

# ACCP Report

American College of Clinical Pharmacy

Michael S. Maddux, Pharm.D., FCCP; Executive Director

Vol. 34, No. 1; January 2015

## Save by Registering for ACCP Updates in Therapeutics® 2015 and ACCP Academy Programming by February 27

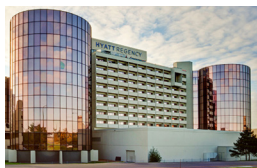

Image courtesy Hyatt Regency O'Hare.

Register now at [www.accp.com/ut](http://www.accp.com/ut) and plan to attend Updates in Therapeutics® 2015 or ACCP Academy programming, April 10–14, 2015, at Chicago's Hyatt Regency

O'Hare in Rosemont, Illinois. This meeting will offer four comprehensive courses to help attendees prepare for the specialty certification examinations administered by the Board of Pharmacy Specialties (BPS) in Ambulatory Care Pharmacy, Critical Care Pharmacy, Pediatric Pharmacy, or Pharmacotherapy.

ACCP's Ambulatory Care Pharmacy, Critical Care Pharmacy, Pediatric Pharmacy, and Pharmacotherapy review courses will guide participants through a comprehensive review of the knowledge domains within each specialty. Each course will consist of a series of case-based lectures presented by faculty who are nationally recognized content experts. Each lecture will place a strong emphasis on the processes and follow-up necessary to manage patient care problems in the specific therapeutic area.

The Pharmacotherapy and Ambulatory Care Pharmacy review courses will also be available for recertification credit. Attendees can earn 25.0 contact hours of BCPS recertification credit by successfully completing the associated posttest for the Pharmacotherapy Preparatory Review and Recertification Course, or they can earn 31.0 contact hours of BCACP recertification credit by attending and successfully completing the associated posttest for the Ambulatory Care Pharmacy Preparatory Review and Recertification Course.

Basic meeting registration begins at \$525 for ACCP full and associate members. ACCP student, resident, and fellow member registration rates begin at the low price of only \$260—a 50% discount! Basic meeting registration provides access to Ambulatory Care Pharmacy, Critical Care Pharmacy, Pediatric Pharmacy, or Pharmacotherapy review course lectures; available continuing pharmacy

education credit (recertification credit is available with the recertification registration for either Ambulatory Care Pharmacy or Pharmacotherapy); morning networking sessions on Saturday through Monday; PDFs for the course workbook of the attendee's choice; and a printed copy of the corresponding course slide deck. The workbook contains extensive and detailed content outlines for each lecture, self-assessment questions for each therapeutic area, and a series of patient cases to reinforce and help gauge one's mastery of the content.

Registration is also now open for the ACCP Academy programming offered at the same time as ACCP Updates in Therapeutics®. With a separate registration, beginning at only \$240 for ACCP full and associate members, registrants may attend the ACCP Academy track of their choice (Leadership and Management, Research and Scholarship, or Teaching and Learning). ACCP student, resident, and fellow member registration rates begin at the low price of only \$145. Attendees can take advantage of available continuing pharmacy education credit, program handouts to the ACCP Academy track session they select, and morning networking sessions on Saturday through Monday.

The three tracks within the ACCP Academy programming will present both required modules and elective courses, according to each program's curricular schedule. Each track will concentrate its programming over a 2-day period to enable Academy participants to minimize travel expense and time away from their practice.

For a full programming schedule, consult the ACCP Web site at [www.accp.com/acad](http://www.accp.com/acad) for Academy programming and [www.accp.com/ut](http://www.accp.com/ut) for preparatory review course programming.

## ACCP Research Institute Recognizes 2014 Donors

The ACCP Research Institute would like to thank all of the 2014 Frontiers Fund donors. Because of their generosity, the Frontiers Fund is able to support the institute's efforts to develop clinical pharmacy researchers and advance clinical pharmacy research.

*continued on page 3*

## Call for Nominations

Nominations for the 2015 “New” Awards (New Clinical Practitioner, New Educator, and New Investigator), 2015 Parker Medal, and 2015 ACCP Fellows (FCCPs) are now open and must be submitted by February 15, 2015. All nomination materials, including letters, curricula vitae or resumes, and other supporting documents, can be submitted online to ACCP. The online nominations portal specifies the nominating materials required for each award and honor. This portal is available at <http://www.accp.com/membership/nominations.aspx>.

**2015 ACCP Fellows:** Fellowship is awarded in recognition of continued excellence in clinical pharmacy practice or research. Nominees must have been Full Members of ACCP for at least 5 years, must have been in practice for at least 10 years since receipt of their highest professional pharmacy degree, and must have made a sustained contribution to ACCP through activities such as presentation at College meetings; service to ACCP committees, PRNs, chapters, or publications; or election as an officer. Candidates must be nominated by any two Full Members other than the nominee, by any Fellow, or by any member of the Board of Regents. Current members of the Board of Regents, Research Institute Board of Trustees, *Pharmacotherapy* Board of Directors, or Credentials: FCCP Committee are ineligible for consideration. **Nomination deadline: February 15, 2015.**

**2015 Paul F. Parker Medal for Distinguished Service to the Profession of Pharmacy:** Recognizes an individual who has made outstanding and sustained contributions to improving or expanding the profession of pharmacy in an area of professional service—including, but not limited to, patient care, leadership, administration, finance, technology, information processing, service delivery, models of care, and advocacy. The award is not limited to pharmacists or ACCP members. All nominations must consist of a letter detailing the nominee’s qualifications for this award and his or her contributions to the profession of pharmacy; the nominee’s curriculum vitae, resume, or biographical sketch as available; and a minimum of three letters of recommendation. At least one of these letters must be from an individual outside the nominee’s current practice locale. Current members of the Board of Regents, Research Institute Board of Trustees, *Pharmacotherapy* Board of Directors, Parker Medal Selection Committee, or ACCP staff are ineligible. **Nomination deadline: February 15, 2015.**

**2015 New Clinical Practitioner Award:** This award recognizes a new clinical practitioner who has made

outstanding contributions to the health of patients and/or the practice of clinical pharmacy. Nominees must have been Full Members of ACCP at the time of nomination and members at any level for a minimum of 3 years. In addition, nominees must have completed their terminal pharmacy training or degree (whichever is most recent) within the past 6 years. Fellows of ACCP (i.e., “FCCPs”) are ineligible. All nominations must include a letter of nomination from an ACCP member detailing the nominee’s qualifications for the award, the nominee’s curriculum vitae, and two letters of support (also from ACCP members) that describe the individual’s accomplishments relative to the award criteria. At least one of the letters of support must be from an individual outside the nominee’s current place of employment. Additional letters of support also may be included, including letters from non-ACCP members. Self nominations are not permitted. Current members of the Board of Regents, Awards Committee, or ACCP staff are ineligible. **Nomination deadline: February 15, 2015.**

**2015 New Educator Award:** This award recognizes and honors a new educator for outstanding contributions to the discipline of teaching and to the education of health care practitioners. Nominees must have been Full Members of ACCP at the time of nomination and members at any level for a minimum of 3 years. In addition, nominees must have completed their terminal pharmacy training or degree (whichever is most recent) within the past 6 years. Fellows of ACCP (i.e., “FCCPs”) are ineligible. All nominations must include a letter of nomination from an ACCP member detailing the nominee’s qualifications for the award, the nominee’s curriculum vitae, and two letters of support (also from ACCP members) that describe the individual’s accomplishments relative to the award criteria. At least one of the letters of support must be from an individual outside the nominee’s current place of employment. Additional letters of support also may be included, including letters from non-ACCP members. Self nominations are not permitted. Current members of the Board of Regents, Awards Committee, or ACCP staff are ineligible. **Nomination deadline: February 15, 2015.**

**2015 New Investigator Award:** The purpose of this award is to highlight the research program of an ACCP member who has made a major impact on an aspect of clinical pharmaceutical science. Nominees must have been at the time of nomination members

of ACCP for more than 3 years; they must have a research program with a significant publication record having a programmatic theme or an especially noteworthy single publication; and it must have been less than 6 years since completion of their terminal training or degree, whichever is most recent. Fellows of ACCP (i.e., "FCCPs") are ineligible. All nominations must include a letter of nomination from an ACCP member detailing the nominee's qualifications for the award, the nominee's curriculum vitae, and two

letters of support (also from ACCP members) that describe the individual's accomplishments relative to the award criteria. At least one of the letters of support must be from an individual outside the nominee's current place of employment. Additional letters of support also may be included, including letters from non-ACCP members. Self nominations are not permitted. Current members of the Board of Regents, Awards Committee, or ACCP staff are ineligible. **Nomination deadline: February 15, 2015.**

### **Register Now for the Upcoming Webinar on Team-Based Learning**

Join ACCP for an interactive 1-hour webinar aimed at enhancing teaching and learning abilities. The webinar will be held Wednesday, January 21, from 6:30 p.m. to 7:30 p.m. (EST). To register, visit [http://www.accp.com/meetings/w-acad\\_t15/](http://www.accp.com/meetings/w-acad_t15/).

Presented by Dr. Andrea Franks, associate professor in the Department of Clinical Pharmacy at the

University of Tennessee Health Science Center, College of Pharmacy, and in the Department of Family Medicine at the University of Tennessee Graduate School of Medicine, this webinar will provide an overview of team-based learning (TBL), highlighting its benefits to pharmacy education. Franks will describe key components of TBL, including team formation, the readiness assurance process, and team application exercises. Perceived barriers and potential solutions will also be reviewed.

This webinar, designed for individuals participating in the Teaching and Learning Academy or for any faculty member interested in TBL, provides an efficient way to bring a real-time, interactive learning experience right to your home or office. ACCP Academy enrollees can register for the webinar at no cost, and the fee is only \$69.00 for ACCP members and \$99.00 for ACCP non-members. Although participants need not be enrolled in the ACCP Academy to attend the webinar or receive continuing pharmacy education credit, only enrollees in the Teaching and Learning Certificate Program will receive credit toward their certificate. To receive 1.0 hour of continuing education credit, attendees must register and attend the webinar on January 21.

Registration for “Team-Based Learning” closes at 11:59 p.m. (CST), January 19. Take advantage of this learning opportunity by registering today. Participation in this webinar is limited to 100 registrants.

### **Preparing for a New Leadership Position? Enroll Now in the ACCP Academy Leadership and Management Certificate Program**

The ACCP Academy’s Leadership and Management Certificate Program helps prepare and motivate clinical pharmacists to meet the demands of virtually any leadership position. Established by ACCP in 2007, the program is designed to help participants better lead their personal/professional lives and to guide and inspire their colleagues in the workplace. Participation in this program has enabled leaders in clinical pharmacy to better make the changes necessary to advance their respective missions within a variety of health care environments. A certificate of completion is awarded to participants who complete 26.0 contact hours of coursework, which consist of 18.0 hours of required modules and 8.0 hours of electives. The program’s required modules are as follows:

- Leadership Primer (6.0 hours)
- Module 1: Personal Leadership Development (4.0 hours)
- Module 2: Interpersonal Leadership Development (4.0 hours)
- Module 3: The Attributes of a Leader (4.0 hours)

Elective modules, each consisting of 2.0 contact hours of instruction, are designed to meet the select needs of program participants, focusing on specific areas of leadership and management not covered in depth by the required modules.

Past enrollees in the ACCP Academy’s Leadership and Management Certificate Program have found themselves well positioned to assume new leadership positions. A total of 12.0 hours of program courses will be offered Friday, April 10, and Saturday, April 11, in conjunction with the ACCP Updates in Therapeutics® 2015 meeting in Rosemont, Illinois.

Visit the ACCP Academy today at [www.accp.com/academy](http://www.accp.com/academy) to enroll and learn more about the Leadership and Management Certificate Program. To view the complete schedule and register for Leadership and Management programming this spring, visit [www.accp.com/acad](http://www.accp.com/acad).

### **Have You Considered Applying to the 2015 FIT or MeRIT Program?**

During the next 2 weeks, the ACCP Research Institute (RI) will host informational conference calls for anyone interested in learning more about each of the RI’s programs for pharmacist-investigator development: the Focused Investigator Training (FIT) Program and the Mentored Research Investigator Training (MeRIT) Program. The inaugural MeRIT Program will be held concurrently with the 2015 FIT Program, July 9–13, 2015, at the University of Georgia College of Pharmacy in Athens, Georgia. Faculty mentors from both programs will be present during each call to both provide an overview of the program and answer participants’ questions about the programs and their application/selection processes. The primary purpose of each conference call is to help familiarize potential applicants with each program’s process and outcomes. Those interested in learning more about the FIT and MeRIT programs need participate in only one of the informational calls scheduled for each of the desired programs.

FIT informational conference calls:

- Tuesday, January 20, 2015: 4:00–4:30 p.m. (EST)
- Wednesday, February 4, 2015: 7:00–7:30 p.m. (EST)

MeRIT informational conference calls:

- Wednesday, January 21, 2015: 4:00–4:30 p.m. (EST)
- Tuesday, February 3, 2015: 7:00–7:30 p.m. (EST)

To confirm your participation and receive the dial-in information for the desired call, please contact Carla Scarborough at [cscarborough@accp.com](mailto:cscarborough@accp.com) at least 24 hours before a scheduled call. Letters of intent to apply for either program are due by February 28, and the FIT and MerIT program applications will close on March 31, 2015. For information about the FIT and MerIT programs, please visit <http://www.accpri.org/investigator/>.

## President's Column

*Judith Jacobi, Pharm.D., FCCP,  
FCCM, BCPS*

### Practice Transformation— Show Us the Data

As we start the New Year, most of us have at least a small amount of optimistic anticipation of the events and activities that lie ahead both professionally and personally. I share that positive view of potential events as we consider the prospect of elevating the stature of pharmacists as key providers in the health care realm. We may also have some trepidation regarding the unknown that awaits us, recognizing that the inertia that has plagued the government may persist. Even though ACCP will continue to collaborate with legislators, individual clinical pharmacists should focus on the factors within our own spheres of influence.

We are looking for formal recognition of the contributions we make every day. For my practice in a critical care setting, it is difficult to measure my contributions. I focus extensively on preventing poor outcomes and find it difficult to measure what I have prevented through my patient-focused interactions—reducing bacterial resistance through good antimicrobial stewardship, maximizing response through dosing individualization, and avoiding expenses or adverse reactions by discontinuing unneeded medications and laboratory tests. As members of the care team, we all take credit for positive outcomes. We measure costs per case and lengths of stay and survival indices for our patients. But how do I prove my individual impact as a member of the team?

Similar challenges exist in the outpatient setting, but in some ways, the opportunity to create new practices and transform existing practices may better allow us to take a fresh perspective and proactively design data collection into these new activities. Even though the outcomes data are not as concrete as our administrators may desire, resources such as the Lessons Learned from Six Minnesota Health Systems on Integrating

Medication Management are required reading (see <http://z.umn.edu/mncasestudies>). These case studies of practice transformation focus on key topics, including how external influences and recognition of pharmacists as an untapped resource can be used and how the initiation of Part D services for eligible patients led to broader activities and comprehensive medication management (CMM). Illustrating this opportunity, a summary of medication therapy management (MTM) services shows that although 25% of Medicare Part D beneficiaries were eligible for MTM, only 11% of all Part D enrollees were part of a program in 2012, and only 1% had received a comprehensive medication review (see <http://www.avalere.com/expertise/managed-care/insights/few-medicare-beneficiaries-receive-comprehensive-medication-management-serv>). Eligible patients had at least two chronic conditions, were taking at least three medications, and reported medication expenses of more than \$3100 annually. For the top 10 Part D plans, enrollment rates ranged from 4.6% to 17.5%. Although a variety of new models for chronic care are emerging, it is clear that significant opportunities remain for pharmacists to initiate MTM services at a minimum and CMM as a standard. Maximizing the pharmacist's value to patients eligible for Part D services may be a stepping-stone to Medicare recognition of CMM as advocated by ACCP.

Regardless of progress on the Part D front, we must seek to measure the impact of CMM (as deployed in team-based, patient-centered care settings) on patient outcomes and medical costs and seek the collaboration of key insurers and other stakeholders in doing so. Team-based care, collaborative practice agreements, quality measurements, and shared accountability are factors cited in the previously mentioned case studies from Minnesota. Although internal result reporting can help support expanded pharmacist services, external reporting is clearly needed, as shown in a recent review of MTM services (see Viswanathan M, Kahwati LC, Golin CE, et al. Medication therapy management interventions in outpatient settings. *JAMA Intern Med* 2015;175:76-87.). In this review, evidence was insufficient for most health outcomes of interest, given the heterogeneity of the patient populations cared for and the inconsistency and imprecision of the clinical interventions used. Indeed, those working in health systems looking for an impact of MTM on hospital admission rates may be disappointed after reviewing these data. To address these insufficiencies, the authors called for future research to control for the underlying variabilities in populations, interventions, and outcome measures.

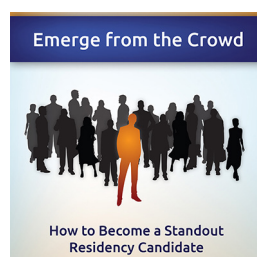

Although more proof of the clinical pharmacist's contributions to the care team is needed, some evidence is emerging. A study of hypertension management with a care team showed that the addition of a pharmacist alone,

or a pharmacist and a nurse, led to a median of 22% and 16% of patients with controlled blood pressure, respectively, compared with 12% in the overall population (see Proia KK, Thota AB, Njie GJ, et al. Team-based care and improved blood pressure control: a community guide systematic review. *Am J Prev Med* 2014;47:86-99). Key design features included the ability of team members to make independent changes to medications or to make recommendations and implement changes after provider approval.

New support for transformative initiatives has been made available to clinicians through the Affordable Care Act. The Transforming Clinical Practice Initiative launched by the Centers for Medicare & Medicaid Services will facilitate the transition to value-based, patient-centered, and coordinated health care services (see <http://innovation.cms.gov/initiatives/Transforming-Clinical-Practices/>). I am hopeful that the groups selected to participate in this program will help develop tools and mechanisms that can better document and measure the contributions of clinical pharmacists with respect to improved patient outcomes, cost savings, and avoidance of hospitalizations. Although this program will offer technical assistance and expertise from networks of clinicians and other stakeholders, ongoing support for the transformation of practices is also a high-priority initiative for ACCP.

Bottom line: there is an urgent need to demonstrate how clinical pharmacists improve the care of patients and meaningfully affect medication-related outcomes in patient-centered, team-based settings. Toward that end, let's take a fresh look now at generating meaningful evidence of the value of CMM.

### Attention Students: Register Today for "Emerge from the Crowd: How to Become a Standout Residency Candidate"

Are you planning to complete a residency after graduation? You probably know that of the 4142 PGY1 applicants who participated in the ASHP Resident Matching Program in 2014, about 36% did not match with a program.<sup>1</sup> As competition

among residency applicants continues to increase, it is important for students to know what type of candidates residency programs look for and learn the steps that can be taken now to distinguish themselves from the crowd.

Plan to join ACCP at Chicago's Hyatt Regency O'Hare this April for an informative and interactive program titled "Emerge from the Crowd: How to Become a Standout Residency Candidate." This unique program is designed

to help first-, second-, and third-year pharmacy students maximize their ability to secure a residency position upon graduation. Students attending this exciting program will receive 12.0 hours of interactive programming over 2 days. The program will begin on Saturday, April 11, and conclude on Sunday, April 12, running alongside the ACCP Updates in Therapeutics® courses.

Students will learn from experts in the field of clinical pharmacy about the steps that they can take now to rise above the competition when applying for a residency during their final academic year. Topics will include maximizing experiential education opportunities, engaging in scholarly activity, and navigating the final year of pharmacy school and the residency application process, with a workshop on CV writing and interviewing skills. Attendees will also have an opportunity to sit down face-to-face with current residents and residency program directors to gain from their perspectives and advice during a special roundtable session.

Register today at [www.accp.com/ec](http://www.accp.com/ec). Questions? Contact us at (913) 492-3311 or e-mail at [accp@accp.com](mailto:accp@accp.com).

1. American Society of Health-System Pharmacists. ASHP Resident Matching Program, 2014. Available at [www.natmatch.com/ash-prmp/](http://www.natmatch.com/ash-prmp/). Accessed January 14, 2015.

### ACCP Member Spotlight: Michael Gillette

Dr. Michael Gillette is a clinical pharmacy specialist in cardiology at the Michael E. DeBakey VA Medical Center in Houston, Texas. Many people and moments in his life have influenced his career in numerous ways, but his brother first introduced the profession of pharmacy to him, and

his undergraduate chemistry professors were also instrumental in supporting and preparing him for pharmacy school. He attended Nova Southeastern University College of Pharmacy, where many faculty and preceptors helped him grow professionally and encouraged him to consider pursuing residency training. After graduation, he first gained valuable experience working as a clinical/staff pharmacist for 2 years in the VA setting before completing an accredited PGY1 pharmacy practice residency with an emphasis in acute care and a 2-year postdoctoral fellowship in cardiology at the North Florida/South Georgia Veterans Health System. He is a recent graduate of the ACCP Research and Scholarship Academy and is board certified in both pharmacotherapy and ambulatory care pharmacy.

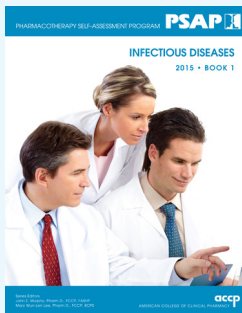

In his current role, his patient care responsibilities include rounding as a member of the interdisciplinary team in the cardiac care unit and on the inpatient

cardiology consult team. He also manages a pharmacist-run heart failure clinic once a week and precepts pharmacy students and residents. Gillette's interests lie in providing optimal patient care as well as conducting research related to the use of pharmacotherapy for treating various cardiovascular diseases. His administrative responsibilities include being a member of the hospital's critical care committee and assisting with the development and implementation of protocols related

to cardiovascular pharmacotherapy. In addition, he participates in investigator-initiated research projects and collaborates with other providers in clinical trials.

Gillette enjoys the daily challenges of being a clinical pharmacy practitioner, and he chose this as a career path because it gave him the ability to directly and positively influence patient care. Some sage advice he would offer to future clinical pharmacists is to always take advantage of every opportunity and experience to

## Next PSAP Release Is *Infectious Diseases*

The care of patients with infectious diseases changes rapidly because of the evolution of pathogens, emergence of new pathogens, and development of new anti-infectives. *Infectious Diseases*, the next release from ACCP's popular Pharmacotherapy Self-Assessment Program (PSAP), presents the latest evidence-based information on the pharmacologic management of a variety of chronic conditions, from long-time scourges such as tuberculosis to the revolution in hepatitis C treatment.

*Infectious Diseases* will be released January 15. The book has four learning modules offering a total of 25.5 BCPS recertification credits. Leading the 2013–2015 edition are PSAP Series Editors John E. Murphy, Pharm.D., FCCP, FASHP, and Mary Wun-Len Lee, Pharm.D., FCCP, BCPS.

*Infectious Diseases* Faculty Panel Chair Ian R. McNicholl, Pharm.D., FCCP, BCPS-AQ ID, AAHIVP, and a team of authors have developed chapters on:

*Infectious Diseases* Faculty Panel Chair Ian R. McNicholl, Pharm.D., FCCP, BCPS-AQ ID, AAHIVP, and a team of authors have developed chapters on:

- Skin and Soft Tissue Infections
- Intra-abdominal Infections
- Bone and Joint Infections
- Antimicrobial Resistance
- Invasive Fungal Infections
- Tuberculosis
- Infections in Patients with Malignancies
- Advances in Hepatitis C Therapy
- HIV Infection
- CNS Infections in Immunocompetent Hosts
- Food- and Waterborne Illnesses
- Quality and Safety in Antimicrobial Practice

PSAP releases are online books (PDFs) with interactive features such as intra-document links from the table of contents; external links to official guidelines,

tools, and resources; and in-text citations linked to the major research compilers. Purchasers of the Print Package also get a soft-cover print book. The E-media Package supplements the online book with a tablet-friendly version and the popular PSAP Audio Companion. The All-Format Package includes all the available learning formats.

PSAP 2013–2015 books are available singly or as a six-book series. Other books in the series are Cardiology/Endocrinology, Special Populations, Critical and Urgent Care, Chronic Illnesses, and CNS/Pharmacy Practice. For specific release dates, available CPE credits, and chapter samples in different formats, or to place your online order, visit the ACCP Online Bookstore. Books are priced as follows; shipping and handling charges apply only to the Print and All-Format Packages.

### PSAP 2013–2015

SINGLE BOOKS	Member Price	Nonmember Price
Standard Release (Online Book)	\$65	\$90
E-media Package	\$90	\$130
Print Package	\$90	\$155
All-Format Package	\$105	\$195
SIX-BOOK SERIES	Member Price	Nonmember Price
Standard Release (Online Book)	\$285	\$385
E-media Package	\$385	\$555
Print Package	\$385	\$585
All-Format Package	\$445	\$785

ACCP is accredited by the Accreditation Council for Pharmacy Education (ACPE) as a provider of continuing pharmacy education. The Board of Pharmacy Specialties (BPS) has approved PSAP for use in Board Certified Pharmacotherapy Specialist (BCPS) recertification.

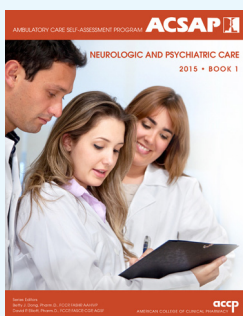

grow and evolve. He notes that while in school, he never thought he would eventually be practicing in cardiology, and although concepts didn't make sense in school, he was fortunate to have the opportunity after graduating to practice under clinical pharmacists and physicians who were able to fill in the missing gaps in an area that was so perplexing at first but then just fell into place. He commented, "Sometimes, you learn from the positive experiences and sometimes the negative, but the great thing is that you learn. Take the opportunity to look back on your mistakes and self-reflect so that you don't repeat them." One thing that has helped him significantly is his experience in networking with others to seek advice, ideas, and even encouragement when necessary. "A good mentor," he

recounts, "is certainly worth his/her weight in gold. Work hard in all that you do; nothing good ever came to those who didn't put forth the effort or ever try." Finally, he advises hopeful clinical pharmacists to find an area within pharmacy that is enjoyable because, as he says, "you'll be doing it for a long time and you'll be successful at doing things that you enjoy. Most of all, great things happen as a generous response to prayer."

Gillette also credits a few others as helpful influences: the numerous patients he has encountered, who have given him necessary experience and both positive and negative feedback; his family and friends, who have been a longitudinal cord of support; and lastly, God, who has graciously coordinated everything that has led him to where he is today.

## ACSAP Releases *Neurologic and Psychiatric Care*

Activities related to the prevention and management of cardiovascular disease are a constant for the ambulatory care clinical pharmacist. *Neurologic and Psychiatric Care*, the January 15 release from the Ambulatory Care Self-Assessment Program (ACSAP), presents evidence-based updates on a wide range of these disorders. The book contains three learning modules with an available 17.5 BCACP recertification credits.

The content of *Neurologic and Psychiatric Care* was developed under the leadership of Faculty Panel Chair Jack J. Chen, Pharm.D., BCPS, CGP. Series editors for this ACCP home-study program are Betty J. Dong, Pharm.D., FCCP, FASHP, AAHIVP, and David P. Elliott, Pharm.D., FCCP, FASCP, CGP, AGSF. The book contains chapters on:

- Fibromyalgia
- Headache
- Dementia
- Depressive Disorders
- Posttraumatic Stress Disorder
- Schizophrenia
- Autism Spectrum Disorder
- Insomnia
- Substance Abuse
- Psychiatric Medication Therapy Management

All ACSAP chapters are fully referenced, with online links to literature compilers such as PubMed.

Hypertext links provide ready access to clinical practice guidelines, official recommendations, and patient assessment tools. New graphic features focus on pivotal studies, patient care scenarios, and take-home points that can be readily integrated into clinical practice.

ACSAP 2013–2015 books are available singly or as a six-book series and in two format packages. Other books in the series are Pulmonary/Preventive Care, Infection Primary Care, Endocrinology/Rheumatology, Cardiology Care, and Women's and Men's Care. For specific release dates, available CPE credits, and program numbers for each book, or to place your online order, visit the [ACCP Online Bookstore](#). Books are priced as follows.

### ACSAP 2013–2015

SINGLE BOOKS	Book Format	Member Price	Nonmember Price

E-Media Package	Online book PLUS full text, figures, and SAQs for e-reader, phones, tablets	\$80	\$115
SIX-BOOK SERIES	Book Format	Member Price	Nonmember Price
Standard Release	Online book (printable PDFs)	\$285	\$385
E-Media Package	Online book PLUS full text, figures, and SAQs for e-reader, phones, tablets	\$345	\$485

The Board of Pharmacy Specialties (BPS) has approved ACSAP for use in Board Certified Ambulatory Care Pharmacist (BCACP) recertification.

## Register Now for the ACCP/ASHP Oncology Pharmacy Preparatory Review and Recertification Course

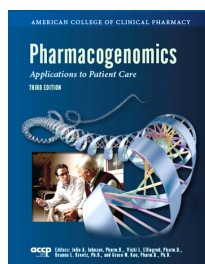

Mark your calendar for the always-popular ACCP/ASHP [Oncology Pharmacy Preparatory Review and Recertification Course](#), to be held in Dallas, Texas, April 30 – May 2, 2015. This program is designed to help pharmacists prepare for the Board of Pharmacy Specialties (BPS) Oncology Pharmacy Specialty Certification Examination. Even if you are not planning to sit for the BPS examination, you may still be interested in assessing your knowledge and skills in the area by taking advantage of this advanced specialty program. The course is an excellent review for oncology practitioners seeking to remain current in all aspects of this practice area.

This course is accredited for 27.0 contact hours of continuing pharmacy education by the Accreditation Council for Pharmacy Education, and it has been approved by BPS for recertification credit for board-certified pharmacists. Course enrollment is limited to 275 participants, so be sure to register early to reserve your place. Register by March 20, 2015, to take advantage of the discounted early registration fee.

A room block has been reserved for Oncology Pharmacy Preparatory Review and Recertification Course attendees at the Westin Galleria Dallas hotel at the special rate of \$175 per night for single or double occupancy, plus tax. The special rate includes complimentary in-room Internet service. The hotel will accept reservations at this special rate until Thursday, April 9, 2015, or until the group block is sold out, whichever occurs first.

This course is part of a professional development program offered by the American College of Clinical Pharmacy and the American Society of Health-System Pharmacists. Visit the ACCP Web site, <http://www.accp.com/meetings/onc15/>, for complete meeting details.

### Pharmacogenomics: Applications to Patient Care, Third Edition, Now Available for Preorder!

In January 2015, the American College of Clinical Pharmacy will publish the third edition of *Pharmacogenomics: Applications to Patient Care*, edited by Julie A. Johnson, Vicki L. Ellingrod, Deanna L. Kroetz, and Grace M. Kuo. The first edition of *Pharmacogenomics: Applications to Patient Care*, published

in 2004, combined the basics of pharmacogenomics with disease-specific applications to give students and practitioners a solid foundation for understanding the basic science of pharmacogenomics and the skills to integrate pharmacogenomics into their daily clinical practice. The second edition contained enhanced chapters on pharmacogenomics science and clinical management, written by leaders in applied pharmacogenomics. For the third edition, the focus has shifted to the implementation of these pharmacogenomic tests into clinical practice, with clinical cases guiding the implementation process. Whereas the first two editions focused on an exhaustive literature review for each topic, the third edition highlights the genetic variants that are currently ready to be translated into practice. Individuals from different practice areas, disciplines, and research environments participated in the publication of the third edition in an effort to provide readers with actionable steps that can be used in practice as the era of personalized medicine continues to evolve.

This new edition is available for preorder from the ACCP On-site Bookstore, and shipping will begin on or before January 30, 2015.

### ACCP eBooks: Your Gateway to the World of Clinical Pharmacy

Every holiday season, smartphones, tablets, and laptops are given as gifts, and January is the perfect time to add new content to those devices. Whether you are in the pharmacy, hospital, or university; with a patient, trainee, or student; traveling; or relaxing at home, your favorite ACCP publication is always just a few clicks away. Several popular titles from the ACCP Online Bookstore are available as eBooks, placing a wealth of clinical pharmacy knowledge at your fingertips. Bookmark pages, highlight terms, search for keywords, and read on the go from any desktop, laptop, or Android or iOS device. Purchase the eBook and download it on up to five devices.

#### Available eBooks

*ACCP Ambulatory Care Pharmacist's Survival Guide, Third Edition*

*Clinical Faculty Survival Guide*

*How to Develop a Business Plan for Pharmacy Services, Second Edition*

*Nourishing the Soul of Pharmacy: Stories of Reflection*

*Pediatric Pharmacotherapy*

*Pharmacist's Guide to Lipid Management, Second Edition*

*Resident Survival Guide*

*Re-visioning Professional Education: An Orientation to Teaching*

*The ACCP Field Guide to Becoming a Standout Pharmacy Residency Candidate*

## ACCP Volunteer Recognition

The following individuals have made significant contributions to ACCP during the past 2 years. ACCP congratulates these individuals for being nominated by their peers and thanks them for their significant contributions to the organization.

### Cardiology PRN

Craig J. Beavers, Pharm.D., AACC, FAHA, BCPS-AQ Cardiology, CACP, Co-chair, Cardiovascular Team Work Group for Clinical Pharmacists for the American College of Cardiology; Residency Program Director, Postgraduate Year Two Cardiovascular Residency, TriStar Centennial Medical Center; Director of Cardiovascular Services, Clinical Services Group, Hospital Corporation of American; Cardiovascular Clinical Pharmacy Specialist, TriStar Centennial Medical Center; Assistant Professor, University of Tennessee College of Pharmacy and Lipscomb University College of Pharmacy

### Geriatrics PRN

Olga Hilas, Pharm.D., MPH, FASCP, BCPS, CGP, Associate Professor/Industry Professional, Clinical Pharmacy Practice, St. John's University College of Pharmacy & Health Sciences, Queens, New York

### Gateway College of Clinical Pharmacy

Erica Crannage, Pharm.D., BCPS, BCACP, Assistant Professor of Pharmacy Practice, Division of Ambulatory Care, St. Louis College of Pharmacy, St. Louis, Missouri

Visit <http://www.accp.com/membership/vrp.aspx> to view the current listing of volunteers recognized and their specific contributions to the College.

## February 15 Is the Deadline for 2015 Global Conference Abstracts

All investigators in the fields of clinical pharmacy, clinical pharmacology, and pharmacotherapy, ACCP members and nonmembers alike, are invited to submit abstracts of papers to be considered for presentation at the ACCP Global Conference on Clinical Pharmacy in San Francisco, California, October 17–21, 2015.

The deadline for abstract submissions for International Clinical Pharmacy Practice, International Clinical Pharmacy Education and Training, Clinical Pharmacy Forum, and Original Research is **Sunday, February 15**. The deadline for Student, Fellow, and Resident Research-in-Progress is **July 1, 2015**. To submit your abstract or to obtain more information, visit <https://accp.confex.com/accp/2015am/cfp.cgi>.

Posters from all categories will be distributed across the poster display sessions/days throughout the meeting. Poster session/day assignments will be made by August 15, 2015. All abstracts accepted for poster presentation, except for "Encore" presentations, will have abstracts published online in Pharmacotherapy. "Encore" abstracts will be published full-text in the Meeting Guide.
