EXPERTS IN TRAINING

DECEMBER 2017

NEWS FOR RESIDENT, FELLOW, & GRADUATE STUDENT MEMBERS OF ACCP

MEMBERSHIP HIGHLIGHT

ACCP Updates in Therapeutics®

Updates in Therapeutics® 2018 offers four Preparatory Review and Recertification Courses designed for pharmacy professionals preparing for Specialty Certification Examinations administered by the Board of Pharmacy Specialties (BPS); three ACCP Academy professional development certificate programs designed for pharmacy professionals wishing to enhance their leadership, research, and teaching skills; two scientific poster sessions; and ACCP's NEW Patient-Centered Team-Based Practice Forum designed for pharmacy professionals wanting to learn more about clinical pharmacy practice advancement.

New Member Discount

Through December 31st, first-time resident and fellow members can join ACCP for half price, just $40!

"You've Got a Friend in Me"

An avid Disney/Pixar lover, I often look to their magical movies to provide me with inspiration and motivation. *Toy Story*'s "You've Got a Friend in Me" hits close to home when it comes to pharmacy mentors and guidance throughout this residency journey. Years ago, I would have thought that an individual could have only one mentor. However, during the residency year, as you engage in a variety of new experiences, it is completely appropriate to have 1, 2, 5, or "101" mentors. Mentors can serve a variety of roles, or a variety of mentors can help you fulfill different roles. Such types include the following:

A CLOSER LOOK AT THE PULMONARY PRN

The Pulmonary PRN was founded in 2017 as ACCP's 26th Practice and Research Network. Its mission is to improve the health of patients affected by pulmonary diseases by fostering practice innovation, supporting outcomes and translational research, and providing high-quality education to patients and practitioners. More than 100 current ACCP members supported the PRN's formation, with interest areas including classic restrictive (asthma) and obstructive (COPD) lung disorders, interstitial lung diseases (ILDs), autoimmune lung diseases, suppurative lung diseases such as cystic fibrosis (CF) and obliterative bronchiolitis, pulmonary alveolar proteinosis, acute lung injury (ALI) and acute respiratory distress syndrome (ARDS), pulmonary arterial hypertension (PAH), See more
