ROLE OF ACCP: ACCP developed the petition seeking recognition of Pharmacotherapy as a specialty of pharmacy and presented it to the Board of Pharmacy Specialties (BPS). As part of its mission to provide leadership, education, advocacy, and resources enabling clinical pharmacists to achieve excellence in practice and research, ACCP also helps pharmacotherapy specialists maintain their certification through PSAP. ACCP reports successful completion of PSAP examinations to BPS for recertification credit. Neither ACCP nor its agents, including the PSAP Editorial Board, authors, reviewers, or other staff, has knowledge of specific examination content, areas of emphasis, or any other information that would compromise the integrity of the examination process.

ROLE OF BPS: The Board of Pharmacy Specialties (BPS) is an autonomous division of the American Pharmacists Association (APhA). BPS is totally separate and distinct from ACCP. The Board, through its specialty councils, is responsible for specialty examination content, administration, scoring, and all other aspects of its certification programs. PSAP has been approved by BPS for use in BCPS recertification. Information about the BPS recertification process is available at www.bpsweb.org/recertification/general.cfm.

Other questions regarding recertification should be directed to:

Board of Pharmacy Specialties
