

## **Learning Objectives**

At the end of this activity you will be able to:

1. Identify relevant testing procedures for the 2014 fall specialty exams and the 2015 spring specialty exams.
2. Describe how standardized questions are developed and written.
3. Explain how standardized tests are constructed.
4. Develop a technique for answering standardized questions more accurately.
5. Identify common issues in testing that may depress your performance.
6. Analyze your test performance in order to improve your accuracy, pacing, and endurance.
