Roles of ACCP and BPSxiii

Cardiology I

HYPERTENSION: EVIDENCE-BASED UPDATES AND CLINICAL CONTROVERSIES	
Learning Objectives	1
Introduction	1
Overview	1
Definitions	1
Diagnosis	1
Quality Patient Care—National Treatment Guidelines	2
JNC 7 Goals and Treatment Recommendations	2
Therapeutic Goals	2
Pharmacotherapy Recommendations	2
Most Patients Without Compelling Indications	2
Patients With Compelling Indications	3
Role of Lifestyle Modifications	3
Treatment Plans	3
Monotherapy and Combination Therapy	
Approaches	3
Evidence-Based Update and Controversies	4
Evolution of Long-Term Outcome Trials	4
Historical End Points Versus Combined Cardiovascular Events	4

Use of Combination Regimens	5
Meta-Analysis of Blood Pressure-Lowering Trials	6
First-Line Pharmacotherapy	6
Thiazide-Type Diuretics Versus Other Drugs	7
Antihypertensive and Lipid-Lowering Treatment to Prevent Heart Attack Trial	7
ALLHAT Subgroup Analyses in Special Populations	7
ALLHAT Subgroup: Blacks Versus Non-Blacks	7
ALLHAT Subgroup: Diabetes, Impaired Fasting Glucose, and Normoglycemia	7
ALLHAT Subgroup: Reduced Glomerular Filtration Rate	8
Anglo-Scandinavian Cardiac Outcomes Trial	8
Women's Health Initiative Observational Study	8
Calcium Channel Blocker Versus Angiotensin Receptor Blocker	8
Treatment of Hypertension With Comorbid Compelling Indications	9
Coronary Disease: Chronic Stable Angina	9
β -Blocker Versus Non-Dihydropyridine CCB	9
β -Blocker Versus Dihydropyridine CCB	9
ACE Inhibitor Therapy	9
Recurrent Stroke Prevention	10
Chronic Kidney Disease	10
Other Clinical Controversies	10
Hydrochlorothiazide Versus Chlorthalidone	10
β -Blocker Therapy	11
Atenolol Versus Other β -Blockers	11
Carvedilol Versus Metoprolol in Type 2 Diabetes	11
The Elderly Population	11
Conclusion	12
Annotated Bibliography	12
Self-Assessment Questions	17
DYSLIPIDEMIAS: THERAPEUTIC ADVANCES	
Learning Objectives	21
Introduction	21

Adult Treatment Panel III Update 2004	21
Therapy Goals	21
Treatment Approach	22
Pathophysiology	22
Acute Coronary Syndromes	22
Statins and ACS	22
Novel and Emerging Risk Factors	23
C-Reactive Protein	23
Apolipoprotein B	24
Quality Patient Care	24
Pharmacotherapy	24
Therapeutic Lifestyle Change	24
Nonprescription Products	24
Treatment Plan	25
Approach to Dyslipidemia by Particle Type	25
Low-Density Lipoprotein	25
Rosuvastatin	25
Intestinal-Acting Drugs	26
Triglycerides	26
Fibrates	26
Fish Oil	26
High-Density Lipoprotein	26
Statins and Fibrates	27
Niacin	27
Novel HDL Therapies	28
Mixed Dyslipidemia	28
Metabolic Syndrome Dyslipidemia Treatment	28
Human Immunodeficiency Virus Lipodystrophy	28
Special Populations	29
Diabetes	29
Peroxisome Proliferator-Activated Receptor	
Agonists	29
Statins in Diabetes	29
Elderly	29
How Old is Too Old?	29
Stroke Prevention	29
Pediatrics	30
Childhood Obesity and CHD	30
Treatment of Children with Dyslipidemia	30
Quality Patient Care	30
Cardiovascular Performance Measures	30
Pharmacist-Managed Programs	30
Compliance Interventions	30
Pharmacist-Managed Lipid Clinics	30
Conclusion	30
Annotated Bibliography	31
Self-Assessment Questions	35
 DRUG-INDUCED CARDIAC DISEASES	
Learning Objectives	39
Introduction	39
Drugs That Induce Cardiac Arrhythmias	39
The Electrocardiogram and Arrhythmias	39
PR Intervals and Their Prolongation	39
Negative Dromotropic Drugs and Heart Block	40
Management of Drug-Induced Heart Block	40
Corrected QT Intervals and Their Prolongation	41
Drugs That Prolong the QTc Interval and the Transmural Dispersion of Repolarization	42
Drug Interactions and the QTc Interval	44
Therapy for Drug-Induced Torsade de Pointes	45
Drug-Induced Ischemic Heart Disease	45
Cyclooxygenase-2 Inhibition and Coronary Disease Risk	45
Mechanism of Cardiovascular Risk With COX-2 Inhibition	46
Platelet Aggregation Effects	46
Collateral Circulation Effects	46
Ischemic Preconditioning	47
Heart-Friendly Pain Management/Pharmacist's Role	47
Cocaine-Induced Myocardial Infarction	48
Mechanism of Cocaine-Induced Myocardial Infarction	48
Myocardial Oxygen Demand	48
Coronary Artery Vasoconstriction	48
Effect on Thrombus Formation	48
Therapy for Cocaine-Induced Myocardial Infarction	48
Role of the Pharmacist in Cocaine-Induced Myocardial Infarction	48
Conclusion	49
Annotated Bibliography	49
Self-Assessment Questions	53

Cardiology II	
ACUTE CORONARY SYNDROMES: EVOLVING PRACTICES	
Learning Objectives	59
Introduction	59
Pathophysiology	59
Plaque Rupture, Thrombosis, and Risk Stratification	59
Mortality	60
Novel Markers of Risk	60
High-Sensitivity C-Reactive Protein	61
Lipoprotein Phospholipase A ₂	61
Cystatin C	62
Goals of Therapy	63
Quality Patient Care	63
Treatment Plan	63
ST-Segment Elevation ACS Algorithm	63
Non-ST-Segment Elevation ACS Algorithm	63
Beyond Primary Percutaneous Coronary Intervention: Role of Hospital Transfer	69
Pharmacotherapy	70
LMWHs Versus UFH in Combination with Aspirin and Fibrinolytic Drugs for ST-Segment Elevation ACS	70
New Role for Clopidogrel in ST-Segment Elevation ACS	71

Early β-Blockade in ST-Segment Elevation ACS:	
Intravenous Versus Oral Therapy	72
Newer Anticoagulant Drugs for Acute Coronary Syndromes	
Enoxaparin	72
Fondaparinux	72
Bivalirudin	73
Quality Improvement	74
Update in Quality Performance Measures	74
The Role of Registries	75
Practice Guideline Implementation	75
The Role of the Pharmacist	75
Conclusion	76
Annotated Bibliography	76
Self-Assessment Questions	81
 ACUTE HEART FAILURE AND CARDIOGENIC SHOCK	
Learning Objectives	85
Introduction	85
Pathophysiology	85
Definitions	85
Underlying Pathophysiology	85
Etiology	86
Clinical Characteristics	87
Diagnosis	88
Prognosis	88
Therapeutic Goals	89
Quality Patient Care	89
Pharmacotherapy	89
Diuretic Therapy	89
Vasodilators	90
Inotropes	90
Calcium Sensitizers	91
Nonpharmacological Therapy	92
Devices	92
Ultrafiltration	92
Treatment Plan	92
Cardiogenic Shock Following AMI	92
Monitoring	93
Patient Education	93
Quality Improvement	93
Conclusion	94
Annotated Bibliography	94
Self-Assessment Questions	97
 CARDIAC TRANSPLANTATION	
Learning Objectives	101
Introduction: Brief Historical Perspective	101
Recipient Evaluation and Selection	101
Preoperative Management	102
Mechanical Circulatory Support Strategies	102
Pharmacological Support Strategies	102
Postoperative Management	103
Management During Hospitalization	103
Calcineurin Inhibitor-Based Regimens	103
Antibody Induction	104
Antilymphocyte Antibodies	104
Interleukin-2 Receptor Blockade	104
Candidates for Therapy	105
Management After Hospital Discharge	105
Maintenance Immunosuppression Strategies	105
Rejection	106
Types of Rejection	106
Treatment Strategies	107
Coronary Allograft Vasculopathy	108
Diagnosis	108
Clinical Presentation	108
Angiography	109
Intravascular Ultrasound	109
Prevention	109
Risk Factor Modification	109
Anticytomegalovirus Therapy	109
Folic Acid	109
Vitamins C and E	109
Immunosuppressant Regimens	109
Mycophenolate Mofetil	110
Target of Rapamycin Inhibitors	110
Treatment	110
Long-Term Complications	110
Hypertension	110
β-Blockers and Thiazide Diuretics	111
Calcium Channel Blockers	111
Dyslipidemia	111
Statins	111
Fibrin Acid Derivatives	112
Omega-3 Fatty Acids (Fish Oil)	112
Other Drugs	112
Outcome and Survival	112
Mortality	112
Quality of Life	113
Costs	113
Role of the Pharmacist	113
Future Directions	113
Conclusion	114
Annotated Bibliography	114
Self-Assessment Questions	117
 ISCHEMIC STROKE	
Learning Objectives	121
Introduction	121
Epidemiology	121
Incidence and Economic Impact	121
Risk Factors	122
Classification and Causes	123
Pathophysiology	124
Mechanisms of Injury	124
Primary Injury	124
Secondary Injury	124
Drug-Induced Stroke	124
Diagnosis and Clinical Characteristics	125
Prognosis and Complications	125
Pharmacotherapy	126

Acute Management	126
Reperfusion Therapy	127
Rationale for Use	127
Efficacy and Therapeutic Role	127
Intravenous Thrombolysis	127
Intra-Arterial Thrombolysis	127
Complications and Cost-Effectiveness	127
Antithrombotic Therapy	128
Rationale to Use	128
Anticoagulation Drugs	128
Antiplatelet Drugs	128
Antihypertensive Therapy	128
Rationale to Use	128
Antihypertensive Drugs	128
Stroke Prevention	129
Anticoagulation Therapy	129
Antiplatelet Therapy	130
Combination Antiplatelet Therapy	130
Antihypertensive Therapy	130
Statins Therapy	130
Future Therapy	130
Vascular Protection	130
Statins	131
ACE Inhibitors and ARBs	131
Other Vascular Protectants	131
Neuroprotective Therapy	131
Magnesium Therapy	131
Hypothermia Therapy	131
Other Neuroprotectants	131
Quality Patient Care	132
Public Awareness and Pre-Hospital Care	132
Pharmacist Role in Management and Prevention	132
Summary	133
Annotated Bibliography	133
Self-Assessment Questions	137
 Cardiology III	
 CHRONIC STABLE ANGINA: MANAGEMENT AND PREVENTION OF FUTURE CARDIOVASCULAR EVENTS	
Learning Objectives	143
Introduction	143
Epidemiology	143
Definitions	143
Pathophysiology	144
Clinical Evaluation	145
Clinical Presentation	146
Diagnostic Tests	146
Treatment Options for Chronic Stable Angina	146
Goals of Therapy	146
Nonpharmacological Therapy	146
Risk Factor Modification	146
Lifestyle Modifications	147
Pharmacological Therapy	147
Anti-Ischemic Drugs	147
β-Blockers	148
Calcium Channel Blockers	148
Short-Acting and Long-Acting Nitrates	148
Ranolazine	148
Vasculo-Protective Drugs	149
Antithrombotic Therapy	149
ACE Inhibitors	150
Revascularization Therapy	150
Percutaneous Coronary Intervention	151
Therapeutic Approach to the Management of Patients With Chronic Stable Angina	153
Patient Education	154
Quality Improvement	154
Conclusion	154
Annotated Bibliography	154
Self-Assessment Questions	157

Cardiology III

 CHRONIC STABLE ANGINA: MANAGEMENT AND PREVENTION OF FUTURE CARDIOVASCULAR EVENTS	
Learning Objectives	143
Introduction	143
Epidemiology	143
Definitions	143
Pathophysiology	144
Clinical Evaluation	145
Clinical Presentation	146
Diagnostic Tests	146
Treatment Options for Chronic Stable Angina	146
Goals of Therapy	146
Nonpharmacological Therapy	146
Risk Factor Modification	146

Lifestyle Modifications	147
Pharmacological Therapy	147
Anti-Ischemic Drugs	147
β-Blockers	148
Calcium Channel Blockers	148
Short-Acting and Long-Acting Nitrates	148
Ranolazine	148
Vasculo-Protective Drugs	149
Antithrombotic Therapy	149
ACE Inhibitors	150
Revascularization Therapy	150
Percutaneous Coronary Intervention	151
Therapeutic Approach to the Management of Patients With Chronic Stable Angina	153
Patient Education	154
Quality Improvement	154
Conclusion	154
Annotated Bibliography	154
Self-Assessment Questions	157
 CHRONIC HEART FAILURE MANAGEMENT	
Learning Objectives	161
Introduction	161
Overview	161
Classification System	161
Epidemiology	162
Primary Pharmacological Therapy	163
Diuretics	163
Angiotensin-Converting Enzyme Inhibitors	163
β-Blocking Drugs	164
Aldosterone Antagonists	165
Digoxin	165
Alternative Drugs	166
Angiotensin Receptor Blockers	166
Isosorbide and Hydralazine	167
Adjunctive Therapy	167
Anticoagulation	167
Antiarrhythmic Drugs	167
Outpatient Inotrope and Vasodilator Therapy	168
Outpatient Inotropic Therapy	168
Outpatient Nesiritide	168
Nonpharmacological Therapy	168
Implantable Cardioverter Defibrillators	168
Cardiac Resynchronization	169
Concomitant Drugs and Impact on the Disease	170
Lifestyle Modification and Patient Education	170
Multidisciplinary Care and the Role of the Pharmacist	171
Additional Therapeutic Considerations	171
Anemia	171
Conclusion	172
Annotated Bibliography	172
Self-Assessment Questions	175

ARRHYTHMIA MANAGEMENT: AN EVIDENCE-BASED UPDATE	
Learning Objectives	179
Introduction	179
Atrial Fibrillation	179
Pathophysiology	179
Etiology	180
Epidemiology	181
Prognosis	181
Therapeutic Goals/Outcomes	181
Quality Patient Care	181
Pharmacological Therapy	181
Management of Postoperative Atrial Fibrillation	181
Chronic Management of Atrial Fibrillation	183
Update on Recent Clinical Trials	183
Angiotensin-Converting Enzyme Inhibitors/Angiotensin Receptor Blockers	183
Omega-3 Fatty Acids	183
Results of Sotalol Amiodarone Atrial Fibrillation Efficacy Trial	184
Update on Rate Versus Rhythm Control Controversy	184
Recent Clinical Trials	184
Nonpharmacological Therapy	185
Treatment Plan	185
Management of Postoperative Atrial Fibrillation	185
Management of Atrial Fibrillation	186
Overview of Updated Treatment Guidelines	186
Ventricular Rate Control	186
Restoring/Maintaining Sinus Rhythm	186
Prevention of Thromboembolic Events	188
Monitoring	189
Ventricular Arrhythmias/Asystole/Pulseless Electrical Activity	192
Epidemiology	192
Therapeutic Goals/Outcomes	192
Quality Patient Care	192
Pharmacological Therapy	192
Acute Management of Ventricular Arrhythmias/Asystole/Pulseless Electrical Activity	192
Chronic Management of Ventricular Arrhythmias	192
Update on Recent Clinical Trials	192
Omega-3 Fatty Acids	192
Prevention of Implantable Cardioverter Defibrillator Shocks	193
Nonpharmacological Therapy	194
Treatment Plan	194
Management of Cardiac Arrest	194
Pulseless Ventricular Tachycardia/Ventricular Fibrillation	194
Asystole and Pulseless Electrical Activity	196
Chronic Management of Ventricular Arrhythmias	197
Primary Prevention of Sudden Cardiac Death	197
Conclusion	197
Annotated Bibliography	197
Self-Assessment Questions	201
PERIPHERAL ARTERIAL DISEASE	
Learning Objectives	205
Introduction	205
Pathophysiology	205
Definitions	205
Etiology	205
Clinical Evaluation	206
PAD Classification	206
Diagnosis	206
Epidemiology	208
Prognosis	208
Exercise Therapy	208
Pharmacotherapy of PAD	209
Antiplatelet Therapy	209
Aspirin and Dipyridamole	209
Thienopyridines	209
Anticoagulants	210
Intermittent Claudication Therapy	210
Vasodilators	210
Cilostazol	210
Pentoxifylline	211
Fibrinolytic Drugs	211
Clinical Use	211
Fibrinolytic Drugs Versus Surgery	212
Therapeutic Approach to Managing PAD	212
Therapy Goals	212
Practice Guidelines	212
Risk Factor Modification	213
Smoking	213
Hypertension	213
Diabetes Mellitus	213
Hyperlipidemia	214
β-Blocker Controversy	214
Asymptomatic PAD	214
Intermittent Claudication	215
Acute Limb Ischemia	216
Initial Therapy	216
Fibrinolytic Drugs	216
Percutaneous Approach	217
Surgical Approach	217
Investigational Pharmacotherapy	217
Nutritional Supplements	217
L-Arginine	217
Propionyl-L-Carnitine	217
Ginkgo Biloba	218
Patient Education	218
Quality Improvement	218
Documentation	218
Conclusion	218
Annotated Bibliography	219
Self-Assessment Questions	223
