

# TABLE OF CONTENTS

<b>Fluids and Nutrition I.....</b>	<b>1</b>	<b>GI and Liver Disorders I.....</b>	<b>73</b>																																																																																																																		
Fluids and Nutrition I Panel.....	3	GI and Liver Disorders I Panel .....	75																																																																																																																		
<b>Fluid and Hyponatremia Management</b>																																																																																																																					
<i>By Craig B. Whitman, Pharm.D., BCPS, BCCCP</i>																																																																																																																					
Intravenous Fluid Therapy .....	7	Introduction .....	79																																																																																																																		
Controversies in Fluid Resuscitation .....	8	Impaired GI Motility in Critically Ill Patients .....	79																																																																																																																		
Updates in Managing Hyponatremia in the ICU .....	12	Intestinal Integrity and the Microbiome .....	85																																																																																																																		
Conclusion .....	17	Altering the Microbiome in the Critically Ill Patient .....	87																																																																																																																		
References .....	17	Digestive Decontamination with Antimicrobial Therapy .....	89																																																																																																																		
Self-Assessment Questions .....	20	Conclusion .....	91																																																																																																																		
<b>Current Topics in Critical Care Nutrition</b>																																																																																																																					
<i>By Karen Hamrick Samaan, Pharm.D., BCCCP, BCNSP</i>																																																																																																																					
Introduction .....	25	References .....	91																																																																																																																		
Inflammation and Its Role in Malnutrition.....	25	Self-Assessment Questions .....	93																																																																																																																		
Malnutrition in the Critically Ill Patient .....	28	<b>GI Alterations</b>																																																																																																																			
Preferred Methods and Timing of NST Delivery .....	30	<i>By Sean P. Kane, Pharm.D., BCPS</i>				Methods of Estimating Caloric Needs and Associated Challenges .....	33	Introduction .....	79	Protein Requirements in the Critically Ill Patient .....	36	Impaired GI Motility in Critically Ill Patients .....	79	Role of Lipids in the Critically Ill Patient .....	37	Intestinal Integrity and the Microbiome .....	85	Fish Oil-Based and Immune-Enhancing EN Formulas .....	40	Altering the Microbiome in the Critically Ill Patient .....	87	Conclusion .....	40	Digestive Decontamination with Antimicrobial Therapy .....	89	References .....	41	Conclusion .....	91	Self-Assessment Questions .....	44	References .....	91	Self-Assessment Questions .....	44	Self-Assessment Questions .....	93	<b>Nutrition Support Services</b>				<i>By Sara E. Bliss, Pharm.D., BCPS, BCNSP, BCCCP; and Michael T. Kenes, Pharm.D., BCPS, BCCCP</i>				Introduction .....	49	<b>Acute Liver Failure</b>				Pharmacists' Roles in Providing Nutrition Support .....	52	<i>By Dustin D. Linn, Pharm.D., BCPS, BCCCP</i>				Didactic Training and Standards of Practice for Nutrition-Support Pharmacists .....	59	Introduction .....	97	Nutrition Support Protocols .....	60	Pathogenesis .....	98	Use of Technology .....	62	Diagnosis .....	99	Nutrition Support Resources for the Critical Care Pharmacist .....	63	Etiology .....	99	Future Research in Nutrition Support .....	64	Management of ALF .....	103	Conclusion .....	64	Nonpharmacologic Treatment .....	110	References .....	65	Drug Dosing in ALF .....	111	Self-Assessment Questions .....	69	Conclusion .....	112	Self-Assessment Questions .....	69	References .....	113	Self-Assessment Questions .....	69	Self-Assessment Questions .....	116	<b>Severe Acute Pancreatitis</b>				<i>By Jennifer McCann, Pharm.D., BCCCP; and Sarah D. Hittle, Pharm.D., BCCCP</i>				Introduction .....	121	Treatment .....	124	Prevention of Relapse .....	129	Conclusion .....	130	References .....	130	Self-Assessment Questions .....	132
<i>By Sean P. Kane, Pharm.D., BCPS</i>																																																																																																																					
Methods of Estimating Caloric Needs and Associated Challenges .....	33	Introduction .....	79	Protein Requirements in the Critically Ill Patient .....	36	Impaired GI Motility in Critically Ill Patients .....	79	Role of Lipids in the Critically Ill Patient .....	37	Intestinal Integrity and the Microbiome .....	85	Fish Oil-Based and Immune-Enhancing EN Formulas .....	40	Altering the Microbiome in the Critically Ill Patient .....	87	Conclusion .....	40	Digestive Decontamination with Antimicrobial Therapy .....	89	References .....	41	Conclusion .....	91	Self-Assessment Questions .....	44	References .....	91	Self-Assessment Questions .....	44	Self-Assessment Questions .....	93	<b>Nutrition Support Services</b>				<i>By Sara E.
