Residency (PGY1)

Primary Specialty: Pharmacy
Position Start Date: 7/1/2018
Length of Program: 1 year
Number of Positions: 4
Stipend: $50,000

Position Description:
The PGY1 Residency at CHRISTUS Mother Frances Hospital - Tyler is a one-year postdoctoral training program designed to enhance and strengthen the resident’s clinical skills and knowledge of the practice of pharmacy. The resident gains practice experience in direct patient care by working independently under the direction of his/her preceptor and participating in team-based interdisciplinary care in various areas of the hospital. The resident also works with a research mentor to develop a project to be presented at a regional or national pharmacy conference. High priority is placed on teaching principles of evidence-based care, and patient safety considerations are also emphasized throughout the program. The ultimate outcome of our PGY-1 program is to produce well-rounded generalist clinicians capable of independent clinical pharmacy practice in a health system setting and/or preparation for PGY-2 specialty training.

Residency (PGY2)

Primary Specialty: Emergency Medicine
Position Start Date: 7/1/2018
Length of Program: 1 year
Number of Positions: 1
Stipend: $50,000

Position Description:
The PGY2 residency in emergency medicine pharmacy is designed to transition PGY1 residency graduates from generalist practice to specialized practice which meets the needs of patients in the emergency department setting. Upon completion of training, graduates are equipped to be fully integrated members of the interdisciplinary emergency medicine team, are able to prioritize responsibilities and utilization of resources, and are able to make complex medication recommendations in this fast-paced environment. Training focuses on developing residents’ capability to deal with a wide range of diseases and disorders that occurs in patients in the emergency environment.

Graduates of the program are empowered to treat and appropriately triage the most complex chronic and acute illnesses presented by emergency department patients, including those with multiple disease states and serious complications. They also acquire the experience necessary to exercise leadership for emergency medicine pharmacy practice in the health-care system.

Residency (PGY1)

Primary Specialty: Community Pharmacy
Position Start Date: 6/25/2018
Length of Program: 1 year
Number of Positions: 2
Stipend: $45,000

Position Description:
The Concordia University Wisconsin School of Pharmacy (CUWSOP) PGY1 24-Month Pharmacy Residency Program will prepare academic ambulatory care practitioners with a specific focus on urban underserved practice settings. Graduates will be capable of developing, providing, advancing and teaching patient care in...
ambulatory settings, as well as fulfilling teaching, practice, research and service roles as a pharmacy practice faculty member. This is a 24-month practice and academic leadership emphasis with time split equally in practice and on CUW's campus. Year 1 in practice is at a local Federally Qualified Health Center where services have been established. Year 2 in practice is at an urban underserved practice site. Time on campus is split between teaching roles and academic development including coursework that results in a Master's in Education. Graduates of our program will be prepared for success in a variety of ambulatory care practice positions, as well as pharmacy practice faculty positions.

Table #6: St. Jude Children’s Research Hospital

Residency (PGY2)
Primary Specialty: Pharmacogenomics
Position Start Date: 7/1/2018
Length of Program: 1 year
Number of Positions: 1

Position Description:
The purpose of the PGY2 Residency in Clinical Pharmacogenetics is to prepare the resident to excel in the implementation of pharmacogenetic testing in clinical practice. St. Jude’s Pharmaceutical Department provides unrivalled opportunities for clinical implementation of pharmacogenetics into patient care through an institution-wide program to implement pre-emptive pharmacogenetic testing. The resident will provide pharmacogenetic consults in the context of a comprehensive
approach to pharmaceutical care integrated into clinical practice areas: general hematology/oncology, bone marrow transplantation, and ambulatory care. The program prepares the resident to practice in the field of clinical pharmacogenetics, and to implement pharmacogenetic testing in other health-system settings.

**Residency (PGY2)**  
**Primary Specialty:** Oncology  
**Position Start Date:** 7/1/2018  
**Length of Program:** 1 year  
**Number of Positions:** 2

**Position Description:**
The clinical pharmacy residency program at St. Jude Children’s Research Hospital is an ASHP accredited one year experience providing advanced training in clinical therapeutics for the pediatric cancer patient and an introduction to clinical research. The residents gain experience in applied pharmacokinetics, pharmacogenetics, nutrition support, and pediatric pharmacotherapy, including oncology, bone marrow transplantation, hematology, infectious disease and critical care. The residents will participate in patient education, drug information, quality improvement and medication outcomes. Experience in teaching is acquired through lectures, in-services, journal club presentations and precepting pharmacy students. An independent project will be carried out during the course of the residency.

Pharmacy residency training has been a longstanding tradition at Palmetto Health since 1972. We have thoughtfully expanded the number of programs offered throughout the years and very proud of our diverse, experienced and enthusiastic preceptor group. Palmetto Health Richland is the largest teaching site for the University of South Carolina College of Pharmacy. The College of Pharmacy has been a leader in academic excellence for over 150 years. College faculty are nationally renowned teachers and researchers providing excellent opportunities for students and residents. PGY2 pharmacy residency programs build on Doctor of Pharmacy (PharmD) education and PGY1 pharmacy residency programs to contribute to the development of clinical pharmacists in specialized areas of practice. PGY2 residencies provide residents with opportunities to function independently as practitioners by conceptualizing and integrating accumulated experience and knowledge and incorporating both into the provision of patient care that improves medication therapy. Residents who successfully complete an accredited PGY2 pharmacy residency should possess competencies that qualify them for clinical pharmacist and/or faculty positions and position them to be eligible for attainment of board certification in the specialized practice area (when board certification for the practice area exists).

**Position Description:**
Scripps Mercy Hospital, recognized as one of the nation’s top 100 hospitals and is the largest of 5 acute care hospitals in the System. Scripps Mercy is an academic hospital, Level 1 Trauma Center and Accredited Stroke center with 520-beds. Over 35 Clinical Pharmacists practice in 10 different settings. We have four PGY1 residencies along PGY2 training in Critical Care and Psychiatry. Annually we train 60 medical residents and 25 pharmacy students. Core resident rotations: Medicine, Trauma, Critical Care, Infectious Disease, Emergency Medicine, Ambulatory Care, Transitions of Care, Psychiatry, Research and Administration. Elective rotations: Endocrinology, Cardiology, NICU, Nephrology, Oncology, Transplant, Palliative care and Pediatrics. The resident will also serve as a preceptor for one P4 student’s internal medicine rotation. The PGY1 program is fully accredited by ASHP since 2001. Application deadline January 1.

Residency (PGY2)

Primary Specialty: Critical Care
Position Start Date: 7/16/2018
Length of Program: 1 year
Number of Positions: 1
Stipend: $52,000

Position Description:
Scripps Mercy Hospital, nation's top 100 hospitals, is the largest of 5 acute care hospitals in the Scripps Health System. Scripps Mercy is a teaching hospital, Level 1 Trauma Center, Accredited Stroke center with 520-beds. The ICU consists of 10 Medical, 14 mixed surgical, and 8 mixed medical/surgical beds. Annually we train 60 Medical Residents, 4 PGY1 Pharmacy Residents and 25 pharmacy students. The medical team consists of 10 pulmonary care intensivists with two rounding teams. This specialized residency will train the resident to practice independently as an ICU specialist in a variety of practice settings such as medical, trauma, emergency medicine, and cardio thoracic surgical units. The resident will have the flexibility of selecting from various electives based on his/her interests. The resident will independently precept students and PGY1 residents. Research design and publication is expected.

Table #17: University of Minnesota PGY1 Pharmacy Residency Program

Residency (PGY1)
Primary Specialty: Pharmacy
Position Start Date: 7/2/2018
Length of Program: 1 year
Number of Positions: 25
Stipend: $47,465

Position Description:
Our Postgraduate PGY1 Residency Program is a large, diverse program focused on preparing practitioners for patient-centered practice in ambulatory care settings. Our program strives to leading ambulatory pharmacy practice in diverse communities through the advanced preparation of patient-centered practitioners. We have 19 sites across the state of Minnesota with emphasis areas on community clinics, rural health and leadership. Please see our website for site specific information.

Table #18: Texas Tech University Health Sciences Center School of Pharmacy

Residency (PGY1/PGY2)
Primary Specialty: Pharmacotherapy
Position Start Date: 7/2/2018
Length of Program: 2 years
Number of Positions: 4

Position Description:
The 24-month program is designed to lead the resident through a variety of integrated practice experiences. By the end of the program, the resident should feel equally competent practicing within acute care, chronic care, and ambulatory care settings. The residency will include core rotations that are chosen to establish a strong base in general medicine and to meet the requirements of a Pharmacy Practice Residency. The resident chooses elective experiences based upon his/her career goals. The Pharmacotherapy residency provides flexibility for candidates to mold the residency training process as their career interests develop.

Table #19: UNC Eshelman School of Pharmacy Fellowships

Fellowship
Primary Specialty: Pharmacokinetics
Secondary: Pharmacodynamics/Pharmacometrics/Modeling
Position Start Date: 7/1/2018
Length of Program: 2 years
Number of Positions: 2
Stipend: $47,000

Position Description:
The UNC Eshelman School of Pharmacy offers a two-year postdoctoral fellowships in PK/PD/PM, in cooperation with Quintiles and Nuventra. Fellowships emphasize coursework and the conduct and data analysis of studies in PK/PD/PM and modeling. Fellows spend their first year at UNC, the second in Quintile's or Nuventra's research facilities. Fellows assist in conducting clinical research studies (Phase I,II, or III) and PK/drug metabolism/genomic studies. Research areas include oncology, cardiovascular, infectious diseases, hepatology, and transplantation. Fellows gain hands-on experience conducting clinical research studies while also attending classes on PK/PD/PM, clinical research design, statistics, regulations, good clinical practice, and the drug development process.

Fellowship
Primary Specialty: Regulatory Affairs
Secondary: Global Regulatory Affairs
Position Start Date: 7/1/2018
Length of Program: 2 years
Number of Positions: 2
Stipend: $47,000

Position Description:
The UNC Eshelman School of Pharmacy, in cooperation with GlaxoSmithKline, offers fellowships in Global Regulatory Affairs to provide training and experience in regulatory functions and requirements key to drug development. Designed to include rotations in academic/medical, pharmaceutical, and regulatory settings, the program provides real-world knowledge and experience developing regulatory practitioners prepared to be successful in the pharmaceutical industry.

Experiences include coursework at the UNC Eshelman School of Pharmacy, exposure to key regulatory functions at UNC HealthCare, and in-depth, hands-on training at GlaxoSmithKline. The potential opportunity exists to train in other regulatory venues (i.e., government, non-profit organizations).

Fellowship
Primary Specialty: Academic Research
Position Start Date: 7/1/2018
Length of Program: 2 years
Number of Positions: 6
Stipend: $47,000

Position Description:
The UNC Eshelman School of Pharmacy offers six academic research fellowships with training in HIV/Infectious Disease, Oncology, Pharmacogenomics, Heart Failure/Cardiovascular Disease, and Pharmacokinetics/Dynamics/Metrics (PK/PD/PM). The intent of these fellowships is to prepare independent researchers for careers in academia. Fellows will gain experience in all areas of research, ranging from grant writing to manuscript submission, including presentation of research findings at scientific meetings. Fellows will become proficient in the conduct of translational research. Course work in clinical trial design, biostatistics, and PK/PD/PM are provided, along with the opportunity for teaching and clinical service. Prior residency experience is required for select programs.

Fellowship
Primary Specialty: Drug Development
Secondary Specialty: Medical Affairs
Position Start Date: 7/1/2018
Length of Program: 2 years
Number of Positions: 6
Stipend: $47,000

Position Description:
The UNC Eshelman School of Pharmacy, in cooperation with GlaxoSmithKline, United Therapeutics, PPD, and Quintiles offers fellowships in clinical research/drug development. The objective of this program is to provide training in study design methodology, the proper conduct of clinical trials, and exposure to ethical, legal, and regulatory issues in research involving investigational and marketed drugs. Fellows are active in all facets of conducting clinical research studies, and will participate in coursework in clinical research methods and biostatistics. Fellows spend their first year in the UNC Eshelman School of Pharmacy working with faculty mentors; the second year of the appointment will occur at the industry sponsor’s site.

**Position Description:**
This PGY1 Pharmacy Residency aims to provide the candidate with knowledge regarding managing the pharmacy benefits in employee health plans. Focus is placed on developing skills to help design strategic interventions to provide clinically defensible ways to efficiently provide cost savings to plans through the pharmacy benefit. Emphasis is placed on critical appraisal of the medical literature and in applying evidence-based medicine skills in creating strategic drug policy. The resident will develop strong clinical skills, precept pharmacy students, facilitate case recitation or provide supplemental instruction, and provide instruction in the Evidence-based Medicine course.

Fellowship
Primary Specialty: Infectious Diseases (Secondary: Pediatric Antibiotic Stewardship)
Position Start Date: 7/2/2018
Length of Program: 2 year
Number of Positions: 1
Stipend: $42,000

Position Description:
The Fellowship in Pediatric Antimicrobial Stewardship and Infectious Diseases is designed to provide the fellow with clinical, research, and teaching skills so that upon completion the fellow will be prepared to help initiate or add to existing antimicrobial stewardship programs. Through participation in teaching, research, and antimicrobial stewardship certificate programs, fellows will further develop their communication and research skills and teaching abilities. Fellows will be exposed to antimicrobial stewardship both locally at ACH and nationally through SHARPS (Sharing Antimicrobial Reports for Pediatric Stewardship) Collaborative. Support will also be given to take additional courses through the UAMS College of Public Health that could lead to a Master’s degree.

Residency (PGY2)
Primary Specialty: Geriatrics
Position Start Date: 7/2/2018
Length of Program: 1 year
Number of Positions: 1
Stipend: $42,000

Position Description:
This PGY2 Geriatric Pharmacy Practice Residency provides the resident with diverse learning opportunities in the field of geriatric pharmacotherapy and academia. The resident gains experience in a variety of settings afforded by the UAMS Donald W. Reynolds Institute on Aging, including ambulatory care, acute care on the Geriatric Consult Team, House Calls, Palliative and Hospice Care, and Long Term Care. The resident will precept pharmacy students, teach in a variety of courses throughout the pharmacy curriculum, and have ample opportunities to teach other health care professionals. Upon successful completion of the program, residents are awarded a Residency Certificate.

Residency (PGY1)

Primary Specialty: Community Pharmacy
Position Start Date: 7/2/2018
Length of Program: 1 year
Number of Positions: 6
Stipend: $41,000

Position Description:
The residency provides the opportunity to gain clinical experience and provide patient care in a community pharmacy setting. While this residency program is based in a community pharmacy, the experience will involve both traditional community pharmacy and ambulatory care experiences. In addition, valuable experience in designing, marketing, implementing and maintaining patient care services will be a focus of the residency. The residency also provides the opportunity to gain experience in teaching.

Residency (PGY2)
Primary Specialty: Ambulatory Care
Position Start Date: 6/11/2018
Length of Program: 1 year
Number of Positions: 2
Stipend: $44,500
Position Description:
This PGY2 program allows residents to work in a progressive clinical pharmacy service with over 50 clinical pharmacy specialists in a variety of practice settings. Core rotations include working in pharmacotherapy clinics managing DM, HTN, hyperlipidemia in addition to working in clinics managing anticoagulation, home-based primary care, mental health, heart failure, emergency primary care, and chronic pain. The resident will also develop, implement, and manage his/her own pharmacotherapy clinic (DM, lipid, and HTN mgmt) and may choose to develop a new outpatient clinic based on the interests of the resident and needs of pharmacy service. Elective months can include a repeated experience in one of the core rotations or rotations in geriatrics, cardiology, pharmacoeconomics, acute psychiatry, acute medicine, critical care, hepatitis C clinic.

Residency (PGY2)
Primary Specialty: Pain Management and Palliative Care
Position Start Date: 6/11/2018
Length of Program: 1 year
Number of Positions: 1
Stipend: $44,500

Position Description:
In alignment with the National Pain Strategy released in 2016, our program endeavors to train clinical pharmacy specialists to provide interdisciplinary care and specialty assistance to front-line providers and serve as trusted liaisons between substance abuse, specialty pain, and primary care services to bridge the gap and assure improved quality of care. As medications tend to be the central focus for the majority of patients, utilizing pharmacy pain specialists can be critical to success. Even within dedicated residency training programs for pain, the majority have a program focus on either palliative care or acute pain management which are fundamentally different in their approach to pain. Chronic pain management by necessity is rehabilitation focused which requires a holistic approach and partnership with Mental Health.

Residency (PGY2)
Primary Specialty: Psychiatry
Position Start Date: 6/11/2018
Length of Program: 1 year
Number of Positions: 2
Stipend: $44,500

Position Description:
The purpose of this PGY-2 Psychiatric Pharmacy Residency Program at VA TVHS is to prepare resident(s) to enter a clinical practice setting in psychiatric pharmacy as an integral member of the interprofessional healthcare team focused on achieving optimal outcomes associated with medication use. The resident will be prepared to become a board certified psychiatric pharmacist and to function as a clinical pharmacy specialist in inpatient and outpatient mental health services and/or academia by completion of the residency program. Start date may vary depending on PGY1 training calendar.

Position Description:
The VCU School of Pharmacy offers a 2-3 year post-doctoral fellowship to prepare applicants for a career in academic research. Fellows will have the opportunity to work with faculty in the School of Medicine and School of Pharmacy to conduct both pre-clinical models and human clinical trials. Additional training will include instruction in experimental design, human subjects research, laboratory techniques, grant writing, and biostatistics.
Fellows will also be required to participate in PharmD didactic education and maintain a clinical practice site in ambulatory or inpatient care settings.

Position Description:
This 2-year Cardiovascular Outcomes Research Fellowship Program is designed to develop the candidate's knowledge base of cardiovascular pharmacotherapy and research skills necessary for a successful outcomes research career. The fellowship will provide knowledge and experience in grant writing, study design, outcomes research methodology skills, statistical analysis, abstract preparation, presentation of research at national meetings, and manuscript preparation and publication. The fellow is expected to design and conduct original clinical research and participate in an ongoing cardiovascular outcomes research program. The resident's principal training sites will be at Western University of Health Sciences and the VA West Los Angeles Healthcare Center, which serves as a major teaching hospital for UCLA. To a limited degree, the fellow will participate in didactic and clinical education of PharmD students. Graduate level coursework is available. Dr. Jackevicius' research in cardiovascular outcomes has received international attention, and has been published widely in high-impact journals, including the New England Journal of Medicine, JAMA, and Circulation.

Position Description:
This is a fellowship program jointly funded by Western University of Health Sciences and the Mendez National Institute of Transplantation, Los Angeles. This fellowship is designed to train the fellow for a future academician and translational researcher. The fellow is expected to have 3-month organ transplantation clinical training and engage in pharmacogenomic research projects. The fellow will learn PCR technique, DNA and RNA sequencing, flow cytometry and analysis. In addition, he or she will learn how to prepare for research protocols, IRB submission, data analysis, and manuscript. The fellow will work mainly at St. Vincent Medical Center/Mendez National Institute of Transplantation. Dr. Min has a close collaborative relationship with the research group led by Dr. Lemp and Dr. Shah, St. Vincent Medical Center and the fellow will have a variety of clinical and translational research training. Other experiences include the class room didactic teaching for Pharm.D. students, clinical teaching for the clerkship students and other teaching skill workshop.

Position Description:
The Western University Medical Center Residency Program is a general practice residency program with a focus in ambulatory care pharmacy. The resident will also have inpatient experiences through Olive View-UCLA. The purpose of the Postgraduate Year One (PGY1) Pharmacy Residency Program is to educate pharmacy graduates to obtain the knowledge and skills needed to become competent in pharmacy practice. The residency program is designed to provide the resident with opportunities to conceptualize, integrate, and transform accumulated experiences and knowledge into improved drug therapy and patient outcomes. During pharmacy residency rotations, the resident participates in all aspects of patient medication use therapy including selection, assessment, monitoring, reconciliation, safety, and adherence. The resident will work as a part of the multidisciplinary team advising physicians, nurses, and patients on appropriate medication use; attending rounds and conferences; and providing lectures on drug therapy to medical, pharmacy, and nursing staff. Taking advantage of the university affiliation, the resident will participate in both the didactic and experiential teaching of Doctor of Pharmacy students at both Olive View-UCLA and Western University. Research experience will involve the completion of a major clinical project during the course of the residency year. Selection of the project is a joint effort between the resident, program director, and residency preceptors. The residency project is identified early in the year and a final report is required. The project will be presented at the Western Pharmacy Residency Conference in the Spring of the residency year.

Fellowship  
Primary Specialty: Outcomes Research (Secondary: Pharmacoeconomics)  
Position Start Date: 7/2/2018  
Length of Program: 2 years  
Number of Positions: 1  
Position Description:  
The WesternU Outcomes Fellowship was established in 2003 and has since graduated six 2-year fellows who are subsequently employed in Outcomes based positions. The goal of the fellowship program is to provide comprehensive postgraduate training to prepare a pharmacy fellow to design, initiate, conduct, manage, monitor and evaluate health services research with a focus on application to the pharmacy profession. The program includes advanced seminar courses and hands-on experience in relevant areas: research methods, biostatistics, pharmacoeconomics and health outcomes; planning, conducting and monitoring an outcomes-based project; combining patient care, pharmacy practice and research for optimal outcomes; practice management; training in setting up a pharmaceutical care site for different patient focused programs; and teaching and precepting PharmD students.

Residency  
Primary Specialty: Pharmacy Practice (Secondary: Acute care)  
Position Start Date: 7/2/2018  
Length of Program: 1 year  
Number of Positions: 1  
Position Description:  
This unique PGY1 Acute Care Residency is a collaborative program between Western University of Health Sciences, and St. Mary Medical Center (SMMC). SMMC is a 389-bed acute care teaching facility located in Long Beach, CA. The hospital is a Level 2 Trauma Center and provides an array of comprehensive services. The resident will primarily rotate through various inpatient practice settings at SMMC and will have the opportunity to select two elective rotations based on the resident’s interest. The PGY1 residency programs will provide an accelerated growth that will progress beyond an entry-level professional competency in patient-centered care and in pharmacy operational services. In addition, development of leadership skills will be emphasized throughout the residency experience.

The PGY1 residents will develop and master problem solving skills and decision-making skills under the guidance of a model practitioner. The training will enhance the resident clinical judgments, professional values, and sense of responsibilities toward the pharmacy profession. To assess these skills and values, the following competencies must be met: managing and improving the medication-use process; providing evidence-based patient-centered medication therapy management with the interdisciplinary team; exercising leadership and practice management; demonstrating project management skills; providing medication and practice-related education/training; and utilizing medical informatics.

Residency  
Primary Specialty: Pharmacy Practice (Secondary: Geriatrics)  
Position Start Date: 7/2/2018  
Length of Program: 1 year  
Number of Positions: 1  
Position Description:  
This Western University Residency Program is a PGY1 Pharmacy Practice Residency with an emphasis on Geriatrics Program. The resident will primarily rotate at Jewish Home for the Aging (JHA) which is a 239 bed skilled nursing facility with a 10-bed Joint Commission accredited geriatric psychiatric inpatient unit. Additionally the resident will be extensively involved in our new outpatient community day treatment Program for All-inclusive Care for the Elderly (P.A.C.E. Program). This PGY1 residency program will provide an accelerated growth that will progress beyond an entry-level professional competency in patient-centered care and in pharmacy operational services. In addition, development of leadership skills will be emphasized throughout the residency experience.

The PGY1 residents will develop and master problem solving skills and decision-making skills under the guidance of a model practitioner. The training will enhance the resident clinical judgments, professional values, and sense of responsibilities toward the pharmacy profession. To assess these skills and values, the following competencies must be met: managing and improving the medication-use process; providing evidence-based patient-centered medication therapy management with the interdisciplinary team; exercising leadership and practice management; demonstrating project management skills; providing medication and practice-related education/training; and utilizing medical informatics.

Residency
Primary Specialty: Community Pharmacy
Position Start Date: 7/2/2018
Length of Program: 1 year
Number of Positions: 1

Position Description:
The purpose of the Western University School of Health Sciences/Ralphs Pharmacy PGY-1 Community Pharmacy Residency Program is to build upon the doctor of pharmacy (PharmD) education and outcomes to develop community-based pharmacist practitioners with diverse patient care, leadership, and education skills who are eligible to pursue advanced training opportunities including postgraduate year two (PGY2) residencies and professional certifications.

This program develops pharmacy practitioners who are leaders and skilled patient care providers within the community pharmacy or health center setting. This program prepares its graduates to assume positions as outpatient clinic/community pharmacy clinicians, community pharmacy managers, to serve as adjunct faculty for a college of pharmacy, or to pursue careers in academia.

The resident will rotate through a variety of community and ambulatory care pharmacy practices providing various clinical services at Ralphs pharmacies and a safety-net clinic. Clinical service activities include counseling patients, initiating and adjusting medication therapies, ordering laboratory tests, performing physical assessments, implementing patient care programs, communicating with other health care providers, and managing a clinical practice. The resident will also get hands-on experience in community pharmacy corporate management. Through the program, the resident will have the opportunity to receive a teaching certificate and participate in didactic and experiential teaching activities. Research experience will involve the completion of a major clinical project during the course of the residency year. Findings from the project will be presented at the Western States Conference in the Spring of the residency year.

Residency (PGY2)
Primary Specialty: Ambulatory Care (Secondary: Family Medicine)
Position Start Date: 7/1/2018
Length of Program: 1 year
Number of Positions: 1
Stipend: $48,000

Position Description:
This PGY2 ambulatory care residency develops advanced skills within ambulatory care clinics to provide care for patients with chronic diseases including asthma, COPD, diabetes, pain, hypertension, chronic anticoagulation, etc. The resident also participates in Medicare Wellness Visits (MWV) and Transitional Care Management (TCM) follow-up. The resident will spend 4 weeks in orientation, 6 months within a Family Medicine clinic, and 2 months within an Internal Medicine clinic. The resident will also spend at least one month as primary preceptor for an APPE pharmacy student. Completion prepares residents for a variety of ambulatory careers. See our website for more information. NHRMC is a 800+ bed teaching community hospital which serves as a regional referral center. PharmD with successful completion of ASHP accredited PGY1 residency required.

Residency (PGY1)
Primary Specialty: Community Pharmacy
Position Start Date: 7/1/2018
Length of Program: 1 year
Number of Positions: 1
Stipend: $48,000

Position Description:
The PGY1 Community-Based Residency is designed to prepare the resident to become a confident member of the health care team with effective and innovation leadership skills. The resident will provide direct patient care longitudinally for patients with a variety of chronic diseases including diabetes, hypertension, HIV, and tobacco abuse. The resident is also vital in providing dispensing services as well as transition of care, MTM and discharge counseling services to patients transitioning home from our hospital. The resident will also participate in formal and small group presentations to pharmacy department staff and medical residents/students. The resident will gain practice management skills and serve as a co-preceptor for APPE students completing a community pharmacy rotation. This resident is integrated into serving our community needs.

Residency (PGY2)
Primary Specialty: Critical Care
Position Start Date: 7/1/2018
Length of Program: 1 year
Number of Positions: 1
Stipend: $48,000

Position Description:
The PGY2 critical care pharmacy residency at the New Hanover Regional Medical Center consists of 12 months of critical care training and experience. The goals, objectives and evaluation procedures are established to be consistent with the PGY2 ASHP Standards with ASHP Goals and Objectives focused in Critical Care. The program allows sufficient flexibility to adapt to the needs and interests of the individual resident, while providing a foundation to develop professional critical care practice skills.

PGY2 pharmacy residency programs build on Doctor of Pharmacy (Pharm.D.) education and PGY1 pharmacy residency programs to contribute to the development of clinical pharmacists in specialized areas of practice. PGY2 residencies provide residents with opportunities to function independently as practitioners by conceptualizing and integrating accumulated experience and knowledge and incorporating both into the provision of patient care or other advanced practice settings. Residents who successfully complete an accredited PGY2 pharmacy residency are prepared for advanced patient care, academic, or other specialized positions, along with board certification, if available the PGY2 critical care resident will rotate in the following critical care specialties: medicine, surgery/trauma, neuro critical care, coronary care, cardiothoracic surgery, pediatrics and emergency medicine. The resident will also participate in medical/trauma codes, a critical care focused research project and critical care committees.

Residency (PGY1)
Primary Specialty: Pharmacy
Position Start Date: 7/1/2018
Length of Program: 1 year
Number of Positions: 6
Stipend: $48,000

Position Description:
The PGY1 residency at NHRMC develops a pharmacy generalist with a focus in direct patient care, teaching, and leadership focus. Residents will experience core areas of practice including: internal medicine, critical care, ambulatory care, and pediatrics, integrated practice, transitions of care, and practice management. Electives are also available to tailor to the resident’s interest and an optional teaching and learning curriculum is available in conjunction with Campbell University School of Pharmacy. Residents teach pharmacy students and other health care practitioners, serve on hospital committees, and participate in several writing and research activities.
