

2021 ACCP/ASHP BCOP Clinical Sessions

Learning Objectives

Beyond the CLOT: Panel Discussion about Updates in Cancer-Associated Thrombosis

1. Evaluate the literature surrounding updates in the prevention of venous thromboembolism in cancer patients in an ambulatory and inpatient setting.
2. Interpret the evidence surrounding updates in the treatment of venous thromboembolism in cancer patients.
3. Recommend therapeutic options for both prevention and treatment of venous thromboembolism in cancer patients.

Updates on Immunotherapy and Best Pharmacy Practice for Multiple Myeloma

1. Identify the role and management strategies for novel antibody-based immunotherapy in multiple myeloma treatment approaches.
2. Describe the use of CAR T-cell and bispecific T-cell engager therapies targeting B-cell maturation antigen (BCMA) and in combination with other agents in multiple myeloma.
3. Interpret barriers to using novel immunotherapeutics in multiple myeloma treatment.
4. Identify strategies for overcoming barriers to optimize access to novel agents and improve the patient experience.
5. Evaluate practice innovations and care models in the current and evolving myeloma treatment landscape.
