcinomas

### The Course Package includes:

- Streaming audio/slide synchronized presentations
- Downloadable/printable PDFs of presentation slides
- Downloadable MP4 video files

## 2019 Oncology Pharmacy Home Study Syllabus for Recertification

Offered twice a year the Oncology Pharmacy Home Study Syllabus for Recertification consists of a collection of journal articles that focuses on advances across the four domains of oncology specialty practice. Approved for Board-Certified Oncology Pharmacist (BCOP) recertification credit by the Board of Pharmacy Specialties (BPS), the home study syllabus is a series of current articles from the primary oncology literature, each with learning objectives, and a web-based posttest covering the full series of articles.

The first volume was released in January 2019 and the second volume was released in July 2019. Each volume offers at least eight hours of BCOP recertification credit.

The Oncology Pharmacy Specialty Home Study Syllabus for Recertification includes multiple Web-based recertification tests. BCOPs who read each article included in the Home Study Syllabus and successfully complete the Web-based posttests on the content of the articles will earn oncology recertification credit.

Volume 1 is no longer available for recertification credit. The posttests for Volume 2 of the Home Study Syllabus must be submitted by January 28, 2020 to be eligible for recertification credit.

Note: Access to the journal articles will expire at the same time as the associated recertification posttest.

Topics in the two 2019 volumes include:

#### Volume 1 – Released January 2019

- Adult Sarcoma
- Cancer-Related Infectious Diseases
- Oncology Practice Management
- Ovarian Cancer
- Oncology Drug Literature: Biostatistics and Study Design
- Colon Cancer
- Chronic Leukemia
- Hematopoietic Stem Cell Transplantation

#### Volume 2- Released July 2019

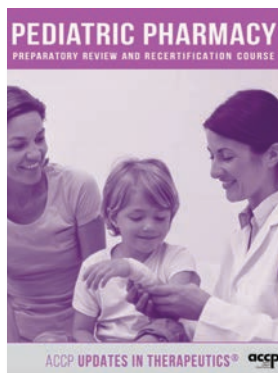

- Acute Leukemia
- Lymphoma
- Multiple myeloma
- Prostate Cancer
- NTRK Therapy
- Pediatric Cancer
- Lung Cancer
- Breast Cancer

| Product  | Member Price | Nonmember Price |
|----------|--------------|-----------------|
| Volume 2 | \$160.00     | \$215.00        |

# Updates in Therapeutics®: Pediatric Pharmacy Preparatory Review and Recertification Course

## An ACCP Educational Resource

The *Updates in Therapeutics®: Pediatric Pharmacy Preparatory Review and Recertification Course* is ideal for pharmacy professionals who are preparing for the Pediatric Pharmacy Specialty Certification Examination administered by the Board of Pharmacy Specialties (BPS) and for those seeking a self-paced review and refresher of disease states and therapeutics.

Developed by Board Certified Pharmacists and clinical experts, the course content is based on the domains, tasks and knowledge statements outlined in the BPS Pediatric Pharmacy content outline.

The course content provides a comprehensive review of the knowledge domains covered in the specialty certification examination. The course uses a case-based approach, with strong emphasis on the thought processes needed to solve patient care problems in each therapeutic area.

The course is available for continuing pharmacy education and recertification credit.

### Recertification Credit

The *Pediatric Pharmacy Preparatory Review and Recertification Course* is approved by the Board of Pharmacy Specialties (BPS) as one of three components in a professional development program that can be used by Board Certified Pediatric Pharmacy Specialists (BCPPS) as an alternative to the written recertification examination. BCPPSs who take the 2019 course and successfully complete the self-assessment test by July 16, 2020, will earn 21.0 hours of BCPPS recertification credit.

## Course Content

The Pediatric Pharmacy Preparatory Review and Recertification Course workbook covers the following content:

- Pediatric Transplantation
- Neonatology
- PICU I
- PICU II
- Immunology
- Fluids, Electrolytes, and Nutrition
- Pulmonary
- Pediatric Nephrology
- Biostatistics
- Cardiology
- Neurology/Psychiatry
- Study Designs: Fundamentals and Interpretation and Research Topics
- Endocrine and Metabolic Disorders
- Infectious Diseases
- Gastroenterology
- Practice Management
- Toxicology
- Hematology/Oncology
- Pharmacokinetics/Pharmacodynamics

### The Course Package includes:

- Streaming audio/slide synchronized presentations
- Downloadable/printable PDFs of presentation slides
- Downloadable MP4 video files
- Online access to the course workbook in electronic (PDF) format
- The opportunity to claim up to 21.0 contact hours of Continuing Pharmacy Education (CPE) credit for the course

| Product  | Member Price | Nonmember Price |
|--|--------------|-----------------|

| Course Package with Online Workbook + Recertification Posttest | \$475.00     | \$675.00        |
| Online Workbook Only   | \$165.00     | \$265.00        |

## Pharmacotherapy Mock Exam, 2019 Edition

The ACCP Pharmacotherapy Mock Exam is a 175-item question bank based on the domains, tasks and knowledge statements outlined in the Board of Pharmacy Specialties (BPS) content outline, which provides you online access anywhere and at any time between August 26, 2019 and December 31, 2020.

### Enhances Studying

Not just another practice test, the ACCP Pharmacotherapy Mock Exam is developed and reviewed by board-certified

clinical pharmacists. The ACCP Pharmacotherapy Mock Exam provides a personalized analysis on the performance of the participant. This analysis includes the amount of time spent on each question and the types of questions most frequently missed or skipped by the participant. An answer key containing explained answers and/or references is also provided for further study. This tool is ideal for anyone studying for the Pharmacotherapy board exam, and who wants to learn more about his or her potential strengths and weaknesses in preparing for either the fall or spring administration of the exam.

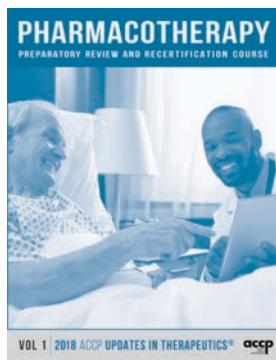

### Topics Covered in the ACCP Pharmacotherapy Mock Exam:

- Biostatistics
- Bone/Joint and Rheumatology
- Cardiology
- Clinical Trial Design
- Dermatology
- Endocrine and Metabolic Disorders
- Eyes, Ears, Nose, and Throat
- Fluids, Electrolytes, and Nutrition
- Gastrointestinal Disorders
- Genitourinary
- Health Maintenance/Public Health
- Hematologic Disorders
- Immunologic Disorders
- Infectious Diseases
- Nephrology
- Neurology
- Obstetrics/Gynecology
- Oncology
- Psychiatry
- Pulmonary Disorders

| Product                   | Member Price | Nonmember Price |
|---------------------------|--------------|-----------------|
| Pharmacotherapy Mock Exam | \$79.95      | \$124.95        |

# Updates in Therapeutics®: Pharmacotherapy Preparatory Review and Recertification Course

## An ACCP Educational Resource

The *Updates in Therapeutics®: Pharmacotherapy Preparatory Review and Recertification Course* is ideal for pharmacy professionals who are preparing for the Pharmacotherapy Specialty Certification Examination administered by the Board of Pharmacy Specialties (BPS) and for those seeking a self-paced review and refresher of disease states and therapeutics.

Developed by Board Certified Pharmacists and clinical experts, the course content is based on the domains, tasks and knowledge statements outlined in

the BPS Pharmacotherapy content outline. The course content provides a comprehensive review of the knowledge domains covered in the specialty certification examination. The course uses a case-based approach, with strong emphasis on the thought processes needed to solve patient care problems in each therapeutic area.

This is the same course that was presented live at the 2019 ACCP Updates in Therapeutics® meeting. The course is available for continuing pharmacy education and recertification credit.

## Recertification Credit

The *Pharmacotherapy Preparatory Review and Recertification Course* is approved by the Board of Pharmacy Specialties (BPS) as one of three components in a professional development program that can be used by Board Certified Pharmacotherapy Specialist (BCPSs) as an alternative to the written recertification examination. BCPSs who take the 2019 course and successfully complete the self-assessment test by October 15, 2019, will earn 24.0 hours of BCPS recertification credit

## Course Content

The Pharmacotherapy Preparatory Review and Recertification Course workbook covers the following content:

### Volume 1

- Biostats: A Refresher
- Study Designs: Fundamentals, Interpretation, and Research Topics
- Geriatrics
- Nephrology
- Cardiology I
- Cardiology II
- Critical Care
- Infectious Diseases
- HIV/Infectious Diseases
- Pediatrics
- Anticoagulation
- General Psychiatry
- Neurology
- Endocrine and Metabolic Disorders

### Volume 2

- Fluids, Electrolytes, and Nutrition
- Pharmacokinetics: A Refresher
- Gastrointestinal Disorders
- Men's and Women's Health
- Pulmonary Disorders, Gout, and Immunizations
- Oncology Support Care
- Policy, Practice and Regulatory Issues

### Additional Resources

- Practices and Processes of Care
- Communication Strategies in Pharmacy
- Principles and Methods of Educating Health Care Professionals
- Managing a Clinical Practice
- Drug Information Resources and Literature Retrieval

## The Course Package includes:

- Streaming audio/slide synchronized presentations
- Downloadable/printable PDFs of presentation slides
- Downloadable MP3 audio files
- Downloadable MP4 video files
- Online access to the course workbook in electronic (PDF) format
- The opportunity to claim up to 24.0 contact hours of Continuing Pharmacy Education (CPE) credit for the course

## ACCP Flip Cards: Pharmacotherapy Mobile App

Are you preparing for the Pharmacotherapy Specialty Certification Examination administered by the Board of Pharmacy Specialties? Now there's an app for that! *ACCP Flip Cards: Pharmacotherapy* is a mobile app for smartphone and iOS devices. Combining the flash card experience with more than 250 patient care scenarios, this new app is a fun, fast, and simple way to prepare for specialty certification in critical care.

*ACCP Flip Cards: Pharmacotherapy* features enhanced self-testing and evaluation. Items can be viewed by domain or random shuffle; scoring statistics outline performance by topic; the favorites and notes features identify areas for further study; and a handy table allows quick access to reference values for common laboratory tests. Explained answers for each item assist learning and include 2–5 supporting references, each with a hyperlink to PubMed or other compiler.

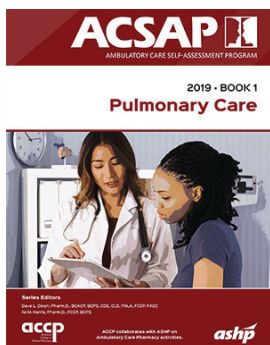

*ACCP Flip Cards: Pharmacotherapy* combines the time-tested method of review by flashcard with your mobile device, creating an ideal resource for those who want a self-paced review and refresher of disease states and therapeutics.

To purchase the mobile app, visit these vendors:

## Ambulatory Care Self-Assessment Program (ACSAP): 2019–2021 Series

ACCP collaborates with ASHP on Ambulatory Care Pharmacy activities.

The Board of Pharmacy Specialties (BPS) has approved ACSAP as a professional development activity for Board Certified Ambulatory Care Pharmacist (BCACP) recertification. Content for ACSAP books is drawn from the BPS outline for the BCACP certification examination.

This home study series provides pertinent updates for the BCACP. Chapters focus on the most recent evidence (past 3–5 years) and emphasize the provision of quality pharmaceutical care, enhancement of clinician skills, and improvement of patient outcomes in this practice setting. To be

eligible for recertification credit, the required posttest must be submitted within the 6-month window after the book's release.

### ACSAP 2019–2020 Series Editors:

Dave L. Dixon, Pharm.D., FCCP, BCACP, BCPS  
Ila M. Harris, Pharm.D., FCCP, BCPS

### Nine-Book Series Has Three Releases Each Year

Books in the 2019–2021 series have release dates in March, July, and November. The nine books are *Pulmonary Care*, *Infection in Primary Care*, *Neurologic Care and Pain Management*, *Cardiology Care*, *Geriatric and Psychiatric Care*, *Gastrointestinal and Nutrition Care*, *Endocrinology and Rheumatology Care*, *Women's and Men's Care*, and *Oncology and Nephrology Care*.

### Get Two Formats for One Low Price

Each ACSAP book is delivered in two formats: (1) an interactive PDF that can be saved to your computer or printed and (2) an eBook that can be viewed on tablets, e-readers, and smartphones. Features of the interactive PDF include intra-document links from the table of contents directly to chapters of interest. Hypertext links bring up official guidelines and recommendations, patient assessment tools, and original data sources. New learning formats include the interactive case (webpages introduced by a sample case-based question); and the recorded webcast (a narrated PowerPoint, also provided as a PDF transcript). Each chapter is fully referenced, with each citation linked to literature compilers such as PubMed.

## Design Your Book Package and Save!

Purchase ACSAP 2019–2020 releases as single books, or buy any three or more and save 20% off the single-book price. Purchase the entire nine-book series for a savings of more than 40% off the single-book price. For the full schedule of ACSAP 2019–2020 releases with tables of contents, sample chapters, lists of faculty, and contact hours for each module as they become available, go to [www.accp.com/store](http://www.accp.com/store).

| ACSAP 2019–2021 Pricing  | Member Price | Nonmember Price |
|--------------------------|--------------|-----------------|
| Single Book              | \$75.00      | \$110.00        |
| Any Three or More Books  | \$60.00/book | \$90.00/book    |
| Full Series (nine books) | \$400.00     | \$600.00        |

### Continuing Pharmacy Education Credit

The American College of Clinical Pharmacy And the American Society of Health-System Pharmacists are accredited by the Accreditation Council for Pharmacy Education (ACPE) as a provider of continuing pharmacy education (CPE) credit. The number of CPE credit hours varies with each ACSAP module.

All ACSAP releases are application-based activities.

To receive BCACP recertification credit, an ACSAP posttest must be submitted within the 6-month period after the book's release.

To receive ACPE CPE credit for an ACSAP module, a posttest must be submitted within the 3-year period after the book's release. The appropriate CPE credit will be awarded for test scores of 50% and higher.

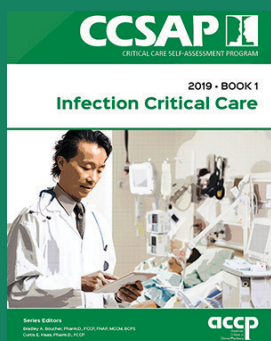

### ACSAP 2019–2021 Books and Release Dates

Pulmonary Care – (March 15, 2019)  
Infection in Primary Care – (July 15, 2019)  
Neurologic Care and Pain Management – (November 15, 2019)  
Cardiology Care – (March 16, 2020)

### Continuing Pharmacy Education Credit

The American College of Clinical Pharmacy is accredited by the Accreditation Council for Pharmacy Education (ACPE) as a provider of continuing pharmacy education (CPE) credit. The number of CPE credit hours varies with each PedSAP module. All PedSAP releases are application-based activities.

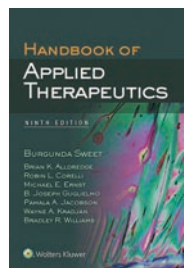

**To receive BCPPS recertification credit**, a PedSAP posttest must be submitted within the 6-month period after the book's release.

**To receive ACPE CPE credit** for a PedSAP module, a posttest must be submitted within the 3-year period after the book's release. The appropriate CPE credit will be awarded for test scores of 50% and higher.

**Pharmacotherapy**

**Handbook of Applied Therapeutics, Ninth Edition**

By: Burgunda Sweet, Pharm.D.; Brian K. Alldredge, Pharm.D.; Robin L. Corelli, Pharm.D.; Michael E. Ernst, Pharm.D., FCCP, BCPS; B. Joseph Guglielmo, Pharm.D.; Pamela A. Jacobson, Pharm.D.; Wayne A. Kradjan, Pharm.D., BCPS; and Bradley R. Williams, Pharm.D.

This must-have resource for pharmacy, PA, and NP students, as well as practicing clinicians, presents drug-related content in a bulleted, tabular, quick-access format to support therapeutic decision-making at the point of care.

This updated ninth edition provides in-depth information on the latest drug treatments for more than 85 diseases and conditions, including heart failure, schizophrenia, viral hepatitis, and diabetes mellitus.

Thoroughly up-to-date content reflects how new drugs are incorporated into contemporary therapeutic practices.

**Features include:**

- Trusted therapeutic content based on *Applied Therapeutics, 10th Edition*, is presented in a concise, bulleted, quick-reference format.
- Hundreds of tables provide rapid access to comparative drug information, pharmacokinetic properties, treatment options, dosing guidelines, risk factors, and disease information.

**CURRENT Medical Diagnosis & Treatment Study Guide, Second Edition**

By: Gene R. Quinn, M.D.; Nathaniel W. Gleason, M.D.; Maxine A. Papadakis, M.D.; and Stephen J. McPhee, M.D.

The ultimate case-based study guide based on the most popular annual resource in internal medicine . . . now extensively updated.

The *CURRENT Medical Diagnosis & Treatment Study Guide* facilitates your analysis of test cases and enhances your recall of internal medicine topics. Organized according to the core curriculum of the Clerkship Directors in Internal Medicine, this study-enhancing resource covers over 30 core topics that encompass essentials, conditions, presentations, treatment approaches, and diseases

seen by general practitioners in inpatient and outpatient settings.

The study guide uses content from CMDT, Quick Answers, and Lange Pathophysiology to provide a case-based application that tests key concepts in clinical reasoning, clinical problem solving, and recognition of essential clinical facts.

**CURRENT Medical Diagnosis & Treatment 2019, 59th Edition**

By: Maxine A. Papadakis, M.D.; Stephen J. McPhee, M.D.; and Michael W. Rabow

Written by clinicians renowned in their respective fields, this trusted classic offers expert advice on all aspects of outpatient and inpatient medical care. You'll find authoritative, evidence-based coverage of more than 1,000 diseases and disorders including concise, yet thorough synopsis of diagnosis and treatment. Presented in full-color, this single source reference has been fully updated with the latest developments and breakthroughs in medicine, guidelines, references, drug prices, and more.

**New in this edition:**

- Extensive updating of tables and images
- New FDA-approved medication for multiple sclerosis
- New summary of recommended FDA treatment regimens for hepatitis C
- U.S. Preventive Services Task Force recommendations for osteoporosis, prostate cancer, ovarian cancer, and cervical cancer
- Extensive update of immune modulation therapy and adjuvant treatments of breast cancer
- Targeted therapies for advanced non-small cell lung cancers
- Thoroughly revised chapter on viral and rickettsial infections, including recent measles, polio, and acute flaccid paralysis outbreaks, and on related immunizations
- Clarification of the appropriate role of opioids and buprenorphine formulations in chronic pain management
- Revised section on health care for sexual and gender minority patients
- Information on new biologic agents for asthma, and many other disorders

## Pharmacist's Guide to Lipid Management, Second Edition

Edited by: Barbara S. Wiggins, Pharm.D., FCCP, BCPS;  
and Joseph J. Saseen, Pharm.D.; FCCP, BCPS

The science and practice of lipidology are always evolving, and the *Pharmacist's Guide to Lipid Management, Second Edition*, offers the latest information for pharmacists on the front lines of lipid management today. In this expanded new edition, material and case studies written by experts in the field build on the authoritative first edition and focus on the latest guidelines from the American College of Cardiology and the American Heart Association for treating high blood cholesterol in people at risk of cardiovascular diseases.

The Pharmacist's Guide to Lipid Management, Second Edition, is not just a great resource for ambulatory care and inpatient pharmacists. With updates and recommendations on pathophysiology, pharmacotherapy, lifestyle modification, special patient populations, landmark clinical trials, and more, the Pharmacist's Guide to Lipid Management, Second Edition, is also a valuable aid for students, physicians, nurse practitioners, and other health care professionals involved in managing lipid therapies.

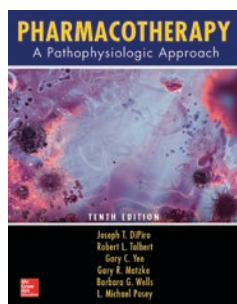

Reducing the risk of cardiovascular disease, America's No. 1 killer, requires a nationwide effort, and pharmacists have a unique opportunity to offer a significant impact. The Pharmacist's Guide to Lipid Management, Second Edition, is the pharmacist's tool in this effort.

## Pharmacotherapy: A Pathophysiologic Approach, 10th Edition

Edited by: Joseph DiPiro, Robert Talbert, Gary Yee, Gary Matzke, Barbara Wells, and L. Michael Posey

*Pharmacotherapy: A Pathophysiologic Approach* is written to help readers advance the quality of patient care through evidence-based medication therapy derived from sound pharmacotherapeutic principles. The scope of this trusted classic goes beyond drug indications and dosages to include the initial selection, proper administration, and monitoring of drugs. Readers will find everything they need to provide safe, effective drug therapy across the full range of therapeutic categories.

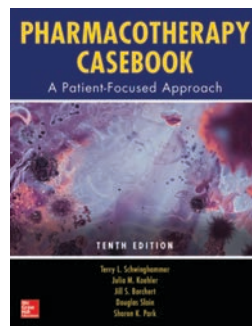

This edition is enriched by more than 300 expert contributors, and every chapter has been revised and updated to reflect the latest in evidence-based information and recommendations. Important features such as key concepts at the beginning of each chapter, clinical presentation tables that summarize disease signs and symptoms, and clinical controversies boxes that examine the complicated issues faced by students and clinicians in providing drug therapy make this text an essential learning tool for students, patient-focused pharmacists, and other health care providers.

## Pharmacotherapy Casebook: A Patient-Focused Approach, 10th Edition

Edited by Terry Schwinghammer, Julia Koehler, Jill Borchert, Douglas Slain, Sharon Park

*Pharmacotherapy Casebook: A Patient-Focused Approach* uses 157 patient cases to help you develop the skills necessary to identify and resolve the most common drug therapy problems encountered in daily clinical practice. The case chapters are organized into organ system sections that correspond to those of the companion textbook, *Pharmacotherapy: A Pathophysiologic Approach, 10th Edition*.

Sharpen your ability to:

- Identify actual or potential drug therapy problems.
- Determine the desired therapeutic outcome.
- Evaluate therapeutic alternatives.
- Design an optimal individualized pharmacotherapeutic plan.
- Develop methods to evaluate the therapeutic outcome.
- Provide patient education.
- Communicate and implement the pharmacotherapeutic plan.

## Pharmacotherapy Handbook, 10th Edition

By: Barbara G. Wells, Pharm.D., FCCP, FASHP, BCPP; Joseph T. DiPiro, Pharm.D., FCCP; Terry L. Schwinghammer, Pharm.D., FCCP, FASHP, FAPhA; and Cecily V. DiPiro, Pharm.D.

*Pharmacotherapy Handbook, 10th Edition*, delivers the critical information needed to make drug therapy decisions for more than 140 diseases and disorders commonly encountered in a clinical setting. Featuring a convenient alphabetized presentation, this handy guide uses text, tables, figures, and treatment algorithms to make important drug data readily accessible and easily understood. The consistent chapter organization includes disease state definitions, concise review of relevant pathophysiology, clinical presentation, diagnosis, goals of treatment, treatment, and monitoring. Readers will also find six valuable appendices, including Geriatrics and Allergic

and Pseudoallergic Reactions.

## Pharmacotherapy Bedside Guide

By: Christopher P. Martin, Pharm.D.; and Robert L. Talbert, Pharm.D., FCCP, BCPS

Developed for use at the point of care, *Pharmacotherapy Bedside Guide* helps you decide which pharmacotherapy to use in specific clinical situations. Composed exclusively of quick-hit tables and algorithms, this carry-anywhere companion tells you what treatment the evidence suggests for each illness or disorder. It also details essential drug information such as benefits, risks, adverse reactions, dosage, interactions with other drugs, and responses. Conveniently organized by specialty and disorder rather than by drug, *Pharmacotherapy Bedside Guide* will prove invaluable when treating patients.

## Pocket Medicine, Sixth Edition

By: Marc S. Sabatine, M. D.

Quick access to key clinical information and solutions to common problems in internal medicine—as close as your pocket! *Pocket Medicine, Sixth Edition*, is your go-to resource for fast answers to diagnostic questions you'll face on rounds and exams.

Completely updated throughout to keep you current with what's new in internal medicine.

Six-ring looseleaf binder accommodates notes and is small enough to fit in a pocket.

- 16-page color insert displays classic normal and abnormal radiographs, CT scans, echocardiograms, peripheral blood smears, and urinalyses commonly seen in the practice of internal medicine.
- User-friendly tabs and a 2-color design help you find information quickly.
- References to landmark papers help you answer questions from attendings and residents—all from a trusted source acceptable for use on rounds.
- Surgical, OB-GYN, and ophthalmic consult section guides you to ask the right questions and get the best care for your patients.
- Ideal for medical students, interns, residents, advanced practice nurses, PAs, and candidates reviewing for internal medicine board exams.

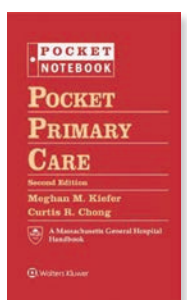

**Member Price:** \$59.95

## Pocket Primary Care, Second Edition

By: Meghan M. Kiefer, M.D.; and Curtis R. Chong, M.D., Ph.D., M.Phil.

*Pocket Primary Care, Second Edition*, is a practical, high-yield reference for quick answers to common diagnostic questions in the outpatient setting. This easy-to-use, loose-leaf resource contains current evidence-based practices, accepted best practices, and expert guidance from physicians at Massachusetts General Hospital, including appropriate workups and when to refer. From counseling patients on insomnia to diagnosing STIs, from interpreting PFTs to treating osteoporosis, this revised second edition supports your clinical decision making and helps you meet everyday challenges in your practice.

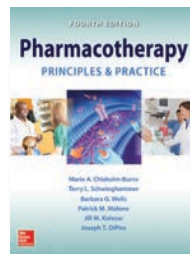

**Member Price:** \$54.95

**Nonmember Price:** \$58.95

ISBN: 978-1-4963-7865-1; 2018; 374 pages; loose-leaf with binder

## Pharmacotherapy Principles & Practice, Fourth Edition

By: Marie A. Chisholm-Burns, Pharm.D., MPH, FCCP, FASHP; Terry L. Schwinghammer, Pharm.D., FCCP, FASHP, BCPS; Barbara G. Wells, Pharm.D., FCCP, FASHP, BCPP; Patrick M. Malone, Pharm.D., FASHP; Jill M. Kolesar, Pharm.D., FCCP, BCPS; and Joseph T. DiPiro, Pharm.D., FCCP

*Pharmacotherapy Principles & Practice, Fourth Edition*, uses a solid evidence-based approach to teach you how to design, implement, monitor, and evaluate medication therapy. This trusted text provides everything you need to gain an in-depth understanding of the underlying principles of the pharmacotherapy of disease—and their practical application. To be as clinically relevant as possible, the disease states and treatments discussed focus on the most common disorders in clinical practice, and laboratory values are expressed as both

conventional units and SI units. All chapters are written or reviewed by pharmacists, nurse practitioners, physician assistants, and physicians widely recognized as authorities in their fields.

## Critical Care

AN ACCP PUBLICATION

## Critical Care Pharmacotherapy

By: Brian Erstad, Pharm.D., FCCP, BCPS

*Critical Care Pharmacotherapy*, edited by Brian Erstad, Pharm.D., is the most comprehensive publication on the cutting-edge field of critical care pharmacotherapy. More than 40 chapters, written by the most experienced critical care pharmacists in the field, cover topics in supportive care, infectious diseases, neurocritical care, cardiovascular critical care, and more. Also featured are chapters dealing with unique pharmacotherapy challenges in special ICU populations such as multiple trauma patients,

as well as chapters on patient safety, credentialing, and compliance issues. A special foreword in *Critical Care Pharmacotherapy* provides a historical analysis of critical care pharmacy practice from the perspectives of experienced practitioners as well as recent entrants in the field. *Critical Care Pharmacotherapy* is the go-to reference for critical care pharmacists everywhere.

## Drug Information

### Demystifying Opioid Conversion Calculations: A Guide for Effective Dosing, Second Edition

By: Mary Lynn McPherson, Pharm.D., MA, MDE, BCPS, CPE

Praised by practitioners, students and instructors for its engaging approach to teaching a very complex subject, *Demystifying Opioid Conversion Calculations: A Guide for Effective Dosing*, has long been the go-to guide for learning how to calculate opioid conversions. Now in its second edition, this reference is a must-have for clinicians involved in pain management at all levels.

This book focuses on the calculations that practitioners use in actual practice, providing realistic scenarios for decision making. The revised edition covers the entire spectrum of opioid analgesics used to manage patients with moderate-to-severe pain and serious lifelimiting illnesses.

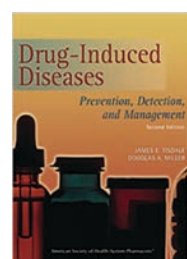

**Member Price:** \$48.95

**Nonmember Price:** \$60.95

ISBN: 978-1-58528-198-5; 2018; 288 pages; softcover

### Drug-Induced Diseases, Second Edition

Edited by: James E. Tisdale, Pharm.D., FCCP, BCPS; and Douglas A. Miller, Pharm.D.

A drug-induced disease is the unintended effect of a drug that results in mortality or morbidity with symptoms sufficient to prompt a patient to seek medical attention and/or to require hospitalization. Since the publication of the first edition of this book in 2005, numerous drugs have been withdrawn from the market in the United States because of morbidity and/or mortality associated with drug-induced disease. Despite best efforts to ensure the safety and effectiveness of all drugs, millions of patients each year develop drug-induced diseases. Now in

its second edition, this essential and comprehensive resource provides a detailed analysis of how to prevent, identify, and manage drug-induced diseases.

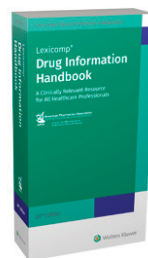

**Member Price:** \$199.95

**Nonmember Price:** \$214.95

ISBN: 978-1-58528-205-0; 2010; 1132 pages; hardcover

## Drug Information Handbook, 28th Edition

By: Walters Kluwer Clinical Drug Data

This handbook follows a dictionary-like format, with drug products organized alphabetically and cross-referenced by U.S. and Canadian brand names and index terms. Clinicians have access to more than 1700 drug monographs, each offering up to 48 fields of information specific to a particular medication. Supplementing the drug information is an extensive appendix offering helpful treatment guidelines and therapy recommendations and a pharmacologic category index.

**Member Price:** \$82.95

**Nonmember Price:** \$89.95

ISBN: 978-1-59195-376-0; 2019; 2493 pages; softcover

### Poisoning & Drug Overdose, Seventh Edition

Edited by: Kent R. Olson, M.D., FACEP, FACMT, FAACT, et al.

Designed for speed of use during toxicologic emergencies, this instant-answer guide delivers critical information on the effective diagnosis and treatment of drug-related emergencies and chemical exposures. Enhanced by detailed tables and charts, extensive cross-referencing, and a comprehensive index, the seventh edition has been thoroughly updated to reflect newly released drugs and the latest information on existing drugs.

*Poisoning & Drug Overdose* is divided into four sections:

**Section I** leads you through initial emergency management, including treatment of coma, hypotension, and other common complications; physical and laboratory diagnosis; and methods of decontamination and enhanced eliminations of poisons.

**Section II** provides detailed information on hundreds of common drugs and poisons.

**Section III** describes the use and side effects of more than 80 antidotes and therapeutic drugs.

**Section IV** covers the medical management of chemical spills and occupational chemical exposures and includes a table of more than 500 industrial chemicals.

*Poisoning & Drug Overdose, Seventh Edition* should be within reach of every medical toxicologist, emergency physician, and poison control staff member.

**Member Price:** \$70.95

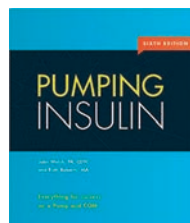

**Nonmember Price:** \$74.95

ISBN: 978-0-07-183979-2; 2017; 960 pages; softcover

## Top 100 Drug Interactions 2019: A Guide to Patient Management

By: Philip D. Hansten, Pharm.D.; and John R. Horn, Pharm.D.

The 2019 edition of this popular, pocket-sized reference book, written by the acknowledged experts in the field, includes several hundred new drug-drug interactions and monographs. As in previous editions, the authors have included interactions that may produce clinically important adverse events based on their properties to assist in predicting interactions where limited data are available. The table of CYP450 and drug transporter substrates and modifiers now includes more than 565 drugs. In addition, many of the existing monographs have been revised to reflect newly published data.

Interaction entries are easy to find in the index by either trade or generic name. The Horn and Hansten Drug Interaction Probability Scale is included to assess the probability of a causal relationship between a potential drug interaction and a patient event.

## Healthy Aging: Principles and Clinical Practice for Clinicians

By: Virginia Burggraf, DNS, RN, FAAN; Kye Y. Kim, M.D.; and Aubrey L. Knight, M.D.

Older adults are among the fastest growing age groups, and according to the U.S. Department of Health and Human Services, over 37 million people in this group will manage more than one chronic condition or related disability by 2030, including diabetes mellitus, arthritis, congestive heart failure, and dementia. *Healthy Aging: Principles and Clinical Practice for Clinicians* provides a fresh perspective and evidence-based approach for helping older adults maintain healthy lifestyles, adapt to normal age-related changes, and manage acute and chronic illnesses. This new

text, divided into chronic illnesses both physical and emotional, covers only the most common illnesses of older adults and incorporates the holistic framework that comprises geriatric care in partnership with physicians, gerontologists, and nurses while addressing the Healthy People 2020 objectives that all practitioners must incorporate into their practice.

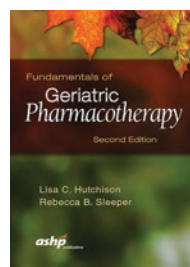

**Member Price:** \$74.95

**Nonmember Price:** \$78.95

ISBN: 978-1-4511-9104-2; 2014; 728 pages; softcover

## Fundamentals of Geriatric Pharmacotherapy, Second Edition

By: Lisa C. Hutchison, Pharm.D., MPH, FCCP, BCPS; and Rebecca B. Sleeper, Pharm.D., FASCP, BCPS

Now in its second edition, *Fundamentals of Geriatric Pharmacotherapy* offers the full support you need to provide the most effective medication management and therapeutic decisions. This text is unique, not only as a comprehensive overview of major issues in geriatric pharmacotherapy and a core textbook for students but also as a resource for all health care professionals who treat older adult patients.

Covering all major topics and issues, the second edition provides the most current information and proven strategies in one comprehensive guide, including associated issues that affect therapy, such as the coordination of care across multiple venues and caregivers.

## — Infectious Diseases —

### Antibiotic Basics for Clinicians, Third Edition

By: Alan R. Hauser, M.D., Ph.D.

Popular as a classroom text, for review, and as a clinical quick-reference, this time-saving resource helps medical students master the rationale behind antibiotic selection for common bacterial pathogens and infectious diseases.

Updated content covers the latest antibiotic medications available on the market, and new full-color illustrations strengthen users' understanding of the application of antibiotic drug treatment.

#### Key Features:

- New full-color illustrations reinforce comprehension with greater clarity.
- Updated content familiarizes users with the most relevant antibacterial agents and treatment guidelines.
- Succinct, practical guidelines simplify challenging content for easier understanding.
- Additional pearls emphasize mnemonics and enhance retention of critical information.
- Remember boxes, History boxes, and drug tables save time with fast access to key information for selecting anti-infection agents.
- Extensive review cases and questions reinforce learning and clinical application.

### Antibiotics Simplified, Fourth Edition

By: Jason C. Gallagher, Pharm.D., BCPS; and Conan MacDougall, Pharm.D., MAS, BCPS

*Antibiotics Simplified* is a succinct guide designed to bridge knowledge gained in basic sciences courses with clinical practice in infectious diseases. This practical text reviews basic microbiology and how to approach the pharmacotherapy of a patient with a presumed infection. It also contains concise drug class reviews with an explanation of the characteristics of various classes of antibacterial and antifungal drugs.

This book simplifies learning infectious disease pharmacotherapy and condenses the many facts that are taught about antibiotics into one quick reference guide. This guide will help the reader learn the characteristics of antibiotics and why an antibiotic is useful for an indication. With an understanding of the characteristics of the antibiotics, students and practitioners will more easily be able to make a logical choice to treat an infection.

With helpful figures and flow charts, drug class reviews, a spectra of activity chart, and an index for reference, this is an ideal handbook for students, practicing pharmacists, physicians, and other clinicians!

### Microbiology & Infectious Diseases Flashcards, Third Edition

By: Kenneth D. Somers, Ph.D.; Stephen Morse, MSPH, Ph.D.; and Molly A. Hughes, M.D., Ph.D.

*Microbiology & Infectious Diseases Flashcards* provide a quick, concise, and effective way to review the essential concepts of microbiology. These cards help you learn the medically important aspects of the subject and cover the basic and clinical aspects of bacteriology, virology, mycology, parasitology, and infectious diseases.

One side of the card features a clinical vignette that is a mini-case study of the disease, and the flip side presents the etiology and epidemiology, pathogenesis, clinical manifestations, laboratory diagnosis,

and treatment and prevention of the disorder.

#### Features include:

- A super-effective portable learning tool.
- Covers major microbial diseases caused by bacteria, viruses, fungi, and parasites.
- Teaches medical microbiology in the context of clinical cases.

Great for last-minute exam preparation.

### The Washington Manual of Infectious Diseases Subspecialty Consult, Second Edition

By: Nigar Kirmani, M.D.; Keith Woeltje, M.D.; and Hilary Babcock, M.D.

Created by faculty and fellows from the Infectious Diseases Division of Internal Medicine at the Washington University School of Medicine in St. Louis, this volume in the Washington Manual Subspecialty Consult Series is designed to provide quick access to the information needed to evaluate a patient on a subspecialty consult service.

Inside, you'll find easy-to-follow guidance for the diagnosis and treatment of infectious diseases. This quick reference features a revised outline format that presents information in a logical and readily accessible style. Updated content has been added to reflect advancing technologies and therapeutics. Two-color design highlights and aids in the retention of essential material. Bulleted lists of common problems let users review salient points at a glance.

**Member Price:** \$55.95

**Nonmember Price:** \$61.95

ISBN: 978-1-4511-1364-8; 2012; 448 pages; softcover

## Nephrology

### Drug Prescribing in Renal Failure, Fifth Edition

By: George R. Aronoff, M.D., FACP; William M. Bennett, M.D., FACP; Jeffrey S. Berns, M.D., FACP; Michael E. Brier, Ph.D.; Nishaminy Kasbekar, Pharm.D.; Bruce A. Mueller, Pharm.D., FCCP; Deborah A. Pasko, Pharm.D.; and William E. Smoyer, M.D.

This classic pocket guide to drug dosing is the most complete resource of its kind. Easy-to-read tables cover dosing information for more than 450 drugs when used in adult patients with impaired renal function. The addition of pediatric dosing information makes this new edition even more useful.

Physiological changes associated with renal disease profoundly affect the kidney's ability to regulate the internal fluid environment. This fifth edition emphasizes the metabolism of drugs eliminated by the kidney as well as the importance of the patient's glomerular filtration rate.

Dosing adjustments are provided for antimicrobial and antiviral agents, anti-hypertensive and cardiovascular agents, analgesics, sedatives and hypnotics, and miscellaneous agents. Recommendations are included for supplemental drug dosing during renal replacement therapy.

## Oncology

### Cancer Therapy: Prescribing and Administration Basics

Edited by: Trinh Pham, Pharm.D., BCOP; and Lisa Holle, Pharm.D., BCOP

*Cancer Therapy: Prescribing and Administration Basics* is a helpful handbook that guides multidisciplinary hematology/oncology practitioners in the practical, day-to-day aspects of cancer therapy prescribing, verification, admixing, administration, and billing. This valuable resource will help practitioners optimize patient adherence, drug efficacy, and safety by providing patient counseling tips, proper safety and dispensing of oral cancer therapy information, and clinically significant drug interactions.

*Cancer Therapy: Prescribing and Administration Basics* is also useful for health care professionals whose primary area of practice is not hematology/oncology but who may be responsible for verifying, preparing, dispensing, or administering cancer therapy agents. This valuable text will provide them with practical information to accurately verify cancer therapy orders before drug preparation and administration and ensure safe use.

### The Chemotherapy Source Book, Fifth Edition (Perry's)

By: Michael C. Perry, M.D.; Donald C. Doll, M.D.; and Carl E. Freter, M.D.

The Chemotherapy Source Book provides a wealth of information on the choice of chemotherapeutic agents, the use of combination chemotherapy, and the toxicity of individual drugs. Organized by site, this is the only book of its kind to focus strictly on the clinical practice of chemotherapy and is meant to serve as a "one-stop shop" for information on choice of chemotherapeutic agents, treatment outlines, grading of adverse effects, and dose modification.

#### Features include:

- Updated drug information.
- Over 20 new drugs, as well as new indications for existing ones.
- Use and unique side effects of tyrosine kinase inhibitors, multi-targeted agents, vascular endothelial growth factor inhibitors, novel monoclonal antibodies, and immunotherapy.
- Changes in management have been incorporated.
- Streamlined content for the busy practitioner.
- Access to the LWW oncology web site is included with purchase, starting with a full 90-day trial with upgrade options offered.

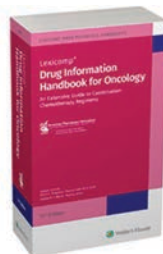

**Member Price:** \$94.95

**Nonmember Price:** \$102.95

### Drug Information Handbook for Oncology, 15th Edition

By: Diedra L. Bragalone, Pharm.D., MBA, BCOP, BCPS

This handbook provides health care professionals with vital information on antineoplastic agents, ancillary medications, combination chemotherapy regimens, and dosing protocols. Oncology drug monographs contain concise fields of pharmacology detail, including a Combination Regimens field in specific monographs that provides references to applicable chemotherapy regimens.

#### Updates to this Edition:

- 23 new drug monographs.
- 55 new chemotherapy regimens.
- 105 new variations within the regimens.
- Updated Special Topics:
  - Chemotherapy-induced peripheral neuropathy.
  - Mucositis and stomatitis.
  - Chemotherapy and obesity.
  - Chronic pain management (cancer).
  - Palliative care medicine (cancer).
- New Appendix Section:
  - Corticosteroid systemic equivalencies.

AN ACCP PUBLICATION

## Pediatric Pharmacotherapy

Edited by: Sandra Benavides, Pharm.D.; and Milap C. Nahata, Pharm.D., FCCP

*Pediatric Pharmacotherapy* focuses on the unique therapeutic needs of neonates, infants, children, and adolescents. Patients in these age groups offer challenges distinct from those of adult patients. Drugs behave differently in this population—medications may not be absorbed, distributed, metabolized, or eliminated in the same manner as in adults, causing increased or decreased efficacy or safety.

Contents include information on specific disease states, as well as drug selection and use, monitoring of effectiveness and toxicity, prevention

of medication errors, and patient/caregiver education. Chapters cover the introduction of pediatric care, pediatric pharmacokinetics, pharmacotherapy toxicology in pediatrics, medication safety, communication with pediatric caregivers, and sections on disease states in cardiovascular, pulmonary, gastrointestinal, renal, and hematology systems as well as the fields of psychiatry, infectious diseases, and more.

AN ACCP PUBLICATION

## Pediatric Medication Education Text, Fifth Edition

By: Marcia Lease Buck, Pharm.D., FCCP; and Anne E. Hendrick, Pharm.D.

This resource has long been the go-to publication for practitioners needing easy-to-access medication information that can be passed along to pediatric caregivers. Easily accessed from your desktop, these single-page drug information sheets can be quickly located and printed to provide caregivers with easy-to-understand instructions.

This unique medication counseling resource, developed for families with children younger than 12 years of age, offers information for each drug in both English and Spanish. The format is specifically designed to provide valuable educational information without overwhelming families with too much information.

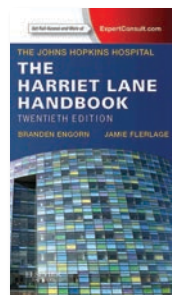

The *Pediatric Medication Education Text* is your source for simple, straightforward medication information on 389 alphabetically organized medications focusing on products most often prescribed at hospital discharge or during pediatric ambulatory care visits. The question-and-answer format meets the requirements from the U.S. Food and Drug Administration for providing written medication information to patients.

**Member Price:** \$51.95  
**Nonmember Price:** \$64.95

ISBN: 978-1-932658-64-4; 2009; 400 pages each of English and Spanish; CD-ROM

## The Harriet Lane Handbook, 20th Edition

By: Johns Hopkins Hospital; Branden Engorn, M.D.; and Jamie Flerlage, M.D.

Trusted by generations of residents and practitioners, *The Harriet Lane Handbook* provides fast, accurate information on pediatric diagnosis and treatment. Now, the most dependable drug information available has been thoroughly updated, providing the standard of pediatric care from the leading pediatric hospital in the world.

Updated content includes parameters for pediatric and neonatal septic shock, guidelines for acute management of severe traumatic brain injury, a convenient table detailing common genetic tests, a significantly extended collection of radiologic images, expanded mental health coverage, and much more.

Access information easily and quickly with reformatted sections designed to make the book easier to use in print, online, or via mobile device.

## Pediatric & Neonatal Dosage Handbook, 25th Edition

By: Carol K. Taketomo, Pharm.D.

*The Pediatric & Neonatal Dosage Handbook* includes more than 1000 drug monographs featuring concise fields of information specific to neonates and children. It follows a convenient, dictionary-like format, with drug products alphabetically organized and cross-referenced by U.S. and Canadian brand names.

Clear, concise, and relevant Lexicomp drug information is supplemented by an extensive appendix of comparative charts, tables, and supportive information as well as a therapeutic category and key word index.

### Updates to this Edition

- 39 New Drug Monographs
- New fields of Information
- Dosing: Renal Impairment: Pediatric
- Dosing: Hepatic Impairment: Pediatric
- Pharmacodynamics/Kinetics: Additional Considerations
- Updates to Hundreds of Existing Monographs, Including Updates Based on New Guideline Recommendations
- Updated Appendix Topics:
- Corticosteroids Systemic Equivalencies
- Normal Pediatric Heart Rates (PALS 2016)

## Pharmacogenomics

AN ACCP PUBLICATION

### Pharmacogenomics: Applications to Patient Care, Third Edition

Edited by: Julie A. Johnson, Pharm.D., FCCP, BCPS; Vicki L. Ellingrod, Pharm.D., FCCP; Deanna L. Kroetz, Ph.D.; and Grace M. Kuo, Pharm.D., MPH, Ph.D., FCCP

Pharmacists and health care practitioners, educators, and trainees providing patient care services are affected by the ever-advancing science of pharmacogenomics. In response, ACCP's third edition of *Pharmacogenomics: Applications to Patient Care*, developed by expert clinicians and researchers in the field, provides a state-of-the-art, clinically germane resource that distills the overwhelming body of scientific and clinical evidence and suggests practical actions for the translation and clinical application of

pharmacogenetics to everyday practice.

The third edition covers a spectrum of topics, from the evolution of pharmacogenomics to the clinical application of pharmacogenetics in the clinical setting, and provides up-to-date contributions from the groundbreaking efforts of pharmacogenomics research.

## Pharmacokinetics

### Applied Clinical Pharmacokinetics, Third Edition

By: Larry A. Bauer, Pharm.D.

The most current, hands-on book in the field, *Applied Clinical Pharmacokinetics* delivers clear and clinically relevant coverage of drug dosing and drug monitoring. Written by a nationally recognized expert, *Applied Clinical Pharmacokinetics* offers the latest standardized techniques and approaches to patient-specific dosing and new information on the most recent pharmacokinetically monitored drugs.

*Applied Clinical Pharmacokinetics* includes valuable learning aids such as sample problems with answers and explanations at the end of each chapter, practical step-by-step examples of both initial dosage determinations and serum concentration analysis, and clear and concise summaries of essential pharmacodynamic concepts. You will also find important coverage of drug dosing in special populations, including patients with renal and hepatic disease, obesity, and congestive heart failure and patients receiving dialysis or other forms of renal replacement therapies.

**Nonmember Price:** \$74.95

ISBN: 978-0-07-179458-9; 2014; 816 pages; hardcover

## Clinical Pharmacokinetics, Sixth Edition

By: John E. Murphy, Pharm.D., FCCP, FASHP

In the evolving practice of pharmacokinetics (PK), it is important to remain current on the latest advances. John E. Murphy, Pharm.D., FCCP, FASHP, a well-known leader in the field of clinical pharmacokinetics, has updated and expanded his widely used textbook and reference.

*Clinical Pharmacokinetics, Sixth Edition*, includes the most current information, covering issues such as rational use of drug concentration measurements, changes in dosing patients with obesity, and considerations for a wider variety of drugs for special populations. There is also a new chapter focused on pharmacogenomics and its impact on pharmacokinetic parameters, as well as a discussion of pharmacogenomics throughout the book.

## Pharmacology

### Basic & Clinical Pharmacology, 14th Edition

By: Bertram G. Katzung, M.D., Ph.D.; and Anthony J. Trevor, Ph.D.

Organized to reflect the syllabi in many pharmacology courses and in integrated curricula, *Basic & Clinical Pharmacology, 14th Edition*, covers the important concepts students need to know about the science of pharmacology and its application to clinical practice. Selection of the subject matter and order of its presentation are based on the authors' many years' experience in teaching this material to thousands of medical, pharmacy, dental, podiatry, nursing, and other health science students.

To be as clinically relevant as possible, the book includes sections that specifically address the clinical choice and use of drugs in patients and the monitoring of their effects and case studies that introduce clinical problems in many chapters. Presented in full color and enhanced by more than 300 illustrations (many new to this edition), *Basic & Clinical Pharmacology* features numerous summary tables and diagrams that encapsulate important information.

**Member Price:** \$63.95

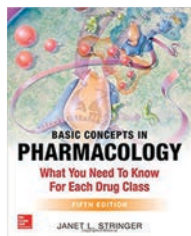

**Nonmember Price:** \$69.95

ISBN: 978-1-259-64115-2; 2017; 1264 pages; softcover

## Basic Concepts in Pharmacology: What You Need to Know for Each Drug Class, Fifth Edition

By: Janet L. Stringer, M.D., Ph.D.

*Basic Concepts in Pharmacology: What You Need to Know for Each Study Class, Fifth Edition*, provides a complete framework for studying—and understanding—the fundamental principles of drug actions. This unique resource presents drugs by classes, details exactly what you need to know about each class, and reinforces key concepts and definitions.

With this innovative text, you'll be able to:

- Recognize the concepts you truly must know before moving on to other material.
- Understand the fundamental principles of drug actions.
- Organize and condense the drug information you must remember.
- Review key information, which is conveniently presented in boxes, tables, and illustrations.
- Identify the most important drugs in each class.

**Member Price:** \$52.95

## LANGE Smart Charts: Pharmacology, Second Edition

By: Catherine E. Pelletier-Dattu, M.D., FACEP, FAAEM

A pharmacology review that simulates the way students think and learn.

Composed entirely of tables and diagrams, this innovative text delivers a complete review of pharmacology. The unique tabular presentation facilitates comparisons and clarifies relationships among drugs within all classes. Each chapter begins with an outline

of the drug class discussed, followed by a list of key terms. Coverage of each drug includes terms of actions, pharmacokinetics, uses, drug interactions, and side effects. Mnemonics and other learning aids are included throughout the book to facilitate learning.

Smart Charts: Pharmacology covers every essential topic in pharmacology.

**Member Price:** \$47.95

## Psychiatry

### Gabbard's Treatments of Psychiatric Disorders, Fifth Edition

By: Glen O. Gabbard, M.D.

The definitive treatment textbook in psychiatry, this fifth edition of *Gabbard's Treatments of Psychiatric Disorders* has been thoroughly restructured to reflect the new DSM-5® categories, preserving its value as a state-of-the-art resource and increasing its usefulness in the field. The editors have produced a volume that is both comprehensive and concise, meeting the needs of clinicians who prefer a single, user-friendly volume. For brevity, the book focuses on treatment over diagnostic considerations, and addresses both empirically validated treatments and accumulated clinical

wisdom when research is lacking.

An authoritative resource for psychiatrists, psychologists, and psychiatric nurses and an outstanding reference for students in the mental health professions, *Gabbard's Treatments of Psychiatric Disorders, Fifth Edition*, will prove indispensable to clinicians seeking to provide excellent care while transitioning to a DSM-5® world.

## Women's and Men's Health

### Drugs in Pregnancy and Lactation, 11th Edition

By: Gerald G. Briggs, Craig V. Tower, Roger K. Freeman, and Alicia B. Forinash

*Drugs in Pregnancy and Lactation* presents by generic name an A–Z listing of drugs that can be used by pregnant and lactating women. Each monograph summarizes the known and/or possible effects of the drug on the fetus and the known/possible passage of the drug into human breast milk.

The book offers a careful and exhaustive summarization of the world literature as it relates to drugs in pregnancy and lactation. Each monograph contains six parts:

- I. Generic U.S. name.
- II. Pharmacologic class.
- III. Risk factor.
- IV. Fetal risk summary.
- V. Breastfeeding summary.
- VI. References.

AN ACCP PUBLICATION

## Clinical Pharmacist's Guide to Biostatistics and Literature Evaluation, Second Edition

By: Robert DiCenzo, Pharm.D., FCCP, BCPS

The definitive biostatistics guide for pharmacists, revised and updated!

Boost your knowledge of biostatistical tools for interpreting the literature with material drawn from ACCP's renowned Pharmacotherapy Self-Assessment Program (PSAP) and the live pharmacotherapy preparatory course Updates in Therapeutics®. Editor Robert DiCenzo, Pharm.D., FCCP, BCPS, designed this review to support pharmacists' preparation for the Board of Pharmacy Specialties (BPS) examinations.

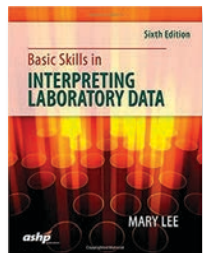

Whether you are interpreting the medical literature to optimize patient care, improve health outcomes, or generate hypothesis for research, an understanding of biostatistics is essential for success. This book was developed to bolster the pharmacist's knowledge and confidence for using biostatistical tools for interpreting the literature. Pharmacists new to practice or seasoned practitioners wanting to refresh their understanding of biostatistics and literature evaluation will benefit from this helpful guide.

## Basic Skills in Interpreting Laboratory Data, Sixth Edition

By: Mary Lee, Pharm.D., FCCP, BCPS

*Basic Skills in Interpreting Laboratory Data* continues to be the most popular teaching text on laboratory data for pharmacy students as well as the go-to reference for pharmacists in therapeutic practice. Now in its sixth edition, *Basic Skills* has been expanded and updated to cover new drugs, research, and therapeutic approaches.

The sixth edition is a comprehensive, in-depth guide to all aspects of laboratory work that apply to clinical practice. Written by 40 established clinicians

and pharmacy faculty members and reviewed by additional experts, it is designed to make all information clear and quickly accessible. Mini-cases provide clinical scenarios for using tests and treating patients, and quickview charts throughout offer clear interpretations of laboratory results.

## Fundamentals of Clinical Trials, Fifth Edition

By: Lawrence M. Friedman, Curt D. Furberg, David L. DeMets, David M. Reboussin, and Christopher B. Granger

This fifth edition of *Fundamentals of Clinical Trials* is written by recognized leaders who have extensive experience in all areas of clinical trials. Most chapters have been revised considerably from the fourth edition. A chapter on regulatory issues has been included, and the chapter on data monitoring has been split into two and expanded. Many contemporary clinical trial examples have been added. In addition, there is extensive new material on adverse events, adherence, issues in analysis, electronic data, data sharing, and international trials.

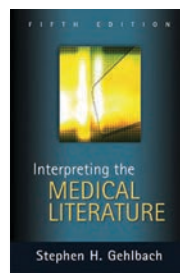

**Member Price:** \$76.95

**Nonmember Price:** \$79.95

ISBN: 978-3-319-18538-5; 2015; 445 pages; hardcover

## Interpreting the Medical Literature, Fifth Edition

By: Stephen H. Gehlbach, M.D., MPH

Keeping up with the medical literature is a daunting task for most health care professionals, especially as medical research becomes increasingly sophisticated and statistical analysis more complex. This easy-to-follow guide will enhance your ability to demystify, interpret, and analyze research literature, making the task not only palatable but also quicker, easier, and more enjoyable.

A highlight of the fifth edition includes a new chapter on how to interpret conflicting studies. Other features of this edition are an expanded discussion

on meta-analysis and developing consensus, updated examples from the literature, and a thorough review of text and references.

**Member Price:** \$52.95

**Nonmember Price:** \$56.95

ISBN: 978-0-07-143789-9; 2006; 308 pages; softcover

## Designing Clinical Research, Fourth Edition

By: Stephen B. Hulley, M.D., MPH; Steven R. Cummings, M.D.; Warren S. Browner, M.D., MPH; Deborah G. Grady, M.D., MPH; and Thomas B. Newman, M.D., MPH

*Designing Clinical Research* has been extensively revised and continues to set the standard as a practical guide for pharmacists, physicians, nurses, and other health professionals involved in all forms of clinical, translational, and public health research. The book presents advanced epidemiologic concepts in a reader-friendly way and suggests commonsense approaches to the challenging judgments involved in designing, funding, and implementing research.

This edition includes expanded and updated content in every chapter, with new material on noninferiority trials for comparative effectiveness research, incidence-density case-control studies, confounding and effect modification, and new NIH grant-writing requirements.

**Member Price:** \$89.95

**Nonmember Price:** \$93.95

ISBN: 978-1-60831-804-9; 2013; 378 pages; softcover

## Primer of Biostatistics, Seventh Edition

By: Stanton A. Glantz, Ph.D.

*Primer of Biostatistics* is a concise, engagingly written introduction to understanding statistics as they apply to medicine and the life sciences. The book demystifies this challenging topic in an interesting and enjoyable manner that assumes no prior knowledge of the subject. You will learn to understand test selection evaluate biomedical statistics critically, knowledgeably, and confidently.

*Primer of Biostatistics* starts with the basics, including analysis of variance and the t-test and then advances to multiple comparison testing, contingency tables, regression, and more. Illustrative examples and challenging problems, culled from recent biomedical literature, highlight the discussions throughout and help foster a more intuitive approach to biostatistics.

The companion CD-ROM contains everything you need to run 30 statistical tests of your own data. Review questions and summaries in each chapter facilitate the learning process and help gauge your comprehension.

## Clinical Epidemiology: The Essentials, Fifth Edition

By: Robert Fletcher, M.D., M.Sc.; and Suzanne W. Fletcher, M.D., M.Sc.

*Clinical Epidemiology: The Essentials* is a comprehensive, concise, and clinically oriented introduction to the subject of epidemiology. Written by expert educators, this text introduces students to the principles of evidence-based medicine that will help them develop and apply methods of clinical observation in order to form accurate conclusions. The fifth edition includes more complete coverage of systematic reviews and knowledge management as well as other key topics such as abnormality,

diagnosis, frequency and risk, prognosis, treatment, prevention, chance, studying cases, and cause.

### Features include:

- New, revised, full-color art program.
- Keywords lists begin each chapter and tip the reader to the important concepts that must be mastered in that chapter.
- End-of-chapter review questions with answers help students test their understanding of the material.
- Example feature helps clarify important concepts by discussing actual studies taken directly from clinical literature.

## Users' Guides to the Medical Literature: A Manual for Evidence-Based Clinical Practice, Third Edition

By: Gordon Guyatt, M.D.; Drummond Rennie, M.D.; Maureen O. Meade, M.D.; and Deborah J. Cook, M.D.

An instant classic in its first edition, this detailed, yet highly readable reference demystifies the statistical, analytical, and clinical principles of evidence-based medicine, giving you a hands-on, practical resource that no other text can match.

Here, you'll learn how to distinguish solid medical evidence from poor medical evidence, devise the best search strategies for each clinical question, critically appraise the medical literature, and optimally tailor evidence-based medicine for each patient. The new third edition of this landmark resource is now completely revised and refreshed throughout, with expanded coverage of both basic and advanced issues in using evidence-based medicine in clinical practice.

Updates to this edition include updated real-world examples drawn from the medical literature, new chapters that reflect the changing complexity of medical research and literature, and a new emphasis on understanding the role of patient preferences and preappraised resources that provide updated evidence and evidence-based recommendations for practice.

## Users' Guides to the Medical Literature: Essentials of Evidence-Based Clinical Practice, Third Edition

By: Gordon Guyatt, M.D.; Drummond Rennie, M.D.; Maureen O. Meade, M.D.; and Deborah J. Cook, M.D.

The streamlined companion to the classic *Users' Guides to the Medical Literature* is fully updated and revised. This compact guide condenses the most clinically relevant content of the landmark *Users' Guides to the Medical Literature* to help you incorporate evidence-based medicine into your practice. You will learn the principles of evidence-based medicine, how your practice can benefit from the constant stream of new medical literature, and how to differentiate good medical evidence from evidence that is inadequate or misleading. This edition includes numerous updates, several new chapters, and a greater

emphasis on the role of patient preferences and preappraised resources.

## Grant Application Writer's Handbook, Fourth Edition

By: Liane Reif-Lehrer, Ph.D.

*Grant Application Writer's Handbook, Fourth Edition*, addresses the key points in developing grant proposals in a hands-on, step-by-step method, with sample forms and tips for getting approved and funded. Both first-time grant seekers and those who have already tried to get funding can benefit from the wealth of updated information regarding the grant application process, including funding sources and newly instituted electronic submission guidelines. A prolific contributor to scientific literature and a national consultant on the grant application process, author Liane Reif-Lehrer

uses her extensive experience to present the general concepts that will help the reader write a good grant proposal or research paper efficiently.

## Principles of Research Design and Drug Literature Evaluation

Edited by: Rajender R. Aparasu, MPharm, Ph.D., FAPhA; and John P. Bentley, RPh, Ph.D., FAPhA

*Principles of Research Design and Drug Literature Evaluation* is a unique resource that provides a balanced approach covering critical elements of clinical research, biostatistical principles, and scientific literature evaluation techniques for evidence-based medicine. This accessible text provides comprehensive course content that meets and exceeds the curriculum standards set by the Accreditation Council for Pharmacy Education. Written by expert authors specializing in pharmacy practice and research, this valuable text will provide pharmacy students and practitioners with a thorough understanding of the principles and practices of drug literature evaluation with a strong grounding in research and biostatistical principles.

### Pharmacoeconomics & Outcomes: Applications for Patient Care, Second Edition

Edited by: Dennis W. Grauer, M.S., Ph.D.; Jeff Lee, Pharm.D., FCCP; Tanner D. Odom, Pharm.D.; Jane T. Osterhaus, Ph.D., FCCP; Lisa A. Sanchez, Pharm.D.; and Daniel R. Touchette, Pharm.D., M.A.

*Pharmacoeconomics & Outcomes: Applications for Patient Care* introduces the reader to the terminology and basic components of health economics, outcomes research, and pharmacoeconomics. The text identifies a strategy for designing a research question, a process for conducting a pharmacoeconomic evaluation, and sources of data for economic outcomes analysis. The text includes an extensive series of economic and humanistic assessments, their purpose, and application. Economic outcomes measures include cost-of-illness analysis, cost-minimization

analysis, cost-benefit analysis, cost-effectiveness analysis, cost-utility analysis, decision analysis, Markov modeling, and sensitivity analysis. Humanistic outcomes measures include health status, patient satisfaction, work outcomes, and patient-based assessments.

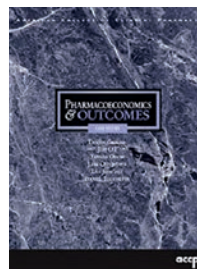

**Member Price:** \$38.95

**Nonmember Price:** \$42.95

ISBN: 1-880401-78-9; 2003; 514 pages; softcover

### Pharmacoeconomics & Outcomes: Case Studies

Edited by: Dennis W. Grauer, M.S., Ph.D.; Jeff Lee, Pharm.D., FCCP; Tanner D. Odom, Pharm.D.; Jane T. Osterhaus, Ph.D., FCCP; Lisa A. Sanchez, Pharm.D.; and Daniel R. Touchette, Pharm.D., M.A.

This companion book provides case studies to reinforce learning. The case studies present real-world scenarios that enable users to apply concepts presented in the main textbook.

#### Cases include:

- Cost-of-illness analysis; calculation of the cost of migraine within a managed care organization.
- Measuring health status.
- Formulary decision-making incorporating humanistic outcomes.
- Evaluating and justifying clinical services.

## Publishing & Presenting Clinical Research, Third Edition

By: Warren S. Browner, M.D.

Publishing & Presenting Clinical Research is an excellent primer for investigators who wish to learn how to organize, present, and publish results of their research. Written by an experienced clinical researcher and editor, it uses hundreds of examples, tables, and figures to show how to produce successful abstracts, posters, oral presentations, and manuscripts for publication. This book also serves as a companion to the popular text *Designing Clinical Research*.

### Features include:

- Guidance on getting work accepted in medical journals and at scientific meetings.
- Examples of the dos and don'ts of data presentation.
- Explanations of confusing statistical terminology.
- Templates to get started and avoid writer's block.
- Tips for creating simple graphics and tables.
- Help for those who are not fluent in English.
- Suggestions about getting the most from a poster session.
- Checklists for each section of a manuscript or presentation.
- Advice about authorship and responding to reviewers' comments.

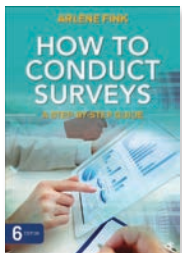

In this edition, there is also access to a companion website with fully searchable text so that you can access the content anytime, anywhere.

## How to Conduct Surveys: A Step-by-Step Guide, Sixth Edition

By: Arlene Fink, Ph.D.

Packed with new topics that reflect today's challenges, the sixth edition of *How to Conduct Surveys* guides readers through the process of developing their own rigorous surveys and evaluating the credibility and transparency of surveys created by others. Offering practical, step-by-step advice and written in the same clear and accessible style as author Arlene Fink's other works, the book focuses on choosing the appropriate type of survey, writing survey questions and responses, formatting the survey, deciding on the characteristics and numbers of respondents

to include, choosing how often to survey respondents, and analyzing and reporting the results.

**Member Price:** \$49.95

## Clinical Faculty Survival Guide

Edited by: Thomas D. Zlatic, Ph.D.

ACCP's *Clinical Faculty Survival Guide* offers new clinical faculty practical information, advice, and encouragement for succeeding in the roles of practitioner, teacher, researcher, and scholar. Editor Thomas D. Zlatic, Ph.D., and a team of seasoned authors and reviewers provide insights to guide you in a successful career as a clinical faculty member.

If you are a new faculty member, you will find this book helpful and easy to read. If you are a resident, fellow, or graduate student preparing

to pursue an academic position, this text will give you a head start on a long and successful career. And if you are a more seasoned faculty member serving as a mentor to younger colleagues, you will find the book's content useful and advantageous for imparting career advice.

## The ACCP Field Guide to Becoming a Standout Pharmacy Residency Candidate, Second Edition

By: Jerry L. Bauman, Pharm.D., FCCP, FACC; and Keri A. Sims, Pharm.D., BCPS

Setting yourself apart as an exceptional candidate early in your academic career becomes increasingly important as a growing number of pharmacy students seek postgraduate pharmacy training. The second edition of *The ACCP Field Guide to Becoming a Standout Pharmacy Residency Candidate* offers a step-by-step approach to maximize your curricular and extracurricular experiences to best prepare yourself to be that standout candidate.

Written by experienced and dedicated pharmacy residency proponents, *The ACCP Field Guide to Becoming a Standout Pharmacy Residency Candidate, Second Edition*, will give you detailed, practical information to use throughout your first, second, third, and all-important fourth years of pharmacy education—information you can use to chart your course to a successful postgraduate experience. Updated chapters such as Step I: Define and Redefine Your Goals, Step II: Making the Grade, and Step IX: Document It All, join with the newest addition to the Field Guide, Step X: Plan for Financial Freedom. This new chapter, written by Timothy Ulbrich, Pharm.D., will help you achieve your financial and professional goals by advising on student loans repayment, debt management, insurance, savings, and more.

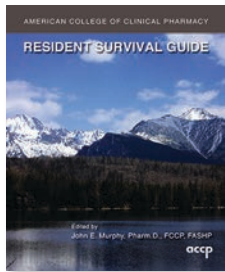

*The ACCP Field Guide to Becoming a Standout Pharmacy Residency Candidate, Second Edition*, is your best guide to detailed and practical information on setting yourself apart as an exceptional pharmacy residency candidate.

## Resident Survival Guide

Edited by: John E. Murphy, Pharm.D., FCCP, FASHP

ACCP's *Resident Survival Guide* offers clinical pharmacy residents a valuable road map for negotiating their residency experience.

Students who make the momentous decision to seek a residency will find that this important choice opens up many opportunities and presents many challenges. Throughout their residency programs, ambitious students transition into superbly skilled and licensed professionals. They can take advantage of the opportunities to acquire knowledge while also

confronting heavy workloads, patient care responsibilities, challenging assignments, and demands on their time from preceptors, team members, and students.

The *Resident Survival Guide* has been developed to assist residents in meeting these challenges and taking advantage of these opportunities. The cadre of experienced authors—leaders in the clinical pharmacy profession—offers potential and current clinical pharmacy residents insights and advice for understanding and learning to manage the challenges they face while gaining the most lifelong advantages from their residency experience.

### Features include:

- Finding a quality training program.
- Changing your perspective: transitioning from student to practitioner.
- What to expect: navigating new professional territory.
- Clinical practice: taking responsibility for patient care.
- Teaching and precepting: assuming the role of an educator.
- Research: becoming a scholar.
- Balancing professional and personal priorities.
- After residency: determining career direction.
- Professional networking and career advancement.
- Lifelong learning as a professional obligation.

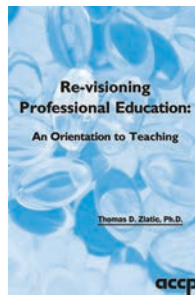

Each chapter includes a reflective essay written by a pharmacy resident that gives a personal account of what to expect from the residency experience.

## Re-visioning Professional Education: An Orientation to Teaching

By: Thomas D. Zlatic, Ph.D.

ACCP's *Re-visioning Professional Education: An Orientation to Teaching* presents educational principles that describe how learning takes place and offers a vision for the type of education required to prepare practitioners for providing pharmaceutical care. This book is designed for both new and experienced clinical faculty and preceptors.

Author Thomas D. Zlatic, Ph.D., professor of English and director of the Writing Center at St. Louis College of Pharmacy, invites readers to take instructional approaches beyond conveyance of information and to embrace a philosophy, style,

and manner of teaching that leads students to master the general and professional abilities necessary for competent pharmacy practice.

Zlatic discusses the nature of teaching, addressing the premise that teaching, as a profession, is based on fiducial or covenantal relationships. He makes a strong case for clinical educators promoting an active learning experience that prepares practitioners to provide pharmaceutical care in all of its dimensions, including knowledge, skills, attitudes, and values. He presents rationales for incorporating higher-order thinking into the pharmacy curriculum and offers strategies for active learning to motivate students to attain educational goals related to the mission of pharmacy practice.

## Developing Outcomes-Based Assessment for Learner-Centered Education

By: Amy Driscoll and Swarup Wood

Offering a description of the basics of outcomes-based assessment, this book strives to empower faculty to develop and maintain ownership of assessment by articulating the learning outcomes and evidence of learning that are appropriate for their courses and programs. Readers are offered a guide to the not-always-tidy process of articulating expectations, defining criteria and standards, and aligning course content consistently with desired outcomes. With a wealth of examples and stories, including accounts of successes and false-starts, the authors use a personal voice to provide a realistic and honest guide to what

is involved in the institutionalization of assessment. This is a must-read for faculty, staff, and campus leaders.

ISBN: 978-1-57922-195-9; 2007; 287 pages; softcover

## Expectations: Teaching Writing from the Reader's Perspective

By: George Gopen

This instructor resource approaches the teaching of writing by focusing on readers' expectations, explaining the perceptive patterns that readers follow in their interpretive process. Examining reader expectations, this text argues that the structural location of a word is often more important than word choice in a reader's interpretation of a piece of writing. Expectations shows how readers gather contextual clues according to not what specific words mean, but according to where those words appear in the structure of a sentence or paragraph. The book then discusses how

to bring these intuitive processes to conscious thought, allowing students to understand and control how readers perceive their writing.

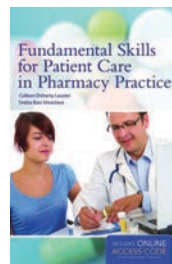

**Member Price:** \$108.95

**Nonmember Price:** \$112.95

ISBN: 978-0-205-29617-0; 2004; 416 pages; softcover

## Fundamental Skills for Patient Care in Pharmacy Practice

By: Colleen Doherty Lauster and Sneha Baxi Srivastava

*Fundamental Skills for Patient Care in Pharmacy Practice* enables students and new pharmacists to master the skills associated with clinical care in either the inpatient or the outpatient setting. In accessible steps, this valuable resource provides the tools for gaining medication histories from patients and counseling them on the most effective and safest manner to take medications. Each chapter explores the practice of a critical skill, tools that aid in its development and mastery, and tips for success. Readers will learn to identify drug-related problems and formulate plans for

solutions to these problems.

ISBN: 978-1-4496-5272-2; 2014; 346 pages; softcover

## Introduction to Rubrics, Second Edition

By: Dannelle D. Stevens, Ph.D.; and Antonia J. Levi, Ph.D.

This second edition of *Introduction to Rubrics* has been expanded to cover the use of rubrics for grading, in online courses, for self-assessment of teaching, program assessment, service learning, study abroad, and student affairs, among other applications.

This edition retains the appeal, clarity, and practicality that made the first edition so successful and continues to provide a fundamental introduction to the principles and purposes of rubrics, with guidance on how to construct them, use them to align course content with learning outcomes, and apply them in a wide variety of courses and to all forms of assignments.

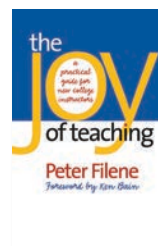

**Member Price:** \$23.95

## The Joy of Teaching: A Practical Guide for New College Instructors

By: Peter G. Filene, Ph.D.

Gathering concepts and techniques borrowed from outstanding college professors, *The Joy of Teaching* provides helpful guidance for new instructors in developing and teaching their first college courses.

Rather than prescribe any single model for success, Filene examines the advantages and disadvantages of various pedagogical strategies, inviting new teachers to make choices on the basis of their own personalities, values, and goals.

Filene tackles everything from syllabus writing and lecture planning to class discussions, grading, and teacher-student interactions outside the classroom. The book's down-to-earth, accessible style makes it appropriate for new teachers in all fields.

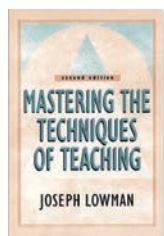

**Member Price:** \$21.95

**Nonmember Price:** \$23.95

ISBN: 978-0-8078-5603-1; 2005; 176 pages; softcover

## Mastering the Techniques of Teaching, Second Edition

By: Joseph Lowman, Ph.D.

This classic resource examines a new model of effective teaching to place greater emphasis on motivational skill and commitment to teaching. The author presents a practical new learning model that compares six sources of influence on what and how students learn in a college course.

All types of teachers and instructors will discover options on how to organize classes and use group work to promote learning. They will also find a checklist for assessing their classroom performance on video, detailed instructions for using video analysis to improve their technique, and an innovative approach to evaluating their overall performance.

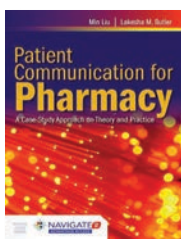

**Member Price:** \$39.95

## Patient Communication for Pharmacy: A Case-Study Approach on Theory and Practice

By: Min Liu and Lakesha M. Butler

*Patient Communication for Pharmacy: A Case-Study Approach on Theory and Practice* offers communication strategies to promote patient-centered care. Using a case-study approach, this practical guide develops readers' understanding of the unique communication dynamics between pharmacists and patients and assists them in strengthening the communication skills necessary for providing optimal patient outcomes. Focusing on skills acquisition and an integration of

communication and behavioral change theories, this valuable resource also addresses issues relevant to pharmacist-patient communication and relationship building, including health literacy, culturally competent care, patient adherence, and conflict/emotionally charged conversations.

ISBN: 978-1-284-03888-0; 2016; 214 pages; softcover

## Promotion and Tenure Confidential

By: David D. Perlmutter, Ph.D.

"Sitting down with a young and brilliant mathematician, I asked what he thought were his biggest problems in working toward tenure. Instead of describing difficulties with his equations or his software programs, he lamented that (a) his graduate assistant wasn't completing his tasks on time; (b) his department chair didn't seem to care if junior faculty obtained grants; and (c) a senior professor kept glaring at him in faculty meetings. He knew he could handle the intellectual side of being an academic—but what about the people side? 'Why didn't they offer "Being a Professor 101" in graduate school?' he wondered."

*Promotion and Tenure Confidential* provides that course in an astute and practical book, which shows that P&T is not just about research, teaching, and service but also about human relations and political good sense. Drawing on research and extensive interviews with junior and senior faculty across many institutions, the author provides clear-sighted guidance on planning and managing an academic career, from graduate school to tenure and beyond.

## Pharmacy Education: What Matters in Learning and Teaching

By: Lynne M. Sylvia, Pharm.D.; and Judith T. Barr, ScD, MEd

*Pharmacy Education: What Matters in Learning and Teaching* is an essential resource for any pharmacy faculty member. More than a narration of the philosophical aspects of teaching and personal perspectives on life as a faculty member, this book explores what matters, why it matters, and how to apply the matter to teaching, learning, and assessment in pharmacy education. It covers a variety of teaching settings (e.g., large classroom, small group teaching, clinical site) and guides the reader in developing a deeper understanding of what it means to be a teacher. Scenarios

are included in each chapter, offering readers the opportunity to readily apply educational theory to their role as educators and to adapt the book's content to their specific educational setting.

## Publish with ACCP

The American College of Clinical Pharmacy is always seeking new, cutting-edge publications and products. If you have an idea for a book, teaching material, monograph, or other informational product that you believe should reach a market consisting of clinical pharmacists, faculty, students, and other health care practitioners, ACCP would like to talk with you about publishing and marketing your ideas through the College.

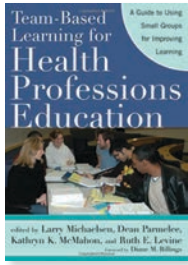

Here is your opportunity to develop a resource to advance knowledge for the pharmacy profession and at the same time enhance your own professional development. Publishing with ACCP can further your professional reputation while providing you with an opportunity to make a significant contribution to clinical pharmacy.

If you would like to discuss your ideas, please visit [www.accp.com](http://www.accp.com) to complete an ACCP Publishing Proposal.

## Team-Based Learning for Health Professions Education: A Guide to Using Small Groups for Improving Learning

Edited by: Larry K. Michaelsen, Ph.D.; Dean X. Parmelee, M.D.; Kathryn K. McMahon, Ph.D.; and Ruth E. Levine, M.D.

Education in the health professions is placing greater emphasis on “active” learning—learning that requires applying knowledge to authentic problems and that teaches students to engage in the type of collaboration that is expected in today’s clinical practice.

Team-based learning (TBL) is a strategy for accomplishing these goals. TBL can be used to transform passive, lecture-based coursework into an environment that promotes more self-directed learning and teamwork.

This book is an introduction to TBL for health professional educators. It outlines the theory, structure, and process of TBL, explains how TBL promotes problem solving and critical thinking skills, aligns with the goals of science and health courses, improves knowledge retention and application, and develops students as professional practitioners.

## Tools for Teaching, Second Edition

By: Barbara Gross Davis, Ph.D.

*Tools for Teaching* is a practical, accessible reference manual for faculty in any discipline. The book presents a rich compendium of classroom-tested strategies and suggestions designed to improve teaching practice. This new edition contains up-to-date information on technology and expands on the ideas and strategies presented in the first edition. Included are 61 chapters designed to improve the teaching of beginning, mid-career, and senior faculty members. The topics cover both traditional tasks of teaching—writing a course syllabus, delivering a lecture—and broader concerns, such as diversity and inclusion in the classroom and technology in educational settings.

**Member Price: \$49.95**

**Nonmember Price: \$53.95**

## ACCP Ambulatory Care Pharmacist’s Survival Guide, Fourth Edition

Lead Editor: Gregory Castelli, Pharm.D., BCPS, BC-ADM

The *ACCP Ambulatory Care Survival Guide, Fourth Edition* is a comprehensive resource that offers practical assistance to both new and seasoned clinicians. As in previous editions, all content in this Survival Guide has been contributed by members of the ACCP Ambulatory Care Practice and Research Network, ensuring its applicability and relevance.

More than 65 guidance documents cover the areas of:

- Ambulatory Care Basics – Scholarship for Clinicians, Reimbursement
- Clinical Practice – Managing Clinics for Opioid Use, DOAC Programs, Public Health, and More
- Education – Clinical Faculty Preceptor Cooperative, Layered Learning, and More
- Practice Management – Collaborative MTM, Practice Agreements, Protocols

These detailed examples of successful clinical practices are invaluable for building or expanding your patient care services. Every clinician in the ambulatory care setting would benefit from this excellent resource.

### AN ACCP PUBLICATION

## Clinical Pharmacy Services: Successful Practices in Community Hospitals

Editors: Karen E. Koch, Pharm.D., FASHP, BCPS; and Bob L. Lobo, Pharm.D., FCCP, BCPS

Working from the premise that clinical pharmacy services are an essential component of medical care in today’s community hospitals, this how-to guide takes the reader through each step in developing these services

The authors explain how to identify practice opportunities with potential for the greatest impact, how to identify potential challenges and barriers in the institution, and how to implement the service.

The authors also present an overview of collaborative drug therapy management.

Through a series of 22 structured monographs, the authors highlight a variety of clinical pharmacy services delivered in both large and small community hospitals. The monographs selected provide examples of mainstream services (anticoagulation and nutrition), comprehensive services, pediatric services, and innovative services (case management and research).

## How to Develop a Business Plan for Pharmacy Services, Third Edition

Editors: Glen T. Schumock, Pharm.D., MBA, Ph.D., FCCP; and JoAnn Stubbings, BPharm, MHCA

The third edition of *How to Develop a Business Plan for Pharmacy Services* is now available. This book is designed to assist pharmacy clinicians, including residents, managers, and leaders in exploring, researching, proposing, and implementing new services as well as enhancing existing services by providing a systematic approach to the business planning process. The materials presented are applicable to pharmacy services in hospitals, community practice, managed care organizations, ambulatory clinics, and elsewhere.

### Features of this new edition include:

- Expanded instruction for the pre-planning phase to help readers learn to explore a new business concept
- New sample business plans:
  - Antimicrobial Stewardship Program in a Community Hospital
  - Specialty Pharmacy Services for Oral Anticancer Agents
  - Value-Based Pharmacy Services in a Clinic Setting
  - Pharmacist-Run Medication Therapy Management Clinic
- Access to online resources including:
  - An electronic version of the workbook questions
  - An electronic version of the business plan template to be used for writing a business plan
  - A Microsoft Excel program that allows the user to develop financial statements for proposed businesses
  - Model business plans

Business planning is an important skill for pharmacists, pharmacy residents, and pharmacy students. Many colleges/schools of pharmacy have required or elective courses on this subject and this book is an indispensable teaching tool in the classroom environment.

## Communication Skills for Pharmacists: Building Relationships, Improving Patient Care, Third Edition

By: Bruce A. Berger, Ph.D., RPh

Effective relationships between pharmacists and patients and between pharmacists and physicians pave the way for positive treatment outcomes. *Communication Skills for Pharmacists* offers guidance to help pharmacists develop the communication skills they need to provide high-quality care.

### Features include:

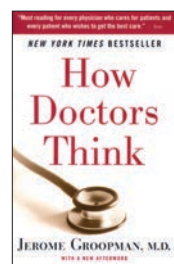

- Key chapters covering important communication skills for pharmacists: listening and empathic responding, supportive communication, persuasive communication, assertiveness, managing conflict, dealing with angry patients, and helping patients accept the behavior changes needed to manage their illness.
- Detailed patient counseling checklist.
- Dozens of examples of good and bad pharmacist-patient and pharmacist-physician dialogues.
- Questions for reflection at the end of each chapter.

## How Doctors Think

By: Jerome Groopman, M.D.

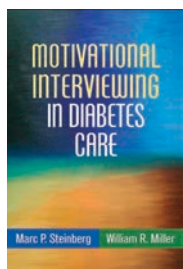

On average, a physician will interrupt a patient describing his or her symptoms within 18 seconds. In that short time, many physicians decide on the likely diagnosis and best treatment. Often, decisions made this way are correct, but at crucial moments, they can also be wrong—with catastrophic consequences. In this myth-shattering book, Dr. Jerome Groopman pinpoints the forces and thought processes behind the decisions physicians make. Groopman explores why physicians err and shows when and how they can—with our help—avoid snap judgments, embrace uncertainty, communicate effectively, and deploy other skills that can profoundly affect our health. This is the first book to describe in detail the warning signs of erroneous medical thinking and reveal how new technologies may actually hinder accurate diagnoses. *How Doctors Think* offers direct, intelligent questions patients can ask their physicians to help them get back on track.

## Motivational Interviewing in Diabetes Care

By: Mark P. Steinberg, M.D.; and William R. Miller, Ph.D.

People with diabetes often struggle to make healthy choices and stay on top of managing their illness. Filling a vital need, this is the first book to focus on the use of motivational interviewing (MI) in diabetes care. The uniquely qualified authors—physician Marc P. Steinberg has devoted much of his career to diabetes care, and renowned clinical psychologist William R. Miller is the co-developer of MI—present proven counseling techniques that can make any conversation with a patient more efficacious and motivating. Numerous sample dialogues illustrate specific ways to elicit patients' strengths and help them overcome barriers to change in areas such as eating habits, physical activity, medication use, insulin treatment, substance abuse, and psychological issues.

## Motivational Interviewing in Health Care

By: Stephen Rollnick, Ph.D.; William R. Miller, Ph.D.; and Christopher C. Butler, M.D.

Much of health care today involves helping patients manage conditions whose outcomes can be greatly influenced by lifestyle or behavior change. Written specifically for health care professionals, this concise book presents powerful tools to enhance communication with patients and guide them in making choices to improve their health—from weight loss, exercise, and smoking cessation to medication adherence and safer sex practices. Engaging dialogues and vignettes bring to life the core skills of motivational interviewing and show how to incorporate this brief

evidence-based approach into any health care setting. Appendices include training resources and publications on specific medical conditions.

### Clinical Pharmacy in the United States: Transformation of a Profession

By: Robert M. Elenbaas, Pharm.D., FCCP; Dennis B. Worthen, Ph.D., and C. Edwin Webb, Pharm.D., MPH, FCCP

*Clinical Pharmacy in the United States: Transformation of a Profession* is a comprehensive account of the evolution of clinical pharmacy and is an insightful must-read for anyone who cares about the profession of pharmacy.

Beginning with an overview of the profession's evolution and proceeding through the decade-specific chapters

that follow, the authors trace the clinical pharmacy movement from its beginnings to the present day. The book's unique organization provides important context beyond the profession of pharmacy by providing a concise overview of U.S. culture, politics, economics, technology, health, and other events, melded with the major clinical pharmacy-related events. A timeline that chronicles the key events flows across the bottom of the pages. Distributed throughout the book are reflective essays—personal accounts that provide an on-the-ground perspective.

The second edition of this indispensable work includes events from the last decade and updated reflections on the future of the profession. Pharmacy students, residents, and fellows should all read this book . . . as should those who have lived through this rich history.

### Nourishing the Soul of Pharmacy: Stories of Reflection

Edited by: Thomas D. Zlatic, Ph.D.; and William A. Zellmer, B.S. (Pharmacy), MPH

In this collection of essays, clinical pharmacists reflect on their role in patient care, illustrating the soul of pharmacy in its many forms. The result is a reflective inquiry that reminds practitioners of their power to transform the delivery of health services in the continuum of care.

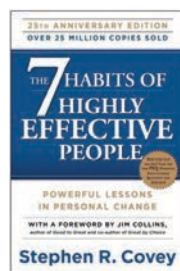

This book is intended for a variety of audiences, including practitioners, educators, and students, as well as those who seek a better understanding of pharmacists and the roles they perform, such as patients, caregivers, and health care professionals in other fields. For educators wishing to adopt the volume as a supplementary textbook, an appendix for using reflection as a learning strategy is included.

### The 7 Habits of Highly Effective People: Powerful Lessons in Personal Change

By: Stephen R. Covey

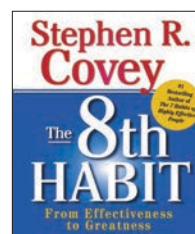

When first published in 1989, *The 7 Habits of Highly Effective People* was an almost instant bestseller—and quickly became a permanent part of the cultural lexicon. With over 25 million copies sold worldwide in over 40 languages since its first publication, this book continues to help millions of readers become more effective in both their personal and professional lives. This is one of the rare books that has helped presidents, CEOs, educators, and individuals all over the world not only improve their businesses and careers but also live with integrity, service, dignity, and success in all areas of life. It has had an undeniable impact for the past 25 years—and will no doubt continue to be influential for many more.

### The 8th Habit: From Effectiveness to Greatness

By: Stephen R. Covey

To thrive, innovate, excel, and lead in what Covey calls the “New Knowledge Worker Age,” leaders and individuals must build on and move beyond effectiveness. The call of this new era is for greatness; it's for fulfillment, passionate execution, and significant contribution.

Accessing the higher levels of human genius and motivation in today's new reality requires a change

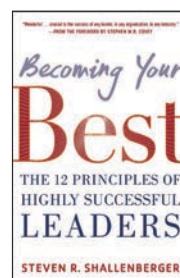

in thinking, a new mind-set, a new skill-set, and a new tool-set—in short, a whole new habit.

## The Five Dysfunctions of a Team

By: Patrick Lencioni

The *Five Dysfunctions of a Team* offers an instructive leadership fable exploring the fascinating, complex world of teams. The story serves as a timeless reminder that leadership requires as much courage as it does insight.

Throughout the story, the author focuses on the five dysfunctions that go to the very heart of why teams, even the best ones, often struggle. The author outlines a powerful model and actionable steps that can be used to overcome these common hurdles and build a cohesive, effective team. This is a compelling

fable with a powerful yet deceptively simple message for all who strive to be exceptional team leaders.

## Good to Great: Why Some Companies Make the Leap ... and Others Don't

By: Jim Collins

Based on the results of a 5-year study, *Good to Great* details the universal distinguishing characteristics that lead a company from good to great. Using tough benchmarks, the author and his research team identify 28 elite companies that made the leap to great results and sustained those results for at least 15 years. After analyzing extensive interviews and data, Collins and his research colleagues discovered the key determinants of greatness.

Among the major determinants discussed are the type of leadership required to achieve greatness, the need for a culture that combines discipline with entrepreneurship, the advantages of making the most of what the company does well, and the pitfalls of radical change programs and restructurings. The author's conclusions in *Good to Great* have surprised many readers and revealed new insights in almost every area of management strategy and practice.

## How the Mighty Fall: And Why Some Companies Never Give In

By: Jim Collins

Amid the desolate landscape of fallen great companies, Jim Collins began to wonder: How do the mighty fall? Can decline be detected early and avoided? How far can a company fall before the path toward doom becomes inevitable and unshakable? How can companies reverse course? In *How the Mighty Fall*, Collins confronts these questions, offering leaders the well-founded hope that they can learn how to stave off decline and, if they find themselves falling, reverse their course. Collins' research project—more than 4 years in duration—uncovered five stepwise stages of decline: Stage 1: Hubris Born of Success, Stage 2: Undisciplined Pursuit of More, Stage 3: Denial of Risk and Peril, Stage 4: Grasping for Salvation, and Stage 5: Capitulation to Irrelevance or Death. By understanding these stages of decline, leaders can substantially reduce their chances of falling all the way to the bottom.

## Leadership and Self-Deception: Getting Out of the Box, Third Edition

By: The Arbinger Institute

Since its release in 2000, the popularity of *Leadership and Self-Deception* has gone global—now in its third edition and available in over thirty languages with increased sales year after year.

Through a story everyone can relate to about a man facing challenges on the job and in his family, the authors expose the fascinating ways that we blind ourselves to our true motivations and unwittingly sabotage the effectiveness of our own efforts to achieve success and increase happiness. This third edition includes

new research about the self-deception gap in organizations and the keys to closing this gap. The authors offer guidance for how to assess in-the-box and out-of-the-box mindsets in oneself and one's organization.

Discover what millions have already learned—how to tap into an innate ability that dramatically improves both your relationships and your results.

## The Leadership Challenge: How to Make Extraordinary Things Happen in Organizations, Fifth Edition

By: James M. Kouzes, Ph.D.; and Barry Z. Posner, Ph.D.

For more than 25 years, *The Leadership Challenge* has been a trusted source on becoming a better leader, selling more than 2 million copies in over 20 languages since its first publication. Based on the authors' extensive research, this new edition casts their enduring work in context for today's world, proving how leadership is a relationship that must be nurtured and most importantly, that can be learned.

This book features over 100 all-new case studies and examples, which show The Five Practices of

Exemplary Leadership in action around the world, focuses on the toughest organizational challenges leaders face today, and addresses changes in how people work and what people want from their work.

An indispensable resource for leaders at all levels, this anniversary edition is a landmark update and must-read.

## Leadership from the Inside Out: Becoming a Leader for Life, Third Edition

By: Kevin Cashman

This long-awaited third edition turns leadership development inside out for a new generation of authentic, purpose-inspired leaders. Balancing timeless principles with emerging research, this new edition offers:

- New validating research from the frontiers of leadership, neuroscience, psychology, and human potential.
- An even more powerful and transformative development experience.

Now framed in eight profound and pragmatic “mastery areas,” this book serves as an integrated growth experience that helps leaders understand how to harness their authentic, value-creating influence and elevate their impact. Cashman demonstrates that his trademark “grow the whole person to grow the whole leader” approach, focusing on purpose-driven leadership, is even more relevant in today’s hypercomplex world. For everyone from CEOs to emerging leaders, this new edition of a proven classic advances the art and science of leadership.

## On Being a Pharmacist: True Stories by Pharmacists

Edited by: Joanna Maudlin Pangilinan, Pharm.D., BCOP; and J. Aubrey Waddell, Pharm.D.

This collection of more than 100 stories reveals the many facets of pharmacy practice—the joys and sadnesses, the achievements and setbacks. In diverse yet engaging voices, the authors explore their profession with honesty, insight, and humor. Their deeply personal accounts encompass day-to-day life, professional training, military service, ethics, working with patients, humorous experiences, challenging situations, death and dying, and lessons learned. A mosaic of pharmacists at work, *On Being a Pharmacist* captures pharmacists’ passion for their profession and dedication to the people they serve.

## The Outward Mindset: Seeing Beyond Ourselves How to Change Lives and Transform Organizations

By: The Arbinger Institute

To change what we do, we first need to change how we see and relate to the world. Changing from an inward mindset to an outward mindset makes all the difference. Without even being aware of it, many of us operate from an inward mindset, a single-minded focus on our own goals and objectives. This book points out the many ways, some quite subtle and deceptive, that this mindset invites tension and conflict. But incredible things happen when people switch to an outward mindset. They intuitively understand what coworkers, colleagues, family, and friends need to be successful and happy. Their organizations

thrive, and astonishingly, by focusing on others they become happier and more successful themselves. This new mindset brings about deep and far-reaching changes. *The Outward Mindset* presents compelling true stories to illustrate the gaps that individuals and organizations typically experience between their actual inward mindsets and their needed outward mindsets. And it provides simple yet profound guidance and tools to help bridge this mindset gap. In the long run, changing negative behavior without changing one’s mindset doesn’t last—the old behaviors always reassert themselves. But changing the mindset that causes the behavior changes everything.

## Understanding Teamwork in Health Care

By: Gordon Mosser, M.D.; and James W. Begun, Ph.D.

Medicine is an ever-changing science. As new research and clinical experience broaden our knowledge, changes in treatment and drug therapy are required. This book provides pharmacists and other health care professionals with the foundational knowledge necessary to be members of effective clinical teams.

### Features include:

- Almost 100 stories of teamwork—mostly exemplary, sometimes cautionary.
- A description of the competencies required to build an effective health care team.
- How different education, roles, and values of health professions contribute to common alliances and conflicts.
