Crowned 2020 ACCP Clinical Research Challenge Champion

Competition in the 2020 ACCP Clinical Research Challenge (CRC) began on February 6, with 86 teams vying for a spot in round 2: Letter of Intent (LOI) Submission. Teams achieving the top 40 scores after the initial online Journal Club round submitted an LOI. Teams achieving the top 20 scores after round 2 were invited to compete in round 3: Research Protocol Development. Teams in round 3 were tasked with developing a research proposal designed to demonstrate the clinical pharmacist’s value in an area of endocrinology and were provided with a specific research environment in which to formulate their proposals.

The proposals were reviewed by the CRC Review Panel, and submissions ranking in the top-thirds were referred for evaluation and selection of awards by the CRC Oversight Panel. Please join ACCP in congratulating the finalist teams and the award winners.

**2020 ACCP Clinical Research Challenge Finalist Teams:**

- Massachusetts College of Pharmacy and Health Sciences University School of Pharmacy – Boston Campus
- Oregon State University College of Pharmacy
- University of California San Francisco School of Pharmacy
- University of Connecticut School of Pharmacy
- University of Pittsburgh School of Pharmacy
- University of Southern California School of Pharmacy
- University of Tennessee Health Science Center College of Pharmacy
- University of Utah College of Pharmacy

**2020 ACCP Clinical Research Challenge Awards:**

**Championship Team: Oregon State University College of Pharmacy**

Proposal Title: Preventing the Transition from Gestational to Type 2 Diabetes Mellitus: A Clinical Pharmacy Approach

Student Team Members: Xueer Li, Justin Donat, Brandon Gill
Faculty Liaison: Adriane Irwin, Pharm.D.

**Second-Place Team: Massachusetts College of Pharmacy and Health Sciences University School of Pharmacy – Boston Campus**

Proposal Title: Pharmacist-Led Insulin Management of Pregnant Women Through Telemedicine
Student Team Members: Melanie Lam, Jiancheng Mo, Thoma Qafko
Faculty Liaison: Roseann Gammal, Pharm.D., BCPS

**Third-Place Team: University of California San Francisco School of Pharmacy**

Proposal Title: Research Proposal: Impact of Student Pharmacist–Led Educational Intervention on the Management of Gestational Diabetes (SPEID)
Student Team Members: Alex Huang, Connie Do, Leanne Liu
Faculty Liaison: Tina Denetclaw, Pharm.D., APh, BCPS

**Fourth-Place Team: University of Connecticut School of Pharmacy**

Proposal Title: Effects of a Clinical Pharmacy Program on Influenza Vaccination Rates in Pregnancy
Student Team Members: Ming Zhang, Yifeng Wang, Mai Vestergaard
Faculty Liaison: William Baker Jr, Pharm.D., FCCP, FACC

Teams with the top three research proposal submissions are invited to present their research design during a poster session at the 2020 ACCP Annual Meeting, October 24–27, in Dallas, Texas. In addition, each student member of these teams will receive a complimentary Annual Meeting registration. For complete competition information, click [here](#).

Please join ACCP in recognizing and thanking the many ACCP members who helped advance this important program for the College’s student members.
2020 CRC Oversight Panel
Sandra Benavides, Pharm.D., FCCP
Doug Fish, Pharm.D., FCCP, BCPS-AQ ID
Anne Hume, Pharm.D., FCCP, BCPS

Timothy Gladwell, Pharm.D., BCPS, BCACP

ACCP Joins CEO Action for Diversity & Inclusion
Signals Launch of Organization-Wide Efforts to Advance Diversity and Increase Inclusivity

On June 11, ACCP signed a pledge to advance diversity and inclusion across the organization. In becoming a signatory of CEO Action for Diversity and Inclusion, ACCP joins more than 900 companies, universities, and other organizations committed to establishing a diverse and inclusive culture that increases creativity and innovation, promotes higher-quality decisions, and enhances organizational growth.

In making this commitment, ACCP has pledged to:
- Foster complex/difficult conversations about diversity and inclusion across the organization
- Provide unconscious bias education for members, leadership, and staff
- Develop a strategic inclusion and diversity plan
- Disseminate best – and unsuccessful – practices toward achieving a more diverse and inclusive organization

This action follows the College’s June 1 release of an ACCP statement noting its commitment to diversity, equality, and inclusion and its June 5 signing of a multi-organizational communication condemning racism and discrimination on behalf of the pharmacy profession. At its June 10 meeting, the Executive Committee of the Board of Regents reflected on ACCP’s core values, mission, and longstanding commitment to equality. In doing so, the committee called for swift and meaningful action to examine the current state of organizational diversity/inclusion and develop a strategic approach to fostering College-wide dialogue and action on this issue.

CALL FOR PAPERS
CLINICAL PHARMACY EDUCATION & TRAINING
SUBMISSIONS DUE JULY 15, 2020
ACCP Executive Director Michael Maddux, serving as the organization’s CEO signatory, commented:

ACCP’s goals align closely with those of CEO Action for Diversity & Inclusion, and we are committed to building a productive, diverse, and inclusive organization. Projections indicate that by 2050, there will be no racial or ethnic majority in the United States. Therefore, taking action now to enhance diversity and inclusion is of paramount importance to ensuring organizational health. We recognize that diversity stimulates creativity and innovation, strengthens decision-making, and enhances organizational quality. Of course, like any critical organizational priority, advancing diversity and inclusion will require a thoughtful strategy, widespread dialogue, a purposeful focus, and sustained action. Therefore, this priority will undoubtedly be a major topic of discussion during next month’s Board of Regents meetings, and we anticipate that it will be an important component of the new ACCP strategic plan. Change begins at the leadership level—we hope to capitalize on the board’s individual and collective voices to advance diversity and inclusion across the organization. Of note, President-Elect Jimmi Hatton Kolpek has declared diversity, inclusion, and health equity as central underpinnings of her 2021 presidential theme.

It’s expected that ACCP will contribute to and learn from the actions of other organizations involved in CEO Action for Diversity & Inclusion. Additional communications will be released as the College seeks to engage its members in addressing these critical societal issues.

### Virtual Poster Option Available for the ACCP Annual Meeting Abstract Submission Deadline Extended

ACCP will offer a virtual poster presentation option for the 2020 ACCP Annual Meeting, October 24–27, in Dallas, Texas, to accommodate those who may have travel restrictions. The College has also extended the deadline to submit an abstract for live or virtual presentation. Click here for details and to submit an abstract. ACCP will offer the option to select between a live and virtual presentation after abstract acceptance.

#### Important Dates:
- July 30, 2020 – Submission deadline for all abstract categories, except Research-in-Progress
- August 31, 2020 – Submission deadline for Research-in-Progress abstracts
- September 15, 2020 – Abstract acceptances will be announced

---

**ACCP Journals Respond to COVID-19**

*Leigh Ann Ross, Pharm.D., FCCP, BCPS
Chair, Pharmacotherapy Publications, Inc. Board of Directors*

The increased pace of scientific investigation and the rapid dissemination of data through traditional channels of peer review and publication during the current pandemic have been remarkable. What has often taken months to occur has in many cases been reduced to weeks or days. The biomedical publishing industry has widely embraced its role in the SARS-CoV-2 pandemic.

—C. Lindsay DeVane, Pharmacotherapy, Editor-in-Chief

ACCP’s journals have responded with an expedited, yet uncompromising approach during the current SARS-CoV2 pandemic. The editors-in-chief of both journals have invited and composed editorials that provide perspectives on clinical pharmacy practice and drug therapy concerns that have emerged as a result of COVID-19. In addition, reputable authors have submitted case reports and review articles to guide drug therapy management, patient care, clinical pharmacy services, and education.

Before the SARS-CoV2 pandemic, both journals had demonstrated growth and were operating efficiently. Manuscript submissions were high, and authors were receiving peer reviews and decisions within 25 days, on average. Because of this strong foundation, few changes were necessary to provide an even more rapid review and publication of COVID-19–related manuscripts. Wiley, the publisher of ACCP’s journals, has made all of both journals’ COVID-19 manuscripts free and accessible to anyone who wishes to download them, despite member or institutional access.

Manuscripts continue to be submitted, but at the writing of this article, Pharmacotherapy and the Journal of the American College of Clinical Pharmacy have published or accepted the following:

**Pharmacotherapy Editorials**
- Bauman JL, Tisdale JE. Chloroquine and Hydroxychloroquine in the Era of SARS-CoV2: Caution on Their Cardiac Toxicity.
- DeVane CL. The Role of Scientific Publishing in the SARS-CoV-2 Pandemic.
- Lodise TP, Rybak MJ. COVID-19: Important Therapy Considerations and Approaches in This Hour of Need.
Pharmacotherapy Reviews of Therapeutics

Pharmacotherapy Case Reports
  - Corresponding ACCP Journals Podcast – Episode 30

Pharmacotherapy Letters to the Editor

JACCP Editorials
- Gross AE, MacDougall C. Roles of the Clinical Pharmacist During the COVID-19 Pandemic.
  - Corresponding ACCP Journals Podcast – Episode 29
  - Responses:
    - Bhat S, Kehasse A. Additional Clinical

Pharmacists Roles During COVID-19
- Barlow B, Barlow A, Sikora Newsome A. Comment on Gross and MacDougall “Roles of the clinical pharmacist during the COVID-19 pandemic.”
- Gross AE, MacDougall C. Authors’ Response to Barlow et al.
- Fan A, Kamath M. Comment on Gross and MacDougall “Roles of the clinical pharmacist during the COVID-19 pandemic.”

JACCP Clinical Pharmacy Forum

JACCP Letters to the Editor

A special thank-you to the ACCP Journals’ editors-in-chief, editorial teams, reviewers, and authors who continue to ensure that ACCP members and both journals’ readerships are informed during this challenging time and that pharmacy roles and issues related to the current pandemic are highlighted. The ACCP Journals team maintains this commitment to the rapid dissemination of high-quality publications as we move forward,
and we appreciate your support. We encourage you to follow ACCP Journals on Twitter (@JACCPJournal, @PharmacoJournal), Facebook (@pharmacotherapy), and LinkedIn (ACCP Journals) to be alerted to new manuscripts as they are released – or sign up to receive ACCP Journals content alerts from Wiley Online Library.

Washington Report
ACCP Discusses the Impact of Racial Intolerance on Population Health

John McGlew
Director of Government Affairs

The refrain “Words matter” is often heard in our D.C. office. This is a reminder that, in the business of government and policy, legislative and regulatory language is our primary tool – one that we must apply with appropriate, rigorous accuracy.

In the same spirit, the simple statement “Black lives matter” must be heard in the context of a reality in which social determinants are a scientifically significant factor in the health and well-being of all Americans and race is a major contributing factor to these social determinants. However, the grim data emerging from the ongoing COVID-19 crisis reveal the shocking extent of black Americans’ health disparities and starkly illustrate how often their lives seemingly don’t “matter” as much as those of their counterparts.

As we reflect on those who have sacrificed during this tumultuous period, it is vital that we focus on the disproportionate burden borne by African Americans and all who suffer as a consequence of racial injustice across society. As stated in our country’s Declaration of Independence and embodied in ACCP’s core values, each American has the right to a safe and healthy life. Yet racial injustice contributes to the denial of a healthy and safe life for so many Americans.

Words matter. To stand in solidarity with those whose lives are compromised every day by racial discrimination and intolerance, ACCP released the following statement on June 1:

ACCP celebrates the diversity of our members and staff. We stand together in our commitment to a culture of equality and inclusion. Racism and intolerance of any kind are antithetical to ACCP’s core values and have no place in health care or society.

ACCP was also proud to join with other organizations on June 5 in issuing a multi-organizational statement on behalf of the profession of pharmacy denouncing racism and intolerance, led by the National Pharmaceutical Association. A copy of the statement is available here.

Government and Professional Affairs June Advocacy Wrap-Up

Comments to Senate HELP on COVID-19 Testing
In response to an ongoing series of hearings into the coronavirus pandemic held by the Senate Committee on Health, Education, Labor and Pensions (HELP), ACCP submitted a statement highlighting the vital contributions of board-certified clinical pharmacists in supervising a multifaceted process that connects patients and their extended care teams with clinical labs, state and federal public health departments, and other appropriate stakeholders.

The statement builds on the interprofessional communication that we submitted in March that called on Health & Human Services to provide additional guidance on pharmacist safety related to COVID-19 testing. In our comments to HELP, we called on the committee to seek opportunities to expand the integration of clinical pharmacists’ services across community practice settings. Click here to read the statement in full.

Multi-Stakeholder Student Loan Effort Continues
Expanding on the pharmacist-led effort to seek clarification on student loan forgiveness language, ACCP joined with a coalition of provider organizations and health care stakeholders to support the Strengthening the Public Health Workforce Act. Click here to read the interprofessional stakeholder letter.

GTMRx Webinars Highlight ACCP Members at the Heart of Medication Optimization
The exciting work of the Get the Medications Right Institute (GTMRx) continues to gain momentum. GTMRx brings together several national thought-leaders in a multidimensional effort that seeks to engage key stakeholders in advocating to Congress, CMS, and other payers on the need for tools, data, practice standards, and implementation resources to advance medication optimization through team-based practice.

ACCP members are encouraged to sign up as members of GTMRx to receive updates and access to exclusive programming. Click here to join this exciting effort today.

GTMRx members had special access to a recent webinar featuring ACCP member Melissa Badowski, Pharm.D., MPH, FCCP, BCIDP, BCPS, AAHIVP, Clinical Associate Professor, Pharmacy Practice, University
ACCP has announced its continued support of the IDEA Collaborative with new content to address educational gaps in the diabetes community.

ACCP is proud to continue its work in collaborating with partners across health care disciplines on the “Innovating Decisions and Empowering Action in Diabetes Management” initiative.

ACCP is extending its commitment to support an interprofessional initiative spearheaded by the American Association of Clinical Endocrinologists that provides innovative programming intended to change how continuous glucose monitoring (CGM) data are interpreted and used by health care practitioners. The Innovating Decisions and Empowering Action in Diabetes Management, or IDEA, project provides a guide for the development and distribution of teaching and learning resources to make use of the best practice standards discussed in the CGM Glucose Pattern Summary and Blood Glucose Pattern Summary reports on providing care for patients with diabetes. The initiative was born out of the idea that as glucose practices and information change, providers will face an evolution in their support of glucose management.

Content for the IDEA project was designed to address educational gaps in the diabetes community, including the underuse of glucose monitoring as part of diabetes management, the frequency with which hypoglycemia goes undetected, and the inability of A1C to capture glycemic excursions. Participation in the programming will hopefully generate new ideas regarding increased shared decision-making and personalized patient care. Phase 2 of the education content is set to be developed and available by the end of 2020. As part of ACCP’s participation in phase 1, pharmacists are still eligible for 3 hours of free continuing education credit by completing the currently available content. The content is hosted on the American Association of Diabetes Educators website and can be accessed here.

ACCP Strategic Planning Activities

ACCP uses a continuous strategic planning process that includes member input, committee and task force charges focused on strategic initiatives, continuous monitoring of progress, and ongoing revisions to the College’s strategic plan as needed. A comprehensive update occurs every 3–5 years. This ongoing, structured approach allows the College to respond to member needs and changing dynamics in the environment while maintaining focus on its long-term goals. The ACCP Board of Regents began work on a comprehensive update to the College’s 2017 Strategic Plan almost a year ago.

Member input is critical to a successful strategic planning endeavor. To inform the 2020 ACCP Strategic Plan, the College has sought member input through several mechanisms over the past year, including an environmental scan, a survey focused on prioritizing and identifying support for initiatives that emerged in the environmental scan, and subsequent qualitative surveys to dive deeper into member perspectives on specific strategic initiatives.

ACCP’s mission and core values remain constant and serve as the guiding principles for all of its strategic and operational initiatives. Critical issues, strategic directions, and objectives are reviewed, revised, and newly developed with each plan update. Critical issues are current concerns vital to the College’s mission. Strategic directions are statements of intent, expressing the College’s approach to addressing a critical issue. Objectives serve as specific, achievable, time-specific actions intended to contribute to the College’s accomplishment of a strategic direction.

Through a review of member input and an environmental scan, the board determined that the three critical issues identified in the 2017 Strategic Plan remain
relevant and applicable. ACCP will therefore continue its focus on developing, advancing, and positioning clinical pharmacists to fully contribute their unique expertise to patient care. Informed by member survey responses and comments, several new strategic directions emerged from the board’s work on updating the College’s strategic plan, including efforts to ensure diversity and inclusiveness, support the growth of clinical pharmacy in the community setting, explore professional development for non–residency-trained pharmacists or those entering career transitions, gain knowledge and skills in establishing new services or other enterprises, and develop future ACCP leaders. In addition, the board retained many ongoing strategic directions, including a continued focus on leading the implementation of comprehensive medication management, providing professional development in research and precision medicine, and contributing to the growth and evolution of clinical pharmacy worldwide. The process of formulating new objectives for each strategic direction began in April and will continue in July, with a review of the final draft of the strategic plan anticipated shortly thereafter. The final version of the plan will be published on the ACCP website and featured in a story in the ACCP Report.

About the Substance Abuse and Mental Health Services Administration (SAMHSA)

Clinical pharmacists working in behavioral health provide a variety of services, from ensuring medication optimization and delivering patient/caregiver education to reducing opioid overprescribing and collaborating with other health care practitioners in the prevention and treatment of substance use disorders in medication-assisted treatment programs. ACCP has partnered with several other organizations, including the Substance Abuse and Mental Health Services Administration (SAMHSA), the American Society of Addiction Medicine (ASAM), and the National Academies of Sciences, Engineering, and Medicine (NASEM) Action Collaborative on Countering the U.S. Opioid Epidemic, to support the goals of expanding behavioral health services and treatment of substance use disorders and providing opportunities for the College’s members to participate in this work.

As the agency within the U.S. Department of Health & Human Services charged with leading public health initiatives related to behavioral health, SAMHSA aims to reduce the impact of substance abuse and mental illness on communities throughout the country. Its work is guided by five core principles: (1) support for the adoption of evidence-based practices; (2) increased access to services for behavioral health and substance use disorders; (3) engagement in outreach to clinicians, patients, and the public; (4) collection, analysis, and dissemination of data to inform policies, programs, and practices; and (5) recognition that the availability of behavioral health and substance use disorder services is integral to health.

Although known to most health care practitioners for its online substance abuse disorder treatment program locator and extensive range of training programs, SAMHSA also provides annual funding opportunities on the basis of the five priorities outlined in its current strategic plan:

- Combating the opioid crisis through expanding prevention, treatment, and recovery support services
- Addressing serious mental illness and serious emotional disturbances
- Advancing prevention, treatment, and recovery support services for substance use
- Improving data collection, analysis, dissemination, and program and policy evaluation
- Strengthening health practitioner training and education

SAMHSA funding opportunities for 2020 cover a wide range of topics related to these priorities, including expanding education on substance use disorders for health care practitioners in training, promoting and integrating behavioral health care into the primary care setting, and improving tribal behavioral health and evaluating this population’s response to opioid misuse disorder treatments. A complete list of current and proposed funding opportunities is available at SAMHSA 2020 grant announcements.

ACCP has been invited by SAMHSA to help recruit clinical pharmacists to participate as peer reviewers for grant applications. The addition of clinical pharmacists to the cadre of peer grant reviewers reflects the need for both a more in-depth assessment of applications involving medication use and an expansion of SAMHSA’s interprofessional collaborations. Peer grant reviewers will analyze applications in relation to the scoring criteria, communicate their evaluations in writing and during group discussions, and work with other reviewers to resolve any significant scoring discrepancies and assemble final comments. All SAMHSA peer grant reviewers will participate in a training program before beginning the assigned work. ACCP members interested in serving as peer grant reviewers are invited to complete the SAMHSA online application form. For members applying to become a SAMHSA grant peer reviewer, ACCP will provide a letter of support. If you would like to include a letter of support in your application, please e-mail your request and a copy of your CV to mbuck@accp.com.
Announcing the NASEM Webinar Series: Caring for People with Mental Health and Substance Use Disorders in Primary Care

The Health and Medicine Division of the National Academies of Sciences, Engineering, and Medicine (NASEM) created the Forum on Mental Health and Substance Use Disorders to provide a structured environment and neutral venue in which to discuss data, policies, practices, and systems that affect the diagnosis and provision of care for people with mental health and substance use disorders. Forum activities emphasize potential opportunities for action and may include expert meetings, public workshops, and webinars; summary publications; and targeted communications and community engagement. Forum members and participants include federal, state, and local government officials; representatives of consumer and family advocacy groups; service providers; payers; policy analysts; researchers; educators; and representatives of relevant professional associations and foundations.

Because of restrictions placed on travel and public gatherings as a result of the COVID-19 pandemic, the workshop hosted by the Forum, originally scheduled to be held in person in Washington, D.C., has been converted into a series of webinars. The webinars will examine approaches for facilitating the delivery of essential components of care for people with mental health and substance use disorders in primary care settings, using three illustrative conditions (depression, alcohol use disorder, and opioid use disorder) as a framework. ACCP is engaged in the Forum’s activities as a sponsoring member, represented by ACCP Director of Policy and Professional Affairs Kathy Pham, and actively participates on the planning committee for this webinar series. ACCP member Carla Cobb, Pharm.D., BCPP, is an invited speaker in the third webinar of this series.

The first webinar, presented on June 3, explored evolving models of care such as accountable care organizations, patient-centered medical homes, and collaborative care arrangements and how essential components of care for mental health and substance use disorders might be induced for these care models. ACCP is engaged in the Forum’s activities as a sponsoring member, represented by ACCP Director of Policy and Professional Affairs Kathy Pham, and actively participates on the planning committee for this webinar series. ACCP member Carla Cobb, Pharm.D., BCPP, is an invited speaker in the third webinar of this series.

Part 2

July 29, 2020: Noon to 3:30 p.m. (ET)

The second webinar will highlight the essential components of care for depression, alcohol use disorders, and opioid use disorders in primary care settings. Register for the second webinar here.

Moderator
- Howard Goldman, M.D., Ph.D., University of Maryland at Baltimore School of Medicine

Speakers
- Frank deGruy, M.D., M.S., University of Colorado School of Medicine
- Sarah Wakeman, M.D., Massachusetts General Hospital and Harvard University
- Richard Saitz, M.D., MPH, FACP, DFASAM, Boston University Schools of Medicine and Public Health
- Lydia Chwastiak, M.D., MPH, University of Washington AIMS Center

The webinar will also discuss the key factors that support or impede the implementation of these essential components of care.

Moderator
- W. Perry Dickinson, M.D., University of Colorado Department of Family Medicine

Speakers
- Laura K. Murray, Ph.D., Johns Hopkins Bloomberg School of Public Health
- David Keller, M.D., University of Colorado School of Medicine
- Stacy Sterling, DrPH, MSW, MPH, Kaiser Permanente Northern California Division of Research
- Suzanne Snyder, LCSW, Access Community Health Network

Part 3

August 26, 2020: Noon to 3:30 p.m. (ET)

The third webinar will explore improving the workforce to support the provision of essential components of care. Register for the third webinar here.

Moderator
- Alexander Ross, ScD, Health Resources and Services Administration, HHS

Speakers
- Phyllis Foxworth, Depression and Bipolar Support Alliance
Carla Cobb, Pharm.D., BCPP, Capita Consulting (ACCP member)
Parinda Khatri, M.D., Ph.D., Cherokee Health Systems

The webinar will also address financing, payment, practice, and systems-level issues, policies, and incentives to support the provision of these essential components of care.

Moderator
Richard Frank, Ph.D., Department of Health Care Policy, Harvard Medical School

Speakers
Kirsten Beronio, JD, National Association for Behavioral Healthcare
Sharon Reif, Ph.D., M.A., Brandeis University
Robert L. Phillips Jr, M.D., MSPH, American Board of Family Medicine

ACCP Student Chapter Annual Report and Award Applications Due June 30

All ACCP student chapters are asked to submit their activities for the Annual Report of Student Chapter Activities to ACCP no later than June 30. Submission of this report is required for chapters to maintain their status as official ACCP chapters. This report provides updated information about ACCP chapter members, officers, and faculty/student liaisons and chapter activities, including membership drives, professional development projects, and participation in ACCP student competitions. Click here to access the current Annual Report of Student Chapter Activities.

Student Chapter Awards
ACCP offers two awards to recognize the outstanding contributions of student chapters and their members: the Outstanding Student Chapter Award and the Outstanding Student Chapter Member Award. Complete information about these awards is available in the ACCP Student Chapter Guide.

Outstanding Student Chapter Award
Chapters that wish to be considered for this award are asked to submit an essay detailing their chapter’s activities and achievements during the past academic calendar year, using the evaluation criteria listed in the essay form as a guide. Click here to access the Outstanding Student Chapter Award application.

Outstanding Student Chapter Member Award
Each chapter is responsible for selecting its own outstanding student chapter member and submitting his or her name to ACCP for recognition. ACCP has created an evaluation rubric for chapters to use in the selection process. Note: Each chapter’s Outstanding Student Member Award recipient will be included in the chapter’s annual report.

Completed forms for the Outstanding Student Chapter and Outstanding Student Chapter Member awards must be submitted by June 30. Please address any questions about the Annual Report of Student Chapter Activities or ACCP student chapter awards to membership@accp.com.

Member Recruiters
Many thanks to the following individuals for recruiting colleagues to join them as ACCP members:

Mispa Ajua-Alemanji
Jena Allred
Scott Arrighi
Joshua Caballero
Andrea Chbeir
Shawn Dalton
Casey Dempsey
Alicia Forinash
Ian Hatlee
Mojdeh Heavner
Baotran Huynh
Audrey Kostrzewa
Amanda Morrill
Lucas Okumura
Roger Orr
Genene Salman
Glecille Salonga
Nicole Sifontis
Nicole Villanueva
Christopher Vu
